Office of Institutional Research

Warning to Data Users

[Broncho Analytics](#) provides data users with the most current institutional data available from the Office of Institutional Research. These data reflect our efforts to correct for a number of data quality issues in the student information system & provide comparable time-series data. As we have transitioned to reporting from a data warehouse, our methods have evolved. Unfortunately, this might mean a report from many years ago is no longer comparable with data reported currently on Broncho Analytics. For example, past reports on student majors were based on the student's "primary major" whereas current major reports are not limited in this way.

Data users are encouraged to consult the Office of Institutional Research when comparing data from past editions of the Factbook and Demobook to current reports on [Broncho Analytics](#).

INTRODUCTION

This document is intended to serve managers in their decision making processes. There has been an effort to use data that is consistent from one semester to the same semester the next year. Where possible, trend information is provided.

FTE numbers may vary slightly because of automatic rounding by the computer. Student credit hours are sorted two ways: by student classification (for FTE calculations) or by course level (for production by department). The data sections for each college do not include students with undeclared majors or with invalid major codes.

This demographic book will vary from earlier ones due to the conversion to the Banner system:

- With the Summer 2003 enrollments, the Graduate and Post-Baccalaureate classifications have been separated. Prior to this, the two classifications had been combined for comparison purposes.
- The increase in undeclared students results in fewer majors within each college. Students are not associated with a college until they declare a major. Therefore, a few pages have been added to show the statistics for these students.
- There are a few reports in the University section relating to student residency that were not included for this term. Collection of the information necessary for the reports began in November 2002 for new students. Therefore, it will take several years before meaningful analysis can occur. In the meantime, a report of in-state, out-of-state, and international residency has been substituted. The report that details the countries of the international students has been added back to the demographics book.
- A new page has been added to track students on campus during the day. Students enrolled in institutes, independent studies, etc., were not included. Students may be counted in more than one category or college.
- A new page has been added with the number of sections for undergraduate and graduate levels. Also included is student enrollment by part of term and class type.

The College of Arts, Media, and Design, initiated in January 2001, began enrolling students in the Fall 2001 semester. The creation of CAMD, and the resulting reorganization of the College of Education and the College of Liberal Arts, causes a shift in the distribution of students between these colleges.

Due to the block scheduling, which allows some classes to have a later enrollment period, the summer semester is the least consistent of the three semesters in terms of preliminary enrollment numbers. The data in this book is accurate as of January 18, 2005. End of semester figures (which vary slightly from these) are transmitted to the Oklahoma State Regents for Higher Education for Unitized Data Reporting and for input into the Integrated Postsecondary Education Data System (IPEDS). This serves as a major database for higher education statistics.
