### **WHAT IS GRAPHIC DESIGN?**

Graphic design, also known as communication design, is the practice of planning, creating and projecting ideas and experiences with visual and textual content. The form of the communication can be physical or virtual, and may include images, words, or graphic forms. The experience can take place in an instant or over a long period of time. The work can happen at any scale, from the design of a single postage stamp to a national postal signage system, or from a company's digital avatar to the sprawling and interlinked digital and physical content of an international newspaper. It can also be for any purpose, whether commercial, educational, cultural, or political. —AIGA

### **WHAT IS INTERIOR DESIGN?**

Interior design is a multi-faceted profession in which creative and technical solutions are applied within a structure to achieve a built interior environment. These solutions are functional, enhance the quality of life and culture of the occupants and are aesthetically attractive. Designs are created in response to and coordinated with the building shell and acknowledge the physical location and social context of the project. The interior design process follows a systematic and coordinated methodology, including research, analysis and integration of knowledge into the creative process, whereby the needs and resources of the client are satisfied to produce an interior space that fulfills the project goals. Interior design includes a scope of services to protect and enhance the health, life safety and welfare of the public. –NCIDQ

### **WHAT CAN YOU DO WITH A BFA IN INTERIOR DESIGN?**

A BFA in Interior Design will give you many career opportunities. The two main categories are Commercial Design and Residential Design, but interior design is an extremely flexible field with job opportunities in textile design, lighting design, set design for stage and film, or computer-aided drafting. No matter the route you decide to go with your career, you will leave not only with the knowledge and skills to be a great designer, but you will also have a working knowledge of structural requirements, building codes, and health and safety concerns.
