## Acknowledgements

First and foremost, thank you God for guiding my every step and comforting me in my times of struggle. When I am weak, you are strong. Without you, Lord, I am nothing. Thank you for giving me this wonderful gift of music and providing me the opportunity and ability to share this gift with the world.

My most sincere gratitude to my doctoral committee for their continual guidance and support: William Wakefield, Michael Hancock, Marvin Lamb, Eugene Enrico, and Alison Palmer. A special thank you to the Spring 2019 University of Oklahoma Wind Symphony, under the direction of Shanti Simon, for being willing to read my transcription of Kurka's *Symphony* and assist in producing a final product worthy of performance. I have been fortunate to work with the brightest minds in music in my music education, and they all continue to impact me as a person and musician: Charles Livesay, Bruce Brown, Robert Belser, Anne Guzzo, Nicole Lamartine, William Wakefield, Shanti Simon, Michael Hancock, Brian Britt, and Brian Wolfe. Two individuals helped me to find my passion for music at an early age: Sheryl Kaptur and Rick Catherman. I would not have become a musician without the two of you. Thank you!

To my Mom, Dad, Doug, and Stephanie: On August 4, 2007, I ventured to New Mexico to begin my teaching career. You never hesitated to support me as I began my new life out west. I am forever grateful for all the wisdom and support you have given me through the years. I love you all. Finally, to my wife, Whitney, and daughter, Norah: The sacrifices you have made to support me in this final degree were numerous and unfair. Yet, your love and support never faltered. For everything you have given me, I can only say this: I love you. With all of my heart, I love you.

## **Abstract**

The need for this project stems from the lack of published compositions and biographical material on Robert Kurka. Given his short life it is no surprise that a lack of information exists; however, based on numerous awards and grants received in his final years his music deserves more recognition and intensive study. Adding a unique work to the band repertoire further broadens awareness for another compositional voice from the 1950s. A band transcription of Kurka's *Symphony No. 2* addresses this need by providing a work to explore his compositional language in a large wind band setting.

*Symphony No. 2* is a well-crafted work written at the peak of Kurka's compositional maturity. It lends itself well for a band transcription because of its prominent wind writing. Presently, wind ensembles are limited to programming *The Good Soldier Schweik Suite* for chamber wind ensemble, and the band transcription of his *Concerto for Marimba and Orchestra* by Thomas Wubbenhorst. The transcription of *Symphony No. 2* will be the first piece by Robert Kurka for a large wind ensemble. The stylistic differences from his other works will reintroduce Kurka's music with new sounds for the band genre.

## Chapter 1 - Biography of Robert Kurka

“Why did Robert Kurka’s Symphony have to wait until last night for its first performance by the Boston Symphony Orchestra under Robert Shaw? As an American conductor, he had the grace to bring us an attractive and worthwhile American Symphony.”<sup>1</sup> – Howard Taubman, New York Times music critic, January 15<sup>th</sup>, 1959.

In the last year of his short life, American composer Robert F. Kurka (1921-1957) received a citation as a “composer on the threshold of real distinction” from composer Gunther Schuller of Brandeis University.<sup>2</sup> Kurka was the recipient of two Guggenheim Fellowship Awards and an award from the National Institute of Arts and Letters,<sup>3</sup> before leukemia took his life on December 12, 1957, just ten days before his 36<sup>th</sup> birthday. He was born in Cicero, Illinois to Anton Joseph Kurka and Rose B. Kurka on December 22, 1921. His father was a Czech immigrant, who arrived in the United States on January 14, 1908.<sup>4</sup> In my research, I discovered he served in the United States Army Reserves, enlisting on July 31, 1942 in New York.<sup>5</sup> Specific details about his service are unknown with the exception that he may have traveled to Tokyo shortly after Japan’s surrender at the end of World War II in 1945. A newspaper announcement

from the *Reno Evening Gazette* on February 25, 1946 states that on the following Wednesday, “Lieutenant Robert F. Kurka of Ruby, New York” would have a performance of one of his string quartets broadcast for the first time on Tokyo’s radio station JOAK. The title of the article reads, “Soldier Plays Concert Piece,” providing the possibility of a live performance in Tokyo.<sup>6</sup>

Little is known about Robert Kurka’s formal training as a young musician, but he eventually earned bachelor and master degrees from Columbia University, completing the latter in 1948. He was a violinist, studying with Canadian violinist Kathleen Parlow, and Alsatian violinist Hans Letz. Kurka’s work in composition began around 1946, with the completion of his *Chamber Symphony* Op. 3, which was not premiered until March 7, 1948 in New York.<sup>7</sup> He studied briefly with composers Otto Luening and Darius Milhaud but is labeled a “self-taught” composer in the *Grove Dictionary of Music and Musicians*.<sup>8</sup> After completing his degrees, Kurka worked as a professor of composition at the City College of New York and Queens College from 1948 to 1951. He also served as a composer-in-residence at Dartmouth College during that time.<sup>9</sup>

In spite of his short life, Kurka created a substantial catalogue of compositions, including solo and chamber works for strings, two chamber works for winds, two choral works, full orchestral works including two symphonies, and one opera. His opera, *The Good Soldier*

## Chapter 2 - Symphony No. 2, Op. 24

“The Symphony begins with a muscular theme announced by trombones, bassoons, and low strings; a broad, lyrical melody initiated by the violas and cellos provides the formal second theme. These two subjects are brought into contention as the sonata-form movement unfolds, with the dynamic first theme dominating. The outer sections of the *Andante* are based on a long, gentle strain of melancholy character, while the center of the movement’s arch form is more animated and expressively intense. The finale is vigorous and optimistic; its driving main theme provides the engine for a fine display of orchestral brilliance.”<sup>14</sup> – Carlos Kalmar, Conductor, Grant Park Orchestra.

### Historical Context

*Symphony No. 2*, one of Kurka’s last two large-scale works, was premiered posthumously on July 8, 1958 by the San Diego Symphony Orchestra conducted by John Burnett.<sup>15</sup> It went on to receive performances and recordings by some of America’s most influential orchestral ensembles, including the Boston Symphony Orchestra, conducted by Robert Shaw, and the Louisville Orchestra, conducted by Robert Whitney. Kurka received the commission for *Symphony No. 2* in 1952 from the Ignacy Jan Paderewski fund and completed the work in 1953.<sup>16</sup> The premiere recording was completed by the Louisville Orchestra in 1959,<sup>17</sup> and was

part of the orchestra's project to make premiere recordings of new compositions by American composers under their own record label, First Edition Records.<sup>18</sup>

Kurka's *Symphony No. 2* reflects Soviet Russia symphony models of the late 1940s and early 1950s, specifically those of Sergei Prokofiev. Similarities are found in the selection of instrumentation, formal structure of movements, motor rhythmic elements, motivic development, and harmonic language and progression. Preston Stedman, in his book *The Symphony*, notes that Prokofiev attributed his own composition style to four main factors:

1. A classical influence, traced back to listening to his mother play Beethoven piano sonatas in his childhood.
2. The neoclassical trend of instrumental works of the time.
3. The modernization of his harmonic language by his teacher Taneyev.
4. The motor or toccata element, inspired by Schumann's *Toccata*.<sup>19</sup>

Kurka demonstrates these same characteristics in *Symphony No. 2* with the use of short motivic elements, traditional forms such as *sonata* form (movement I), theme-and-variation (movement II), and *sonata-rondo* form (movement III), unprepared dissonances, unusual harmonic shifts, and the persistent use of motor rhythms. The *Symphony* also includes the bass clarinet and contrabassoon for bass-line scoring, similar to Prokofiev,<sup>20</sup> adding a distinctive color to the bass voices.

<sup>20</sup> Preston Stedman, 286-287

*Symphony No. 2* is a well-crafted work written at the peak of Kurka's compositional maturity. It lends itself well for a band transcription because of its prominent wind writing. Presently, wind ensembles are limited to programming *The Good Soldier Schweik Suite* for chamber winds, and a transcribed version of his *Concerto for Marimba and Orchestra* by Thomas Wubbenhorst. The transcription of *Symphony No. 2* will be the first piece by Robert Kurka for a large wind ensemble. The stylistic differences from his other works will reintroduce Kurka's music with new sounds for the band genre.

### **Structural Analysis**

A structural analysis of Kurka's *Symphony No. 2* is useful in further understanding his compositional language and its impact on the band transcription. This analysis will not include an exhaustive theoretical analysis but will focus on an overall phrase structure for each movement. In addition to the prose version in the following sections, a table representation of the analysis is included in Appendix B.

#### **Movement I – “Allegro molto”**

The first movement is in *sonata* form, and can be outlined as follows:

- **Exposition** – m. 1-103
  - Theme 1 – m. 1-20 – D minor
    - Transition – Rehearsal 2, m. 21-31
  - Theme 2 – Rehearsal 3, m. 32-44 – G minor
    - Transition – Rehearsal 4, m. 45-57
  - Theme 3 – Rehearsal 5, m. 58-73 – G minor
    - Transition to Theme 1' – Rehearsal 6, m. 74-87
  - Theme 1' – Rehearsal 7, m. 88-101 – A minor
    - Transition to the development – m. 102-103
- **Development** – Rehearsal 8, m. 104-257
  - Theme 4 – m. 108-151
  - Theme 2' (diminution) – Rehearsal 9, m. 112-151
    - Transition to Theme 1 material – m. 152-156
  - Focus on Theme 1 material – Rehearsal 12, m. 157-257
- **Recapitulation** – Rehearsal 20, m. 258-311
  - Theme 1'' – m. 258-269 – D minor

- Transition – Rehearsal 21, m. 270-271
- Theme 2'' – m. 272-295 – D minor
- Theme 3' – Rehearsal 23, m. 296-297 – D minor
  - Transition – m. 298-311
- **Coda** – Rehearsal 24, m. 312-347

The *Symphony* begins immediately with Theme 1 projected in unison octaves by the low voices of the orchestra. Kurka often fragments and develops the first two measures of this melody throughout the movement.

