whole-root Raudixin:

## safe, smooth, gradual reduction of blood pressure

Raudixin is the most-prescribed of rauwolfia preparations. It is *powdered whole root* of *Rauwolfia serpentina*—not just one alkaloid, but all of them. Most of the clinical experience with rauwolfia has been with Raudixin.

"A sense of well-being, decrease in irritability, 'improvement in personality'

and relief of headache, fatigue and dyspnea" are frequently described by patients.<sup>1</sup>

*Raudixin is base-line therapy.* In mild or moderate cases it is usually effective alone.

50 and 100 mg. tablets, bottles of 100 and 1000.

Raudixin alone and combined with other hypotensive agents

\*RAUDIXIN\*<sup>®</sup> IS A TRADEMARK

Through its three-fold action in arthritis...relief of pain, improvement of function, and resolution of inflammation...BUTAZOLIDIN contributes significantly to the rehabilitation of the arthritic patient.

In addition to its marked therapeutic effectiveness, the advantages of BUTAZOLIDIN include:

*Wide Scope of Usefulness*—effective in the most crippling and chronic arthritides.

*Persistence of Effect*—does not provoke tolerance on continued usage.

*Nonhormonal in Character*—the therapeutic action of BUTAZOLIDIN is not mediated through the pituitary-adrenocortical axis.

BUTAZOLIDIN being a potent agent, the physician should carefully select candidates for treatment and promptly adjust dosage to the minimal individual requirement. Patients should be regularly examined during treatment, and the drug discontinued should side reactions develop.

*Detailed literature on request.*

BUTAZOLIDIN® (brand of phenylbutazone): Red sugar-coated tablets of 100 mg.

## With The Editor . . .

Skinny people have a better chance of surviving a hydrogen or atomic bomb, says Tulsa's Dr. Averill Stowell . . . Speaking before the International College of Surgeons in Chicago last month, Dr. Stowell reported that experiments with animals showed the starved ones reacted better to massive x-ray doses. . . . "In the light of these revelations, a trim waist line might provide an additional margin of safety should we be subjected to an atomic attack," he says . . . And we thought we'd heard all of the reasons for reducing! . . . Tulsa has added six new general practitioners in the last 60 days . . . Dr. T. Paul Haney, Superintendent of the Tulsa City-County Health Department, is having troubles with his new public health building . . . He's got the money but no place to put the building . . . The Board of County Commissioners has postponed the selection of a site for several months, and hopes for a spot in the projected civic center in downtown Tulsa have yet to materialize . . . If the building isn't up by mid-1955 approximately \$200,000 in Hill-Burton money will be subject to recall . . . St. John's Hospital has been allocated federal funds under the Hill-Burton bill for its projected addition; it will augment the money raised by the Hospital's current public drive . . . Return your Community Chest pledge cards at once if you haven't already done so . . . Doctors have a big quota—\$14,500—and never let it be said we didn't do our part . . . The October issue of the Journal of the Oklahoma State Medical Association will pay tribute to a grand old man of Medicine, the late Dr. Lewis J. Moorman . . . Issue will reprint some of his scientific articles and better editorials, and will carry a number of tributes . . . Dr. Moorman died in Oklahoma City last August 2nd . . . The Annual Founders Day Clinic of the Tulsa County Medical Society on November 18th looks to be a big event . . . Three top speakers, six papers, and a roundtable luncheon discussion . . . No charge—just a day of your time. The date is a Thursday, so plan now!

### NATION'S MEDICAL POPULATION RISES

**United States Now Has One Doctor for Every 730 Persons. Medical School Classes Are Largest in History. Ten New Schools to Open.**

A record ratio of one doctor for every 730 persons in the United States has been reached during 1954 through the graduation of the largest class of physicians in history and the continued expansion of the nation's medical schools, a report of the American Medical Association released last month indicates.

The AMA also noted that the ratio will continue to improve in the next few years as the number of medical graduates rises in greater proportion than the general population.

The graduation of 6,861 doctors during 1953-54 brings the nation's total medical population to a record of 220,100. The AMA report also indicated that the medical school enrollment of 28,227 students is the greatest in history with a record Freshman class of 7,449.

