Title: Marketing Alumni Survey and Analysis
Pages in Study: 80
Candidate for the Degree of Master of Business Administration

Scope and Method: The purpose of this study was to survey Oklahoma State University marketing alumni for their opinions on the marketing curriculum and determine the skills and courses that would better prepare marketing graduates for business. The data for this study was collected by distributing a questionnaire to OSU marketing alumni. The data were analyzed using Edu-Stat statistical program.

Findings and Conclusions: Marketing graduates who feel prepared with their marketing degree and satisfied with OSU are more likely to recommend marketing and OSU to future students and financially support the Marketing Department and the College of Business. Most alumni are satisfied with their marketing degree from OSU, but feel improvements could be made in the current curriculum to prepare students more thoroughly for the business world.

## EXECUTIVE SUMMARY

A sample of 2,458 marketing graduates from OSU were surveyed to determine the attitudes and opinions of marketing alumni in the business world. The goal of the research was to assess how their marketing education prepared them for their careers and gain insight into the areas where the marketing curriculum could be enhanced. Seven hundred and two (28.56\%) marketing alumni responded to the questionnaire.

Forty-eight percent of the respondents felt they were very well to well prepared for the business world with their marketing degree. Eighty-eight percent were extremely satisfied to satisfied with their degrees from OSU. The most beneficial required marketing courses were Marketing 3323, Consumer and Market Behavior, and Marketing 4683, Managerial Strategies in Marketing. Marketing 4223, Business Logistics and Channel Management was the least beneficial required course. Popular elective courses included Marketing 3613, Retailing Management, and Marketing 4113, Decision Analysis and MIS. Least beneficial elective marketing courses were Marketing 4443, Social Issues in the Marketing Environment and Marketing 4553, International Marketing.

Sales was the most recommended marketing course needed in the marketing curriculum (12.82\%). Dale Carnegie type sales courses were highly recommended several times. Personal skills needed included; computer knowledge (30.06\%), negotiation (10.97\%) and presentation skills (9.12\%). "Pursue different or advanced degrees" was the frequent reply (20.51\%) to what an alumni would do differently.

Of those who would not recommend a marketing degree to a potential college student (33.76\%), most felt it was too broad. Fifteen percent said jobs could not be found in the marketing area (especially in Oklahoma). Ninety-three of the marketing alumni respondents would recommend OSU to a potential college student.

Forty-four percent of the respondents work with an average of six other OSU graduates. Seventy-five percent of the marketing alumni respondents do not support the College of Business. Only $3 \%$ support the Marketing Department. "Have never been asked" and "financial interest lies in other areas" were frequent responses to not supporting the Marketing Department. Almost 50\% of the marketing alumni respondents support other OSU programs.

Interest in a marketing newsletter received a 65\% favorable response. Content criteria included; making it free, containing useful marketing information and career
information. The oldest marketing alumni respondent was from the Class of 1923. The average graduation year of all respondents was 1976.

Approximately $15 \%$ of the marketing graduates received advanced degrees. Fifty percent of those received a Master of Business Administration. The majority of advanced degrees were received in Oklahoma (67.52\%) and OSU graduated $34.19 \%$ of those candidates.

Marketing alumni work for approximately 460 different companies. Approximately $43 \%$ of the respondents were not currently active in a marketing position. Almost $32 \%$ of those responded they were never active in a marketing position. One hundred and fifteen respondents had no employer. Over 500 different occupational titles existed for 702 respondents. Titles ranged from Chairman/CEO to secretary and from Pastor to golf pro. Government and nonprofit services accounted for $20.10 \%$ of the types of businesses. Other categories included: Financial Services (15.28\%), Manufacturing (14.29\%), Professional Services (11.96\%) and Petroleum/Energy (10.80\%). Four is the average number of years on the first job and three on the second job for marketing alumni respondents.

A number of cross tabulations and correlations were performed with the data. Results of these tests showed the importance of graduating students who are prepared by their marketing degree for the business world and satisfied with their degree from OSU. A number of recommendations were made to enhance the marketing curriculum based on the results of the survey responses and data analysis:

1. Require additional sales, computer and communication (speech and English) courses for all marketing students. A technical writing and presentation course should be offered.
2. Offer a Small Business Management course as a Marketing elective. The course should include all aspects of operating a business. Case studies, role playing and guest speakers should all be a part of the curriculum.
3. Present a "Marketing - Marketing" session in the Principles of Marketing class. This would include a presentation of career opportunities in marketing.
4. Incorporate case studies and role playing into every marketing course. These provide important learning experiences for students.
5. Encourage marketing students to pursue accounting and finance electives. Apparently, these areas cannot be avoided in the business world.
6. Greatly expand internship and cooperative programs. These provide students with practical learning experience that can be applied while in college.
7. Pursue the possibility of implementing a career searching/counseling service center in the College of Business or Marketing Department. Provide students with career counseling, resume' writing suggestions, interviewing techniques, etc.
8. Develop a Marketing newsletter to maintain contact and establish relationships with alumni.
9. Invite guest lecturers to marketing classes to share business experiences with students.
10. Actively pursue private fundraising opportunities from alumni, corporations, and foundations. This will directly enhance the marketing department and its graduates.

