Insect Update

The crop is progressing at very good rate, we will see how the cooler temperatures effect it. No new pest were reported this week. Aphids are still present in many fields but beneficial arthropods are keeping them under control. Plants should be watched closely for bollworms for at least the next 10 days. Until a field is insect-safe and terminated, I cannot overstate the importance of weekly scouting.

Caddo County Irrigated OVT – OSU Caddo Research Station, August 1, 2017

Field Surveys – Week Ending August 4, 2017

Location	Date of planting	Plant Stage	Insects	Comments
Blaine Irrigated Cotton Inc Enhanced Variety - Schantz	May 26	6.25 NAWF	NONE	GOOD
Blaine Irrigated Dow Innovation - Schantz	May 26	6.75 NAWF	NONE	GOOD
Caddo Irrigated OVT – OSU Caddo Research Station	May 30	5.75 NAWF	NONE	GOOD
Jackson Irrigated DT RACE – Darby	May 15	6.25 NAWF	APHIDS	GOOD
Jackson Irrigated Bayer CropScience APT	May 24	5.25 NAWF	APHIDS	FAIR
Jackson Irrigated OVT – OSU SWREC	May 24	6.75 NAWF	APHIDS	GOOD
Jackson Dryland DT RACE - Abernathy	June 7	6.50 NAWF	NONE	GOOD
Jackson Irrigated Cotton Inc Enhanced Variety - Abernathy	May 9	4.75 NAWF	APHIDS	GOOD
Jackson Irrigated Innovation-Abernathy	May 10	5.75 NAWF	APHIDS	GOOD
Jackson Irrigated PhytoGen Innovation Trial – OSU SWREC	May 24	5.50 NAWF	APHIDS	FAIR
Jackson Irrigated Entomology Trials – OSU SWREC	May 8	4.50 NAWF	APHIDS	FAIR
Tillman Irrigated DT RACE – Nichols	May 12	6.75 NAWF	NONE	GOOD
Tillman Dryland OVT – OSU Tipton Valley Research Center	June 13	PREBLOOM	NONE	FAIR
Tillman Dryland DT RACE - White	June 12	6.50 NAWF	NONE	GOOD

DT RACE – Dicamba Tolerant - Replicated Agronomic Cotton Evaluation Trial (Oklahoma Cooperative Extension)

OVT – Official Variety Trial (Oklahoma Agricultural Experiment Station, Altus, Tipton, Fort Cobb)

APT – Agronomic Performance Trial

Oklahoma Boll Weevil Eradication Organization Update: Quarantine of Cotton Harvesting Equipment Coming From Certain Areas of Texas

John Henderson, Director of the Oklahoma Boll Weevil Organization, based at Altus, provided the information below. Eradication of the boll weevil across most of the U.S. Cotton Belt, and in the state has been very successful and is a major contributing factor to the continued profitability of cotton production. It has been a long, difficult, and expensive task to rid our state and most of the Cotton Belt of this invasive species that for such a long time negatively impacted our production. There is still a difficult fight with this insect pest in south Texas, and we all need to do our part in keeping this pest from resurfacing in our state.

Cotton harvesting equipment entering Oklahoma from two eradication areas in Texas has to be certified as boll weevil free prior to movement into our state. Please contact the Texas Boll Weevil Eradication Foundation (TBWEF) at least 48 hours in advance of equipment departure from these two areas. This will allow TBWEF to inspect the equipment. A USDA-APHIS phytosanitary certificate is issued and is required before equipment can be transported from these areas. These ONLY include the Lower Rio Grande Valley Eradication Zone (blue area on the map below) or the East Texas Maintenance Area (brown area on the map below). This is critical to meet USDA-APHIS requirements and prevent the re-infestation of boll weevils into eradicated areas. It is illegal to move non-certified cotton harvesting equipment from these areas into the state of Oklahoma.