Figure 2.1. Movement I, m. 1-7 - Theme 1

This primary theme begins and ends on D, strongly asserting a D minor tonal center. Kurka uses the first two measures of Theme 1 throughout the movement.

In the exposition, two accompaniment figures are presented that are developed later in the movement. The first of these accompaniment figures is a rising eighth-note passage that is presented by the horns in measure 7.

Figure 2.2. Movement I, m. 7-8 - Accompaniment Figure 1

This figure is in contrary motion to the descending eighth-notes at the beginning of Theme 1.

The second accompaniment figure is a punctuated three-note statement introduced at rehearsal 2.

Figure 2.3. Movement I, m. 21-24 – Accompaniment Figure 2

The high and low voices move in contrary motion, with the higher voices descending on pitches F-sharp, F-natural, and D, and the low voices ascending on F-sharp, G-natural, and B-flat. This figure is taken from the syncopated notes in the fourth measure of Theme 1. These two figures, extracted from the main theme, provide developmental and structural unity to the movement.

Transitional material begins at measure 21, shifting the harmony to a plagal tonal relationship of G minor, and arriving at the introduction of Theme 2 at measure 32.

Figure 2.4. Movement I, m. 34-39 – Theme 2

Theme 2 is a foreboding but lyrical theme that contrasts with the rhythmic and angular Theme 1 and is first stated by solo flute and clarinet in octaves. This theme is immediately echoed by middle and low strings, but shifts the tonal center momentarily to B-flat. Imitative statements by 1<sup>st</sup> horn, 1<sup>st</sup> oboe, and strings begin a transition to a third theme in the exposition.

Theme 3 is the first theme of the *Second Symphony* that demonstrates the influence of jazz in Kurka's music, with a syncopated rhythm that is representative of Ragtime.

Figure 2.5. Movement I, m. 58-61 – Theme 3

The dark nature of the movement is sustained with the persistence of a G minor tonality within this theme. The last two measures of Theme 3 are used as transitional material at rehearsal 6 to return to Theme 1.

The brass powerfully restate Theme 1 at rehearsal 7, but the theme is abbreviated by six bars. The restatement of this theme provides convincing formal clarity to the conclusion of the exposition. A short two-measure transition occurs in measures 102 and 103, with the clarinets establishing a new tonal center in the dominant key of A to begin the development.

Kurka introduces a new theme at the start of the development, identified here as Theme 4.

Figure 2.6. Movement I, m. 108-112 – Theme 4

A three-staff musical score for three Trumpets in Bb, measures 108-112. Each staff is marked with 'con sord.' and 'pp poco a poco cresc.'. The music consists of a rhythmic pattern of eighth and sixteenth notes, with some measures containing rests.

Throughout the first half of the development Theme 4 is placed in the trumpets and upper woodwinds, and is accompanied with Theme 2 in rhythmic diminution by lower voices. As the development progresses, new tonal centers are explored for short periods of time (see appendix B), including F-sharp, E-flat, and C.

Kurka focuses on Theme 1 material for the remainder of the development beginning at measure 152. Fragments of motives pass around the ensemble as the individual voices contend to be the dominant voice. In a sudden change at rehearsal 15, the musical landscape evaporates to an isolated muted trumpet solo, stating Theme 1 with light upper woodwind accompaniment. A dialogue between the trumpet and a solo piccolo is accompanied by delicate *staccato* quarter-note patterns in the double-reeds and snare drum. The end of each phrase in this portion of the development consists of a *subito forte* punctuation in syncopated strings. With each statement of Theme 1, more voices are added, building to the recapitulation at rehearsal 20.

At the onset of the recapitulation, Theme 1 is stated in the dominant key; however, the accompaniment initially emphasizes the original tonic key of D minor. Conforming to neo-classical ideals, Kurka restates his second and third themes in the tonic at measures 272 and rehearsal 23, respectively. After a transition in measures 298 through 311 using Theme 3 material, the coda begins at rehearsal 24, concluding the movement in the original key.

### **Movement II – “Andante espressivo”**

Kurka constructs the second movement of the Symphony in a theme-and-variations form, in keeping with the neo-classical nature of the work. The use of 6/8 meter and *staccato* bass accompaniment closely resembles the second movement, “Lament,” of Kurka’s *The Good Soldier Schweik Suite*. He organizes the second movement of the Symphony as follows:

- **Theme** – m. 1-15 – B-flat major/minor
  - o Transition – m. 16-19
- **Variation I – Melodic Variation** – Rehearsal 2, m. 20-30 – G major/minor
  - o Transition – m. 31-32
- **Variation II – Figure Variation** – Rehearsal 3, m. 33-43 – E major/minor
  - o Transition – m. 44-45
- **Variation III – Character Variation** – Rehearsal 4, m. 46-57 – E-flat and F
- **Variation IV – Character Variation** – Rehearsal 5, m. 58-71 – D major
  - o Transition – m. 72-73
- **Theme (abbreviated)** – Rehearsal 7, m. 74-77 – B-flat major/minor

- Coda – m. 78-84

The Theme is introduced by the 1<sup>st</sup> violin and 1<sup>st</sup> flute:

Figure 2.7. Movement II, m. 3-14 – Main theme

Violin 1

Andante ♩ = 76

*molto espress.*  
*mf cresc...*

*f*

*mf*

The Theme centers around a B-flat major/minor tonality, and is accompanied by delicate *pizzicato* strings, *staccato* low woodwinds, and march-like timpani and bass drum. Horns enter in measure 3 and provide a harmonized legato line in two-voice texture supporting the Theme.

Variation I begins in measure 20 stated by the flutes and clarinets, shifting the timbral color from the violins to woodwinds.

Figure 2.8. Movement II, m. 20-31 – Variation I

Piccolo

**2**

*molto espress.*  
*mp cresc.*

*f*

*dim...* *(mf)* *p*

Kurka centers this variation on the submediant G and condenses the intervallic range of the Theme from two octaves to one, resulting in a more chromatic melody. He harmonizes the melody using parallel thirds in flute and clarinet, and gradually expands the parallel motion to sixths by the end of the phrase.

Both the Theme and Variation I begin on the dominant and end on the tonic of their respective tonal areas. The melodic rhythm and contour of the musical line also share

similarities. Kurka uses the same meter structure, utilizing two measures of 6/8, one measure of 9/8, followed by nine measures of 6/8 to end the variation.

Variation II presents a dramatic change, and features a lively, Chopin-like ornamented melody in the violins, taking on a brighter tonality.

Figure 2.9. Movement II, m. 33-44 – Variation II

This variation continues the descending submediant trend, using E major/minor as its new pitch center. Kurka retains the Theme meter structure of 6/8, 9/8, and 6/8. Again, he begins the variation on the dominant of the new center and ends on the tonic, using a similar melodic contour.

Variation III is the most dramatic alteration of the Theme. The first two variations each moved a minor third down from the previous tonal center; B-flat (Theme), to G (Variation I), then to E (Variation II). Kurka alters this pattern in Variation III by moving down a minor second to the sub-dominant E-flat of the original B-flat tonal center. Instead of using the entire original Theme, he develops only the first two measures. He also shifts the orchestration color by featuring a powerful, *fortissimo* brass section. This is the first and only time the brass are featured in this movement. Kurka saved the brass for the most unusual variation of the set, from

the standpoint of phrase structure, melodic contour, and articulation style. The uniqueness of the variation is further enhanced through displacement of the melody by a single eighth-note between the trumpets and trombones.

Figure 2.10. Movement II, m. 46-50 – Variation III

Variation III is echoed by the upper woodwinds in a new key center of F, the dominant of the original key (B-flat). At the completion of the variation, Kurka unexpectedly moves the F to F-sharp, establishing the third of the chord for the new D major tonality in the next variation.

Variation IV features Kurka's most sensitive and expressive writing of the entire *Symphony*. Shifting the pitch center down a minor third to D major, he establishes the most stable tonality of the movement by limiting dissonant harmonies.

Figure 2.11. Movement II, m. 59-66 – Variation IV

In character with the original theme, he begins the melody on the dominant (A), imitates the original phrase structure, and uses the same melodic contour. However, he does not end this variation on the newly established tonic. Instead, a short two-measure modulation in bars 72 and 73 craftily evades expectations by moving the tonic back to B-flat, where Kurka ends the movement stating the Theme one final time, reflectively fading away before the final B-flat major chord.

Variation IV and the restatement of the Theme in the second movement marks a turning point in the mood and style of the *Symphony*. Aggressive declarations dominated the first movement, followed by a somber and lamenting mood in the second. Suddenly, the final

variation melody in the second movement is presented in D major and brings optimism to the composition.

### **Movement III – “Presto gioioso”**

Movement III builds on the optimism established in movement II with energetic statements of joyous enthusiasm. The finale is in *sonata-rondo* form and features exuberant musical statements that bring light to what thus far has been a dark and lamenting symphony.