The goal of these recommendations is to provide a marketing curriculum that will offer a student theoretical and practical learning experiences. It is essential that marketing graduates be well prepared for the business world to ensure satisfaction with their degree and OSU. Future recommendations and private support are dependent upon this satisfaction.

To maintain a competitive academic program, the OSU Marketing Department must monitor their curriculum, provide outstanding faculty and researchers, and graduate excellent marketing students. There are many measures of an academic program's success; renowned faculty who excel not only as instructors but also as researchers and authors, graduates sought by top business and industry and increasing enrollment of students into a program. Aspects, like these, are used to constantly evaluate OSU's Marketing Department. Research on the Marketing Department's curriculum success after a student has graduated from OSU and been employed in the business world, however, has not been conducted. The goal of this research was to determine the attitudes and opinions of marketing alumni employed in the business world.

Research was conducted to determine alumni opinions on the current marketing curriculum. Additional courses and skills were requested in order to compare current offerings with real world needs. Discovering attitudes about the marketing degree, Oklahoma State University, and private support, was also important in evaluating alumni. Additional personal data on marketing alumni reveals where OSU's alumni are, what type of business they work for and how successful
they are. This type of information may attract top business recruiters to Oklahoma State which again would be used as a measure of a successful marketing program.

There were several reasons for surveying marketing alumni: 1) Contact the alumni and ask for opinions; 2) Evaluate the current curriculum; 3) Identify needs and opportunities for new graduates; and 4) Develop listing of careers and employers for students and business recruiters. The results of the survey revealed most alumni are satisfied with their degree from OSU, but feel improvements could be made in the current curriculum to prepare students more thoroughly for the "real business world." In the following, results are discussed and recommendations are made that incorporate this suggestion as well as others that the survey identified.

## RESEARCH METHODOLOGY

Exploratory research was conducted using a survey sent to all Oklahoma State University graduates with a marketing degree and known addresses. The sample frame attempted to include the entire population of marketing graduates. Bad addresses or lost alumni records, however, prevented a total population survey. A total of 2,458 surveys were sent to obtain primary data for research analysis.

Edu-Stat, a statistical software package, was used to analyze the response data. A variable name and label was given to identify each value (refer to appendix A). Edu-Stat accumulated frequency and percentile results for each question. Means, minimum and maximum responses were calculated for specified variables. Cross tabulations calculated combined frequencies for two variables, for example, "support the College of Business" by "support the Marketing Department." The association of one variable with another was identified through correlation analysis. EduStat has the ability to transform data sets enabling the analysis to more accurately portray the response data. Defining non-responses ( 0 ) as a missing value (.) is one example of data transformations that were performed for statistical analysis.

The Questionnaire

To encourage increased response, two cover letters were included with the questionnaire. A copy of the survey and questionnaire is included as appendix B. A letter from the Interim Head of the Marketing Department, Dr. Raymond Fisk, explained the survey as a research project for a graduate student trying to complete her degree. This letter was on
$5 \times 8.5$ inch College of Business Administration stationery. The smaller size was intentionally used to attract attention. Behind the small letter, a full-sized letter (8.5 x 11 inch), from the graduate student, outlined the objective of the survey and emphasized how responses would affect marketing students and their career opportunities. The survey also included a postage paid envelope so respondents could easily return the survey.

The purpose of the questionnaire was to determine how marketing alumni felt their degree prepared them for their careers and what attributes new graduates needed to succeed. The questionnaire contained 22 multiple choice, ranking, yes/no, and open-ended questions (refer to appendix B). Questions 1, 2, 7a, and 8 are multiple choice that ask the respondent their opinion on how the marketing degree prepared them, whether they were satisfied with their degree from OSU, and would they recommend a marketing degree or degree from OSU. Question 3 asked the respondent to rank each course offered on how the current curriculum benefited them on a scale from one to six (one $=$ very beneficial to six $=$ not taken.) Open-ended questions 4 and 5 asked alumni what additional marketing courses and personal skills should be included in the marketing curriculum. What the alumnus would do differently now was open-ended question 6. Question 7 b ,
referring to $7 a$, asked why an alumnus would not recommend a marketing degree to a new college student. Open-ended questions were used to obtain detailed, honest answers from respondents so the current curriculum could be evaluated effectively.

