MAPS.

	Page.
Increase and decrease of population between 1880 and 1890.....	xii
Density of total population: 1790.....	xix
Density of total population: 1800.....	xx
Density of total population: 1810.....	xxi
Density of total population: 1820.....	xxii
Density of total population: 1830.....	xxiii
Density of total population: 1840.....	xxiv
Density of total population: 1850.....	xxiv
Density of total population: 1860.....	xxv
Density of total population: 1870.....	xxvi
Density of total population: 1880.....	xxvii
Density of total population: 1890.....	xxviii
Center of population: 1890 (sketch).....	xxxvi
Center of population: 1790 to 1890.....	xxxvii
Gain or loss of rural population between 1880 and 1890.....	lxx
The predominating sex: 1890.....	lxxiv
Proportion of foreign to aggregate population: 1890.....	lxxxii
Density of foreign population: 1890.....	lxxxiii
Density of colored population: 1890.....	xcv
Proportion of colored to aggregate population: 1890.....	xcvi
Density of the natives of Canada and Newfoundland: 1890.....	cxliii
Density of the natives of Ireland: 1890.....	cxliv
Density of the natives of Great Britain: 1890.....	cxlv
Density of the natives of Germanic nations: 1890.....	cxlvi
Density of the natives of Scandinavian nations: 1890.....	cxlvii
Density of the Italian, French, Spanish, and Portuguese population: 1890.....	cxlviii
Density of the Russian, Pole, and Bohemian population: 1890.....	cxlviii
Proportion of whites of foreign parentage to all whites: 1890.....	clx
Average size of families: 1890.....	clxxxviii

DIAGRAMS.

Proportion of urban to total population, by states and territories (historical).....	lxv
Urban and total population, by states and territories: 1890.....	lxviii
Constituents of the population, by states and territories: 1890.....	lxxxv
Constituents of the population of the great cities: 1890.....	xcii
Rates of increase of the white and negro population: 1790 to 1890.....	xciv
Nativity of foreign born population: 1890.....	cxxxv
Number of natives of Germanic nations and Ireland: 1890.....	cxxxvii
Number of natives of Great Britain, Canada and Newfoundland, Scandinavian nations, Slav nations, and Latin nations: 1890.....	cxxxvii
Conjugal condition of the population: 1890.....	clxxxi
Population of each state and territory: 1890.....	1
Number of inhabitants to the square mile, by states and territories: 1890.....	6
The total population and its elements at each census: 1790 to 1890.....	395

Letter of transmittal of the Commissioner of Labor in charge to the Secretary of the Interior.....

PROGRESS OF THE NATION.

AGGREGATE POPULATION.....	xi-xviii
Aggregate population of the United States and percentage of increase during each decade: 1790 to 1890.....	xi
Percentage of increase in total population, by states and territories: 1790 to 1890.....	xiii
Rank in population of states and territories: 1880 and 1890.....	xvii
PROGRESS OF THE NATION: 1790 TO 1890.....	xviii-xxviii
VACANT SPACES ON THE DENSITY MAP.....	xxviii-xxx
SETTLED AREA IN 1890.....	xxx-xxxiv
Areas in square miles of the total settled area and of the different groups of settlement: 1790 to 1890.....	xxxi
Areas in square miles of the total settled area and of the different groups of settlement, by states and territories: 1890.....	xxxiii
DENSITY OF POPULATION.....	xxxiv-xxxvi
Gross area and land and water surface of states and territories: 1890.....	xxxiv
Number of inhabitants per square mile, by states and territories: 1790 to 1890.....	xxxv
CENTER OF POPULATION.....	xxxvi, xxxvii
Position of the center of population: 1790 to 1890.....	xxxvii
GEOGRAPHICAL DISTRIBUTION OF POPULATION: 1870 TO 1890.....	xxxvii-lxiv
Distribution according to drainage basins.....	xxxvii-xliii
Distribution in accordance with topographic features.....	xliii-xlvi
Distribution in accordance with altitude.....	xlvi-l
Distribution in accordance with mean annual temperature.....	l-lii
Distribution in accordance with mean annual rainfall.....	lii, liii
Distribution in accordance with mean relative humidity of the atmosphere.....	liv, lv
Distribution in accordance with latitude and longitude.....	lv-lxiv
URBAN POPULATION.....	lxv-lxix
Urban and total population of the United States, and percentage of urban of total population: 1790 to 1890.....	lxv
Rank of cities having a population of 100,000 or more: 1870 to 1890.....	lxvi
Population of 50 principal cities in 1890, in the order of rank, with population for 1880 and increase during the decade.....	lxvii
Urban population, by states and territories: 1880 and 1890.....	lxviii
RURAL POPULATION.....	lxix-lxxi
Percentage of total area showing loss in rural population, by states and territories: 1890.....	lxx
Increase or decrease in rural population since 1880, by states and territories.....	lxx
SEX.....	lxxi-lxxviii
Percentage of males and females of total population, by states and territories: 1850 to 1890.....	lxxii
Relative proportions of females to males, by states and territories: 1870 to 1890.....	lxxiv
Increase in males and females, by states and territories: 1850 to 1890.....	lxxvii, lxxviii
GENERAL NATIVITY.....	lxxix-xciii
Native and foreign born population of the United States: 1850 to 1890.....	lxxix
Percentage of native and foreign born of total population, by states and territories: 1850 to 1890.....	lxxxiii
Relative proportions of foreign to native born, by states and territories: 1870 to 1890.....	lxxxv
Increase in native and foreign born, by states and territories: 1850 to 1890.....	lxxxvii, lxxxviii
Proportion of foreign born in principal cities, and in remainder of the country, compared with total population: 1890.....	xc
Native and foreign born population of the principal cities and of the states in which they are situated: 1890.....	xcii
COLOR.....	xciii-ciii
White and negro population of the United States: 1790 to 1890.....	xciii, xciv
Percentage of white and negro of total population, by states and territories: 1850 to 1890.....	xcv
Relative proportions of negroes to whites, by states and territories: 1870 to 1890.....	xcviii
Increase in white and negro population, by states and territories: 1850 to 1890.....	ci, cii
STATE OR TERRITORY OF BIRTH.....	ciii-cxxxiv
Native born, native white, and native colored persons born and living in each state or territory: 1880 and 1890.....	civ-cvii
Native white persons of native and foreign parentage born and living in each state or territory: 1890.....	cix
Native born persons living in each state or territory who were born in other states and territories, etc.: 1890.....	cx
Distribution of persons living in each state or territory who were born in other states and territories: 1890.....	cxii
Number of foreign born persons, persons born and living in state or territory, and other native born persons, by states and territories: 1880 and 1890.....	cxviii
Number of persons born in each state or territory who were living there or in other states and territories: 1880 and 1890.....	cxxi
Distribution of persons born in each state or territory who were living in other states and territories: 1890.....	cxxii
Number of foreign born persons, persons born in state or territory in which each city is situated, and other native born persons, in each of the 124 principal cities: 1890.....	cxxvi
Percentage of foreign born persons, persons born in state in which each city is situated, and other native born persons, in each of 50 principal cities: 1880 and 1890.....	cxxix
Distribution of persons living in each specified city who were born outside the state or territory in which it is situated: 1890.....	cxxxi
Distribution of persons born in each state or territory who were living in certain specified cities: 1890.....	cxxxii

	Page.
COUNTRY OF BIRTH.....	cxxxiv-cliii
Total foreign born population distributed according to country of birth: 1890.....	cxxxv
Total persons born in each specified country, distributed according to geographical divisions: 1890.....	cxxxvi
Foreign born population of certain states distributed according to principal countries of birth: 1890.....	cxxxviii
Foreign born population distributed according to principal countries of birth: 1850 to 1890.....	cxl
Percentage of population and of foreign born, and density, for certain nationality groups, by states and territories: 1890.....	cxliii-cl
Distribution of the foreign born by principal countries of birth in 124 principal cities and the country at large: 1890.....	cl
Distribution of the foreign born by principal countries of birth, for cities having 100,000 inhabitants or more: 1890.....	cli
Distribution of the foreign born by principal countries of birth, for cities having less than 100,000 inhabitants but containing more than 20,000 foreign born persons: 1890.....	clii
Distribution of the foreign born by principal countries of birth in 50 principal cities: 1880 and 1890.....	cliii
FOREIGN PARENTAGE.....	cliv-clxxv
Total persons of foreign parentage, by states and territories: 1870 to 1890.....	clv
White and colored persons of foreign parentage, by states and territories: 1890.....	clviii
Native and foreign white persons of foreign parentage, by states and territories: 1890.....	clx
Total, white, native white, and foreign white persons of foreign parentage, for cities having 25,000 inhabitants or more: 1890.....	clxii
White persons of foreign parentage having either one or both parents born in specified countries or who were of mixed foreign parentage, by states and territories: 1890.....	clxvi
White persons of foreign parentage having either one or both parents born in specified countries or who were of mixed foreign parentage, for cities having 400,000 inhabitants or more: 1890.....	clxix
Distribution of white persons of mixed foreign parentage in detail by combinations of parentage.....	clxx
White persons having fathers and mothers born in certain specified countries.....	clxxi
Persons born in Canada and Newfoundland of English or French extraction, by states and territories: 1890.....	clxxiii
White persons having either one or both parents born in Canada and Newfoundland of English or French extraction, by states and territories: 1890.....	clxxiv
PERSONS OF SCHOOL AGE.....	clxxvi, clxxvii
MALES OF MILITIA AGE.....	clxxvii
MALES OF VOTING AGE.....	clxxviii
CONJUGAL CONDITION.....	clxxix-clxxxviii
Conjugal condition of the aggregate population, classified by sex, general nativity, color, and age periods: 1890.....	clxxix-clxxxiii
Conjugal condition of persons 20 years of age and over, classified by sex, general nativity, and color: 1890.....	clxxxiii-clxxxvi
Proportion of divorced to married persons.....	clxxxvii, clxxxviii
DWELLINGS AND FAMILIES.....	clxxxviii-cc
Increase in dwellings and families, by geographical divisions: 1880 to 1890.....	clxxxviii-cxc
Total dwellings and families, and persons to a dwelling and to a family, for cities having 25,000 inhabitants or more: 1890.....	cxci
Percentage of dwellings containing specified numbers of persons, and percentage of total population in each class.....	cxcii, cxci
Percentage of families containing specified numbers of persons, and percentage of total population in each class.....	cxci
Average number of families to a dwelling, for cities having 100,000 inhabitants or more: 1890.....	cxci, cxci
Persons to a dwelling and to a family, and families to a dwelling, for New York city by wards.....	cxvii-cc
INDIAN POPULATION.....	cc
ALASKA.....	cci
FORM OF SCHEDULE AND METHOD OF TABULATION.....	ccii-ccvi
APPORTIONMENTS.....	ccvii-ccxiv

GENERAL TABLES.