Some other salient points in the report included:

Of freshmen entering medical schools, 68.9 per cent had "B" averages in their pre-medical training, 21.1 per cent had "A" averages, and only 10.0 per cent had "C" averages.

Only five per cent of freshmen left medical school because of academic failure during 1953-54, whereas fifteen years ago 9.5 per cent failed during the first year.

Ten new four-year medical schools are under construction and will be in operation within six years at most.

More than \$76,000,000 was spent during 1953-54 for new medical school facilities, remodeling, or completion of

buildings under construction.

The budgets of American medical schools for 1954-55 total more than \$143,000,000.

Out of 6,475 seniors enrolled in medical school this year only two failed.

Besides the 28,227 medical students training in the nation's 80 approved medical schools, there were 59,430 persons receiving some type of instruction from medical school faculties. These included dental, pharmacy and nursing students, technicians, residents, interns, and physicians with fellowship appointments.

To staff the 80 medical schools in the United States, 28,435 faculty personnel were required; of this number 21,328 served without pay.

In regard to the costs of medical education the report said that "in spite of augmented funds available to medical schools these institutions continue to face difficult and perplexing problems. The adequate maintenance of currently existing and newly developing medical schools, together with the constant demands for the application of new knowledge and techniques in the interest of ever better medical care for the American public, implies a continuing need for augmented financing of medical education and research."

The ten new four-year medical schools will be at the Universities of California, Mississippi, Miami, Missouri, Florida, Kentucky, West Virginia, North Dakota, and Yeshiva University of New York and Seton Hall University.

## A NEW EVIL—THE MALPRACTICE SUIT

Liability Actions Against Doctors Increase by 540 Per Cent Since 1900. Carelessness of Physicians In Conversations With Patients Seen As Major Cause of Suits.

### *What makes a malpractice suit?*

To busy doctors the question is particularly pertinent, given significance by a startling increase in the number of malpractice suits threatened or filed in the last few years. In the decades between 1900 and 1950, the incidence of such cases to actually reach the courts has risen by 540 per cent. In 1953 alone there were 32 cases to reach the upper appellate courts of the United States. The number tried in lower courts, settled without litigation, or merely threatened runs annually into the hundreds.

This tremendous increase in the incidence of malpractice suits is not localized to any one state or section of the country. It is perhaps more noticeable in larger metropolitan centers where there is a greater volume of more difficult and specialized surgery performed. But no doctor, either the country G.P. or the big city specialist, is ever free from the threat of what may become a ruinous malpractice action.

Doctors have not been singled out for this special torture by the public. In the years since World War I there has been a dramatic increase in all forms of personal injury litigation. Mass production of the automobile plus great new changes in the techniques of manufacturing have wrought many changes, one which is the increased frequency of accidental injuries or death and increased resort to law for redress.

The result has been a "suit-conscious" or "litigation-conscious" public which tends to think in terms of legal action for any and all real or imagined grievances. This public attitude has been helped along by an increased number of attorneys who build their practice around such suits and who frequently encourage them for the sake of a prospective fee.

For doctors the results have been more than significant. Faced with the necessity of thinking constantly in terms of protection against malpractice actions, it has

often become necessary to sacrifice what is best for the patient to reduce the opportunities for legal action. A strange paradox exists whereby the patient, medically untrained and emotionally upset, can dictate procedures to the surgeon and anesthesiologist which are definitely inferior to those preferred by the doctors. Typical of this has been the refusal of many patients to accept spinal anesthesia; as a result, they are more frequently endangered by less suitable anesthetics whose mortality rate is considerably higher.

Another significant aspect of the situation is the phenomenal size of many judgments which have been entered against physicians in malpractice suits in recent years. Misled by a popular public philosophy that all doctors are rich, juries have awarded ruinous damages which have frequently destroyed the defendant's financial estate. Fortunately, most physicians, aware of this trend, have wisely increased the extent of their malpractice liability insurance.

To return to the question—What makes a malpractice suit?—a prominent attorney recently set forth his views on the matter. As contributing causes he suggests:

1. *A poor personal relationship between doctor and patient.* The more impersonal and aloof a physician is, the more critical the patient is bound to be.