Questions concerning private support to the College of Business, Marketing Department, and other OSU programs were asked in 10,11 , and 12 . As private support becomes increasingly more important for public institutions, it was important to research alumni giving patterns. Interest in a Marketing Department newsletter and year of graduation was asked in questions 13 and 14, respectively. Questions 15, 16, 17, 18a, and 18b pursued information on advanced degrees. Background data concerning occupational and employer information was needed to assess alumni in question 10 and 19 through 22. This type of information is essential for attracting recruiters, preparing graduates, and obtaining private support from individuals, corporations, and foundations.

RESULTS

Each question was numerically coded for analysis. The numerical coding reflected the type of question and the response (refer to Appendix B). A zero was recorded for
those questions not answered. Open-ended questions were coded after classifying a sample of the responses. Coding reflected the response classification scheme developed for each open-ended question (refer to appendices $E, F$, and I). A value of "9" was assigned to any "other" response not categorized in open-ended questions.

Seven hundred and two responses were analyzed utilizing Edu-Stat statistical program. This reflected a $28.56 \%$ response rate from the 2,458 surveys sent to the marketing alumni sample. Approximately 35 (1.4\%) of the surveys mailed were returned with unknown addresses. A complete listing of frequency analysis results is included in appendix $C$.

The responses from questions 1 and 2 revealed important information for the Marketing Department. Forty-two percent of the respondents felt they were well prepared by the marketing degree for the business world. "Moderately" to "not at all" prepared by the marketing degree answers accounted for $52.23 \%$ of the responses. Eighty-eight percent were extremely satisfied-to-satisfied with their degrees from OSU.

## Marketing Degree Prepare

| Frequency | Percent |
| :---: | :---: |
| 38 | $5.45 \%$ |
| 295 | 42.32 |
| 342 | 49.07 |
| 22 | 3.16 |

Satisfied with Degree from OSU

|  | Frequency | Percent |
| :---: | :---: | :---: |
| Very Satisfied: | 185 | $26.35 \%$ |
| Satisfied: | 435 | 61.97 |
| ghtly Satisfied: | 77 | 10.97 |
| S all Satisfied: | 5 | .71 |

The average of responses was figured to determine the overall rating of each marketing course (refer to appendix D). The required courses that were most beneficial to alumni included Marketing 3323, Consumer and Market Behavior, and Marketing 4683, Managerial Strategies in Marketing. The least beneficial required course was Marketing 4223, Business Logistics and Channel Management. Marketing 3613, Retailing Management, and Marketing 4113, Decision Analysis and Marketing Information Systems were the most beneficial elective courses while Marketing 4443, Social Issues in the Marketing Environment, and Marketing 4553, International Marketing, were the least beneficial for respondent's careers. It is important to note the difference between the number of responses for electives taken (200 or less) versus the number of responses for required courses taken (476 plus) (refer to appendix D). More alumni rated the required courses resulting in a more accurate overall required course evaluation.

Non-marketing courses such as accounting, finance, computer, small business management, personnel management,
etc., accounted for $28.92 \%$ of the responses to question 4 (refer to appendix E, Table 1). Since this question specifically requested recommendations for marketing courses, any courses not related to marketing were categorized together. Sales ( $12.82 \%$ of the responses) was the most recommended marketing course needed in the marketing curriculum.

Of the personal skills needed for the marketing curriculum, $30.06 \%$ of the respondents replied with computer knowledge (refer to appendix E, Table 2). These answers varied from personal computer literacy to focusing on spread sheet management and LOTUS 1-2-3. Approximately $11 \%$ of the responses preferred negotiation as a needed personal skill. Due to the leading nature of this question, however, these two answers may have been biased responses (see question 5 in appendix B). Presentation skills, an answer not suggested, accounted for $9.12 \%$ of the responses.

When questioned what an alumnus would do differently if attending OSU again, $20.51 \%$ replied they would pursue a different degree or get an advanced degree (refer to appendix F, Table 1). Many of these answers specified a more technical degree such as accounting, finance or engineering. "Do nothing" as well as any "other" response was coded as a
"9" for this question. Approximately 15\% of the replies were in this category.

Sixty five percent said "yes" to "definitely yes" they would recommend a marketing degree to a new college student. Of those who would not recommend marketing, $25.27 \%$ felt the degree was too broad (refer to appendix $F$, Table 2). Most felt a more specific field of study was needed in the business world. Almost $15 \%$ said jobs could not be found in the marketing area. "No research jobs" and "No marketing jobs in Oklahoma," were typical examples of this response. (Only those who responded negatively to question 7 a were asked to justify their response. Five hundred and twenty did not reply.) The majority of alumni (93.31\%) would recommend OSU to a potential college student.

