## Acknowledgements

Many thanks to my friends who played draft versions of this work and provided comments and encouragement: Chris Hammel, Matt Mealey, Bob Baca, Brandon Moodie and Karl Sievers. Gerald Sloan's insightful suggestions are especially appreciated.

David William Marvel's knowledge of music theory assisted greatly with proofreading the final draft, responsibility for any errors is, of course, the author's alone.

Christi Wans created the perfect cover.

Jacob Larson's influence is gratefully felt each time I play or think about the trumpet.

## Introduction

First published circa 1859 Jean-Baptiste Arban's *Grande méthode complète pour cornet à pistons et de saxhorn* is an integral part of the practice routines of trumpeters around the globe. The First Studies, which stress an even tone and attack in the middle register are among the most frequently assigned exercises in our studies. This book expands on Arban's work by presenting these exercises in tonal patterns that we frequently encounter in music of the twentieth and twenty-first centuries.

Although the initial inspiration for this project was second-hand accounts that several of William Adam's well-known students practice Arban's exercises in various modalities, I make no claim that these variations are the exercises they do. These are simply my own application of the same concept.

Courtesy accidentals have been deliberately omitted. While they may help with the initial reading of an exercise, in my own practice I came to realize that there are more benefits in learning to truly hear the pattern rather than relying on courtesy accidentals to remind me which valve to push.

At first glance this may seem to be an overwhelming amount of material. Please remember that there are only two whole-tone and three diminished scales. Once their sound is learned it is simply a matter of applying the new sound to the familiar exercise. It is advisable to play the original version of an exercise as well as the alteration to serve as a reference point for tone quality, articulation, and fluency.

## A Final Challenge – Twelve Tone Rows

By using all pitches of the chromatic scale before any pitch is repeated twelve-tone or serial music avoids creating a stable tonal center as we have grown accustomed to hearing when we play. Looking more closely at a row we frequently see groups of three or four notes in a now familiar pattern. As an example, consider the Alban Berg Violin Concerto.

Notes one through three form a minor triad. Notes three to six are a dominant seventh chord. Pitches six to eight are an augmented triad and seven to nine are a major triad. Finally, nine through 12 make a whole tone scale. Before playing for the first time it is advisable to spend a few moments scanning the exercise for these familiar patterns.

As a final challenge four exercises based on the tone rows of celebrated compositions are included. Each has been transposed to begin on F and consists of the original order ( $P_0$ ) the retrograde inversion (upside-down and backwards,  $R_1$ ) and the retrograde (backwards,  $R_0$ ). In this way each exercise is able to return to the starting pitch while obeying the rules of serial composition.