2. *Careless and frequently untrue remarks of one doctor about another.* The roots of malpractice most often lie in such remarks as "What butcher performed this operation?" or "How in the world could he have missed it?" The doctor, like everyone else, must sell himself, and being human, the doctor frequently tries to build himself up by knocking others. The skillful salesman ignores his competitors and concentrates on establishing confidence in himself. The most damaging of such abuse lies in a growing tendency of many physicians to commit such views to paper—paper which most often finds itself into the plaintiff's Exhibit A.

3. *Careless handling of the financial side of medical practice.* A certain way to wound deep personal pride is for the physician to send a bill that a patient can't pay and humble the patient to the point where he has to ask for charity. The bill doesn't have to exorbitant to cause anger and resentment; it can be reasonable, but if it humiliates, resentment is immediately aroused. By careful inquiry and a little tact, the doctor can avoid such situations and charge in proportion to ability to pay. Otherwise, the step to a malpractice action is a quick one for the humiliated patient.

4. *Irresponsible statements of patients about doctors.* People have a habit of stating as a fact information which they would like to believe but which is not cold reality. Many physicians cannot realize that the tales their patients tell them about other doctors may not necessarily be true; the danger is that such an attitude may lead him into commenting and the physician in question to the courts.

5. *Failure of physicians to admit errors to patients.* Curiously enough, more malpractice suits often arise out of attempts of a physician to hide a serious error from his patient than by telling him what has actually happened. Malpractice attorneys are insistent that when a mistake has been made, the patient should be frankly advised. Failure to do so compounds the seriousness of the charge by interjecting fraud as a consideration.

Add these factors to the public's suit-conscious attitude plus the unscrupulous attorney, and you have the basic causes of malpractice.

The best defenses against malpractice are built upon a frank and open relationship between doctor and patient, adequate malpractice liability insurance coverage, an organized program of malpractice prevention and defense (such as exists in the Tulsa County Medical Society), and constantly being on the alert to avoid saying or doing anything which may give a wrong impression to the patient. Needless to say, a more basic element is the necessity of practicing within one's capabilities with the health and welfare of the patient always paramount.

What to do when a malpractice suit is threatened?

The procedure is a simple but effective one: write a note to the agent who sold you the policy and state in detail the facts of the case. This will comply with the terms of your policy which requires you to make an immediate notification to the company of all threatened suits. *Do not wait until suit has actually been filed; put the company on notice at the first hint of trouble.*

The insurance carrier will then advise you of your future course in action, and most likely, a legal adjustor or attorney will call upon you to discuss the case.

Most members of the Tulsa County Medical Society are insured under the Society's group policy. The Insurance

### HARRY GREEN, M.D.

1898-1954

Dr. Harry Green, 56, prominent Tulsa dermatologist, died in a Tulsa hospital on September 7, 1954, after suffering a heart attack several hours earlier.

Born in Russia, Dr. Green came to America as a child and lived in Indiana and Tennessee. He was graduated from the University of Tennessee School of Medicine in 1920 and two years later became a general practitioner in Tulsa. In 1931 he was awarded a fellowship at the University of Vienna and secured his specialty training in dermatology. He reopened his Tulsa offices the following year and has specialized in dermatology and syphilology since that time.

Dr. Green served as a Major in the Army Medical Corps during World War II and saw active service in the Philippines and the Pacific theater. A portion of his army service was devoted to research in dermatology at Army medical centers. He was a diplomate of the American Board of Dermatology.

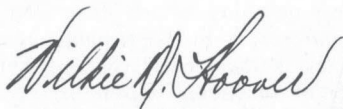

Services were held September 9th at B'Nai Emunah Congregation with interment in Rose Hill Cemetery. Two brothers and two sisters survive.

# PRESIDENT'S PAGE

In a recent survey the American Medical Association rated Tulsa as one of 88 "prime-primary" areas of the nation in which every type of medical and surgical care is available. This designation reflects the tremendous progress which the local medical profession has made since the close of World War II. There are very few of the most advanced medical and surgical techniques of diagnosis and treatment which cannot be performed in Tulsa with the same high degree of professional skill to be found in the nation's best known medical centers. Yet, there is a constant flow of Tulsa patients to these centers, frequently for the correction of some ailment which is relatively minor. Not all of these patients are wealthy individuals indulging a whim for what is considered to be the best in medical care; most are of moderate means and go heavily into debt to finance the trip. At times the situation borders on the ridiculous; the result is a heavy burden of expense, the painful inconvenience of travel, more lost man hours of work, and all too often the sacrifice of the personal attentions of an interested family physician.

