### Scrap, Scrap, Scrap

The nation's newspapers have taken on a tremendous job, that of digging out enough scrap metal to keep the U. S. war furnaces roaring all winter, and Oklahoma has called on N. D. Welty of Bartlesville, who calls himself a medium-sized country editor, to see that the state finds and turns in its share.

Welty rolled up his sleeves at the state scrap headquarters in Oklahoma City and said it was going to mean hard work for everybody in Oklahoma, especially the newspapers, "but work never scared a country editor."

"They haven't told us yet what our quota is, but whatever it is, we know we are going to get co-operation from everybody to find every ounce of it," the director-general of the Oklahoma Press Association's salvage campaign said. The campaign will start September 28 and end October 17, with the "Junior Army" of school children beginning their own war on Iron Slackers October 5.

Three thousand dollars in war bonds have been posted by Oklahoma City and Tulsa newspapers as prizes for the county, the schools, the junior organizations, the adult organizations and the individuals locating and turning in the most scrap during the campaign. Rubber as well as iron and steel and other metals will be counted.

The Independent will pitch in with the county's other newspapers to see that Creek county wins the \$1,000 grand championship prize.

The money is to go to whatever worthy purpose the county scrap drive committee designates.

This isn't a question of trying to hog the glory, but a question of meeting the emergency", is the way Welty looks at the newspapers' participation in the scrap gathering campaign. "Our government says it needs scrap iron, now, and the newspapers are going to help the local salvage committees get it. They've been doing a fine job."

## Grade School In The Scrap

The grade school rooms have  
collected and weighed the following  
amounts of scrap iron up to and in-  
cluding Tuesday morning:

First Grade	112 lbs.
Second Grade	1097 lbs.
Third Grade	600 lbs.
Fourth Grade	908 lbs.
Fifth & Sixth Grades	1971 lbs.
Seventh and Eighth Grades	5107 lbs.

This makes them a total of near-  
ly five tons.

These pupils have been doing a  
nice job bringing in this scrap iron.  
Their efforts will not only help out

**★ GIVE ME YOUR OLD JUNK**

The boys and girls of Depew and of Creek County are part of a national Junior Army which on October 5 will begin a great attack.

The attack is against the worst enemy within our borders today. The enemy could stop our factories from making guns and ships and planes. The enemy could prevent those weapons from being made by preventing manufacture of the steel out of which parts of those weapons are made.

That enemy is starvation of the steel mills.

But the school pupils of our nation, organized in a great Junior Army, are going to feed the mills. They are going to find and bring together the things out of which tanks and ships are made—things like rusty pipe, broken bed springs, air guns that won't shoot any more. Around Depew and Creek County that is junk, scrap. But after it has gone through the mills it is bombs for the Nazis and bullets for the Japs.

The regiment in Depew is headed by Colonel Myron Cunningham.

Each school principal is a major in the Junior Army. Under each major come the captains, the teach-

to donate to now, rest Uncle Sam sends around a representative soliciting the use of your salvage.

#### Schools Going Ahead

Supt. Myron Cunningham reports the goal of the schools will be five tons of scrap. Each school child is canvassing his neighborhood and already the grade school children have brought in 3678 pounds of salvage.

The Inman Page school has dug up 5 or 6 rubber tires beside their salvage.

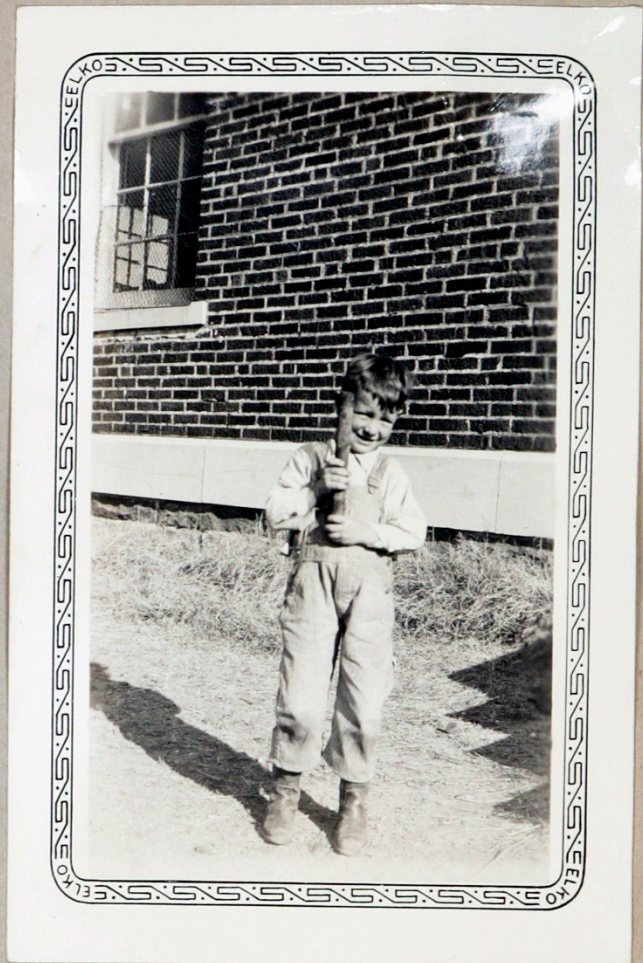

#### Organizations Should Enter

There will be war bonds given as prizes for the most salvage turned in and all churches, clubs, and organizations should enter this campaign and help some organization win a war bond and the proceeds may be used locally.

If an individual wishes to sell his or her salvage, this is alright—the main thing is to get it into the war production and let's win this war.

ers. School boys and girls of each school room will be the lieutenants, sergeants, corporals and privates of the Junior Army. Those who do well will be promoted, just like real soldiers in the fighting army.

For, so long as the junk lies un-gathered, it is part of the starvation enemy of our steel mills, our war factories, and our fighting men. The boys and girls of Depew and Creek County are going to find and take prisoner all of that enemy in this part of our nation.

year do something for the country in which live and love so well. Give to the scrap drive, but don't make scrape out of what can be useful to some one.

The recent campaign for scrap metal has closed and the poundage of the collection is being weighed—but Uncle Sam is still calling for metal, burlap, fats, rubber, etc.

It is up to the civilians to see that the work here at home is carried out in full and that means for everyone to keep working at the job.

Please notify any member of the faculty or grade school pupils.

## Depew Busy Gathering In The Scrap

From the authentic reports given this week, the citizens of Depew have been busy gathering up all the old scrap iron for the salvage drive. Housewives are scouring their homes and making substitutes for the place of iron items in many cases. Uncle Sam is needing all the scrap iron to keep the furnaces going this winter to help win the war that is now raging over the world. Amunition must be made for our boys who are now in training camps all over the United States and some allied nations, waiting for the time when they will be called out to subdue the enemy.

The salvage campaign is so intense that if you have scrap iron that has not been given do not fail to donate it now, lest Uncle Sam sends around a representative soliciting the use of your salvage.