The outline is as follows:

- **Exposition** – m. 1-60
  - **A:** m. 1-12 – D major to A major
    - Transition: m. 13-16 – D major
  - **B:** Rehearsal 2, m. 17-30 – D major
    - First statement – m. 17-23 – D major
    - Repeat – Rehearsal 3, m. 24-30 – A major
  - **A:** Rehearsal 4, m. 31-42 – D major to A major
    - Transition: m. 43-46 – remains in A major
  - **C:** Rehearsal 6, m. 47-60
    - First statement – m. 47-52 – A major
    - Repeat – Rehearsal 7, m. 53-58 – A major
      - Transition – m. 59-60 – D major
- **Development** – Rehearsal 8, m. 61-142
  - **A’:** Rehearsal 8 – m. 68 – D major to E-flat
    - Transition: Rehearsal 9, m. 69-84 – E-flat to F
  - **D:** Rehearsal 10, m. 85-110
    - First statement – m. 85-95 – F major
      - Transition: m. 96-97
    - Second statement – Rehearsal 11, m. 98-108 – E major
      - Transition: m. 109-110 – A major/minor
  - **E:** Rehearsal 12, m. 111-142
    - First statement – m. 111-119 – A major/minor
    - Second statement – Rehearsal 13, m. 120-126 – A major/minor
    - Third statement – Rehearsal 14, m. 127-132 – G major/minor
      - Transition: m. 133-142 – G major/minor
- **Delayed Recapitulation** – Rehearsal 16, m. 143-165
  - **B’:** Rehearsal 16 – m. 165
    - First statement – Rehearsal 16 – m. 158 – G major/minor
    - Second statement – Rehearsal 17, m. 159-165 – D major
- **Recapitulation** – Rehearsal 18, m. 166-223
  - **A:** Rehearsal 18, m. 166-177 – D major to A major
    - Transition: m. 178-181

- **C**: Rehearsal 20, m. 182-195
  - First statement – m. 182-187 – A major
  - Second statement – Rehearsal 21, m. 188-193 – A major
    - Transition – m. 194-195
- **B<sup>o</sup>**: Rehearsal 22, m. 196-223
  - First statement – m. 196-209 – D major
  - Second statement – Rehearsal 23, m. 210-223 – D major
- **Coda**: Rehearsal 24, m. 224-234 – D major/minor

Section A is in D major, the parallel major key of the first movement. The driving and syncopated sixteenth-note rhythms give this section an almost Gershwin-like feel.

Figure 2.12. Movement III, Section A Melody

The addition of a *staccato* bass-line resembling a walking-bass gives this movement a jazz-inspired essence.

Section B, also set in D major, contains a soaring, lyrical melody, contrasting with the more rhythmic A melody. The Section B melody has an important use later in the movement, when Kurka uses it to craft a convincing finale. Horns first play the melody at measure 17, doubling in octaves.

Figure 2.13. Movement III, Section B Melody

Rhythmic intensity though this section is sustained by the continuous sixteenth-note scalar figures in the flute and piccolo.

Kurka uses a lighter rhythmic gesture for the theme in Section C, along with a brief meter shift, alternating between 6/4 and 4/4. Middle strings comprise the first statement, while the upper strings restate the melody in the second phrase.

Figure 2.14. Movement III, Section C Melody

The mechanical nature of this section strays from the Gershwin-like essence, and perhaps is more inspired by compositions in the style of Sergei Prokofiev.

The development begins at rehearsal 8. The A melody is stated in detached fragments that are passed around the ensemble, yet remain in D major. As the fragments begin to dissipate, Kurka composes a transition using descending quarter-notes beginning at measure 77. The music *crescendos* with thicker texture and cascading voices, anticipating a significant musical arrival.

Section D, a new thematic idea in the movement, is first introduced within the development at rehearsal 10. New themes being presented in the development of a *sonata-rondo* form movement is not an uncommon practice, and dates back to the early classical symphonies of Sammartini and Brioschi. An example given by Bathia Churgin, in her article *Beethoven and the New Development-Theme in Sonata-Form Movements*, notes that Sammartini's Symphonies J-C 7 and 65 include distinctive development themes and were written in the mid-18<sup>th</sup> century.<sup>21</sup>

<sup>21</sup> Bathia Churgin, "Beethoven and the New Development-Theme in Sonata-Form Movements," *The Journal of Musicology* 16, no. 3 (Summer 1998): 323-325, accessed April 10, 2019, <https://www.jstor.org/stable/763994>

Kurka uses this same compositional idea in sections D and E of his *Second Symphony*. These melodies only occur in the development, and do not return later in the composition.

Figure 2.15. Movement III, Section D Melody

Figure 2.16. Movement III, Section E Melody

The Section B melody returns in rhythmic diminution at rehearsal 16 and is set in the dominant key of A major. The significance of this arrival is two-fold:

1. It is the first of the three exposition melodies (A, B, and C) to return after the development in its entirety.
2. Using the B melody after the development results in a delayed recapitulation, with the return of the original A melody not occurring until rehearsal 18.

The Section B melody is immediately restated at rehearsal 17 in its original key of D major, presenting the tonic key before the return of Section A.

Finally, Section A returns at rehearsal 18, announcing the arrival of the true recapitulation in the tonic key of D major. After a brief return of Section C at rehearsal 20, the B melody is used as the primary material in which Kurka constructs a powerful finale.

## Chapter 3 - Strategies for Transcription and Retention of Composer's Voice

“Orchestration deals with the emotional and aesthetic possibilities of instruments in their tone color and shading, mixtures and blending characteristics, dynamic values in relation one to the other, their use to enhance nuance, rhythm, distinctive passages, or entire melodies.”<sup>22</sup> - Arthur A. Clappé

### Instrumentation

Clappé's statement suggests that the emotional output of a work depends on the clarity of the music, considering all of the characteristics listed. This served as a guiding principle throughout the transcription process. John Cacavas cautions transcribers to “...be as true to the original sounds as possible...”<sup>23</sup> Erik Leidzén suggests the transcriber consider what the composer would have done had he or she written the original work for band.<sup>24</sup> In this transcription, the orchestrator has made every attempt to achieve musical clarity while adhering as close as possible to the original voice of the composer.<sup>25</sup>

Kurka's *Symphony No. 2* utilizes a common wind instrumentation seen in the middle to late Romantic orchestra. He often favors the wind voices in the *Symphony*, using them for thematic, harmonic, and textural development. The wind instrumentation is the following:

<sup>25</sup> Arthur A. Clappé, p. 122

Piccolo  
2 Flutes  
2 Oboes  
English Horn  
2 Clarinets in B-flat  
Bass Clarinet

2 Bassoons  
Contrabassoon  
4 Horns in F  
3 Trumpets in B-flat  
3 Trombones  
Tuba

The first step towards achieving musical clarity within the transcription is the careful selection of instrumentation. Timothy Shade, in his doctoral essay regarding the process of transcribing orchestral works for wind band, states that instrumental range is one of his first considerations in rescoring string voices.<sup>26</sup> Middle to low strings present less of a concern than the higher violin register, which requires more careful consideration. The violin's highest note in this work is an E7, occurring at measure 155 in the first movement. The piccolo is the only wind instrument able to attain this pitch in a comfortable manner. Kurka's compositional style consists of numerous doublings at the octave, lending itself to having fewer instruments perform in extreme registers. This provides ease of tuning and balance, difficulties that might otherwise be present. With this possibility, the piccolo can be supported by other instruments including flutes, E-flat clarinet, B-flat clarinet, soprano saxophone, and mallet percussion at the lower octave, and still generate a similar orchestrational goal.

The middle to low string parts can be managed by the saxophone family of instruments down to C2, the lowest sounding pitch for the baritone saxophone. Bass saxophone is not utilized in this transcription, since the instrument is not commonly accessible. Kurka included five string parts in the original manuscript, so it is fitting to have the saxophone ensemble reflect this instrumentation. Therefore, the saxophone voices used in the transcription are soprano, two altos,

---

<sup>26</sup> Timothy Shade, "A Process for Transcribing Orchestral Works for Wind Band: Andre Previn's *Sallie Chisum Remembers Billy the Kid*" (doctoral essay, University of Miami, 2016), 53

tenor, and baritone. To achieve the desired orchestration for band, the addition of E-flat clarinet, a 3<sup>rd</sup> B-flat clarinet, saxophones, and euphonium, along with standard doubling of personnel on certain parts expands the instrumentation to the following:

Piccolo	2 – 1 <sup>st</sup> B-flat Trumpet
2 – 1 <sup>st</sup> Flute	2 – 2 <sup>nd</sup> B-flat Trumpet
2 – 2 <sup>nd</sup> Flute	2 – 3 <sup>rd</sup> B-flat Trumpet
1 <sup>st</sup> Oboe	4 – F Horn
2 <sup>nd</sup> Oboe	1 <sup>st</sup> Trombone
English Horn	2 <sup>nd</sup> Trombone
1 <sup>st</sup> Bassoon	Bass Trombone
2 <sup>nd</sup> Bassoon	2 – Euphonium
Contrabassoon	2 – Tuba
E-flat Clarinet	String Bass (with extension)
3 – 1 <sup>st</sup> B-flat Clarinet	Timpani
3 – 2 <sup>nd</sup> B-flat Clarinet	Snare Drum
3 – 3 <sup>rd</sup> B-flat Clarinet	Triangle
B-flat Bass Clarinet	Bass Drum
Soprano Saxophone	Cymbals (Sus. and Crash)
1 <sup>st</sup> Alto Saxophone	1 <sup>st</sup> Xylophone
2 <sup>nd</sup> Alto Saxophone	2 <sup>nd</sup> Xylophone
Tenor Saxophone	Glockenspiel
Baritone Saxophone	

### **Retention and Doubling of the Contrabass**

The contrabass part is retained in the transcription; however, with only a solo player being requested it becomes necessary periodically to double the part using other wind instruments. Doubling the contrabass voice utilizing baritone saxophone presents an issue, as the latter cannot reach the lower register of the bass. Fortunately, Kurka includes wind instruments in the original instrumentation capable of doubling the contrabass when they are musically available, including the contrabassoon, bass clarinet, and tuba. The latter is most often available for this purpose.