## Recommend a Marketing Degree

|  | Frequency | Percent |
| ---: | :---: | :---: |
| Definitely Yes: | 187 | $26.64 \%$ |
| Yes: | 269 | 38.32 |
| Maybe: | 154 | 21.94 |
| Probably Not: | 74 | 10.54 |
| Never: | 9 | 1.28 |

Recommend OSU to Potential College Students

|  | Frequency | Percent |
| ---: | :---: | :---: |
| Definitely Yes: | 440 | $62.68 \%$ |
| Yes: | 215 | 30.63 |
| Maybe: | 36 | 5.13 |
| Probably Not: | 5 | .71 |
| Never: | 4 | .57 |

Only 43.79\% of the respondents work with other OSU graduates. Two hundred and seventy two people work with an average of six fellow alumni (refer to MANY in appendix G). Six people work with 70 or more alumni (three of these work for OSU). Averages for this question were computed by eliminating non-responses.

Work with Other OSU Graduates

|  | Frequency | Percent |
| :---: | :---: | :---: |
| Yes: | 307 | $43.79 \%$ |
| No: | 387 | 55.21 |

Questioning marketing alumni on financial contributions to their alma mater provided interesting results. Only 25\% support the College of Business (refer to appendix C). Marketing Department support drops to $3 \%$ and approximately $50 \%$ support other OSU programs. The significance of these numbers is their counterpart. These figures show the intense need for the Marketing Department and the College of Business to educate their students and alumni on the need for private gifts to enhance academic quality. If 50\% are supporting other OSU programs, there should be at least 50\% directly supporting the College of Business.

Three reasons occupied the majority of responses for not supporting the Marketing Department. "Have never been asked"
accounted for 30.91\%. "Financial interest lies in other areas" and "cannot afford to at present" represented 27.35\% and $23.50 \%$ of the answers respectively. Many alumni chose more than one option on this question, but only the first response was recorded. Although these answers were predetermined, it does prove that a large number of alumni may be willing to support the Marketing Department if asked. It also presents the possibility that if alumni were well enough informed of financial needs, those who presently cannot and whose financial interest lies in other areas, may support the Marketing Department in the future.

| Support the College of Business |  |  |
| :---: | :---: | :---: |
|  |  |  |
|  | Frequency | Percent |
| Yes: | 173 | $24.68 \%$ |

| Not Interested | 44 | 6.27 |
| Financial interest lies in |  |  |
| $\quad$ Other areas | 192 | 27.35 |
| Other | 57 | 8.12 |

## Support Other OSU Programs

|  | Frequency | Percent |
| :---: | :---: | :---: |
| Yes: | 345 | $49.15 \%$ |
| No: | 350 | 49.86 |

Positive interest was shown in the idea of a Marketing Department newsletter. Approximately $63 \%$ responded favorably. Conditions of a newsletter included; making it free, if it contained new and useful marketing information, research findings, and career information. If the newsletter is pursued, a questionnaire should be included in the first issue requesting topics to be covered in future newsletters.

## Interest in a Marketing Newsletter

The Class of 1923 was represented by one marketing alumni, making him the oldest respondent. Forty-nine responded from the Class of 1988. Appendix $H$ shows the average graduation year of all responses as 1976 and the number of respondents by decade.

Fifty percent of those who obtained advanced degrees received a Masters in Business Administration. Only 14.53\% (102 respondents), however, pursued advanced degrees. Twenty respondents are currently working toward an advanced degree.
"Other" advanced degrees pursued included (among others) Juris Doctorate, Master of Science in Education, Master of Public Administration, Master of Logistics Management, Human Resource Administration, Master of Occupational Therapy and Master of Arts in Latin American Studies.

Schools in Oklahoma comprised $67.52 \%$ of the higher education institutions for advanced degrees. Oklahoma State University had the highest frequency of advanced degree graduates (34.19\%). Other Oklahoma schools, listed in decreasing order of attendance, included University of Oklahoma (12.82\%), Tulsa University (8.55\%), Oklahoma City University (6.84\%), and Central State University (4.27\%). Advanced degrees benefited alumni careers most by increasing opportunities for those who received them (refer to appendix I).

| Was an Advanced Degree | Obtained |  |  |
| ---: | :---: | :---: | :---: |

Approximately $43 \%$ of the respondents are no longer active in a marketing position. The average of the last year active is 1981 (refer to YEAR in appendix G). Eleven percent were last active in 1988 and $31.76 \%$ responded they were never actively involved in a marketing position (coded as an "8" in appendix C). This result may reflect the findings of question 7b, which stated finding jobs in marketing was difficult.

Active in a Marketing Position

One hundred and fifteen respondents had no employer. Of those, $42.61 \%$ were retired. Only 9.57\% (11 people) were actually unemployed. Another interesting result, almost $22 \%$ of those with no employer were homemakers. Raising a family is still an important career for many individuals with a college degree.