I feel that we doctors are largely to blame for this situation, primarily through our failure to acquaint Tulsans with the institutional progress of the local medical profession. Most patients would prefer to remain near their homes and families if they could be assured of a comparable quality of medical care. The Tulsa County Medical Society, through its public relations program, has sought to attain this objective with an educational program. The Tulsa newspapers and radio-television press, which feel that we are not properly selling ourselves to the public, have been of tremendous help. The need exists, however, for some down-to-earth attention to the matter in the doctor's private office. The physician himself, in his daily relationship with the patient, can be of invaluable service. What is equally important is some few doctors are in need of learning themselves of our progress. We will be doing our patients a service, particularly in terms of time and money saved, by impressing upon them that Tulsa has become a reliable medical center.

Sincerely,

President

### **TULANE OBSTETRICIAN TO SPEAK HERE OCTOBER 11TH**

Dr. Conrad G. Collins, Professor and Chairman of the Department of Obstetrics and Gynecology, Tulane University School of Medicine, New Orleans, Louisiana, will be guest speaker for the Tulsa County Medical Society on Monday, October 11, 1954, at 8:00 P.M. His subject will be "Management of Pelvic Abscesses."

The meeting will be held in the spacious new auditorium of the recently completed Blue Cross-Blue Shield Plans Building at 1215 South Boulder, Tulsa. The new location offers parking for fifty cars in its adjacent parking lot and convenient additional street parking. An attractive stage, built-in wall screen, and public address system adds to the comfort of the meeting room. Physicians will be notified later of a direct telephone service number to which emergency calls may be made.

Dr. Collins is a graduate of Tulane University Medical School, Class of 1928, and interned at Charity Hospital, New Orleans. He served a residency in Obstetrics and Gynecology at Touro Infirmary of New Orleans and entered practice in that City in 1932. During World War II he served as a Major in the United

States Army Medical Corps. Dr. Collins is presently Senior Visiting Surgeon and Obstetrician and Gynecologist-in-Chief of Charity Hospital, diplomate and examiner for the American Board of Obstetrics and Gynecology, member of the American Academy of Obstetrics and Gynecology, and fellow of the American College of Surgeons. He holds memberships in twelve other leading medical organizations. For his work with South and Central American medical groups, Dr. Collins has been honored by Sociedad Panamena de Ginecologia y Obstetricia and the Venezuelan Faculty of Gynecologic y Obstricia.

Dr. Collins is best known for his extensive studies in Endometriosis, and more recently has done extensive clinical research into the cause and nature of pelvic abscesses. He has completed a new motion picture on this subject which will be shown at the October 11th meeting if available.

The Society's meeting of November 8, 1954, will feature Dr. Robert P. Glover, distinguished cardiovascular surgeon of Philadelphia, Pennsylvania, and the concluding meeting of the year on December 13, 1954, will be devoted to the annual business meeting and election of officers.

### **BLUE CROSS NON-GROUP ENROLLMENT IN PROGRESS**

The second annual non-group community enrollment of the Blue Cross-Blue Shield Plans is now in progress in Tulsa and will close on October 9, 1954. Applications will be accepted through that date.

The enrollment permits individuals not eligible for established groups to purchase Blue Cross-Blue Shield hospital insurance for protection effective November 1, 1954. Premiums are paid on a quarterly basis direct to the Blue Cross-Blue Shield offices at 1215 South Boulder. Complete informative literature and application cards are available from the Company offices.

DR. RAYMOND S. ECHOLS has reported to San Diego, California, for a tour of duty with the United States Navy Medical Corps. He was commissioned in the grade of Lieutenant-Commander.

## RECENT PUBLICATIONS BY MEMBERS OF THE TULSA COUNTY MEDICAL SOCIETY—

- Dr. Eugene S. Cohen.** Clinical Aspects of Endometriosis. *Journal of the Oklahoma State Medical Association*, 47:249-252 (September) 1954.
- Dr. F. L. Flack.** Paronychia. *American Journal of Nursing*, 54:114 (September) 1954.

