EXPERIMENTAL PRODUCTS EVALUATION PROGRAM: ANNUAL REPORT

BACKGROUND

Rapid implementation of new technologies and products is an important component of an efficiently managed transportation system. The Experimental Products Evaluation Program (EPEP) is an ongoing program established by The Research & Development Division to provide The Oklahoma Department of Transportation (ODOT) with a means of evaluating, monitoring, and implementing the use of new or experimental products. This report gives the status of products evaluated, pending evaluation, or under evaluation by ODOT during the last five years.

Certain restrictions apply to the use of new products on ODOT projects. If the project includes federal funds, special provisions and an evaluation work plan must be developed and approved.

CLASSIFICATION OF EVALUATION STATUS

The status of each product evaluation is classified as follows.

Pending	The evaluation has not yet begun or has been delayed.
Under Evaluation	The product is currently being evaluated.
Accepted	The evaluation is complete and the product met the evaluation criteria. This does not guarantee approval by ODOT or the FHWA for general use.
Not Accepted	The evaluation is complete and the product failed to meet the criteria under which it was evaluated.

SUMMARY OF ANNUAL PROGRESS

For the year 2002, there were 14 products under evaluation. The products under evaluation are listed in Table 1. The products evaluated by the EPEP are kept in the "current" database for a minimum of two years after completion of the evaluation. Pages 3 through 14 consist of a listing of the 48 products in the database at this time.