## No Employer Status

|  | Frequency | Percent |
| ---: | :---: | :---: |
| Retired: | 49 | 42.618 |
| Unemployed: | 11 | 9.57 |
| Homemaker: | 25 | 21.74 |
| Other: | 28 | 24.35 |

Occupational titles varied widely among alumni. Over 500 different titles existed for 702 respondents. Occupational titles ranged from Chairman/CEO to secretary and from Pastor to golf pro. Every area and almost every field was covered by marketing alumni respondents. The idea that a marketing degree is broad, is definitely proven by the responses on this question. It represents, however, that a marketing graduate can become whatever he/she wants to with
this degree. Appendix J categorized occupational titles shared by five or more marketing alumni respondents.

Business or industry type was coded according to the SERVMARK services field categorization (refer to appendix K). Petroleum/energy, agriculture, and manufacturing categories were added to complete the list of possible businesses employing marketing alumni. Government and Non-Profit service businesses comprised $20.10 \%$ of the total. Financial Services (15.28\%), Manufacturing (14.29\%), Professional Services (11.96\%) and Petroleum/energy (10.80\%) accounted for over $50 \%$ of the types of businesses employing marketing alumni respondents (appendix K ).

The last question of the survey attempted to determine what jobs new graduates entered and where they were currently. The idea was to create a typical career path for a marketing graduate. The tremendous response, detailed explanations and limited analysis ability prevented the construction of this career path. It would be possible, from the information obtained, to outline general career patterns of marketing alumni. An entire semester and research paper could be devoted to this effort.

Relevant information concerning job turn-over was obtained from the data. The frequency of job turn-over among new graduates is a question that many researchers explore.

The information from this survey revealed that four years is the average number of years spent on the first job and three years on the second (refer to YRS1 and YRS2 in appendix G). The maximum number of years spent with the first and second job was a rather amazing 55 and 56, respectively.

A number of cross tabulations were performed so relationships between variables could be compared. "Support of the College of Business" and "support of the Marketing Department" had a statistically significant relationship with a Chi Square of $p=.01$ (refer to appendix L). This test concluded that $90.5 \%$ of those who support the Marketing Department support the College of Business. But, there was only 19 respondents who support both. Five hundred and twenty-two respondents do not'support either.

Appendix $M$ is a cross tabulation of "support the College of Business" by "how the marketing degree prepared alumni." The responses in PREPARED were combined to form three categories; very well prepared, well prepared, and moderately-to-not at all prepared. The results from this test presented a statistically significant relationship ( $\mathrm{p}=.01$ ). The analysis revealed that those respondents who felt they were very well prepared-to-well prepared were more likely to support the College of Business than those who were moderately-to-not at all prepared.

Respondents who were "extremely satisfied" with their degree from OSU were more likely to support the College of Business (refer to appendix N). The alumni who were "satisfied" (22.22\%) were slightly below the overall percentage of those supporting the College of Business (24.82\%). As mentioned earlier, overall, $75 \%$ of marketing alumni respondents do not support the College of Business. Only $67 \%$ of the "extremely satisfied" do not support the College of Business compared with $75 \%$ of all other marketing respondents. (This test was conducted after combining slightly satisfied and not at all satisfied into one category and resulted in a Chi-Square significance of $\mathrm{p}=.01$ ).

Respondents who were extremely satisfied with their degrees from OSU and those who support other OSU programs exhibited a positive relationship with a Chi-Square significance of $p=.01$ (refer to appendix O). Again, "satisfied" respondents showed a slightly lower "support" percentage than the overall percentage of supporting other OSU programs. Testing "satisfaction" by "interest in a Marketing newsletter" ( $\mathrm{p}=.01$ ) gave predictable results. Fifty-two percent of the marketing alumni respondents who were slightly-to-not at all satisfied with their degree from OSU were not interested in receiving a Marketing newsletter
(refer to appendix P). Overall, $35 \%$ of the marketing alumni respondents were not interested in a marketing newsletter. Sixty-three percent of the marketing alumni respondents who felt they were well prepared by the marketing degree are still actively employed in marketing (refer to appendix Q). The $48.48 \%$ who were moderately-to-not at all prepared are no longer active in a marketing position. (This test had a ChiSquare significance of $\mathrm{p}=.02$.)

Additional statistically significant tests occurred between "active in a marketing position" and "satisfied with degree" ( $p=.03$ ) and "active in a marketing position" and "recommend a Marketing degree" ( $\mathrm{p}=.01$ ) (refer to appendices R and S , respectively). Appendix R establishes that $42 \%$ of the respondents moderately-to-not at all satisfied with their degree from OSU are still active in a marketing position. Appendix $S$ reveals that those most likely to recommend a marketing degree are still active in a marketing position. Approximately $60.85 \%$ of the marketing alumni respondents who would not recommend a marketing degree are not active in a marketing position.