Dr. John C. Kramer, son of Dr. Allen C. Kramer of Tulsa, is the author of a scientific paper entitled "Recurrent Acute Thyroiditis," appearing in the *AMA American Journal of Diseases of Children*, Volume 88, Pages 81-83, July, 1954. The paper is based on cases encountered during Dr. Kramer's residency at Childrens Hospital of Cleveland. Now serving in the Armed Forces, Dr. Kramer expects to return to Tulsa after his discharge.

## ARMED FORCES MEDICAL LIBRARY ONE OF THE WORLD'S BEST

The Armed Forces Medical Library, founded in 1836 as the Library of the Army Surgeon-General's Office, has the largest collection of medical literature in western hemisphere and is one of the five largest medical libraries in the world.

The Library numbers almost a million titles and with its collection of historical works, portraits, and photographs of medical men, and with its annual receipt of 100,000 journals and monographs, it has become almost unsurpassed. It furnishes a photoduplication service, interlibrary loans, reference service, and publications. Almost any article in this huge storehouse will be microfilmed on request. Members of the Tulsa County Medical Society may secure information in this fashion and read it on the Medical Society Library's microfilm reader.

## ANNUAL GOLF TOURNAMENT SET FOR THURSDAY, OCTOBER 21

The Annual Doctors and Dentists Golf Tournament and Dinner will be held at Indian Hills Country Club on Thursday, October 21, 1954. Golfing begins at 12 noon and a steak dinner will be served at 7 P.M.

The Medical Service Society of Tulsa will again be host to doctors and dentists in attendance for a complimentary social hour at 6:00 P.M. Many attractive merchandise prizes have been donated by leading Tulsa merchants, and these will be awarded following the dinner. The W. Albert Cook Cup and the H. D. Murdock Cup, two new trophies donated last year, will also be awarded.

Dinner will \$3.00 and greens fee will be \$2.50. Doctors who do not golf are urged to come out for the dinner. Dr. Paul N. Atkins, Jr., is in charge of arrangements, assisted by Drs. Simon Pollack, Worth M. Gross, and R. Q. Atchley. About 150 members of the Tulsa County Medical and Dental societies are expected. Reservations must be made for dinner, and a reservation card will be mailed later to all doctors.

## PERSONNEL ANNOUNCED FOR ANNUAL MEETING COMMITTEE

Dr. James W. Kelley, General Chairman of the 62nd Annual Meeting of the Oklahoma State Medical Association to be held in Tulsa, May 8-11, 1955, has announced the personnel of five special sub-committees to assist in completing convention arrangements.

Appointed to assist Dr. Kelley were:  
*Commercial and Scientific Exhibits:* Dr. Richard E. McDowell, Chairman, Dr. William C. Pratt, Dr. H. Kenneth Ihrig, Dr. Ceylon S. Lewis, Jr., Dr. Robert G. Perryman, and Dr. William S. Jacobs.

*Social Events:* Dr. Jack L. Richardson, Chairman, Dr. H. J. Rubin, Dr. Robert Hall Johnson, Dr. William F. Boyer, Dr. W. Carl Lindstrom, and Dr. Dixon N. Burns.

*Hotels and Registration:* Dr. Rayburne W. Goen, Chairman, Dr. Carl H. Guild, Dr. Dean C. Walker, Dr. Gerald E. Cronk, Dr. Ben F. Gorrell, and Dr. Robert T. Cronk.

*Publicity and Press Relations:* Dr. E. N. Lubin, Chairman, Dr. D. L. Edwards, Dr. Hugh Perry, Dr. J. D. Shipp, Dr. Carl C. Morgan, Jr., and Dr. Manuel Brown.

*Golfing:* Dr. Simon Pollack, Chairman, Dr. Henry S. Browne, Dr. Charles G. Stuard, Dr. C. E. Wilbanks, Dr. E. Malcolm Stokes, and Dr. William F. Thomas, Jr.

The scientific program will be prepared under the direction of the Scientific Works Committee of the Oklahoma State Medical Association. Dr. Walter E. Brown is Chairman of this Committee, assisted by Dr. E. G. Hyatt, Dr. Earl I. Mulmed, Dr. Wendell L. Smith, Dr. James B. Thompson, and Dr. Thomas J. Hardman.

Dr. Brown last month urged Oklahoma doctors wishing to submit papers for the Annual Meeting program to send the title and synopsis to him by November 30, 1954. Papers presented by Association members are limited to twenty minutes in length. Applications should be mailed to Dr. Brown in care of the Tulsa County Medical Society, B9 Medical Arts Building, Tulsa. More than half of the visiting guest speakers have already been committed, Dr. Brown said, but no announcement of the panel will be made until all vacancies have been filled.

Dr. Richard E. McDowell, Chairman of the Sub-Committee on Commercial Exhibits, has announced that commercial exhibitors will receive a prospectus for approximately 52 available booths in mid-October. The commercial exhibit will be immediately adjacent to the general meeting room in the Cimarron Ballroom.

## G. P.'S CANCEL MEETING

The Tulsa Academy of General Practice will not meet in October to permit members to attend the Oklahoma City Clinical Society's Annual Fall Conference in Oklahoma City, October 25-29, 1954. The next meeting of the Academy will be Monday, November 22, 1954, at Hotel Tulsa.

DR. JACK L. RICHARDSON is on a six weeks tour of Europe and expects to return to Tulsa on October 12, 1954.

 Adult Heart Clinic, Tulsa County Heart Association, Hillcrest Medical Center Outpatient Department, 8:00 A.M.  
 St. John's Isotope Committee Meeting, St. John's Hospital, 8:30 A.M.

# ACHROMYCIN<sup>\*</sup>

Tetracycline

## Now available in ORAL SUSPENSION and PEDIATRIC DROPS

 *popular cherry flavor*

ACHROMYCIN Tetracycline, a new broad-spectrum antibiotic, is now available in a cherry-flavored liquid preparation and in pediatric drops, as well as in forms for oral and parenteral use.

The cherry flavor of the new dosage forms is very popular with children and other patients. The Oral Suspension is supplied in a 1 oz. bottle of dry crystals. The suspension retains potency for 2 weeks after reconstitution with water.

ACHROMYCIN has proved effective against pneumococci, staphylococci, beta hemolytic streptococci, gonococci, meningococci, *E. coli* infections, acute bronchitis and bronchiolitis, and certain mixed infections.

Developed by Lederle research, ACHROMYCIN has definitely fewer side reactions associated with its use. It provides more rapid diffusion in body tissues and fluids.

**DOSAGE FORMS:**

ORAL SUSPENSION: Cherry Flavor: 250 mg. per 5 cc. teaspoonful

PEDIATRIC DROPS: Cherry Flavor: 5 mg. per drop. Graduated Dropper

LEDERLE LABORATORIES DIVISION *AMERICAN Cyanamid COMPANY* PEARL RIVER, NEW YORK

## MEDICAL SOCIETY TO HAVE TWO STATE FAIR EXHIBITS

The Tulsa County Medical Society will sponsor two health and medical exhibits at the 1954 Tulsa State Fair and Exposition at the Fairgrounds beginning October 2 and continuing through October 9. Both will be located in the South end of the main grandstand exhibit area.

One exhibit will be entitled "Health Today" and will emphasize by cartoonized statistical charts the reduction of infant and maternal deaths, increase in life expectancy, and decrease in communicable diseases. It will also illustrate that less working time is required to pay for it—one-half less time than in 1939, for instance. A turntable exhibit entitled "Where Your Medical Dollar Goes," illustrating the division of the medical dollar into various health services, will also be featured. This booth will be staffed by volunteers from the Women's Auxiliary to the Tulsa County Medical Society.

A second exhibit entitled "Food Facts, Fads and Fallacies," is an extensive study of popular food fallacies. These fads are put in their proper perspective and serve to correct many misapprehensions that have long existed about foods. This exhibit is 20 feet in width and will be part of the Health Fair section where various civic and professional organizations will have health exhibits.

At both exhibits useful literature will be distributed. These deal with selection of a physician in advance of actual need, medical progress, and warnings against quacks.

The exhibit material has been provided by the Bureau of Exhibits of the American Medical Association. Local arrangements are under the direction of the Sub-Committee on Health Education of the Tulsa County Medical Society, of which Dr. R. M. Wadsworth is Chairman. All members of the Society are urged to visit both exhibits.