When the contrabass performs independently from the wind voices in the original score, balance issues must be taken into account in the transcription. An example of this is measure 136

in the first movement. Kurka utilizes all low winds separately from the contrabass. If the baritone saxophone is the only instrument that doubles the solo contrabass in the transcription, these two instruments will be over-powered by the remainder of the winds. A solution to this dilemma is adding a second tuba. The menacing nature of the strings from measures 112 to 157 is now retained because of the added depth provided by the second tuba voice. Additionally, using two independent tubas benefits the entire transcription by providing another bass voice while simulating a larger contrabass section comparable to the original composition.

### **Versatility of the Euphonium**

The euphonium offers transcribers many benefits in a transcription. The lower range of the instrument, with its conical bell and warmth of tone, provides added depth of sound and can support both low brass and low reed voices. In its middle and upper registers, it can provide a satisfactory substitute or supporting voice for many instruments. These capabilities in the euphonium provide the transcriber a flexible option for setting music from an orchestral score.

The euphonium found its greatest use in this transcription as a substitute for higher tuba passages. This allowed the transcribed tuba to support the original contrabass voice. An example is found in movement I, measures 18 through 20. In the original score, Kurka has the tuba performing the punctuated brass motive; however, the strings rearticulate the original thematic material, and take prominence over the other voices. It is important for the string material to be realized in the transcription. This necessitates the tuba to double the contrabass part to further enhance the melodic motif. The euphonium is utilized to perform the original material written for the tuba.

An example of the euphonium's virtuosic versatility occurs in movement III at measure 95. A sixteenth-note passage descends through the strings at a *fortissimo* dynamic. Using only

saxophones to handle this passage provides a difficult challenge for balance. The euphonium deftly supports the end of the passage by assisting the baritone saxophone during the final two beats.

### **Added Mallet Percussion**

“Contemporary wind bands are typically around 50 players and include extensive percussion sections. These percussion sections contain instruments capable of assisting with rescoring some of the more diverse string passages. The use of percussion has assisted with the inherent balance issues in transcribing from orchestra to the wind band.”<sup>27</sup> – Timothy Shade

A lack of wind instrument substitutes for the violin in its higher tessitura presents many issues to the transcriber. The piccolo is the most direct instrument for this purpose regarding pitch, but it is not common practice to have multiple piccolo players within a wind ensemble. Doubling music written above C7 at the octave below helps the presence of the highest voice, but the added brilliance of the highest register is easily lost using this method alone. Mallet percussion instruments can be of great value by supplying the brighter timbre associated with the original register.

Rehearsal 22 of Movement III is one example of the challenge of transcribing high string parts. Kurka composed this particular passage by using rhythmic diminution of the B melody from this movement. The musical phrase contains whole notes and half notes, and is set in a higher register, reaching B6 in the 1<sup>st</sup> violin. This presents a passage that is physically problematic for winds to reproduce. In addition, the piccolo and flute voices are composed with their own musical material, leaving only the oboe, clarinet, and soprano saxophone available to substitute for violin. In this transcription, the

---

<sup>27</sup> Timothy Shade, 19.

glockenspiel proved useful by maintaining the register of the violin passage while the soprano saxophone and clarinets double the part an octave below. Although the number of voices in the highest register is minimized to only the glockenspiel, this solution avoids the predictable issues of tuning and balance from having numerous wind voices performing in this extremely high register. Further, the longer ring of the glockenspiel is more advantageous in supporting the longer tones of the melody than the xylophone.

A second instance where mallet percussion proved beneficial was during rapid technical passages. In movement III, rehearsal 2, the piccolo and flute perform a continuous scalar sixteenth-note passage for fourteen measures, all tongued at 152 bpm. With such a fast tempo, and high demand for articulation and finger coordination, this transcription includes slurs for this passage, with the xylophones doubling. This provides an articulation for each note, and satisfies the original intent.

## Chapter 4 - Transcription Process

“The adaptation of a composer’s work to another medium demands a carefully designed process to ensure that the end result is comparable to the original. This process is a combination of a preliminary investigative procedure and the actual transcription of the work. The preliminary process will ensure the transcriber has obtained all necessary information regarding the piece and composer before beginning the transcription, allowing for decisions more aligned with the style of the composer.”<sup>28</sup>

### Selection of Repertoire

In October of 2017, my D.M.A. chamber recital featured Robert Kurka’s *The Good Soldier Schweik Suite* for 16 winds and percussion. Intense study of this suite led to a curiosity of both the life and works of the composer. Surprisingly, I discovered that only the final nine years of Kurka’s life are well-documented. Everything before then largely remains a mystery to published historical research. Furthermore, his unique compositional voice is rarely explored by all ensembles due to his limited catalogue. Providing the band genre with an opportunity to perform Kurka’s music became a primary goal, and the exploration of his catalogue was essential to determine the work best suited to a larger band ensemble.

Kurka’s orchestral compositions served as the primary source of potential works for a band transcription. He wrote exclusively for orchestra; the exception being *The Good Soldier Schweik* opera which was written for chamber winds. His catalogue includes two symphonies; however, a published score or recording of *Symphony No. 1*, Op. 17 could not be located. Recordings of his orchestral compositions aided in the selection process. Of particular interests were the following: *Music for Orchestra* Op. 11, *Serenade for Small Orchestra* (after Walt Whitman) Op. 25, *Julius Caesar Symphonic Epilogue* (after William Shakespeare) Op. 28, and

---

<sup>28</sup> Timothy Shade, 38

*Symphony No. 2, Op. 24* (1953/1958).<sup>29</sup><sup>30</sup> From this group, *Symphony No. 2, Op. 24*, was selected for transcription based on the following criteria:

1. Appeal to the transcriber based on recordings.
2. The prominence of the wind writing within the original work, regarding motivic and harmonic development.
3. The potential for movements of the *Symphony* to be performed individually.

### **Initial Scoring – Advantage of Current Technology**

Erik Leidzén outlines a four-step transcription plan in the book *An Invitation to Band Arranging*:<sup>31</sup>

1. Score all solid tutti passages first.
2. After all tutti passages have been transcribed, turn to the places where the full scoring appears but combined with some characteristic voice-leading.
3. ...treat all places that are scored a bit lighter.
4. ...scan each part to ascertain if there are enough breathing places. This is especially important if the wind part has been transcribed from a string part.

Timothy Shade encourages this plan in his document, noting that the process would “...preserve authenticity and fidelity.”<sup>32</sup> Fidelity must be a primary objective for transcribers; however, the process that allows the transcriber to complete the project, while achieving the goal of authenticity, should be informed by the original composition with the transcriber’s own discretion. Furthermore, Leidzén’s plan was written in the first half of the 20<sup>th</sup> century, before

---

<sup>29</sup> Robert Kurka, *Robert Kurka: Symphonic Works*, Carlos Kalmer, recorded with the Grant Park Orchestra in June 2002 and June 2003, Cedille Records, CDR 90000 077, 2004.

<sup>30</sup> *Lopatnikoff, Helps, Thomson & Kurka*, David Alan Miller, recorded with the Albany Symphony Orchestra, Albany Records, 2003.

<sup>31</sup> Erik Leidzén, *An Invitation to Band Arranging* (Bryn Mawr, Pennsylvania: Theodore Presser Co., 1950), 181.

<sup>32</sup> Timothy Shade, 35.

the availability of a computer and music notation software. Current technological advantages allow for a slightly altered process.

The process for transcribing *Symphony No. 2* included the following steps:

1. Notation of all music, including all text, dynamics, and tempo markings using the desired instrumentation of the band:
  - a. Keep all music in the same voice as notated in the original, regardless if it will remain in that voice or not.
  - b. Notate string parts in added instrument parts, such as saxophones and euphoniums, or other available voices.
2. Rescore as necessary:
  - a. Re-voice sections to better fit the idiomatic capabilities of the instruments, with specific attention to string parts.
  - b. Re-voice sections where extreme range issues occur.
  - c. Re-voice where balance issues become present.
  - d. Assign solos to either the same or similar instruments, depending on balance challenges in the band.
  - e. Add or subtract instruments that may or may not be needed in favor of clarity and finalize instrumentation.
3. Study each part to ensure that music written is within the capabilities of the instruments.

The initial step of scoring all notes, texts, and dynamics in a literal fashion from beginning to end allowed for the music to be set in the most authentic form possible, though perhaps not the best form for the band medium. With the assistance of current music notation software, rescoring portions of the music consumed less time than it would have for Erik Leidzén in the early 20<sup>th</sup> century. Though the process developed by Leidzén is in no way obsolete, this project utilized the efficiency and editing benefits of technology to craft the final product once the literal setting of the music had been completed.

The transcription of *Symphony No. 2* presented unique problems from what might be considered normal. Kurka's *Symphony* possesses youthful vitality, congruent with a 32-year-old "self-taught" composer<sup>33</sup>. Ranges of trumpets and horns exceed comfortable limits for some

---

<sup>33</sup> James Wierzbicki, 2001 "Kurka, Robert," *Grove Music Online*.

performers. Fast, articulated passages in the third movement for the piccolo and flute require double-tonguing for an extended period of time. These issues raise concerns of repeated performances. Adjustments made to ameliorate the identified challenges are discussed in the following sections of this chapter.

### Horn Considerations and Adjustments

Horn register issues are common in *Symphony No. 2*. Kurka consistently doubled pairs of horns in octaves. Occasionally, these octaves exceed the comfortable range of the horn. With the addition of saxophones, forcing the horns to play at such extreme registers can be avoided.

The first instance of this occurs in measures 7-10 of movement I. The 1<sup>st</sup> horn ascends to a written B5, or sounding E5.

Figure 4.1. Movement I, m. 7-10 – Original Score - Extreme horn register.

The image shows a musical score for four horns in F major, measures 7-10. The score is written for Horn in F 1, Horn in F 2, Horn in F 3, and Horn in F 4. The key signature is one sharp (F#), and the time signature is 7/8. The first horn part (Horn in F 1) has a dynamic marking of *ff* and a *pizz* marking in measures 9 and 10. The other horn parts also have *ff* markings. The score shows the original horn parts with dynamic markings and articulation in measures 9 and 10.