Correlations were performed between the variables; PREPARE, SATISFY, RECOM, and OSU (refer to appendix $T$ ). Significant correlations were found between all variables tested ( $p=.01$ ). The highest correlation ( $x=.5$ ) occurred
between PREPARE and SATISFY suggesting that a person who feels very prepared with their marketing degree tends to be more satisfied with their degree from OSU. A high correlation (.38) between PREPARE and RECOM and between PREPARE and OSU (.198) shows that those marketing alumni respondents who feel prepared with their marketing degree tend to recommend a marketing degree and/or OSU to potential students.

A correlation coefficient of .40 existed between SATISFY and RECOM (refer to appendix $T$ ). This means if marketing alumni respondents are satisfied with their degree from OSU, they are more likely to recommend a marketing degree to potential college students. Correlation testing also revealed that satisfied respondents were more likely to recommend OSU (r=.30). The last correlation suggested that the marketing alumni respondents who recommend a marketing degree to potential students, also recommend OSU ( $r=.18$ ).

The correlation and cross tabulation results show the importance of graduating students who feel prepared with their marketing degrees and satisfied with OSU. Statistically significant relationships occurred between these and other variables in a number of tests. It seems that providing an outstanding marketing curriculum that prepares students for the business world will result in a
student that is satisfied with his/her degree from OSU, will recommend a marketing degree and OSU to potential students, and will be more apt to financially support the Marketing Department and the College of Business.

## RECOMMENDATIONS

The Marketing Department currently has the resources needed to implement many of the recommendations made by the marketing alumni respondents. Many of the suggestions and ideas discovered by the survey dealt with coordinating the marketing curriculum with the "real business world." Theoretical learning was seen as important, but it must be applied through case studies and practical experience.

Recommended courses for the marketing curriculum include additional sales, computer, communication and small business management. Although sales accounted for only $12.82 \%$ of the responses in recommended marketing courses, it was referred to often throughout the responses. Good sales skills are essential in any career and in obtaining almost any job. A "Dale Carnegie Sales Course" was referred to by numerous respondents and received excellent recommendations by all. It is recommended that a course in sales be included in every marketing student's curriculum and that the instructor attend
a Dale Carnegie sales class for reference in their sales presentation material.

Additional computer courses are also recommended. The subject material should focus on software packages and usage for business rather than programming. With the limited equipment that is available at OSU and the number of students utilizing it, it is difficult to encourage extra computer time. It is necessary, therefore, to focus on course content during computer classes. Financial packages, spreadsheet analysis and LOTUS 1-2-3 are suggested topics. Complete computer knowledge, including personal computers, word processing packages, and software and hardware for business applications should be covered.

Excellent communication skills, both written and verbal, are essential in the business world. These skills are not stressed enough in the current curriculum. Additional speech and English courses should be required in the marketing curriculum. A required upper division course in technical writing and presentation skills would be instrumental in a marketing student's career.

Another suggestion which is highly recommended for the marketing curriculum is a course on Small Business Management. Having 46 self-employed respondents and numerous CEO's and managers, as well as several comments on the
subject matter, qualifies this for an appropriate marketing subject. It is recommended that this course be offered as an elective and include all aspects of starting and running a business. Cost analysis on taxes, insurance, rent, utilities, and employee wages and benefits should be involved. Utilize actual case studies and role playing throughout the class. The course should interrelate marketing with all aspects of running a business and tie together marketing and business concepts. Guest lecturers, providing experience and insight, would also make this an extremely useful and successful marketing course.
"Marketing - Marketing" is a suggested topic to be included in the courses offered in the current curriculum. This topic should cover what types of jobs are available for a marketing graduate, what a marketing degree prepares a student for, and marketing at entry level jobs. Many marketing alumni respondents referred to the fact they were prepared, educationally, for high management and supervisory positions, only to be hired in as sales representatives, etc. They felt mislead and often said they had forgotten management theory by the time they reached those positions. Several respondents noted that they were not certain what to do with their degree after graduation. It is recommended that these topics be included in the Principles of Marketing

Course. It is this course where a student is learning marketing concepts, practical applications should also be included. This would allow a student to make an early decision about career opportunities in marketing.

Marketing students should be encouraged to take all of the accounting and finance courses possible. Many of the marketing alumni respondents said they would have taken more of these courses and would have paid better attention in the ones they did take. It appears that marketing graduates cannot avoid these areas in the business world and, therefore, need these courses.

Case studies and role playing also seem to play an important role in adjusting to the business world. All marketing courses should utilize more of these instructional methods. It gives students an opportunity to view business situations, analyze problems, make recommendations, and evaluate solutions. This experience is vital for students and should be implemented more frequently.

A variety of new programs are recommended for the Marketing Department. First, cooperative and internship programs should be actively pursued and implemented. These programs provide students with practical experience and develop excellent business relationships between participating businesses and the Marketing Department. This
is an "all win" situation that could greatly enhance the Marketing Department's curriculum. Internship programs currently exist, but should be expanded. Co-op programs should be developed for those students wanting more work experience (and needing additional money). Brighter students, experienced employees, and better relationships between students, businesses and the Marketing Department are just a few of the rewards of such a program. These types of programs are feasible for the Marketing Department. After all, it is marketing alumni and business graduates who are potential business participants.