## INTERNAL MEDICINE COURSE SCHEDULED FOR OCTOBER 4-9

The American College of Physicians has announced a postgraduate study course for Oklahoma doctors in Selected

Problems in Internal Medicine to be held at Oklahoma City, October 4-9, 1954.

The course will cover such subjects as Cardiovascular Disease, Hematology, Neurology, Metabolism, Endocrinology, Psychosomatics. Members of the College may register for a fee of \$30.00, and non-members for \$60.00. The course, sponsored in cooperation with the University of Oklahoma School of Medicine, is one of a series planned by the American College of Physicians in this area.

For additional information doctors may write Dr. Wann Langston, 1214 North Hudson, Oklahoma City, Oklahoma. Registration is limited.

DR. JOHN G. MATT has been named to the Editorial Committee of the Journal of the Oklahoma State Medical Association.

It's a son for DR. and MRS. EUGENE S. COHEN, born September 17th.

DR. SAMUEL GOODMAN is expected to return in early October from a two months tour of Europe.

DR. LEO LOWBEER and DR. EMIL E. PALIK attended the Annual Meeting of the International Congress of Clinical Pathologists at Washington, D. C., September 6-11, 1954. Dr. Lowbeer appeared on the program and presented an exhibit on the subject, "Pathology of Brucellotic Osteomyelitis." Dr. Palik was elected Chairman of the Board of Censors of the organization.

DR. J. W. CHILDS has returned from New York City where he attended the Annual Meeting of the American Rose Society.

DR. GERALD G. ROBERTSON has been named County Physician and Medical Director of the Tulsa County Medical Clinic. He succeeds Dr. Nevin W. Dodd, resigned.

DR. WILLIAM F. BOYER is recuperating from recent major surgery.

Drs. Capehart, Flanigin and Allen have announced the opening of their laboratory in Electroencephalography at 1635 East 15th Street, Tulsa, under the direction of DR. H. F. FLANIGIN, JR.

DR. AVERILL STOWELL was guest speaker at the Annual Meeting of the International College of Surgeons in Chicago last September 9th. His subject was "A New Scintillation Counter for Use in Clinical Diagnosis with Radioactive Isotopes."

DR. W. A. SHOWMAN has returned from Colorado Springs, Colorado, where he attended the Annual Meeting of the Pacific Dermatological Association last month.

DR. ROBERT A. NORTHRUP, appeared before the Cosmopolitan Club of Tulsa as guest speaker last month.

### COLUMBIA RADIOLOGIST SET FOR FOUNDERS DAY CLINIC

Dr. Sergei Feitelberg, Associate Professor of Radiology at Columbia University School of Medicine and Director of Physics at Mount Sinai Hospital, New York, N. Y., has been added to the panel of visiting distinguished guest speakers for the Tulsa County Medical Society's Annual Founders Day Clinic to be held Thursday, November 18, 1954.

Dr. Feitelberg joins Dr. George E. Burch, Professor of Medicine at Tulane University, New Orleans, Louisiana, and Dr. Richard H. Freyberg, Associate Professor of Medicine, Cornell Medical School, New York, N. Y., in presenting a day-long program of scientific papers.

Since 1947 Dr. Feitelberg has been director of Mount Sinai's Department of Radioisotope Therapy and Research and is recognized as one of the foremost American authorities in the field of atomic medicine.

Dr. Earl I. Mulmed, Chairman, announced last month that the site of the Annual Founders Day Clinic had been shifted to the attractive new auditorium of the Blue Cross-Blue Shield Building at 1215 South Boulder. Three papers will be presented in the morning session and three in the afternoon. A roundtable luncheon will offer visiting doctors the opportunity of asking pertinent questions of the three visiting guests.

A complete program will reach Tulsa doctors late this month.

**FOR LEASE:** Attractive suite of offices at Ranch Acres Medical Center, 600 square feet, built-in solid walnut bookcases, waiting room rug. Rent \$225.00 monthly. Available October 1, 1954. Telephone Dr. Lester I. Nienhuis, 7-8004.

DR. ROYAL E. STUART has returned to his Tulsa practice after eighteen months service with the United States Navy Medical Corps at Newport, Rhode Island. He will have offices at Utica Square Medical Center.

DR. JOHN E. McDONALD appeared on the program of the American Medical Association's Annual Public Relations Conference in Chicago, Illinois.

## NOT ARTHRITIS BUT ARTHRALGIA...

If the patient complaining of aching joints is a woman between 37 and 54 years of age, it is highly possible that she is suffering from arthralgia rather than arthritis.<sup>1</sup> It has been estimated that arthralgia occurs in about 40 per cent of women with estrogen deficiency, and is exceeded in frequency only by symptoms of emotional or vasomotor origin.<sup>2</sup> In fact, arthralgia may be as indicative of declining ovarian function as the classic menopausal hot flushes.

Arthralgia, however, is just one of a vast number of distressing but ill-defined symptoms that may be precipitated by the loss of estrogen as a "metabolic regulator." Other good examples are insomnia, headache, easy fatigability, and tachypnea.

Because these symptoms sometimes occur years before or even long after cessation of menstruation, they are not always readily associated with estrogen deficiency, and the tendency may be to treat them with medications other than estrogen. Obviously, sedatives and other palliatives cannot be expected to produce a satisfactory response if an estrogen deficiency exists. Only estrogen replacement therapy will correct the basic cause of the disorder.

"Premarin" is an excellent preparation for the replacement of body estrogen. In "Premarin" all components of the complete equine estrogen-complex are meticulously preserved in their natural form. "Premarin" produces not only prompt symptomatic relief but a distinctive "sense of well-being" which is most gratifying to the patient.

The Tulsa County Red Cross Blood Center will play a definite role in the event of a serious catastrophe, Dr. Betty Conrad, Medical Director of the Center, told the Civil Defense Committee of the Tulsa County Medical Society last month.

In a report to the Committee, Dr. Conrad said the Center was rapidly approaching a point where it would be equipped to handle blood needs in the event of an atomic bombing or natural emergency such as a tornado, refinery explosion, etc. The Center is now completing its second training course for registered nurses in the instruction of blood taking and administration procedures. Almost forty nurses from the Tulsa District, Oklahoma State Nurses Association, will be available for such duty on emergency notice, Dr. Conrad said.

Necessary blood taking equipment poses a more serious problem, Dr. Conrad said. She urged Civil Defense authorities to make sure an ample supply of blood donor sets was available at the regional emergency equipment storehouses to be set up in Tulsa high schools. Quantities of Dextran and blood derivatives should also be stocked in some quantity to meet the needs of the worst casualties. It is estimated by Dr. Conrad that 500 pints of donor blood could be obtained within twelve hours of the beginning of the disaster. By that time blood could be flown in from other areas to meet the continuing need.

## **MALPRACTICE SUITS**

*(Continued From Page 9)*

Committee of the Society meets routinely with the doctor who has been threatened and with the company attorney to study the case. Where the claim is justified, the Committee will recommend a settlement with fair compensation to the patient; if the facts do not disclose any medical dereliction on the part of the accused physician, the Committee will assist in fighting the action. This friendly assistance requires an open and above board approach to the problem on the part of the accused physician; in turn, he will receive invaluable technical advice and assistance.

The doctor who is under threat of a suit should always have the benefit of sound legal advice; independent actions by the accused doctor are unwise, and the case should never be discussed with the plaintiff or his legal representative until the doctor's attorney is present. The attorney appointed by the company is usually a competent individual with special training or experience in handling suits of this type.

A final consideration in the malpractice action is a serious and important one to every doctor—a willingness to fight those claims which are not justified. Too often, the fear of newspaper and other publicity leads the accused doctor into panic, and he insists upon settlement of the case irregardless of its lack of merit. Such action not only encourages further suits, but will eventually lead to a drastic increase in liability insurance premiums. However distasteful the publicity may be, the defendant-doctor must stand firm in his determination to seek justice.

## **DETAIL MEN ELECT**

New officers of the Medical Service Society of Tulsa are Dorwin Lamkin, Upjohn Company, President; C. R. Doran, Lakeside Laboratories, Vice-President; R. E. Loftus, Warren-Teed, Secretary; and Bill Walker, Parke-Davis, Treasurer.