In figure 4.2., the original 1<sup>st</sup> horn part has been placed in the 1<sup>st</sup> alto saxophone line, an instrument capable of handling the extreme register with greater ease. Measures 9 and 10 are doubled by the soprano saxophone to assist with balance, allowing the higher octave to be present within the ensemble. The 2<sup>nd</sup> and 4<sup>th</sup> horns double the 1<sup>st</sup> and 2<sup>nd</sup> alto saxophones, while 1<sup>st</sup> and 3<sup>rd</sup> horns double the tenor saxophone.

Figure 4.2. Movement I, m. 7-10 – Transcription - Adjusted voicing for horns using saxophones.

The musical score for Figure 4.2 consists of eight staves. The top four staves are for saxophones: Soprano Saxophone, Alto Saxophone 1, Alto Saxophone 2, and Tenor Saxophone. The bottom four staves are for horns: Horn in F 1, Horn in F 2, Horn in F 3, and Horn in F 4. The music is in 4/4 time with a key signature of one sharp (F#). The saxophone parts are marked with a forte (*ff*) dynamic. The horn parts also feature *ff* dynamics. The score shows measures 7 through 10. In measure 7, the saxophones play a rhythmic pattern of eighth notes, while the horns play a similar pattern. In measure 8, the saxophones continue their pattern, and the horns play a similar pattern. In measure 9, the saxophones play a similar pattern, and the horns play a similar pattern. In measure 10, the saxophones play a similar pattern, and the horns play a similar pattern. The saxophone parts are transcribed to match the voicing of the horn parts.

Trumpets are also useful in rescoring horn sections. The example below occurs in measures 26 through 32 of movement I. Due to the increasing dynamic of the music, the trumpet, rather than the saxophone, provides improved balance of voices in the ensemble.

Figure 4.3. Movement I, m. 26-32 – Original Score – Extreme horn register.

The musical score for Figure 4.3 consists of four staves for horns: Horn in F 1, Horn in F 2, Horn in F 3, and Horn in F 4. The music is in 4/4 time with a key signature of one sharp (F#). The score shows measures 26 through 32. In measure 26, the horns play a rhythmic pattern of eighth notes. In measure 27, the horns play a similar pattern. In measure 28, the horns play a similar pattern. In measure 29, the horns play a similar pattern. In measure 30, the horns play a similar pattern. In measure 31, the horns play a similar pattern. In measure 32, the horns play a similar pattern. The Horn in F 1 part has a circled number 3 above it in measure 32, indicating a third ending.

Figure 4.4. Movement I, m. 26-32 – Transcription– Adjusted voicing for horns using trumpet.

The image shows a musical score for five instruments: Trumpet in B $\flat$  2, Horn in F 1, Horn in F 2, Horn in F 3, and Horn in F 4. The score is in 2/4 time and G major. A box with the number '3' is positioned above the first staff. The Trumpet part has a melodic line with eighth and quarter notes. The Horn parts are arranged in octaves: Horn 1 (highest), Horn 2, Horn 3, and Horn 4 (lowest). The Horn 1 part has a more complex melodic line with slurs and ties.

The rescoring in the above example presents appropriate voicing for the instruments involved. Reassigning the original 1<sup>st</sup> horn line to the 2<sup>nd</sup> trumpet leaves the most difficult passage in the 3<sup>rd</sup> horn. Re-voicing this section becomes necessary to ensure the principal player is tasked with the performance of the most challenging line of music. In Figure 4.4., the 1<sup>st</sup> and 3<sup>rd</sup> horns double the musical line in octaves, with the 1<sup>st</sup> part performing the higher octave. The 2<sup>nd</sup> and 4<sup>th</sup> horns double the original 1<sup>st</sup> horn part, now reassigned to 2<sup>nd</sup> trumpet.

Kurka, on rare occasions, composed a line of music that is uncharacteristic or extremely difficult for a particular instrument. Examples occur at measures 224 and 236 of movement I.

Figure 4.5. Movement I, m. 236-239 – Original Score – Large horn leaps.

The image shows a musical score for four horns: Horn in F 1, Horn in F 2, Horn in F 3, and Horn in F 4. The score is in 2/4 time and G major. A box with the number '18' is positioned above the first staff. Each horn part has a melodic line with eighth and quarter notes. The Horn 1 part has a more complex melodic line with slurs and ties. The dynamic marking *mf* is present at the beginning of each staff.

The 1<sup>st</sup> horn voice is tasked with performing quarter-note leaps in octaves for eleven continuous measures. A second passage at measure 236, with similar material placed in a higher tessitura, makes the passage even less idiomatic. The leaps in the 2<sup>nd</sup>, 3<sup>rd</sup>, and 4<sup>th</sup> horn parts are more manageable, and can remain as written. The saxophones are available at this point in the music, and can be used to re-voice these passages for ease of performance in the horns.

Figure 4.6. Movement I, m. 236-239 – Transcription – Large horn leaps rescored with saxophones.

The 1<sup>st</sup> alto saxophone is scored to manage the most difficult line of this section. The remaining lines are doubled with the following couplings; 2<sup>nd</sup> alto saxophone/1<sup>st</sup> horn, tenor saxophone/2<sup>nd</sup> horn, and 3<sup>rd</sup> horn/4<sup>th</sup> horn. The voicings continue into rehearsal 19.

At rehearsal 15 of movement III, Kurka orchestrates the horn voices in an extremely high register at a *piano* dynamic marking.

Figure 4.7. Movement III, m. 133-136 – Original Score – Horn range at piano dynamic.

This presents an obvious problem for repeat performances. In the transcription, saxophones substitute for the horns to provide a similar timbre and a more idiomatic setting for the music.

Figure 4.8. Movement III, m. 133-136 – Transcription – Saxophones substitute for horns.

Other rescoring passages of note for the horns occur in the following locations, utilizing similar voicings as previously mentioned:

- Movement I – Rehearsal number 24, measures 312-327
- Movement III – Rehearsal number 7, measures 53-61
- Movement III – Rehearsal number 21, measures 188-195

### Trumpet Considerations and Adjustments

Register issues occur in the trumpets similar to horns. While one could argue that the original trumpet parts are playable, they would limit repeat performances of the transcription. To allow greater access, many of the moments in question have been adjusted while some remained

unedited to retain musical intent. The *Symphony*'s 1<sup>st</sup> trumpet range extends to a written D6, or sounding C6.

The first rescoring for trumpet occurs in movement I at rehearsal 15, where a muted trumpet is featured as a solo voice. The passage reaches a written D6 while demanding a *mezzo-piano* dynamic, increasing the difficulty of performance.

Figure 4.9. Movement I, m. 194-207 – Original Score – Muted trumpet solo with oboe accompaniment.

The image displays a musical score for rehearsal 15, starting at measure 194. It features three staves: Oboe 1, Oboe 2, and Trumpet in Bb 1. The key signature is one flat (Bb) and the time signature is common time (C).  
- **Oboe 1:** Starts with a whole rest in measure 194. In measure 195, it begins a melodic line with a dynamic marking of *p*.  
- **Oboe 2:** Plays a continuous accompaniment of repeated quarter notes throughout the passage, with a dynamic marking of *fff p*.  
- **Trumpet in Bb 1:** Plays a melodic line with a dynamic marking of *mp*. The notation includes the instruction "solo, con sord." and features several slurs and ties, including a long note in measure 207.

Due to similar timbres, substituting oboe for muted trumpet is an option. In the original *Symphony*, Kurka sets the oboe voices in an accompaniment role, playing repeated *staccato* quarter-notes. Reversing the roles by placing the solo part in 1<sup>st</sup> oboe and moving the *staccato* quarter-notes into muted trumpet lines solves this range issue.

Figure 4.10. Movement I, m. 194-207 – Transcription – Oboe solo with muted trumpet accompaniment.

At measure 46 of movement II, a stately moment occurs in the trumpet and trombone voices. All three trumpet voices have range demands in this passage, with the 1<sup>st</sup> trumpet reaching a D6, 2<sup>nd</sup> trumpet reaching an A5, and 3<sup>rd</sup> trumpet reaching an A-flat5.

Figure 4.11. Movement II, m. 46-52 – Original Score – Trumpet scoring with high range.

The 3<sup>rd</sup> trumpet is tasked with the melody along with the 1<sup>st</sup> oboe. The original 1<sup>st</sup> trumpet part can be lowered one octave and placed in the 3<sup>rd</sup> part for greater ease of performance.

Consequently, the 2<sup>nd</sup> trumpet plays the 3<sup>rd</sup> part (the melody), and the 1<sup>st</sup> trumpet covers the 2<sup>nd</sup> part. The rescoring of these voices occurs only for the first three bars of the statement, at which point the voices return to their original and more playable parts.

Figure 4.12. Movement II, m. 46-52 – Transcription – Adjusted trumpet scoring for range.

Measure 24 of movement III presents another register problem. All three trumpets play a sustained, harmonized musical line scored in the higher tessitura of the instrument. The B-flat clarinets are available to suitably perform the music with greater ease. The change has two added benefits:

1. It allows the trumpet performers to rest for a longer period of time, improving endurance for the entirety of the work.
2. The restatement of the theme by the trumpets in measure 159, as opposed to the clarinets, provides a timbral and dynamic change that supports the approaching climatic ending.

In the finale at measure 210, the trumpets are tasked with a long musical phrase that states the second theme of movement III. In this case, the registers were not altered for the trumpets to allow for a more powerful climatic sound. Consequently, in some instances, assistance in carrying the melodic content would be useful. The E-flat clarinet, 3<sup>rd</sup> clarinet, and

soprano saxophone, available at this point in the transcription, can double the trumpet lines. The pairings are as follows:

- Trumpet 1 with E-flat clarinet
- Trumpet 2 with soprano saxophone
- Trumpet 3 with 3<sup>rd</sup> B-flat clarinet

Regardless of the range adjustments that have been made, the 1<sup>st</sup> trumpet for the transcription still requires an advanced performer. Passages that were considered for adjustment, but ultimately were not altered for the purpose of musical intent, include the following:

- Movement I, m. 124-133
- Movement I, m. 187-190
- Movement I, m. 268-230
- Movement III, m. 159-166

### **Addition of 3<sup>rd</sup> Clarinet in B-flat**

The addition of 3<sup>rd</sup> clarinet in B-flat provides an option for doubling higher brass lines, substituting or doubling string parts, substituting for a high-register bass clarinet, or for supporting the other soprano clarinet voices. A more practical reason to add this voice is to conform to a current band instrumentation, which generally utilizes three clarinet parts.

The 3<sup>rd</sup> clarinet can double at the octave, providing a greater depth of sound within the clarinet section. This occurs immediately in the first entrance of the clarinets in movement I at measure 9. In the first three notes, the clarinet voices cover three octaves. As the music continues, the 3<sup>rd</sup> part doubles the 1<sup>st</sup> at the octave.

The 3<sup>rd</sup> clarinet may also serve as a continuation instrument, using a point of *stretto*, if the part of the bass clarinet exceeds a comfortable high range. An example occurs in movement I at measure 193. In the transcription, the bass clarinet is substituting for the original cello part, which ascends to an E5. In figures 4.13. and 4.14., a solution is presented to remedy the bass

clarinet range issue. Using a point of *stretto* in the last beat of measure 192 allows the 3<sup>rd</sup> clarinet to complete the passage.

Figure 4.13. Movement I, m. 191-194 – Original Score – Cello in high range.

Figure 4.14. Movement I, m. 191-194 – Transcription – Bass clarinet and 3<sup>rd</sup> clarinet for cello.

## Technical passages in Woodwinds and Strings

In Philip Lang’s book, *Scoring for Band*, he outlines five characteristics of an original score that should deter someone from transcribing an orchestral work for band:

1. Independent activity of woodwinds and strings in the upper register.
2. Intricate and delicate passages for violas, cellos, and basses.
3. Passages for strings of a “violinistic” character with rapid skips, changes of register, double stops, *spiccato* bowing, etc.
4. String phrases of unusually long duration and sustained intensity.
5. Passages for harp and piano.

He continues, stating, “If an orchestral score contains all or many of these characteristics it is not a good subject for band transcription.”<sup>34</sup> Though it is advantageous to be aware of these challenges, with the advancement of technology and the design of current musical instruments, lines of music that may have proven difficult in the early or middle

<sup>34</sup> Philip J. Lang, *Scoring for Band* (New York: Mills Music, Inc., 1950), 134.

20<sup>th</sup> century may, in some cases, be more easily achieved in the present day.

Interestingly, many of the challenging passages that Kurka writes in his *Symphony* involve wind instruments more often than strings.

The clarinets are faced with a daunting task at measure 102 in movement I. Kurka composed a continuous rhythmic accompaniment lasting for 50 measures. Past performers of this work would have undoubtedly omitted notes at certain points to breathe and continue performing. The advantage in the transcription is the benefit of multiple individuals on each clarinet part. The original music may be retained, while instructing the performers to alternate entrances by noting “player 1a” or “player 1b.” The following is an example:

Figure 4.15. Movement I, m. 104-109 – Transcription – Clarinet multiple performer instructions.

The musical score for measures 104-109 of Movement I is presented in four staves. The top two staves are for Clarinet in Bb 1 and Clarinet in Bb 2, and the bottom two are for Clarinet 1 and Clarinet 2. A box with the number '8' is positioned above the first measure of the Clarinet in Bb 1 staff. The music is in B-flat major and 4/4 time. The Clarinet in Bb 1 and Clarinet 1 parts (player 1a and 1b) feature a melodic line with slurs and accents, while the Clarinet in Bb 2 and Clarinet 2 parts (player 2a and 2b) provide a rhythmic accompaniment. The dynamic marking is *pp* (pianissimo).

Kurka orchestrates another difficult passage in movement III, measure 17, setting a lengthy sixteenth-note passage in the piccolo and flute voices that accompanies the main melody. The passage is 14 measures, with a note in the original published score that states, “In the parts, the flutes and piccolo alternate, as indicated, to facilitate the

performance of this and similar passages later on.” In the case of this transcription, the parts were unavailable, and the notes in the score that attempt to indicate the instructions for each player are not clear.

The entire passage of sixteenth-notes is on the piccolo staff. An attempt is made to notate where the piccolo, 1<sup>st</sup> flute, or 2<sup>nd</sup> flute voices are to enter to play the written music. Upon initial study of the score, it appears the 2<sup>nd</sup> flute voice begins the sixteenth-note passage, with *tacet* written above the piccolo staff and a note of “I. *tacet*” written above the flute staff, signifying that the 1<sup>st</sup> flute voice should rest. To designate when either the 1<sup>st</sup> flute or 2<sup>nd</sup> flute part should be playing, a *simile* mark is included in the flute staff, similar to figure 4.16. When that *simile* mark is absent, it appears the piccolo then takes over the line as written. At best, this method of notation is unclear to the conductor.

Figure 4.16. Movement III, m. 17-20 – Original Score – Flute and piccolo sixteenth-note passage.

The image shows a musical score for two staves: Piccolo and Flute I - II. The Piccolo staff is in 4/4 time and contains a sixteenth-note passage starting with a forte (f) dynamic. Above the first measure of the Piccolo staff is a box containing the number '2' and the word 'TACET'. The Flute I - II staff is in 4/4 time and contains rests. Above the first measure of the Flute I - II staff is the instruction 'II. (I. TACET)'. Below the Flute I - II staff is the instruction '(Sounding 8va lower)'. A note in the center of the score reads: '(Note: In the parts, the flutes and piccolo alternate, as indicated, to facilitate the performance of this and similar passages later on.)'

The most puzzling moment is encountered when the word “play” is written over the piccolo line at measure 24, yet “I. (II. Tacet)” is also written over the flute staff, signifying that the 1<sup>st</sup> flute voice should play and the 2<sup>nd</sup> flute voice should rest; however, the *simile* mark remains in every staff from this point up until the end of the line at measure 31. It can be assumed that Kurka did not intend to have both the piccolo and flute voice playing at the same time, but rather that they alternate as previously noted.

With the notes by the composer or publisher in the score causing confusion, reexamining and altering the piccolo and flute entrances is acceptable. Slurs were also added to aid in ease of performance. The 1<sup>st</sup> and 2<sup>nd</sup> xylophone parts double the piccolo and flute line, adding an articulated sound to the music which is desired by the original composer (See Figure 4.17.). Similar passages occur at measures 17, 159 and 196, all in movement III.

Figure 4.17. Movement III, m. 24-30 – Transcription – Alternating entrances of piccolo and flute.

The musical score is presented in three systems, each with four staves. The key signature is two sharps (D major) and the time signature is 4/4. A box with the number '3' is placed above the first staff of the first system. The instruments are Piccolo, Flute 1, Xylophone 1, and Xylophone 2. The score shows alternating entrances of the piccolo and flute. The flute part begins with a dynamic marking of *f*. The xylophone parts also feature *f* dynamics. The score is divided into measures 24, 25, and 26 across the three systems.

System 1 (Measures 24-25):  
Piccolo: Rest in m. 24, enters in m. 25 with a sixteenth-note pattern.  
Flute 1: *f* dynamic, plays a sixteenth-note pattern in m. 24, rests in m. 25.  
Xylophone 1: Rest in m. 24, enters in m. 25 with a sixteenth-note pattern.  
Xylophone 2: *f* dynamic, plays a sixteenth-note pattern in m. 24, rests in m. 25.

System 2 (Measures 25-26):  
Picc.: Continues sixteenth-note pattern in m. 25, rests in m. 26.  
Fl. 1: Rests in m. 25, enters in m. 26 with a sixteenth-note pattern.  
Xyl. 1: Continues sixteenth-note pattern in m. 25, rests in m. 26.  
Xyl. 2: Rests in m. 25, enters in m. 26 with a sixteenth-note pattern.

System 3 (Measures 26-27):  
Picc.: Rests in m. 26, enters in m. 27 with a sixteenth-note pattern.  
Fl. 1: Continues sixteenth-note pattern in m. 26, rests in m. 27.  
Xyl. 1: Rests in m. 26, enters in m. 27 with a sixteenth-note pattern.  
Xyl. 2: Continues sixteenth-note pattern in m. 26, rests in m. 27.

The string parts in the original composition presented few issues regarding musical gestures. To facilitate ease of performance, slurs were added in the transcribed wind parts for sixteenth-note passages in faster tempi. *Staccato* articulations were also added to simulate *pizzicato* technique.

One problematic musical line occurs in movement III, measures 5 through 7. The 1<sup>st</sup> violin and viola parts contain fast passages with leaps that exceed two octaves.

Figure 4.18. Movement III, m. 5-7 – Original Score – Large leaps in violin and viola.

The image shows a musical score for Violin I and Viola, measures 5 through 7. The key signature is one sharp (F#) and the time signature is 4/4. The Violin I part is written in treble clef and the Viola part is written in alto clef. Both parts feature a fast, rhythmic passage with large leaps. The first measure of each part is marked with 'div.' (divisi) and a slur. The second measure contains a large leap from a low note to a high note. The third measure continues the fast passage with further leaps. The fourth measure shows a large leap from a high note to a low note. The fifth measure continues the fast passage with further leaps. The sixth measure shows a large leap from a low note to a high note. The seventh measure continues the fast passage with further leaps. The score is presented in a standard musical notation format with a grand staff for each instrument.

Clarinets and saxophones are able to manage such a line; however, one could argue whether the two-octave leaps are necessary for retaining fidelity, or if leaping just a single octave is a possibility. The latter option allows for the composition to be more accessible while remaining true to the composer's musical intent. Additionally, mallet percussion can assist with the prominence of the line, to ensure proper balance within the ensemble.

Figure 4.19. Movement III, m. 5-7 – Transcription – Large leaps limited to one octave in winds.

The image shows a musical score for measures 5-7 of Movement III. The score is arranged in two systems. The first system includes Alto Saxophone 1, Alto Saxophone 2, Tenor Saxophone, and Baritone Saxophone. The second system includes Xylophone 1, Xylophone 2, and Glockenspiel. The key signature is one sharp (F#) and the time signature is 4/4. The wind parts feature large leaps, while the xylophone and glockenspiel parts provide harmonic support with chords and rhythmic patterns. Dynamics like *f* (forte) are indicated.

Three other instances of the same or similar gestures occur within the movement:

- Measures 35-37
- Measures 170-172
- Measures 224-227

In all cases, similar voicings were used.

### Enharmonic Spellings

Enharmonic spellings are used to assist wind players in performance. Some changes involve short lines of music, while the majority of changes are the result of double-sharps or double-flats occurring after the score is transposed in the Sibelius music notation software. The natural enharmonic equivalents of E-sharp, F-flat, B-sharp and C-flat were generally used with

few exceptions. These spelling changes do pose difficulties in the analysis of the score by the conductor, however it results in less confusion for the performers.

There are some exceptions to the use of double-accidentals that should be noted. When the use of a double-accidental results in less accidentals being written in close proximity, it is preferable. A primary example occurs in the 3<sup>rd</sup> clarinet voice in movement III, measure 5 where the clarinet is playing a sixteenth-note figure between a written D-sharp and C-double-sharp. The use of the double-sharp makes the music clearer than if the transcriber were to use a D-natural in its place. Figure 4.20. provides the comparison.

*Figure 4.20. Movement III, m. 5-6 – Transcription – Use of double-sharp.*

The image shows two musical staves for Clarinet in B $\flat$  3. The top staff is titled "With Double-sharp" and shows a sixteenth-note figure with a double-sharp (D $\sharp$ ) and a double-flat (C $\flat$ ) in close proximity. The bottom staff is titled "Without Double-sharp" and shows the same sixteenth-note figure but with a D-natural instead of a double-sharp, resulting in a more cluttered appearance with many accidentals.

When a portion of the music requires numerous enharmonic re-spellings, it is often preferable to re-notate the entire section with enharmonic equivalents. An example occurs at rehearsal 11 of movement III for the trumpet voices, and later at measure 102 for the horns. The music includes a written B-sharp and F-double-sharp for the trumpets, and written B-sharp and E-sharp for the horns in the original score. The passage also contains many sharp accidentals in general, which is not preferable for wind performers. Reading an enharmonic equivalent of the passage allows the performers to read the music with greater ease, thus improving performance. The following is an example from the trumpet voice:

Figure 4.21. Movement III, m. 98-99 – Original Score – Trumpet part before enharmonic spelling.

Figure 4.21 shows the original score for three trumpets in B-flat for measures 98-99. The score is in 4/4 time with a key signature of three sharps (F#, C#, G#). A box containing the number '11' is positioned above the first staff. Each staff is labeled 'Trumpet in B♭ 1', 'Trumpet in B♭ 2', and 'Trumpet in B♭ 3' respectively. The music is marked 'con sord.' and 'mf' (mezzo-forte). A bracket under the first measure of each staff is labeled 'as before'. The notation includes various accidentals and slurs across the two measures.

Figure 4.22. Movement III, m. 98-99 – Transcription – Trumpet part enharmonically spelled.

Figure 4.22 shows a transcription of the same three trumpet parts for measures 98-99. The key signature is changed to two sharps (F#, C#) to facilitate enharmonic spelling. A box containing the number '11' is positioned above the first staff. The parts are labeled 'Trumpet in B♭ 1', 'Trumpet in B♭ 2', and 'Trumpet in B♭ 3'. The music is marked 'mf' and 'con sord.'. A bracket under the first measure of each staff is labeled 'as before'. The notation shows how the original notes are respelled with flats and naturals to fit the new key signature.

Fragments of melodies are also respelled as necessary. One example is the melodic fragment found in the violins in movement III, measure 108. This fragment is stated often, and by multiple voices. Though the sharp and double-sharp accidentals fit the key center of E in this section, the respelling of the fragment allows for ease of reading.

Figure 4.23. Movement III, m. 108 – Enharmonic example.

The image shows two musical staves. The top staff is for Violin 1, labeled 'Original Spelling'. It is in 4/4 time with a key signature of one sharp (F#). The notes are: F#4, G4, A4, B4, C5, D5, E5, F#5. The bottom staff is for Flute 1, labeled 'Transcribed Spelling'. It is in 4/4 time with a key signature of one sharp (F#). The notes are: F#4, G4, A4, B4, C5, D5, E5, F#5. A dashed line with a double bar and a vertical line at the end is positioned above the notes in both staves, indicating a specific interval or relationship.

With the majority of enharmonic issues occurring in movement III, one could argue that the entire key of the movement could be changed. Collette Rockley states in her document that, “Awkward fingering combinations are usually the result of poor key selection by the composer or the transcriber...The farther away from the central pitch of an instrument a particular note is, the more the instrument has to be manipulated through the opening and closing of certain holes to attain that pitch.”<sup>35</sup> This statement is true from the point of view of a performer or conductor. However, a composer often takes a different approach to the decision of a key to use within a work. Respected music editor and conductor Mark Rodgers notes that Percy Grainger would often try a piece of music in many key signatures to decide which sounded the best before publishing the composition.<sup>36</sup> Based on Mark Rodgers’ observation, changing the key of any portion of *Symphony No. 2* would not ensure fidelity, as it was Kurka’s decision to set the music in the given key.

## **Chapter 5 –Summary, Conclusions and Recommendations for Further Study**

### **Summary and Conclusions**

The transcription of *Symphony No. 2* provides current band ensembles with another voice from the 1950s, a decade that witnessed a surge of new works for band by American composers. Darius Milhaud, Vincent Persichetti, Paul Hindemith, Percy Grainger, Igor Stravinsky and Morton Gould all composed significant wind band works within the lifetime of Kurka. The trends in Kurka's writing signify a desire to write for winds, considering his *Moravian Folk Songs* for chamber winds, *The Good Soldier Schweik Suite*, and the prominent use of winds in his *Symphony No. 2* and other large orchestral compositions. With prominent composers writing for wind ensembles in the 1950s, perhaps, given a longer life, Kurka would have done the same.

With the transcription of Kurka's *Symphony No. 2* for full band, the possibility of Kurka's compositional voice in a large wind setting is realized. As a result, the composer's creative melodic development, free use of dissonance in a tonal setting, and features of neo-classical music may be experienced by more wind musicians, providing further insight into American compositions of the 1950s. Even though the *Symphony* contains substantial technical challenges and a youthful vitality in the original orchestration of the composer, the work lies within the grasp of most upper-collegiate ensembles. Smaller university, college, or high school band programs may also find the work playable.

### **Recommendations for Further Study**

The transcription of *Symphony No. 2* assumes an important role in renewing interest in Robert Kurka's legacy. Transcriptions do not hold the same importance as they once did in the early 20<sup>th</sup> century, when they were the primary source of repertoire for wind bands. Since the second-half of the 20<sup>th</sup> century, the creation of original music for wind band has been, and

remains the expectation. Regardless, adapting music for other genres remains an important endeavor for enriching performers' and listeners' experiences.

Additional study is recommended of Robert Kurka's solo and chamber works, which constitute the largest portion of the composer's output. In addition, performing and recording these works would assist in introducing Kurka's music to a new generation of musicians and further understanding his compositional language. Finally, additional transcriptions of his large ensemble works would continue to offer more opportunities to explore his music.

Due to the limited publication of biographical information on Robert Kurka from 1921 through 1948, research is needed to focus on his early childhood. Research through correspondence or interviews with living relatives and perhaps the uncovering of new documentation, may provide insight into his life including early musical training and general education.

Mark Rodgers notes that a transcription or arrangement being recognized as an important addition to the band repertoire is preferred, but that "such a goal...may be unattainable for any setting of a composition which has the misfortune to be an arrangement and is therefore less than totally authentic."<sup>37</sup> Though performance of this adaptation of Kurka's *Symphony* is desired, the transcription primarily serves as a starting point to rediscover the history of the composer. The next step is the continuation of research and the performance of Kurka's works, and to learn more about a gifted American composer who has evaded intensive study for over 60 years.

Detailed description: This is a page of a musical score for orchestra and woodwinds, covering measures 238 to 247. The score is arranged in a standard orchestral layout with multiple staves. The woodwind section includes Piccolo, Flutes 1 & 2, Oboes 1 & 2, English Horn, Bassoons 1 & 2, Contrabassoon, E♭ Clarinet, Clarinets 1, 2, and 3, Bass Clarinet, Soprano Saxophone, Alto Saxophones 1 and 2, Tenor Saxophone, and Baritone Saxophone. The brass section includes Trumpets 1, 2, and 3, Horns 1 & 3 and 2 & 4, Trombones 1 and 2, Baritone Trombone, Euphonium, Tuba, and Double Bass. The percussion section includes Timpani, Snare Drum/Triple Drum, Bass Drum/Snare Drum, Cymbals, Xylophones 1 and 2, and Glockenspiel. The woodwinds and brasses have various melodic and harmonic parts, with some woodwinds playing sixteenth-note patterns. The percussion parts are primarily rhythmic accompaniment. The score is written in a key signature of one sharp (F#) and a 2/4 time signature. Measure numbers 238, 241, 244, 247, 4, 8, and 11 are indicated at the beginning of their respective staves.

This page of a musical score, numbered 31, contains measures 317 through 324. The score is arranged in a standard orchestral format with multiple staves for each instrument family. The woodwind section includes Piccolo, Flutes 1 & 2, Oboes 1 & 2, English Horn, Bassoons 1 & 2, Contrabassoon, E♭ Clarinet, Clarinets 1, 2, and 3, Bass Clarinet, Soprano Saxophone, Alto Saxophones 1 and 2, Tenor Saxophone, and Baritone Saxophone. The brass section includes Trumpets 1, 2, and 3, Horns 1 & 3 and 2 & 4, Trombones 1 and 2, Baritone Trombone, Euphonium, Tuba, and Double Bass. The percussion section includes Timpani, Snare Drum/Triple Drum, Bass Drum/Snare Drum, Cymbals, Xylophones 1 and 2, and Glockenspiel. The woodwinds and brass play melodic lines with various articulations and dynamics, including a forte (*ff*) marking. The saxophones play a rhythmic pattern of eighth notes. The percussion section is mostly silent, with some activity in the Snare Drum/Triple Drum and Snare Drum parts.

This block contains the musical notation for measures 1 through 12. It includes staves for Piccolo, Flute 1&2, Oboe 1&2, English Horn, Bassoon 1&2, Contrabassoon, Eb Clarinet, Clarinet 1, Clarinet 2, Clarinet 3, Bass Clarinet, Soprano Saxophone, Alto Saxophone 1, Alto Saxophone 2, Tenor Saxophone, and Baritone Saxophone. Performance markings such as *mf*, *pp*, *f*, *p*, *pp*, *p* cresc., *molto espress.*, and *mp cresc.* are present throughout the score.

This block contains the musical notation for measures 1 through 12 for the brass section, including Trumpets 1, 2, and 3; Horns 1&3 and 2&4; Trombones 1, 2, and Bass Trombone; Euphonium; and Tuba. The notation shows various dynamics and articulations for the instruments.

This block contains the musical notation for measures 1 through 12 for percussion and auxiliary instruments. It includes Double Bass, Snare Drum, Tom-toms, Snare Drum/Triangles, Bass Drum/Snare Drum, Cymbals, Xylophone 1, Xylophone 2/Triangles, and Glockenspiel. Dynamics like *f*, *pp*, *p*, and *ppp* are indicated.

Musical score for page 2, featuring woodwinds, strings, and percussion. The score is divided into two systems. The first system includes Piccolo, Flutes 1 & 2, Oboe and English Horn, Bassoon and Contrabassoon, Clarinets in E-flat, C1, C2, C3, Bass Clarinet, Soprano Saxophone, Alto Saxophones 1 & 2, Tenor Saxophone, and Baritone Saxophone. The second system includes Trumpets 1, 2, & 3, Horns in F and B-flat, Trombones 1, 2, & Bass, Euphonium, Tuba, Double Bass, Timpani, Snare Drum/Tom, Bass Drum/Snare Drum, Cymbals, Xylophone 1, Xylophone 2/Tom, and Glockenspiel. The score includes various musical notations such as dynamics (mf, f), articulation (arco, picc), and performance instructions (choke). A rehearsal mark '1' is present at the beginning of the second system.

Detailed description: This section of the score covers measures 128 to 150. It features woodwind and string parts. The Piccolo and Flutes 1 and 2 play a melodic line starting at measure 128. The Bassoon 1&2 part has a dense texture of sixteenth notes starting at measure 145. Clarinets 1, 2, and 3, and the Bass Clarinet play a similar melodic line. Saxophones 1 and 2 play a rhythmic accompaniment. The string section (Cbsn., Eb Cl., Cl. 1-3, B. Cl.) provides harmonic support with sustained notes and some rhythmic patterns.

This page contains a musical score for measures 202 through 205. The score is arranged in a standard orchestral format with multiple staves for each instrument. The woodwind section includes Piccolo, Flutes 1 and 2, Oboes 1 and 2, English Horn, Bassoons 1 and 2, Contrabassoon, Eb Clarinet, Clarinets 1, 2, and 3, Bass Clarinet, Soprano Saxophone, Alto Saxophones 1 and 2, Tenor Saxophone, and Baritone Saxophone. The brass section includes Trumpets 1, 2, and 3, Horns 1 and 3, Horns 2 and 4, Trombones 1 and 2, Baritone Trombone, Euphonium, Tuba, and Double Bass. The percussion section includes Timpani, Snare Drum/Triple Drum, Bass Drum/Snare Drum, Cymbal, Xylophone 1, Xylophone 2/Triple Drum, and Glockenspiel. The Piccolo part features a melodic line with slurs and accents. The woodwinds and brass parts are mostly sustained notes with slurs. The percussion parts include rhythmic patterns and sustained notes.

Detailed description: This is a page of a musical score, page 30, containing measures 206 through 231. The score is arranged in two systems. The first system includes parts for Piccolo, Flute 1 and 2, Oboe 1&2, English Horn, Bassoon 1&2, Contrabassoon, E♭ Clarinet, Clarinet 1, 2, and 3, Bass Clarinet, Soprano Saxophone, Alto Saxophone 1 and 2, Tenor Saxophone, and Baritone Saxophone. The second system includes parts for Trumpet 1, 2, and 3, Horn 1&3, Horn 2&4, Trombone 1, 2, and Bass Trombone, Euphonium, Tuba, Double Bass, Timpani, Snare Drum/Triple Snare, Bass Drum/Snare Drum, Cymbal, Xylophone 1, Xylophone 2/Triple Snare, and Glockenspiel. The score features complex rhythmic patterns, including sixteenth and thirty-second notes, and rests. Dynamic markings such as *ff* (fortissimo) are present. A rehearsal mark '23' is indicated in a box at the beginning of measure 231 in both systems.

## Appendix C – List of Works by Robert Kurka

The following is a full list of Kurka's known works, according to the *Grove Online*

*Dictionary of Music and Musicians*:<sup>38</sup>

- **Opera:**
  - o *The Good Soldier Schweik* (1957)
  
- **Orchestral:**
  - o *Chamber Symphony*, Op. 3 (1946/1948)
  - o *Symphony for brass and strings*, Op. 7
  - o *Concerto for violin and chamber orchestra*, Op. 8
  - o *Music for Orchestra*, Op. 11
  - o *Three Pieces*, Op. 15
  - o *Symphony No. 1*, Op. 17
  - o *The Good Soldier Schweik Suite* (for 16 winds and percussion), Op. 22 (1956)
  - o *Symphony No. 2*, Op. 24 (1953/1958)
  - o *Serenade for Small Orchestra* (after Walt Whitman), Op. 25
  - o *John Henry*, Op. 27 (for orchestra)
  - o *Julius Caesar Symphonic Epilogue* (after William Shakespeare), Op. 28
  - o *Concerto*, Op. 31 (for piano, strings, and trumpet)
  - o *Concerto for Marimba and Orchestra*, Op. 34 (1958)
  - o *Chamber Sinfonietta*, Op. 39
  
- **Vocal:**
  - o *Who Shall Speak for the People* (C. Sandburg), TTBB
  - o *Song of the Broadaxe*, TTBB
  
- **Chamber and Solo Instrumental:**
  - o *Sonata*, Op. 5 (for violin)
  - o *Piano Sonatina*, Op. 6
  - o *String Quartet No. 4*, Op. 12 (1950)
  - o *For the Piano*, Op. 13
  - o *Music for Clarinet, Horn, Trumpet, Violin, and Double-Bass*, Op. 14
  - o *Piano Trio*, Op. 16
  - o *Piano Sonata*, Op. 20
  - o *Sonatina* (for Cello), Op. 21
  - o *Sonata No. 3* (for violin and piano), Op. 23 (1953)

---

<sup>38</sup> *Grove Music Online*, s.v. "Kurka, Robert," accessed January 10, 2018, <http://www.oxfordmusiconline.com/grovemusic/view/10.1093/gmo/9781561592630.001.0001/0-mo-9781561592630-e-0000015691>.

- *Dance Suite* (for piano and four hands), Op. 29
- *Sonatina for Young Persons* (for piano), Op. 40
- *Seven Moravian Folksongs* (for flute, oboe, clarinet and bassoon)
- *Notes from Nature* (for piano)
- *Ballad for Horn and Strings* Op, 36
- Four other string quartets
- Three other violin sonatas
- Other piano works

Mr. Schrader,

We were able to confirm that a performance of Mr. Kurka's Symphony No. 2, Op. 24 by the San Diego Symphony did in fact occur on July 8, 1958. The conductor was John Burnett. No program, just a notice. You might check *San Diego Union-Tribune* archives for a review.

A cursory search tells me, though, that Kurka's Symphony No. 2 was actually published in 1952 or 1953, so this may not have been a premiere performance. We can't confirm if it was, sorry.

I hope this helps a little.

**Subject:** Inquiry on historical performance - Robert Kurka Symphony No. 2

Hello,

I am a doctoral wind conducting student at the University of Oklahoma, and am researching the life and works of American composer Robert F. Kurka (1921-1957), specifically his Symphony No. 2, Op. 24. According to my research, I have found that this work was premiered on July 8, 1958 (posthumously) in San Diego, but have not been able to definitively determine if it was by the San Diego Symphony.

I was hoping you all might have an archive, where a program may still be in existence from that date. If a PDF copy is available, that would be a tremendous help, but any info you may have will be useful.

I thank you for your time.

Mr. George Schrader  
University of Oklahoma