A concept similar to internships and co-ops is career searching. The University Placement Office provides students with a list of recruiters and some career counseling, but a need may exist for the College of Business or Marketing Department to offer their students guidance in career searching, resume' preparation, interview techniques, etc. Many marketing alumni respondents mentioned that career counseling and searching services would have enhanced their educational experiences at OSU. A thorough feasibility study investigating this concept would be required before implementing this venture.

Three additional programs are suggested; a Marketing newsletter, guest lecturers, and active fundraising. As
mentioned previously, interest exists for a Marketing newsletter. Keeping in contact with alumni is extremely important, especially for fundraising. A Marketing newsletter containing a survey for suggested future topics should be sent to alumni. If survey response is low, then actual interest in the newsletter may be less than the effort involved in publishing one. Staying in contact with alumni through publications, however, is essential in maintaining relationships.

The Marketing Club provides frequent guest lecturers for Marketing Club students. This is also an excellent way of preparing students for marketing careers and maintaining relationships with alumni. It is also a program that could be expanded. Several marketing alumni respondents commented on the value of having guest lecturers in class. Students learn from the actual experiences of others. Again, the opportunity exists to utilize marketing (and business) alumni as guest lecturers. Most would be thrilled at the opportunity to talk to a class about their successes. It also enhances the relationship between the alumni and the Marketing Department.

The last recommendation to help improve the Marketing Department curriculum will affect it directly through indirect measures. Increasing private dollars given to the

Marketing Department will allow the department to bring in guest lecturers, send faculty to Dale Carnegie courses (and many others), implement career counseling centers, etc. It is no longer feasible (or practical) to depend on state support or adequate budgets. Private giving is one answer to funding problems. The need for private giving must be stressed early to students and it must be reinforced frequently during college and after graduation. Many of the recommendations stated above can be used to maintain relationships and cultivate prospects (individuals, corporations, and foundations). It is necessary to publicize the educational needs, reinforce them, and proactively plan to solve them. It is time for the Marketing Department to start utilizing business and marketing principles to raise private dollars to enhance their departmental and personal educational goals.

## CONCLUSION

It is important for future recommendations and private support that the marketing curriculum adequately prepare a student for the business world. Satisfaction with OSU is also critical for positive referrals. It is necessary, therefore, to review the marketing curriculum and provide the
type of education that will prepare a graduate for the business world.

The current marketing curriculum could be enhanced by offering more sales and computer courses. Written and verbal communication skills, case studies and role playing should be stressed in all marketing classes. Different business courses, such as accounting and finance, should be encouraged to marketing students. The Marketing Department needs to incorporate internship and co-op programs that will enable a student to obtain practical experience while attending college.

The lack of alumni support for the Marketing Department and the College of Business must be corrected. Private dollars, which enhance the Marketing Department, will greatly affect current students who are future alumni. Educating students, publicizing departmental needs through newsletters, and maintaining and cultivating relationships are all ways to obtain private gifts.

Marketing alumni respondents varied greatly in occupations and employers. The marketing degree can prepare a student for a variety of positions and jobs. Opportunities are endless with a marketing degree. It is the responsibility of the Marketing Department to provide a student with the education to take advantage of theseopportunities. The results of the survey lead to therecommended actions that attempt to offer a practicaleducational experience as well as a theoretical one. It isthe combination of these two that will graduate marketingstudents who are very well prepared for the business world.

## APPENDIX B

## Oklahoma State University

COLLEGE OF BUSINESS ADMINISTRATION 405-744-5064, STILLWATER, OKLAHOMA 74078-0555

February 20, 1989

Dear Marketing Alumnus:

The attached survey is being done as a graduate class project by Leshia Pearson. Your response to this survey will enable Leshia to complete her M.B.A. degree and the information you provide will be very helpful to the OSU Marketing Department.

If you have any questions about this survey you may call me or my secretary, Cherrye, at (405) 744-5192.

Sincerely,

Raymond P. Fisk
Associate Professor of Marketing and
Interim Head, Department of Marketing
(405) 744-5192
$R P F / c j b$
P.S. Please return this survey no later than March 8, 1989.

## LESHIA M. PERRSON

February 20, 1989

Dear Fellow OSU Graduate:
I am a graduate student in the College of Business at Oklahoma State University. My final six hours of credit is a research project for the Marketing Department. The purpose of this research is to learn more about the attitudes and career experiences of OSU Marketing alumni.

This questionnaire is being sent to all Marketing alumni. The results of this survey will be used to evaluate and improve the OSU Marketing curriculum. It will also be used to assess opportunities for future OSU Marketing graduates. Your business information provides important information which may be useful in attracting marketing recruiters to campus or in seeking private support from corporations and foundations.

