❖ Disclaimers

- This presentation is not a prescription for how anyone else should proceed.

❖ Disclaimers

- This presentation is not a prescription for how anyone else should proceed.
- This presentation is not a judgment on Ex Libris hosted Services.

❖ Disclaimers

- This presentation is not a prescription for how anyone else should proceed.
- This presentation is not a judgment on Ex Libris hosted Services.
- **We began and still have our SFX and MetaLib services hosted by Ex Libris.**

❖ Disclaimers

- This presentation is not a prescription for how anyone else should proceed.
- This presentation is not a judgment on Ex Libris hosted Services.
- We began and still have our SFX and MetaLib services hosted by Ex Libris.
- **When we began with Voyager and Primo, no hosted solution was available.**

❖ Disclaimers

- This presentation is not a prescription for how anyone else should proceed.
- This presentation is not a judgment on Ex Libris hosted Services.
- We began and still have our SFX and MetaLib services hosted by Ex Libris.
- When we began with Voyager and Primo, no hosted solution was available.
- **This is not an argument against off-computer or off-site hosting/storage.**

❖ Primary Stakeholders

This requires a strong collaborative spirit. All parties involved must be on board for a successful implementation and ongoing quality support.

- Library
- Office of Information Technology
- University Executive Body

➤ Library:

We considered the following factors to host locally or not:

- Physical Infrastructure (building, power, network bandwidth ...);

➤ Library:

We considered the following factors to host locally or not:

- Physical Infrastructure (building, power, network bandwidth ...);
- Moving from dedicated to shared;

➤ Library:

We considered the following factors to host locally or not:

- Physical Infrastructure (building, power, network bandwidth ...);
- Moving from dedicated to shared;
- Software (OS, DBs, Application)Infrastructure;

➤ Library:

We considered the following factors to host locally or not:

- Physical Infrastructure (building, power, network bandwidth ...);
- Moving from dedicated to shared;
- Software (OS, DBs, Application)Infrastructure;
- Human Infrastructure (Systems Staff);

- **Library Administration and Staff**

➤ Office of Information Technology

Information Technology considers the following factors:

- Local Infrastructure and facilities – Data Center;

➤ Office of Information Technology

Information Technology considers the following factors:

- Local Infrastructure and facilities – Data Center;
- **Virtualization and server consolidation ;**

➤ Office of Information Technology

Information Technology considers the following factors:

- Local Infrastructure and facilities – Data Center
- Virtualization and server consolidation ;
- **Storage systems that scale with data volumes;**

➤ Office of Information Technology

Information Technology considers the following factors:

- Local Infrastructure and facilities – Data Center
- Virtualization and server consolidation ;
- Storage systems that scale with data volumes;
- **existing technology support staff;**

➤ Office of Information Technology

Information Technology considers the following factors:

- Local Infrastructure and facilities – Data Center
- Virtualization and server consolidation ;
- Storage systems that scale with data volumes;
- existing technology support staff;
- **Technical vulnerability assessments, including intrusion detection systems in place;**

➤ Office of Information Technology

Information Technology considers the following factors:

- Local Infrastructure and facilities – Data Center
- Virtualization and server consolidation ;
- Storage systems that scale with data volumes;
- existing technology support staff;
- Technical vulnerability assessments, including intrusion detection systems in place;
- **Locally hosted systems can be more extensible;**

➤ Office of Information Technology

Information Technology considers the following factors:

- Local Infrastructure and facilities – Data Center
- Virtualization and server consolidation ;
- Storage systems that scale with data volumes;
- existing technology support staff;
- Technical vulnerability assessments, including intrusion detection systems in place;
- Locally hosted systems can be more extensible;
- **Even if higher upfront cost, we have already made investment in on-site infrastructure;**

➤ University Executive Body:

University Administration considers the following factors:

- Being a state supported university, do we have a legislative mandate to do this;

➤ University Executive Body:

University Administration considers the following factors:

- Being a state supported university, do we have a legislative mandate to do this
- Existing infrastructure;

➤ University Executive Body:

University Administration considers the following factors:

- Being a state supported university, do we have a legislative mandate to do this
- Existing infrastructure;
- Support Staff availability and expertise;

➤ University Executive Body:

University Administration considers the following factors:

- Being a state supported university, do we have a legislative mandate to do this
- Existing infrastructure;
- Support Staff availability and expertise;
- Ensuring “High Availability”;

➤ University Executive Body:

University Administration considers the following factors:

- Being a state supported university, do we have a legislative mandate to do this
- Existing infrastructure;
- Support Staff availability and expertise;
- Ensuring “High Availability”;
- **Costs vs. Savings**

❖ “Cost”

❖ “Cost”

➤ Financial Cost
