**History of the Collection**

In the late 1950s, several prominent Oklahoma City women in fashion-related businesses initiated contacts with The Fashion Group International, Inc. headquartered in New York. As a result, a new regional "Fashion Group, Inc. of Oklahoma City (OKC Fashion Group)" was established in the fall of 1958.

One of the goals of the OKC Fashion Group was to collect garments in order to establish a "designer costume collection" covering several decades and representing significant changes in fashion design. They collected garments and accessories from prominent women in Oklahoma. The collection was to be used by fashion marketing, costume design, drama, art, and history students. The items in the collection range from the late 1800s to the 1980s.

In 1989, the OKC Fashion Group disbanded and donated the entire collection to Central State University, which is now called the University of Central Oklahoma (UCO). The collection consists of over 800 items of clothing, 338 hats, 151 pairs of shoes, 12 pairs of boots, 50+ purses, some jewelry and gloves.

The collection was kept in storage for many years and used occasionally for class instruction in the fashion marketing program. In 2014, I began the task of inventorying the collection, documenting details of each item and photographing some of the items and details.

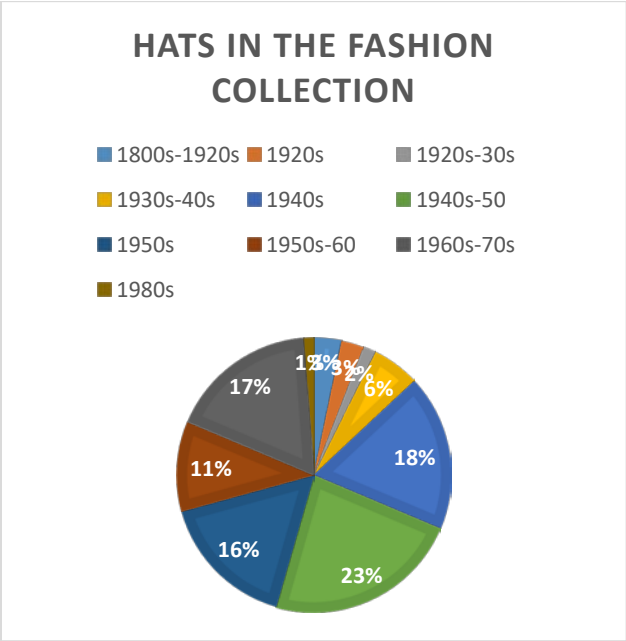

It is now 2019 and everything has been photographed, documented and inventoried. It is my sincere hope that others will find this information helpful.

**Catalog Arrangement**

The hats in the collection range in date from the late 1800s through the 1980s. The largest percentage of hats are from the 1930s through the 1970s. The following pages are arranged by decade, and then numerically by the acquisition numbers.

Since there are 338 hats in the collection the catalog is published in two volumes. Often it was difficult to determine exactly which decade a hat fit into because they were so very popular and designer and milliners made thousands and thousands of hats over the years. Deborah Miller, a textile & clothing appraiser, was very helpful in assisting me in determining the correct decade.

Below is a chart showing the different decades the hats fit into from my research, as well as the percentages of the number of hats in each category.

I sincerely hope this information is helpful to others. Hats are fun. They can make a woman wearing one feel a little bit different for a time, whether it's to be more glamorous, or spunky, funny, fashionable, or practical. Enjoy!

## List of Hat Donors

Hats in the collection were donated by several women from Oklahoma. If it is known which particular hat(s) they donated, a notation was made on the catalog pages. Oftentimes, however, the log only indicated someone donated 3 pillbox hats, or 18 flowered hats, etc.