Your help is needed in order to assure as accurate and complete a study as possible. Your reply will be completely anonymous and confidential.

Please take a few minutes to complete this survey and please return it within the week in the enclosed postage-paid envelope. The students currently enrolled will be significantly affected by your views and support as they join the ranks of OSU Marketing alumni.

P.S. If you would like a summary of the results, please include a business card or your name and address.
please answer all questions as completely as possible. Where requested, please provide written responses. Feel free to attach additional pages if there is not enough room provided to answer a question. Your prompt response is greatly appreciated.

1. How well did your marketing degree prepare you for the business world?

2. How would you rate the extent to which you are satisified with your degree from OSU?
```
l Very Satisfied
    2 ~ - ~ S a t i s f i e d ~
    3 Slightly Satisfied
    4 Not At All Satisfied
```

3. How did the following courses benefit you for your career?
```
l = Very beneficial , 4 = Not at all beneficial
2 = Beneficial 5 = Not applicable to position
3 = Slightly beneficial }6=\mathrm{ Not taken
```

REQUIRED COURSES:

| 0-6 | MKTG 3323 | Consumer \& Market Behavior |
| :---: | :---: | :---: |
| 0-6 | MKTG 3433 | Promotional Strategies |
| 0-6 | MKTG 3513 | Sales Management |
| 0-6 | MKTG 4223 | Business Logistics \& Channel Management |
| 0-6 | MKTG 4333 | Marketing Research |
| 0-6 | MKTG 4683 | Managerial Strategies in Marketing |

ELECTIVE COURSES:
$0-6$
$0-6$

$0-6$ | MKTG 3613 Retailing Management |
| :--- |
| MKTG 4113Decision Analysis and <br> Marketing Information Systems |
| $0-6$ |

4. What additional marketing courses and/or topics would you recommend that students graduating from college need?
$0-5,8,9$ $\qquad$
$\qquad$
5. What particular personal skills should be a part of the marketing curriculum? (e.g. microcomputer, negotiation)
0-9 $\qquad$
$\qquad$
$\qquad$
6. What would you do differently now if pursuing a degree from OSU?

0-9 $\qquad$
$\qquad$

7a. Would you recommend a Marketing degree to a new college student? 1 Definitely yes 2
$\qquad$ Yes 3 — Maybe 4 _ Probably not. 5 _Never
b. If not, what are the reasons?
$0-7,9$ $\qquad$
$\qquad$
8. Do you recommend OSU to potential college students?
1
2

$3=$| Definitely yes |
| :--- |
| Yes |
| Maybe |
| 4 |
| 5 |$=$ Probably not

Never
9. Do you work with other OSU graduates?
How many Yes
10. Do you financially support the College of Business at Oklahoma State University through donations?

1 Yes 2 No
lla. Do you financially support the OSU Marketing Department? 1 $\qquad$ Yes

2 $\qquad$ No
b. If no, please explain:
1
$2-$ Have never been asked
$3-$ Cannot afford to at present
$4-$ Not interested
5 Financial interest lies in other areas
Other, please specify
12. Are there other programs at Oklahoma State you financially support? 1 Yes 2 No
13. Would you be interested in receiving a Marketing Department Newsletter? 1 Yes 2 No
14. What year did you graduate with a Marketing degree? $\qquad$
15. Did you obtain an advanced degree?

1 $\qquad$ Yes

2 $\qquad$ No

If no, please skip to Question 19.
If yes, please answer the following:
16. What advanced degree did you pursue?

| 1 |
| :--- |
| 2 |
| 3 |
| 4 |
| 5 |$=$ Master of Business Administration

17. Where did you receive this degree? $\qquad$
$\qquad$

18a. Has the advanced degree benefited you in your career?
$\qquad$ Yes

2 $\qquad$ No
b. How?
$0-6,9$ $\qquad$
$\qquad$
$\qquad$

19a. Are you actively involved in a marketing position now?
b. If not, when was the last year you were actively involved in a marketing position?

20a. What is the name of your employer? $\qquad$
$\qquad$
b. If no employer, are you:

1 Retired
2 — Unemployed
3 - A Homemaker
4 - Other, please explain $\qquad$

2la. What is your current occupational title? $\qquad$
$\qquad$
b. What kind of work do you do; that is, what are your main duties on the job? $\qquad$
$\qquad$
$\qquad$
$\qquad$
c. What type of business or industry is this; that is what product is made or what service is provided? $\qquad$
$0-13$ $\qquad$
$\qquad$
$\qquad$
$\qquad$

See the following page for question 22
22. Please include as much information on your career path (job, position, duties and responsibilities) as possible. This information will enable us to prepare students for future opportunities. It may also help in our planning of future marketing curriculums.

First job upon graduation from OSU:
