WE REPORT TO THE NATION

We herewith submit a bird's-eye view report of our
SCHOOLS AT WAR Program. It includes factual and pictorial
accounts of our War Savings Program and other outstanding
war activities. It is tangible proof of the resourcefulness, skills,
activities and the will to win of every student, teacher and
parent enlisted in our SCHOOLS AT WAR Program.

SCHOOLS AT WAR

Our Country is now in this war, and we as students must do everything that is in our power to help win in the shortest possible time, with the minimum loss of lives. We are not on the battle fronts, working in defense plants, or other vital plants that are engaged in the manufacture of vital war materials, but we can buy war bonds and stamps, gather scrap materials necessary for war production. Vital materials that are needed now are copper, iron, magnesium, tin, rubber, paper, and aluminum and many others. They are used in making planes and ships, rubber life boats, military cars and jeeps for Army and Navy Officers. Schools all over the country are sponsoring scrap drives to collect metals, to help win this war. Most schools have made plans for students to buy War Stamps and Bonds. "Does your school have this plan?" Schools are at war because their country is at war. They are training men for vital defense jobs. We are a united people, we work together, and in the end we shall have an everlasting peace together.

5th.	"	-----	3048 lbs.
6th.	"	-----	86 lbs.
7th.	"	-----	186 lbs.
8th.	"	-----	1052 lbs.
9th. & 10th.		-----	100 lbs.
11th. & 12th.	"	-----	<u>723 lbs.</u>
			8438 lbs.

11" x 14"

The Industrial Arts classes of Napier High School are putting forth every effort to complete the required quota of Air Craft Models given by the "Bureau of Aeronautics", for the purpose of air craft recognition and gunnery sighting practice.

Some of the important things a student can learn by construction of models are first, the value of precision. A model that does not conform to exact specifications is useless. Second, he can learn the value of speed and third, he can learn about Air Crafts of all the Major Nations.

Each student who produces stated quantities of accepted models will receive an individual certificate issued by the United States Navy Bureau of Aeronautics. This certificate will include his name and a statement of the importance of the work.

THE HOME-ECONOMICS DEPARTMENT AT WAR

The Home-Economics Department of the Napier High School is very proud to say that it is doing its bit to serve better meals, in order to help Uncle Sam save.

The Program for the year has been built around the present day situation, which contributes much to the war-effort program. In the foods classes much stress has been placed on War-Time Cookery, Food Preservation and New Food Substitutes. Although we are not able to go on the fighting front we are doing our bit at home and in the kitchen. We are helping to make a bigger and better America by using more milk, fruits, vegetables and meat substitutes.