STATES AND TERRITORIES.....	1-6
Table 1.—Population of states and territories at each census: 1790 to 1890.....	2, 3
Table 2.—Increase in population of states and territories at each census: 1790 to 1890.....	4, 5
Table 3.—Density of population of states and territories at each census: 1790 to 1890.....	6
COUNTIES.....	7-46
Table 4.—Population of states and territories by counties, at each census: 1790 to 1890.....	9-46
MINOR CIVIL DIVISIONS.....	47-368
Table 5.—Population of states and territories by minor civil divisions: 1880 and 1890.....	52-368
CITIES, TOWNS, VILLAGES, AND BOROUGHES.....	369-392
Table 6.—Population of cities having 25,000 inhabitants or more in 1890, at each census: 1790 to 1890.....	370-373
Table 7.—Increase in population of cities having 25,000 inhabitants or more in 1890, at each census: 1790 to 1890.....	374-377
Table 8.—Population of cities, towns, villages, and boroughs having 1,000 inhabitants or more in 1890, with population for 1880.....	378-392
SEX, GENERAL NATIVITY, AND COLOR.....	393-558
Table 9.—Population by sex, general nativity, and color, by states and territories: 1890.....	395, 396
Table 10.—Colored population classified as negroes, mulattoes, quadroons, octoroons, Chinese, Japanese, and civilized Indians, by states and territories: 1890.....	397
Table 11.—Male and female population, by states and territories: 1850 to 1890.....	398
Table 12.—Native and foreign born population, by states and territories: 1850 to 1890.....	399
Table 13.—White and negro population, by states and territories: 1850 to 1890.....	400
Table 14.—Chinese, Japanese, and civilized Indian population, by states and territories: 1860 to 1890.....	401
Table 15.—Native and foreign born and white and negro population, by counties: 1870 to 1890.....	402-436
Table 16.—Chinese population, by counties: 1870 to 1890.....	437-441
Table 17.—Japanese population, by counties: 1870 to 1890.....	442, 443
Table 18.—Civilized Indian population, by counties: 1870 to 1890.....	444-450

CONTENTS—PART I.

SEX, GENERAL NATIVITY, AND COLOR—Continued.	Page.
Table 19.—Population by sex, general nativity, and color, of places having 2,500 inhabitants or more: 1890.....	451-485
Table 20.—Native and foreign born and white and colored population, classified by sex, by states and territories: 1890....	486, 487
Table 21.—Negro, Chinese, Japanese, and civilized Indian population, classified by sex, by states and territories: 1890.....	488
Table 22.—Native and foreign born and white and colored population, classified by sex, by counties: 1890.....	489-523
Table 23.—Native and foreign born and white and colored population, classified by sex, of places having 2,500 inhabitants or more: 1890.....	524-558
STATE OR TERRITORY OF BIRTH.....	559-604
Table 24.—Native population, distributed according to state or territory of birth, by states and territories: 1890.....	560-563
Table 25.—Native white population, distributed according to state or territory of birth, by states and territories: 1890....	564-567
Table 26.—Native white population of native parentage, distributed according to state or territory of birth, by states and territories: 1890.....	568-571
Table 27.—Native white population of foreign parentage, distributed according to state or territory of birth, by states and territories: 1890.....	572-575
Table 28.—Native colored population, distributed according to state or territory of birth, by states and territories: 1890..	576-579
Table 29.—Native population, distributed according to state or territory of birth, for cities having 25,000 inhabitants or more: 1890.....	580-587
Table 30.—Native white population of native parentage, distributed according to state or territory of birth, for cities having 25,000 inhabitants or more: 1890.....	588-595
Table 31.—Native white population of foreign parentage, distributed according to state or territory of birth, for cities having 25,000 inhabitants or more: 1890.....	596-603
COUNTRY OF BIRTH.....	605-678
Table 32.—Foreign born population, distributed according to country of birth, by states and territories: 1890.....	606-609
Table 33.—Foreign born population, distributed according to country of birth, by counties: 1890.....	610-669
Table 34.—Foreign born population, distributed according to country of birth, for cities having 25,000 inhabitants or more: 1890.....	670-677
FOREIGN PARENTAGE.....	679-730
Table 35.—Aggregate, white, and colored population, distributed according to native or foreign parentage, by states and territories: 1890.....	681
Table 36.—White persons having either foreign fathers and foreign mothers, foreign fathers and native mothers, or foreign mothers and native fathers, by states and territories: 1890.....	682, 683
Table 37.—White persons having both parents born in specified countries, or of mixed foreign parentage, by states and territories: 1890.....	684, 685
Table 38.—Native white persons having both parents born in specified countries, or of mixed foreign parentage, by states and territories: 1890.....	686, 687
Table 39.—Foreign white persons having both parents born in specified countries, or of mixed foreign parentage, by states and territories: 1890.....	688, 689
Table 40.—White persons having fathers born in specified countries and native mothers, by states and territories: 1890....	690
Table 41.—Native white persons having fathers born in specified countries and native mothers, by states and territories: 1890.....	691
Table 42.—Foreign white persons having fathers born in specified countries and native mothers, by states and territories: 1890.....	692
Table 43.—White persons having mothers born in specified countries and native fathers, by states and territories: 1890....	693
Table 44.—Native white persons having mothers born in specified countries and native fathers, by states and territories: 1890.....	694
Table 45.—Foreign white persons having mothers born in specified countries and native fathers, by states and territories: 1890.....	695
Table 46.—White persons having fathers born in specified countries and mothers born in some other foreign country, by states and territories: 1890.....	696
Table 47.—White persons having mothers born in specified countries and fathers born in some other foreign country, by states and territories: 1890.....	697
Table 48.—White persons of mixed foreign parentage, classified according to principal combinations of parentage, by states and territories: 1890.....	698-701
Table 49.—White persons having either fathers or mothers born in specified countries, by states and territories: 1890.....	702, 703
Table 50.—Aggregate, white, and colored population, distributed according to native or foreign parentage, for cities having 25,000 inhabitants or more: 1890.....	704, 705
Table 51.—White persons having either foreign fathers and foreign mothers, foreign fathers and native mothers, or foreign mothers and native fathers, for cities having 25,000 inhabitants or more: 1890.....	706, 707
Table 52.—White persons having both parents born in specified countries, or of mixed foreign parentage, for cities having 25,000 inhabitants or more: 1890.....	708, 709
Table 53.—Native white persons having both parents born in specified countries, or of mixed foreign parentage, for cities having 25,000 inhabitants or more: 1890.....	710, 711
Table 54.—Foreign white persons having both parents born in specified countries, or of mixed foreign parentage, for cities having 25,000 inhabitants or more: 1890.....	712, 713
Table 55.—White persons having fathers born in specified countries and native mothers, for cities having 25,000 inhabitants or more: 1890.....	714, 715
Table 56.—Native white persons having fathers born in specified countries and native mothers, for cities having 25,000 inhabitants or more: 1890.....	716, 717
Table 57.—Foreign white persons having fathers born in specified countries and native mothers, for cities having 25,000 inhabitants or more: 1890.....	718, 719
Table 58.—White persons having mothers born in specified countries and native fathers, for cities having 25,000 inhabitants or more: 1890.....	720, 721

	Page.
FOREIGN PARENTAGE—Continued.	
Table 59.—Native white persons having mothers born in specified countries and native fathers, for cities having 25,000 inhabitants or more: 1890.....	722, 723
Table 60.—Foreign white persons having mothers born in specified countries and native fathers, for cities having 25,000 inhabitants or more: 1890.....	724, 725
Table 61.—White persons having fathers born in specified countries and mothers born in some other foreign country, for cities having 25,000 inhabitants or more: 1890.....	726, 727
Table 62.—White persons having mothers born in specified countries and fathers born in some other foreign country, for cities having 25,000 inhabitants or more: 1890.....	728, 729
SCHOOL, MILITIA, AND VOTING AGES.....	731-826
Table 63.—Persons of school age, 5 to 17 years, inclusive, by general nativity and color, by states and territories: 1890....	733
Table 64.—Persons of school age, 18 to 20 years, inclusive, by general nativity and color, by states and territories: 1890....	734
Table 65.—Persons of school age, 5 to 20 years, inclusive, by general nativity and color, by states and territories: 1890....	735
Table 66.—Males of school age, 5 to 17 years, inclusive, by general nativity and color, by states and territories: 1890.....	736
Table 67.—Females of school age, 5 to 17 years, inclusive, by general nativity and color, by states and territories: 1890....	737
Table 68.—Males of school age, 18 to 20 years, inclusive, by general nativity and color, by states and territories: 1890.....	738
Table 69.—Females of school age, 18 to 20 years, inclusive, by general nativity and color, by states and territories: 1890....	739
Table 70.—Males of school age, 5 to 20 years, inclusive, by general nativity and color, by states and territories: 1890.....	740
Table 71.—Females of school age, 5 to 20 years, inclusive, by general nativity and color, by states and territories: 1890....	741
Table 72.—Persons of school age, 5 to 20 years, inclusive, by general nativity and color, of cities having 25,000 inhabitants or more: 1890.....	742, 743
Table 73.—Males of school age, 5 to 20 years, inclusive, by general nativity and color, of cities having 25,000 inhabitants or more: 1890.....	744, 745
Table 74.—Females of school age, 5 to 20 years, inclusive, by general nativity and color, of cities having 25,000 inhabitants or more: 1890.....	746, 747
Table 75.—Males of militia age, by general nativity and color, by states and territories: 1890.....	748
Table 76.—Males of militia age, by general nativity and color, of cities having 25,000 inhabitants or more: 1890.....	749, 750
Table 77.—Males of voting age, by general nativity and color, by states and territories: 1890.....	751
Table 78.—Males of voting age, by general nativity and color, of cities having 25,000 inhabitants or more: 1890.....	752, 753
Table 79.—Persons of school, militia, and voting ages, by sex, general nativity, and color, by counties: 1890.....	754-789
Table 80.—Persons of school, militia, and voting ages, by sex, general nativity, and color, of places having 2,500 inhabitants or more: 1890.....	790-825
CONJUGAL CONDITION.....	827-910
Table 81.—Conjugal condition of the aggregate population, classified by sex, by states and territories: 1890.....	829
Table 82.—Conjugal condition of the aggregate population of the United States, classified by sex, general nativity, color, and age periods: 1890.....	830, 831
Table 83.—Conjugal condition of the aggregate population, classified by sex, general nativity, color, and age periods, by states and territories: 1890.....	832-880
Table 84.—Conjugal condition of the aggregate population, classified by sex, for cities having 25,000 inhabitants or more: 1890.....	881, 882
Table 85.—Conjugal condition of the aggregate population, classified by sex, general nativity, color, and age periods, for cities having 100,000 inhabitants or more: 1890.....	883-910
DWELLINGS AND FAMILIES.....	911-960
Table 86.—Total dwellings and persons to a dwelling, by states and territories: 1850 to 1890.....	913
Table 87.—Total families and persons to a family, by states and territories: 1850 to 1890.....	914
Table 88.—Total dwellings and families, and persons to a dwelling and to a family, by counties: 1890.....	915-931
Table 89.—Total dwellings and families, and persons to a dwelling and to a family, for places having 2,500 inhabitants or more: 1890.....	932-947
Table 90.—Persons to a dwelling, in detail, by states and territories: 1890.....	948
Table 91.—Persons to a dwelling, in detail, for cities having 25,000 inhabitants or more: 1890.....	949, 950
Table 92.—Persons to a family, in detail, by states and territories: 1890.....	951
Table 93.—Persons to a family, in detail, for cities having 25,000 inhabitants or more: 1890.....	952, 953
Table 94.—Number of dwellings having specified number of families, with average number of families to a dwelling, for cities having 100,000 inhabitants or more, and by wards for certain cities: 1890.....	954-957
Table 95.—Number of families in dwellings according to specified number of families, for cities having 100,000 inhabitants or more, and by wards for certain cities: 1890.....	958-960
APPENDIX.....	961-968
Indian territory and Indian reservations.....	965
Table 1.—Indians and other persons in the Indian territory and on Indian reservations, not included in the general enumeration, classified by sex, by states and territories: 1890.....	965
Alaska.....	966-968
Table 2.—Population by sex, general nativity, and color, by districts: 1890.....	966

DEPARTMENT OF THE INTERIOR,
CENSUS OFFICE,
WASHINGTON, D. C., October 22, 1894.

SIR:

I have the honor to transmit herewith the general tables, explanatory text, and maps and diagrams comprising Part I of the report on population, giving the statistics of population in the aggregate and by sex, general nativity, color, place of birth, parentage, school, militia, and voting ages, conjugal condition, and dwellings and families, as returned at the Eleventh Census. Comparative statements of the population and its distribution at preceding censuses are also given whenever possible or where they were deemed essential to the proper presentation and discussion of the results of the present census.

Part II contains the statistics of population classified according to age, school attendance, illiteracy, ability to speak English, occupations, and citizenship, and, in addition, a monograph on education compiled from the reports of schools in the United States as returned at the Eleventh Census.

The statistics of population have been compiled under the direction of Mr. William C. Hunt, expert special agent, upon whom has devolved the entire responsibility of their tabulation and presentation, and who is entitled to great credit for the skill and accuracy displayed in the preparation of the statistical and analytical data contained in this report. This office has also had the benefit of the experience of Mr. Henry Gannett, geographer of the census, in the construction of the maps and diagrams and in the preparation of the text, particularly that portion relating to the geographical distribution of population and the general growth of the country since the first census.

I am, very respectfully, your obedient servant,

CARROLL D. WRIGHT,
Commissioner of Labor in charge.

Hon. HOKE SMITH,
Secretary of the Interior.

PROGRESS OF THE NATION

1790 TO 1890.

BY ROBERT P. PORTER, HENRY GANNETT, AND WILLIAM C. HUNT.

PROGRESS OF THE NATION.

AGGREGATE POPULATION.

The following table shows the aggregate population of the United States at each census from 1790 to 1890, together with the per cent of increase during each decade:

CENSUS YEARS.	Aggregate population.	Per cent of increase.
1790.....	3,929,214	
1800.....	5,308,483	35.10
1810.....	7,239,881	36.38
1820.....	9,633,822	33.07
1830.....	12,866,020	33.55
1840.....	17,069,453	32.67
1850.....	23,191,876	35.87
1860.....	31,443,321	35.58
1870.....	38,558,371	22.63
1880.....	50,155,783	30.08
1890.....	62,622,250	24.86

The population of the United States on June 1, 1890, as shown by the general enumeration for all the states and organized territories, was 62,622,250; including 325,464 Indians and other persons in the Indian territory and on Indian reservations and 32,052 persons in Alaska, specially enumerated under the law, the entire population of the country was 62,979,766. In 1880 the population of the United States, exclusive of the population of the Indian territory, Indian reservations, and Alaska, was 50,155,783. The absolute increase of the population in the ten years intervening was 12,466,467, and the percentage of increase was 24.86. In 1870 the population was stated as 38,558,371. According to these figures the absolute increase in the decade between 1870 and 1880 was 11,597,412, and the percentage of increase was 30.08.

Upon their face these figures show that the population increased 869,055 more between 1880 and 1890 than between 1870 and 1880, while the rate of increase apparently diminished from 30.08 to 24.86 per cent. If these figures were derived from correct data, they would be disappointing. Such a reduction in the rate of increase, in the face of the heavy immigration during the past ten years, would argue a diminution in the fecundity of the population, or a corresponding increase in its death rate. These figures are, however, easily explained when the character of the data used is understood. It is well known, the fact having been demonstrated by extensive and thorough investigation, that the census of 1870 was grossly deficient in the southern states, so much so as not only to give an exaggerated rate of increase of the population between 1870 and 1880 in these states, but to affect materially the rate of increase in the country at large.

These omissions were not the fault of the Census Office nor within its control. The census of 1870 was taken under a law which the Superintendent, Francis A. Walker, characterized as "clumsy, antiquated, and barbarous". The Census Office had no power over its enumerators save a barren protest, and even this right was questioned in some quarters. In referring to these omissions the Superintendent of the Tenth Census (1880) said in his report in relation to the taking of the census in South Carolina: "It follows, as a conclusion of the highest authority, either that the census of 1870 was grossly defective in regard to the whole of the state or some considerable parts thereof, or else that the census of 1880 was fraudulent". Those therefore who believe in the accuracy and honesty of the Tenth Census—and that was thoroughly established—must accept the alternative offered by Superintendent Walker, namely, that the Ninth Census was "grossly defective". What was true of South Carolina was also true, in greater or less degree, of all the southern states.

There are, of course, no means of ascertaining accurately the extent of these omissions, but an approximation to it may be obtained by the following method:

It is fair to assume that the rates of increase in population of the southern states between 1860 and 1870 and between 1870 and 1880 were related to one another in a proportion similar to the corresponding rates in the northern states during the same periods. In the term "southern states" is here included the two Virginias, the two Carolinas, Georgia, Florida, Alabama, Mississippi, Louisiana, Texas, Arkansas, Tennessee, and Kentucky. The census of 1870 is known or is suspected to have been deficient in all these states. In the other states and territories there is no suspicion of incompleteness.

The population of the southern states in 1860, 1870, and 1880 was as follows:

1860	10,259,016
1870	11,250,411
1880	15,257,393

The population of the other states and territories in 1860, 1870, and 1880 was as follows:

1860	21,184,305
1870	27,307,960
1880	34,898,390

The rate of increase in these other states and territories was 28.91 per cent between 1860 and 1870, and 27.80 per cent between 1870 and 1880. These two rates are so nearly equal that in extending them to the southern states they may be regarded as identical; in other words, it may be assumed that the rate of increase in the southern states between 1860 and 1870 and between 1870 and 1880 was the same.

Classified as white and negro, the population of the southern states was as follows:

CENSUS YEARS.	White.	Negro. (a)
1860.....	6,366,703	3,890,037
1870.....	7,067,213	4,179,222
1880.....	9,592,568	5,657,635

a Includes all persons of negro descent.

The increase of the white population between 1860 and 1880 was 50.67 per cent, or at a uniform rate for each ten years of 22.75 per cent. The increase of the negro population between 1860 and 1880 was 45.44 per cent, or at the rate of 20.60 per cent for each ten years. Applying these rates of increase respectively to the white and negro population in 1860, the white population in 1870 was approximately 7,815,128 and the negro 4,691,385. These results are in excess of the figures as returned by the census of 1870, in the case of the white 747,915, and in the case of the negro 512,163, a total of 1,260,078, which may be assumed as approximately the extent of the omissions by the faulty census of 1870. The total population in 1870 was, therefore, approximately 39,818,449 instead of 38,558,371.

Assuming these figures to represent approximately the true population in 1870, the rates of increase would stand as follows:

	PER CENT.
1860 to 1870	26.64
1870 to 1880	25.96
1880 to 1890	24.86

Omitting from consideration those states in which the census of 1870 is known or is presumed to have been faulty, the rate of increase between 1870 and 1880 in the remaining states has been very nearly maintained in the decade from 1880 to 1890. The census of 1870 is known or is presumed to have been deficient in nearly all the states of the South Atlantic and South Central divisions, while in the North Atlantic, North Central, and Western divisions no evidence of incompleteness has been detected. The population of these three last named divisions in 1870, 1880, and 1890, with the numerical increase and the percentage of increase for the two decades, is set forth in the following table:

CENSUS YEARS.	Population.	INCREASE	
		Number.	Per cent.
1870.....	26,270,351		
1880.....	33,639,215	7,368,864	28.05
1890.....	42,791,437	9,152,222	27.21

It will be seen that the numerical increase between 1880 and 1890 exceeded that between 1870 and 1880 by 1,783,358, and that the proportional increase was only 0.84 per cent less.

AGGREGATE POPULATION.

The following table shows the percentage of increase in total population for each decade since 1790, derived from Table 2, pages 4 and 5, post:

PERCENTAGE OF INCREASE IN TOTAL POPULATION: 1790 TO 1890.

STATES AND TERRITORIES.	1880 to 1890	1870 to 1880	1860 to 1870	1850 to 1860	1840 to 1850	1830 to 1840	1820 to 1830	1810 to 1820	1800 to 1810	1790 to 1800

a Decrease.
 b Decrease; due to loss of territory. West Virginia having been set off from Virginia December 31, 1862.
 c North Dakota and South Dakota combined. Apportioning the population of Dakota territory in 1880, North Dakota increased 395.05 per cent, and South Dakota increased 234.60 per cent.
 d Dakota territory.

The thirteen original states, which comprise practically the North Atlantic and South Atlantic divisions, were, to a great extent, settled communities at the time of the First Census, in 1790, and their rate of increase in the early decades, though in certain cases considerable, was in no case excessive. In certain cases, indeed, it was very small, as in Rhode Island, Connecticut, Delaware, and Maryland.

These two groups of states, from the time of the earliest records, have been the sources of supply for a great westward migration. Their children have peopled the great interior valley and the mountains of the west. They have swarmed from the Atlantic coast to the prairies, plains, mountains, and deserts by millions during the last century. The extent of this movement can not be estimated, but some idea of it may be obtained from the fact that in 1880, out of 22,000,000 persons born in the Atlantic states, over 3,000,000 were found living in other states entirely to the westward.

In the North Atlantic division this draft has been in great part made good, especially during the past forty years, by foreign immigration, which has thus replaced to a great extent the original stock. Such is not the case, however, with the South Atlantic states, which, owing in part to climatic conditions and in part to the presence of the negro race, have received insignificant foreign immigration.

In the North Central, South Central, and Western divisions the rate of increase was at first very large, and gradually diminished as the population increased in number and approximated settled conditions.

The general law governing the increase of population is that, when not disturbed by extraneous causes, such as wars, pestilences, immigration, emigration, etc., increase of population goes on at a continually diminishing rate. The operation of this law in this country has been disturbed in recent years by the civil war, which, besides the destruction of a vast number of lives, decreased the birth rate materially during its progress. It was followed by an increased birth rate, as is invariably the case under similar circumstances. The normal rate of increase has been, and is, greatly disturbed also by immigration, and it is difficult to estimate the effect of this upon our rate of increase.

Throughout the whole table, in nearly every state, there is distinctly traceable the result of the late civil war upon the rate of increase between 1860 and 1870. It is, however, much more marked in the southern than in the northern states, showing how much more severely these states were strained by the conflict.

The table on the preceding page, showing the percentages of increase in population by states and territories from 1790 to 1890, is supplemented in the case of a few states and territories by the following table, in which are given, in addition to the results of the United States censuses of 1880 and 1890, the results of state censuses taken in 1885, with the exception of Michigan, the census of that state having been taken in 1884:

STATES AND TERRITORIES.	POPULATION.			INCREASE.		PER CENT OF INCREASE.	
	1890	1885	1880	1885 to 1890	1880 to 1885	1885 to 1890	1880 to 1885
Colorado	412, 198	243, 910	194, 327	168, 288	49, 583	69.00	25.52
Dakota (a)	511, 527	415, 610	135, 177	95, 917	280, 433	23.08	207.46
Florida	391, 422	342, 551	260, 493	48, 871	73, 058	14.27	27.11
Iowa	1, 911, 896	1, 753, 980	1, 624, 615	157, 916	129, 365	9.00	7.96
Kansas	1, 427, 096	1, 268, 530	996, 096	158, 566	272, 434	12.50	27.35
Massachusetts	2, 238, 943	1, 942, 141	1, 783, 085	296, 802	159, 056	15.28	8.92
Michigan	2, 093, 889	1, 853, 658	1, 636, 937	240, 231	216, 721	12.96	13.24
Minnesota	1, 301, 826	1, 117, 798	780, 773	184, 028	337, 025	16.46	43.17
Nebraska	1, 058, 910	740, 645	452, 402	318, 265	288, 243	42.97	63.71
New Jersey	1, 444, 933	1, 278, 033	1, 131, 116	166, 900	146, 917	13.06	12.99
New Mexico	153, 593	134, 141	119, 565	19, 452	14, 576	14.50	12.19
Oregon	313, 767	194, 150	174, 768	119, 617	19, 382	61.61	11.09
Rhode Island	345, 506	304, 284	276, 531	41, 222	27, 753	13.55	10.04
Washington	349, 390	129, 438	75, 116	219, 952	54, 322	169.93	72.32
Wisconsin	1, 686, 880	1, 563, 413	1, 315, 497	123, 467	247, 916	7.90	18.85

a North Dakota and South Dakota combined for 1890; Dakota territory in 1880 and 1885.

In comparing the results of these state censuses with those of the United States censuses, it must be understood that the state censuses were taken under different authority, by different machinery, and by different methods from those employed in the United States censuses.

In the state of Kansas the course of the population can be traced even more closely than in the other states represented in the preceding table. Since 1885 this state has taken a census each year, the results of which are shown in the accompanying statement, together with the United States censuses of 1880 and 1890:

1880. United States census	996, 096
1885. State census	1, 268, 530
1886. State census	1, 406, 738
1887. State census	1, 514, 578
1888. State census	1, 518, 552
1889. State census	1, 464, 914
1890. United States census	1, 427, 096

In the principal tables the states and territories are grouped as North Atlantic, South Atlantic, North Central, South Central, and Western divisions. This grouping is a natural one, and by the aid of it certain characteristic features in the development of the states are brought out. The North Atlantic division is primarily a manufacturing section. As a necessary result of the predominance of manufacturing, there is a great development of urban population. Indeed, more than half of the inhabitants are grouped in cities.

The predominant industry of the North Central division is agriculture, although in many of these states manufactures are now acquiring prominence. The industries of the South Atlantic and South Central divisions are still almost entirely agricultural, while in the Western division the leading industries are agriculture, mining, and grazing.

In the course of the settlement and development of a country the industries commonly follow one another in a certain order. After the hunter, trapper, and prospector, who are commonly the pioneers, the herdsman follows, and for a time the raising of cattle is the leading industry. As settlement becomes less sparse, this is followed by agriculture, which in its turn, as the population becomes more dense, is succeeded by manufactures, and, as a consequence, the aggregation of the people in cities. All stages of this progress are seen in this country.

In Maine, New Hampshire, and Vermont the rate of increase between 1870 and 1880 was not quite maintained during the past decade, probably due to a large migration of the farming population to the far west, while manufactures had not assumed great prominence. In Vermont there has been only a trifling increase of population.

In the other states of this division, with the exception of Rhode Island, viz, Massachusetts, Connecticut, New York, New Jersey, and Pennsylvania, manufactures have assumed so great prominence that they have not only sufficed to maintain the former rate of increase but even to increase it. The rate in Massachusetts has increased from 22.35 to 25.57 per cent; in Connecticut from 15.86 to 19.84; in New York from 15.97 to 18.00; in New Jersey from 24.83 to 27.74, and in Pennsylvania from 21.61 to 22.77. It will be seen, furthermore, that this augmentation of the rate of increase is greater in the more easterly states than in the three westerly ones above mentioned, owing to the relatively greater development of manufacturing industries.

Turning to the table on the preceding page, showing the results of the state censuses, it appears that during the first half of the last decade the rate of increase in Massachusetts was below the average of the decade, being only 8.92 per cent, while in the last half it was much greater, or 15.28 per cent. The case is somewhat similar in Rhode Island, although not in so marked a degree, the rates of increase between 1880 and 1885 and between 1885 and 1890 being, respectively, 10.04 and 13.55 per cent. In New Jersey the rate of increase seems to have been maintained quite uniformly throughout the decade.

In the North Central group of states various conditions prevail. In Ohio, Indiana, Iowa, and Missouri, and in Illinois, if the city of Chicago be dropped from consideration, the rate of increase has declined decidedly. In Ohio it has fallen from 19.99 to 14.83 per cent; in Indiana from 17.71 to 10.82; in Iowa from 36.06 to 17.68; in Missouri from 25.97 to 23.56 per cent, in spite of the rapid growth of St. Louis and Kansas city, and in Illinois, dropping Chicago from consideration, from 14.89 to 5.90 per cent. In these states the agricultural industry, which is still the prominent one, has begun to decline, owing to the sharp competition of western farms. The farming population has migrated westward, and the growth of manufactures is not yet sufficiently rapid to repair these losses. The southern portions of Michigan, Wisconsin, and Minnesota are under similar conditions, but the northern parts of these states, lying upon the frontier of settlement, have filled up with sufficient rapidity to repair wholly or in part the losses of the southern parts. Michigan increased at the rate of 38.25 per cent between 1870 and 1880, while between 1880 and 1890 the rate was but 27.92 per cent. The increase between 1880 and 1890 was cut into unequal parts by the state census taken in 1884. In the first four years of the decade the increase was 13.24 per cent, while in the last six years it was 12.96 per cent. As the rate of increase in this state is declining, the state census taken in 1884 corroborates the United States census of 1890. In Wisconsin the last decade shows an increase of 28.23 per cent, as against an increase of 24.73 per cent in the decade from 1870 to 1880. The state census of Wisconsin, taken in 1885, cuts the decade into two equal parts, and shows an increase during the first half of 18.85 per cent and during the second half of but 7.90 per cent.

Minnesota increased 77.57 per cent between 1870 and 1880 and 66.74 per cent between 1880 and 1890, the numerical increase being over half a million in the past decade. The state census, taken in 1885, shows that the bulk of this increase occurred between 1880 and 1885. The numerical increase during the first five years was 337,025, and the rate of increase 43.17 per cent, while during the last half of the decade the numerical increase was 184,028, and the rate of increase 16.46 per cent.

During the past ten years the population of Dakota, considering the two states of North Dakota and South Dakota together, has increased from 135,177 to 511,527, or 278.41 per cent; Nebraska from 452,402 to 1,058,910, or 134.06 per cent, and Kansas from 996,096 to 1,427,096, or 43.27 per cent. This increase has not, however, continued uniformly throughout the decade. In 1885 Dakota contained 415,610 inhabitants, or more than four-fifths of its present population. Nebraska contained 740,645 inhabitants in the same year, thus dividing the numerical increase quite equally between the two halves of the decade, but leaving the greater percentage of increase in the first half. In the same year Kansas by its state census had 1,268,530 inhabitants, showing that nearly two-thirds of

the numerical gain was acquired during the first half of the decade. The industries of these states are almost purely agricultural, and are largely dependent on the supply of moisture, either in the form of rain or by irrigation. Through these states passes what is known as the sub-humid belt, a strip of country several degrees in width, in which during rainy years there is an abundance of moisture for the needs of crops, while in the years when the rainfall is below the average the supply is deficient. In this region little provision has been made for artificial irrigation, the settlers having thus far been content to depend upon rainfall. Into this region settlers flocked in large numbers in the early years of the decade, drawn thither by the fertility of the land and by the fact that for a few years the rainfall had been sufficient for the needs of agriculture. During the past two or three years, however, the conditions of rainfall have materially changed. It has fallen decidedly below the normal, and the settlers have thereby been forced to emigrate. Thousands of families have abandoned this region and gone to Oklahoma and the Rocky Mountain region. This migration is well shown in the progress of Kansas, as indicated by its annual censuses. These censuses show a rapid increase in population from 1880 up to 1887; 1888 shows but a slight increase over 1887, while 1889 shows a reduction in the population, leading up to the further reduction shown by the United States census in 1890.

Throughout the South Atlantic and South Central states the rate of increase has diminished, and in most of these states it has diminished materially. A certain reduction in the percentage of increase, especially in the eastern part of this region, was to have been expected, due not only to the operation of general laws but also to the fact that there has been considerable migration from the states east of the Mississippi river to the westward, and but little immigration. Taken together, however, these two causes by no means account for the reduction in the rate of increase in these states. The real cause is to be found, as was stated early in this discussion, in the imperfections of the census of 1870. These imperfections resulted in giving a comparatively low rate of increase between 1860 and 1870, and an exaggerated increase between 1870 and 1880. The following table, showing the rates of increase during the last three decades in these states, illustrates the imperfections of the census of 1870:

STATES.	PER CENT OF INCREASE.		
	1860 to 1870	1870 to 1880	1880 to 1890
Virginia	a4.44	23.46	9.48
North Carolina	7.93	30.65	15.59
South Carolina	0.27	41.10	15.63
Georgia	12.06	30.24	19.14
Alabama	3.40	26.63	19.84
Mississippi	4.63	36.68	13.96
Louisiana	2.67	29.31	19.01
Kentucky	14.31	24.81	12.73
Tennessee	13.40	22.55	14.60

a Of Virginia and West Virginia together.

It is but reasonable to suppose that in these states, which were ravaged by war from 1861 to 1865, the rate of increase in the decade which includes the war period should be less than a normal one. Of all these states Virginia, whose soil was the principal theater of the war, must have suffered most severely, and during the period in question it increased at the rate of but 4.44 per cent. Next to Virginia, Tennessee suffered most severely, and yet it increased 13.40 per cent. On the other hand, North Carolina, which suffered less severely, gained but 7.93 per cent, and South Carolina, which suffered less in comparison with Virginia, apparently remained at a standstill as regards population. Georgia gained 12 per cent, while Alabama gained but 3.40 per cent, Louisiana 2.67 per cent, and Mississippi 4.63 per cent, although they were comparatively remote from active operations, and suffered relatively little from the ravages of war. On the other hand, those states which suffered the most severely from the war made during the decade from 1870 to 1880 the smallest proportion of gain of the southern states, whereas the reverse should have been the case. Thus Virginia gained 23.46 per cent, Kentucky 24.81, and Tennessee 22.55, while the states that were farther removed from active operations were North Carolina, which gained 30.65; South Carolina, 41.10; Georgia, 30.24; Alabama, 26.63; Mississippi, 36.68, and Louisiana, 29.31 per cent. These startling discrepancies were due, first, to the imperfections of the census of 1870, which, as has been demonstrated, were greatest in South Carolina, Mississippi, Louisiana, Alabama, Georgia, and North Carolina, although they were not by any means wanting in Virginia, Kentucky, and Tennessee; and, second, in part, to migration of the negro population from South Carolina and other recent slave states.

The industries of these two sections are almost purely agricultural. During the past ten years manufactures have obtained a slight footing and mining has made considerable growth in the mountain regions, but these causes have thus far produced but a comparatively trifling movement of population. The urban population, although great in proportion to that which existed formerly, is very small in proportion to the rural population of the region.

During the first half of the last decade Florida had a rapid growth. The population between 1880 and 1885 increased 73,058, or at the rate of 27.11 per cent. This rapid growth, however, received a serious check in 1887 and 1888 by an epidemic of yellow fever and by severe frosts. The growth since 1885 has, therefore, been comparatively slow.

Arkansas has continued to grow at a rapid rate, having increased 40.58 per cent in the last ten years. Texas also has increased with great rapidity, the numerical increase of its population being 643,774, or 40.44 per cent.

In the Western division the conditions of growth have been varied. In the earlier years of the decade the discovery of valuable silver and copper mines in the mountains of Montana, in the neighborhood of Butte, drew to that state a large immigration, which engaged not only in mining, but in developing the agricultural resources. Wyoming has continued to grow with accelerated rapidity.

The census of Colorado in 1880 was taken on the top wave of a mining excitement, which had filled its mountains with miners, prospectors, and speculators, increasing its population enormously, especially in the mountainous country. The census of the state taken in 1885 was, on a superficial view, very surprising. It showed that most of the mining counties had lost population during the five years preceding. This loss was, however, more than made up by the growth of its cities and its agricultural counties. The census of 1890 shows still further reduction of population in the mining regions of the state, and on the other hand an extraordinary development of its urban population and its farming element. New Mexico, Arizona, and Utah show rates of increase which are small when the sparsely settled condition of these territories is considered, while Nevada shows an absolute diminution in population of 16,505, or 26.51 per cent, leaving it with a population less than that of any other state. This condition of things is a natural result of the failure of the Comstock and other mines, work upon which has practically ceased. Idaho has increased its population 158.77 per cent. Its prosperity is mainly due to its mines, although people are now turning to agriculture in considerable numbers.

The growth of Washington has been phenomenal, the population in 1890 being nearly five times that of 1880. As is shown by the state census taken in 1885, this growth has been almost entirely during the last five years of the decade. The inducements which have attracted settlers are in the main its fertile soil and ample rainfall, which enable farming to be carried on without irrigation over almost the entire state. The growth of Oregon, though less rapid, has been at a rate of 79.53 per cent during the past decade. The numerical increase has been 138,999, of which over four-fifths have been acquired during the past five years. The additions to its population are mainly in the valleys of the Columbia and Willamette rivers.

California, which increased 54.34 per cent during the decade from 1870 to 1880, has maintained during the past decade a rate of increase of 39.72 per cent. This increase, though widespread throughout the state, has been most marked in its great cities and in the southern part.

The following table shows the relative rank in population of the states and territories in 1890 and in 1880:

1890	1880	1890	1880
1 New York.	1 New York.	26 Nebraska.	26 Minnesota.
2 Pennsylvania.	2 Pennsylvania.	27 Maryland.	27 Maine.
3 Illinois.	3 Ohio.	28 West Virginia.	28 Connecticut.
4 Ohio.	4 Illinois.	29 Connecticut.	29 West Virginia.
5 Missouri.	5 Missouri.	30 Maine.	30 Nebraska.
6 Massachusetts.	6 Indiana.	31 Colorado.	31 New Hampshire.
7 Texas.	7 Massachusetts.	32 Florida.	32 Vermont.
8 Indiana.	8 Kentucky.	33 New Hampshire.	33 Rhode Island.
9 Michigan.	9 Michigan.	34 Washington.	34 Florida.
10 Iowa.	10 Iowa.	35 Rhode Island.	35 Colorado.
11 Kentucky.	11 Texas.	36 Vermont.	36 District of Columbia.
12 Georgia.	12 Tennessee.	37 South Dakota.	37 Oregon.
13 Tennessee.	13 Georgia.	38 Oregon.	38 Delaware.
14 Wisconsin.	14 Virginia.	39 District of Columbia.	39 Utah.
15 Virginia.	15 North Carolina.	40 Utah.	40 Dakota.
16 North Carolina.	16 Wisconsin.	41 North Dakota.	41 New Mexico.
17 Alabama.	17 Alabama.	42 Delaware.	42 Washington.
18 New Jersey.	18 Mississippi.	43 New Mexico.	43 Nevada.
19 Kansas.	19 New Jersey.	44 Montana.	44 Arizona.
20 Minnesota.	20 Kansas.	45 Idaho.	45 Montana.
21 Mississippi.	21 South Carolina.	46 Oklahoma.	46 Idaho.
22 California.	22 Louisiana.	47 Wyoming.	47 Wyoming.
23 South Carolina.	23 Maryland.	48 Arizona.	
24 Arkansas.	24 California.	49 Nevada.	
25 Louisiana.	25 Arkansas.		

It will be seen that, as in 1880, New York still heads the list, and is followed by Pennsylvania. Ohio and Illinois have exchanged places. Of the other changes in the list the most marked are those of Texas, which rises from No. 11 to No. 7; Kentucky, which drops from 8 to 11; Minnesota, which rises from 26 to 20; Nebraska, which rises from 30 to 26; Maryland, which drops from 23 to 27; Colorado, which rises from 35 to 31; Vermont, which drops from 32 to 36; Washington, which rises from 42 to 34; Delaware, which drops from 38 to 42; Nevada, which drops from 43 to 49, and Arizona, which drops from 44 to 48. The average change in rank is 2.2 places.

PROGRESS OF THE NATION: 1790 TO 1890.

The accompanying series of maps of the United States, showing the density of the population, is intended to exhibit the increase and the movement of population from the date of the First Census, in 1790, through ten decades, to 1890. Of these maps, the first nine, up to and including that of 1870, are reproductions from the "Statistical Atlas of the United States", published in 1874. The earlier ones are on the same scale as those of the atlas; the later ones are reduced in scale.

The method by which these maps have been constructed is that used for the atlas above referred to, and is explained in that work. This explanation is here reproduced, with such changes and modifications as appear to be necessary.

These maps, one for each census, show the density of population, that is, the number of individuals to a square mile, arranged within certain groups.

The general method of preparing these maps has been uniform, and is as follows: the county has been taken, in general, as a unit. Its population, at the period to which the map refers, having been ascertained, the population of all cities of 8,000 inhabitants or more, existing within it, has been deducted therefrom, the population of such cities being represented by circles of solid color, separate from the other population, which latter has been regarded, for the purposes of illustration, as rural population uniformly spread over the surface of the county. The rural population has been divided by the area of the county in square miles, the quotient representing the average density of settlement.

In cases, however, where the county was of unusual extent, or there was reason to believe that its density differed greatly in different parts, the county has been no longer taken entire, but has been examined by sections, even sections as small as its townships or other civil divisions. The number of counties thus broken up for the purpose of comparison would naturally vary greatly. In some census years, as in the case of the later ones, it would amount to several hundred; in others, particularly the earlier ones, to scarcely as many score.

The average density of each county, or part of a county, having been thus ascertained, the sections so taken have been grouped according to five degrees of density, as explained in the legends accompanying the maps. The general plan of grouping has been to make as many large groups as could be made without merging any appreciable proportion in groups of a markedly different grade: thus, if a single county of small extent belonging to group 3, should be surrounded by many counties of group 4 or of group 2, it would not be preserved distinct, but would take the shading of its general section, either 2 or 4, as the case might be. If, however, a county of group 4 or 5 should appear among counties of group 1 or 2, the distinction would be regarded of sufficient importance to be maintained. Again, a county whose average density brought it within group 4 might be found with counties of group 3 on one side and of group 5 on the other, appearing thus to belong to a group distinct from both, yet an examination into the density of its constituent townships might, and generally would, develop the fact that those parts of the county which bordered on group 3 were really of that grade, while the parts bordering on group 5 belonged in that class. In such a case, the division of the county by a central line, and the throwing of parts on the one side and on the other, into the adjacent groups, would not only dispense with the necessity for preserving a small separate group upon the map, but would even more correctly represent the facts of the case than would be done by representing the entire county as of group 4. Again, a tier of counties along a river or a railroad might yield a quotient showing an average population of only 30 to a square mile, and thus appear to belong in group 3, whereas an examination of the townships composing the county might show that, for a few miles back from the river, the density was much greater; while in the portion farthest away from the river the density was much less than the average, thus splitting the county, perhaps, into two groups, viz, 4 and 2.

The county, and, in some cases, the township, has been adopted as a unit, not with a view to representing separately each such subdivision, for this the scale of the map would not permit, but for the sake of more definitely determining the true line of demarcation between large groups.

Such being the system and the scope of the illustrations under consideration, it is proposed briefly to discuss the increase and movement of population from 1790 to 1890. It should be remembered throughout that the maps do not profess to exhibit settlements which do not reach an average of 2 to the square mile for a tract large enough to be clearly shown to the eye on the scale employed. It follows that the outside line of color indicates the limits of population of 2 or more to the square mile, the petty population that lies beyond being made up of the solitary ranchman, trapper, or fisherman, or of mining parties, lumber camps, and the like. This line, which limits the average density of 2 to a square mile, is considered as the limit of settlement—the frontier line of population.

An inspection of the maps relating to the earlier census years will show that the progress of population westward across the Appalachian system has taken place, in the main, along four lines. The northernmost of these, which was the first to be developed, runs through central New York, following up, generally, the Mohawk river. This line has, throughout our history, been one of the principal courses of population in its westward flow. The second crosses southern Pennsylvania, western Maryland, and northern Virginia, parallel to and along the course of the upper Potomac. The third runs through Virginia, passing southwestward down the great Appalachian valley, crossing thence over into Kentucky and Tennessee. South of this, the principal movement westward has been around the end of the Appalachian chain, through Georgia and Alabama.

Let us consider the results of measurement and computations as to the extent of this line of settlement, and as to the space which it incloses on the different maps.

1790.

The First Census of the United States, taken as of the first Monday in August, 1790, under the provisions of the second section of the first article of the Constitution, shows the population of the thirteen states now existing and of the unorganized territory to be, in the aggregate, 3,929,214.

This population is distributed almost entirely on the Atlantic seaboard, extending from the eastern boundary of Maine nearly to Florida, and in the region known as the Atlantic plain. Only a very small proportion of the inhabitants of the United States, not, indeed, more than 5 per cent, is found west of the system of the Appalachian mountains. The average depth of settlement, in a direction at right angles to the coast, is 255 miles. The densest settlement is found in eastern Massachusetts, Rhode Island, and Connecticut, and about New York city, whence population has extended northward up the Hudson, and is already quite dense as far as Albany. The settlements in Pennsylvania, which started from Philadelphia, on the Delaware, have extended northeastward, and form a solid body of occupation from New York, through Philadelphia, down to the upper part of Delaware.

The Atlantic coast, as far back as the limits of tide water, is well settled at this time from Casco bay southward to the northern border of North Carolina. In what is now the "district of Maine", sparse settlement extends along the whole seaboard. The southern two-thirds of New Hampshire and nearly all of Vermont are covered by population. In New York, branching off from the Hudson at the mouth of the Mohawk, the line of population follows up a broad gap between the Adirondacks and the Catskills, and even reaches beyond the center of the state, occupying the whole of the Mohawk valley and the country about the interior New York lakes. In Pennsylvania population has spread northwestward, occupying not only the Atlantic plain, but, with sparse settlements, the region traversed by the numerous parallel ridges of the eastern portion of the Appalachians. The general limit of settlement is, at this time, the southeastern edge of the Allegheny plateau, but beyond this, at the junction of the Allegheny and Monongahela rivers, a point early occupied for military purposes, considerable settlements exist which were established prior to the war of the Revolution. In Virginia settlements have extended westward beyond the Blue Ridge, and on the western slope of the Allegheny mountains, though very sparsely. From Virginia, also, a narrow tongue of settlement penetrates into the "Kentucky country", which is almost as populous as Vermont or Georgia, and down to the head of the Tennessee river in the great Appalachian valley, where the "state of Franklin" has been for four years a political unit. In North Carolina the settlements are abruptly limited by the base of the Appalachians. The state is occupied with remarkable uniformity, except in its southern and central portion, where population is comparatively sparse. In South Carolina, on the other hand, there is evidence of much natural selection, apparently with reference to the character of the soil. Charleston is now a city of considerable magnitude, and about it is grouped a comparatively dense population; but all along a belt running southwestward across the state, near its central part, the settlement is very sparse. This area of sparse settlement joins that of central North Carolina, and runs eastward to the coast, near the junction of the two states. Further westward, in the "up country" of South Carolina, the density of settlement is noticeable, due to the improvement in soil. At this date settlements are almost entirely agricultural, and the causes for variation in their density are general ones. The movements of population at this epoch may be traced in almost every case to the character of the soil, and to facility of transportation to the seaboard; and, as the inhabitants are dependent mainly upon water transportation, we find the settlements also conforming themselves very largely to the navigable streams.

Outside the area of continuous settlement, which we have attempted to sketch, is found a number of smaller settlements of greater or less extent. The principal of these lies in the northern part of what is now known as the "territory south of the river Ohio", and comprises an area of 10,900 square miles. Another, in western Virginia, lies upon the Ohio and Kanawha rivers, and comprises 750 square miles. A third, in the southern part of the "territory south of the river Ohio", upon the Cumberland river, embraces 1,200 square miles.

In addition to these, there is a score or more of small posts, or incipient settlements, scattered over what is an almost untrodden wilderness, such as Detroit, Vincennes, Kaskaskia, Prairie du Chien, Mackinac, and Green Bay, beside the humble beginnings of Elmira and Binghamton, in New York, which, even at this time, lie outside the body of continuous settlement and embrace about 1,000 square miles.

Following the line which limits this great body of settlement in all its undulations, we find its length to be 3,200 miles. In this measurement no account has been made of slight irregularities, such as those in the ordinary

meanderings of a river which forms the boundary line of population; but we have traced all the ins and outs of this frontier line, which seem to indicate a distinct change in the settlement of the country for any cause, whether of progression or of retrogression. Thus the area of settlement is the area embraced between the frontier line and the coast, diminished by such unsettled areas as may lie within it, and increased by such settled areas as lie without it. These are not susceptible of very accurate determination, owing to the fact that our best maps are, to a certain extent, incorrect in boundaries and areas; but all the accuracy required for our present purpose can be secured. The settled area of 1790, as indicated by the line traced, is 226,085 square miles. The entire body of continuously settled area lies between 31° and 45° north latitude and 67° and 83° west longitude.

Outside of this body of continuous settlement are the smaller areas mentioned above, which, added to the main body of settled area, give as a total 239,935 square miles, the aggregate population being 3,929,214, and the average density of settlement 16.38 to the square mile.

The "district of Maine" belongs to Massachusetts. Georgia extends to the Mississippi river. Kentucky and Tennessee are known as the "territory south of the river Ohio", and Ohio, Indiana, Illinois, Michigan, Wisconsin, and a part of Minnesota, as the "territory northwest of the river Ohio". Spain claims possession of Florida, with a strip along the southern border of Georgia, and all of the region west of the Mississippi river.

1800.

At the Second Census, that of 1800, the frontier line, as it appears on the map, has been rectified, so that while it embraces 282,208 square miles, it describes a course, when measured in the same manner as that of 1790, of only 2,800 lineal miles. The advancement of this line has taken place in every direction, though in some parts of the country much more markedly than in others.

In Maine and New Hampshire there is apparent only a slight northward movement of settlement; in Vermont, on the other hand, while the settled area has not decidedly increased, its density has become greater. Massachusetts shows but little change, but in Connecticut the settlements along the lower course of the Connecticut river have appreciably increased.

In New York settlement has poured up the Hudson to the mouth of the Mohawk, and thence, through the great natural roadway, westward. The narrow tongue, which before extended out beyond the middle of the state, has now widened until it spreads from the southern border of the state to Lake Ontario. A narrow belt of settlement even stretches down the St. Lawrence, and along all the northern border of the state, to Lake Champlain, completely surrounding what may be characteristically defined as the Adirondack region.

In Pennsylvania settlements have extended up the Susquehanna and joined the New York groups, leaving, as yet, an unsettled space in the northeast corner of the state, which comprises a body of rugged mountain country. With the exception of a little strip along the western border of Pennsylvania, the northern part of the state, west of the Susquehanna, is as yet entirely without inhabitants. Population has streamed across the southern half of the state, and settled in a dense body about the forks of the Ohio river, where we note the beginning of Pittsburg, and thence extended slightly into the "territory northwest of the river Ohio".

In Virginia we note but little change, although there is a general extension of settlement, with an increase in density, especially along the coast. North Carolina is now almost entirely covered with population; the mountain region has, generally speaking, been nearly all reclaimed to the service of man. In South Carolina there is a general increase in density of settlement, while the southwestern border has been carried down, until now the Altamaha river is its limit. The settlements in northern Kentucky have spread southward across the state, and even into Tennessee, forming a junction with the little settlement, noted at the date of the last census, on the Cumberland river. The group thus formed has extended down the Ohio, nearly to its junction with the Tennessee and the Cumberland, and across the Ohio river, where we note the beginning of Cincinnati. Other infant settlements appear at this date. On the east side of the Mississippi river is a strip of settlement along the bluffs below the Yazoo bottom. Above this, on the west side, we note the beginning of St. Louis, not at this time within the United States, and across the river an adjacent settlement in what is now known as Indiana territory, while all the pioneer settlements previously noted have grown to a greater or less extent.

From the region embraced between the frontier line and the Atlantic must be deducted the Adirondack tract, in northern New York, and the unsettled region in northern Pennsylvania, already referred to; so that the actual area of settlement, bounded by a continuous line, is to be taken at 271,908 square miles. All this lies between 30° 45' and 45° 15' north latitude, and 67° and 88° west longitude.

To this should be added the aggregate extent of all settlements lying outside of the frontier line, which collectively amount to 33,800 square miles, making a total area of settlement of 305,708 square miles. As the aggregate population is 5,308,483, the average density of settlement is 17.36.

The infant settlements of this period have been much retarded at many points by the opposition of the Indian tribes; but in the neighborhood of the more densely settled portions of the northern part of the country these obstacles have been of less magnitude than farther south. In Georgia, especially, the large and powerful tribes of Creeks and Cherokees have stubbornly opposed the progress of population.

During the decade Vermont, formed from a part of New York, has been admitted to the Union; also Kentucky and Tennessee, formed from the "territory south of the river Ohio"; Mississippi territory has been organized, having, however, very different boundaries from what is known later as the state of that name; while the "territory northwest of the river Ohio" has been divided and Indiana territory organized from the western portion.

1810.

In the decade from 1800 to 1810 we note great changes, especially the extension of the sparse settlements of the interior. The hills of western New York have become almost entirely covered with population, which has spread along the south shore of Lake Erie well over into Ohio, and has effected a junction with the previously existing body of population about the forks of the Ohio river, leaving unsettled an included heart-shaped area in northern Pennsylvania, which comprises the rugged country of the Appalachian plateau. The occupation of the Ohio river has now become complete, from its head to its mouth, with the exception of small gaps below the mouth of the Tennessee. Spreading in every direction from the "dark and bloody ground" of Kentucky, settlement covers almost the entire state, while the southern border line has been extended to the Tennessee river, in what is now known as Mississippi territory. In Georgia settlements are still held back by the Creek and the Cherokee Indians, although in 1802 a treaty with the former tribe relieved the southwestern portion of the state of their presence, and left the ground open for occupancy by the whites. In Ohio settlements, starting from the Ohio river and from southwestern Pennsylvania, have worked northward and westward, until they cover two-thirds of the area of the state. Michigan and Indiana are still virgin territory, with the exception of a little strip about Detroit, in the former, and two small areas in the latter, one in the southeastern part of the territory extending along the Ohio river, and one in the southwestern part extending up the Wabash from its mouth to and including the settlement at Vincennes. St. Louis, from a fur-trading post, has become an important center of settlement, population having spread northward above the mouth of the Missouri and southward along the Mississippi to the mouth of the Ohio. On the Arkansas, near the mouth, is a similar body of settlement. The transfer of the territory of Louisiana to our jurisdiction, which was effected in 1803, has brought into the country a large body of population, which stretches along the Mississippi river from its mouth nearly up to the northern limit of what is now known as the "territory of Orleans" and up the Red and Washita rivers, in general occupying the alluvial regions. The incipient settlements noted on the last map in Mississippi have effected a junction with those of Louisiana, while in what is now the lower part of Mississippi territory a similar patch appears upon the Mobile river.

In this decade large additions have been made to the territory of the United States, and many changes have been effected in the lines of interior division. The purchase of Louisiana has added 1,124,685 square miles, an empire in itself, to the United States, and has given to us absolute control of the Mississippi and its navigable branches. Georgia, during the same period, has ceded to the United States about two-thirds of her territory. The state of Ohio has been formed from a portion of what previously was known as the "territory northwest of the river Ohio". Michigan territory has been erected, comprising at this time the peninsula north of Ohio and the lower part of Indiana territory and south of the straits. Indiana territory has become restricted in its limits to the following boundaries: Lake Michigan and Michigan on the north, Ohio on the east, the Ohio river on the south, and Illinois on the west, with a detached area on Lake Superior. Illinois territory comprises all territory west of Lake Michigan and Indiana, north of the Ohio, and east of the Mississippi. The "territory of Orleans", which lies west of the Mississippi, has been carved out of the Louisiana purchase. The remainder of the territory acquired from France is known by the name of "Louisiana territory".

At this date the frontier line is 2,900 miles long, and includes between itself and the Atlantic 408,895 square miles. From this must be deducted several large areas of unsettled land: first, the area in northern New York, now somewhat smaller than ten years before, but still by no means inconsiderable in extent; second, the heart-shaped area in northwestern Pennsylvania, embracing part of the Allegheny plateau, in size about equal to the unsettled area in New York; third, a strip along the western part of Virginia, extending from the Potomac, southward, taking in a part of eastern Kentucky and southwestern Virginia, and extending nearly to the border line of Tennessee; fourth, a comparatively small area in northern Tennessee, upon the Cumberland plateau. These tracts together comprise 26,050 square miles, making the actual area of settlement included within the frontier line 382,845 square miles. All this lies between latitude $29^{\circ} 30'$ and $45^{\circ} 15'$ north, and between the meridians of 67° and $88^{\circ} 30'$ west.

Beyond the frontier there are, in addition to the steadily increasing number of outposts and minor settlements, several considerable bodies of population, which have been above noted. The aggregate extent of these, and of the numerous small patches of population scattered over the west and south, may be estimated at 25,100 square miles, making the total area of settlement in 1810, 407,945 square miles, the aggregate population being 7,239,881, and the average density of settlement 17.75 to the square mile.

Between 1800 and 1810 the principal territorial changes have been as follows: Ohio has been admitted, and the territories of Illinois and Michigan have been formed, the former from part of Indiana territory and the latter from parts of Indiana territory and the "territory northwest of the river Ohio".

1820.

The decade from 1810 to 1820 has witnessed several territorial changes. Florida at this date (1820) is a blank upon the map. The treaty with Spain to transfer Florida to the United States is signed, but the delivery has not yet taken place. Alabama and Mississippi, made from Mississippi territory, have been organized and admitted as states. Indiana and Illinois appear as states, with restricted limits. The "territory of Orleans", with somewhat enlarged boundaries, has been admitted as a state and is known as Louisiana. The "district of Maine" has also been erected into a state. Arkansas territory has been cut from the southern portion of the territory of Louisiana. The Indian territory has been constituted to serve as a reservation for the Indian tribes. Michigan territory includes all territory east of the Mississippi and north of Illinois, Indiana, and Ohio. That part of the old Louisiana territory remaining, after cutting out Arkansas and the Indian territory, has received the name of "Missouri territory".

Again, in 1820, we note a great change in regard to the frontier line. It has become vastly more involved and complex, extending from southeastern Michigan, on Lake St. Clair, southwestward into Missouri territory; thence, making a great semicircle to the eastward, it sweeps west again around a body of population in Louisiana, and ends on the Gulf coast in that state. The area included by it has immensely increased, but much of this increase is balanced by the great extent of unsettled land included within it.

Taking up the changes in detail, we note, first, the great increase in the population of central New York, a belt of increased settlement having swept up the Mohawk valley to Lake Ontario, and along its shore nearly to the Niagara river. A similar increase is seen about the forks of the Ohio river, while in northern Pennsylvania the unsettled region on the Appalachian plateau has sensibly decreased in size. The unsettled area in western Virginia and eastern Kentucky has very greatly diminished, population having extended almost entirely over the Allegheny region in these states. The little settlements about Detroit have extended and spread along the shore of Lake Erie, until they have joined those in Ohio. The frontier line in Ohio has crept northward and westward, leaving only the northwestern corner of the state unoccupied. Population has spread northward from Kentucky and westward from Ohio into southern Indiana, covering sparsely the lower third of that state. The groups of population around St. Louis, which at the time of the previous census were enjoying a rapid growth, have extended widely, making a junction with the settlements of Kentucky and Tennessee, along a broad belt in southern Illinois; following the main water courses, population has gone many scores of miles up the Mississippi and the Missouri rivers. The settlements in Alabama, which, up to this time, had been very much retarded by the Creeks, have been rapidly reinforced and extended, in consequence of the victory of General Jackson over this tribe and the subsequent cession of portions of this territory. Immigration to Alabama has already become considerable, indicating that in a short time the whole central portion of the state, embracing a large part of the region drained by the Mobile river and its branches, will be covered by settlements, to extend northward and effect a junction with the Tennessee and Kentucky settlements, and westward across the lower part of Mississippi, until they meet the Louisiana settlements. In Georgia the Cherokees and the Creeks still hold settlement back along the line of the Altamaha river. There are, however, scattered bodies of population in various parts of the state, though of small extent. In Louisiana we note a gradual increase of the extent of redeemed territory, which appears to have been limited almost exactly by the borders of the alluvial region. In Arkansas the settlements, which we saw in 1810 near the mouth of the Arkansas river, have extended up the bottom lands of that river, forming a body of population of considerable size. Beside these, a small body is found in the southern central part of the state, at the southeastern base of the hill region, and another in the prairie region in the northern part.

The frontier line now has a length of 4,100 miles, embracing an area, after taking out all the unsettled regions included between it, the Atlantic, and the Gulf, of 504,517 square miles, all lying between $29^{\circ} 30'$ and $45^{\circ} 30'$ north latitude, and between 67° and $93^{\circ} 45'$ west longitude. Outside the frontier line are some bodies of population on the Arkansas, White, and Washita rivers, in Arkansas, as before noted, as well as some small bodies in the northwest. Computing these at 4,200 square miles in the aggregate, we have a total settled area of 508,717 square miles, the aggregate population being 9,633,822, and the average density of settlement 18.94 to the square mile.

1830.

In the decade from 1820 to 1830 other territorial changes have occurred. In the early part of the decade the final transfer of Florida from Spanish jurisdiction was effected, and it became a territory of the United States. Missouri has been carved from the southeastern part of the old Missouri territory, and admitted as a state. Otherwise the states and territories have remained nearly as before. Settlement during the decade has again spread greatly. The westward extension of the frontier does not appear to have been so great as in some former periods, the energies of the people being mainly given to filling up the included areas. In other words, the decade from 1810 to 1820 seems to have been one of blocking out work which the succeeding decade has been largely occupied in completing.

During this period the Indians, especially in the south, have still delayed settlement to a great extent. The Creeks and the Cherokees in Georgia and Alabama, and the Choctaws and the Chickasaws in Mississippi, occupy

large areas of the best portions of those states, and successfully resist encroachment upon their territory. Georgia, however, has witnessed a large increase in settlement during the decade. The settlements which have heretofore been staid on the line of the Altamaha have spread westward across the central portion of the state to its western boundary, where they have struck against the barrier of the Creek territory. Stopped at this point, they have moved southward down into the southwest corner, and over into Florida, extending even to the Gulf coast. Westward they have stretched across the southern part of Alabama, and joined that body of settlement which was previously formed in the drainage basin of the Mobile river. The Louisiana settlements have but slightly increased, and no great change appears to have taken place in Mississippi, owing largely to the cause above noted, viz, the occupancy of the soil by Indians. In Arkansas the spread of settlement has been in a strange and fragmentary way. A line reaches from Louisiana to the Arkansas river and up that river to the state line, where it is stopped abruptly by the boundary of the Indian territory. It extends up the Mississippi, and joins the great body of population in Tennessee. A branch extends northeastward from near Little Rock to the northern portion of the state. All these settlements within Arkansas territory are as yet very sparse. In Missouri the principal extension of settlement has been in a broad belt up the Missouri river, reaching to the state line, at the mouth of the Kansas river, where quite a dense body of population appears. Settlement has progressed in Illinois, from the Mississippi river eastward and northward, covering more than half of the state. In Indiana it has followed up the Wabash river, and thence has spread until it reaches nearly to the north line of the state. But little of Ohio remains unsettled. The sparse settlements about Detroit, in Michigan territory, have broadened out, extending toward the interior of the lower peninsula, while isolated patches have appeared in various other localities.

Turning to the more densely settled parts of the country, we find that settlement is slowly making its way northward in Maine, although discouraged by the poverty of the soil and the severity of the climate. The unsettled tract in northern New York is decreasing, but very slowly, as is also the case with the unsettled area in northern Pennsylvania. In western Virginia the unsettled tracts are reduced to almost nothing, while the vacant region in eastern Tennessee, on the Cumberland plateau, is rapidly diminishing.

At this date, 1830, the frontier line has a length of 5,300 miles, and the aggregate area now embraced between the ocean, the Gulf, and the frontier line is 725,406 square miles. Of this, however, not less than 97,389 square miles are comprised within the included vacant tracts, leaving only 628,017 square miles as the settled area within the frontier line, all of which lies between latitude $29^{\circ} 15'$ and $46^{\circ} 15'$ north, and between longitude 67° and 95° west.

Outside the body of continuous settlement are no longer found large groups, but several small patches of population appear in the states of Ohio, Indiana, and Illinois, and in Michigan territory, aggregating 4,700 square miles, making a total settled area, in 1830, of 632,717 square miles. As the aggregate population is 12,866,020, the average density of settlement is 20.33 to the square mile.

1840.

During the decade ending in 1840 the territory of Michigan has been divided; that part east of Lake Michigan and north of Ohio and Indiana, together with the greater part of the peninsula between Lakes Superior and Michigan, has been created into the state of Michigan, the remainder being known as Wisconsin territory. Iowa territory has been created out of that part of Missouri territory lying north of the Missouri state line and east of the Missouri river, and Arkansas has been admitted to the Union.

In 1840 we find, by examining the map of population, that the process of filling up and completing the work blocked out between 1810 and 1820 has been carried still further. From Georgia, Alabama, and Mississippi the Cherokee, Creek, Choctaw, and Chickasaw Indians, who, at the time of the previous census, occupied large areas in these states, and formed a very serious obstacle to settlement, have been removed to the Indian territory, and their country has been opened up to settlement. Within the two or three years which have elapsed since the removal of these Indians the lands relinquished by them have been entirely taken up, and the country has been covered with a comparatively dense settlement. In northern Illinois, the Sac and Fox and Pattawatomie tribes having been removed to the Indian territory, their country has been promptly taken up, and we now find settlements carried over nearly the whole extent of Indiana and Illinois, and across Michigan and Wisconsin as far north as the forty-third parallel. Population has crossed the Mississippi river into Iowa territory, and occupies a broad belt up and down that stream. In Missouri the settlements have spread northward from the Missouri river nearly to the boundary of the state, and southward till they cover most of the southern portion, and make connection in two places with the settlements of Arkansas. The unsettled area found in southern Missouri, together with that in northwestern Arkansas, is due to the hilly and rugged nature of the country, and to the poverty of the soil, as compared with the rich prairie lands all around. In Arkansas the settlements remain sparse, but have spread widely away from the streams, covering much of the prairie parts of the state. There is, beside the area in northwestern Arkansas just mentioned, a large area in the northeastern part of the state, comprised almost entirely within the alluvial regions of the St. Francis river, and also one in the southern portion, extending over into northern Louisiana, which is entirely in the fertile prairie section. The fourth unsettled region lies in the southwestern part of the state.

In the older states we note a gradual decrease in the unsettled areas, as in Maine and New York. In northern Pennsylvania the unsettled section has nearly disappeared. A small portion of the unsettled patch on the Cumberland plateau still remains. In southern Georgia the Okefenokee swamp and the pine barrens adjacent have thus far repelled settlement, although population has increased in Florida, passing entirely around this area to the south. The greater part of Florida, however, including nearly all the peninsula and several large areas along the Gulf coast, still remains without settlement. This is due in part to the nature of the country, being alternately swamp and hummock, and in part to the hostility of the Seminole Indians, who still occupy nearly all of the peninsula.

The frontier line in 1840 has a length of 3,300 miles. This shrinking in its length is due to its rectification on the northwest and southwest, owing to the filling out of the entire interior. It incloses an area of 900,658 square miles, all lying between latitude 29° and $46^{\circ} 30'$ north, and longitude 67° and $95^{\circ} 30'$ west. The vacant tracts have, as noted above, decreased, although they are still quite considerable in Missouri and Arkansas. The total area of the vacant tracts is 95,516 square miles. The settled area outside the frontier line is notably small, and amounts, in the aggregate, to only 2,150 square miles, making the entire settled area 807,292 square miles in 1840. The aggregate population being 17,069,453, the average density is 21.14 to the square mile.

1850.

Between 1840 and 1850 the limits of our country have been further extended by the annexation of the state of Texas and of territory acquired from Mexico by the treaty of Guadalupe Hidalgo. The states of Iowa, Wisconsin, and Florida have been admitted to the Union, and the territories of Minnesota and Oregon have been created. An examination of the map shows that the frontier line has changed very little during this decade. At the western border of Arkansas the extension of settlement is peremptorily limited by the boundary of the Indian territory; but, curiously enough also, the western boundary of Missouri puts almost a complete stop to all settlement, notwithstanding that some of the most densely populated portions of the state lie directly on that boundary.

In Iowa settlements have made some advance, moving up the Missouri, the Des Moines, and other rivers. The settlements in Minnesota at and about St. Paul, which appeared in 1840, have greatly extended up and down the Mississippi river, while other scattering bodies of population appear in northern Wisconsin. In the southern part of the state settlement has made considerable advance, especially in a northeasterly direction, toward Green Bay. In Michigan the change has been very slight.

Turning to the southwest we find Texas, for the first time on the map of the United States, with a considerable extent of settlement; in general, however, it is very sparse, most of it lying in the eastern part of the state, and being largely dependent upon the grazing industry.

The included unsettled areas now are very small and few in number. There still remains one in southern Missouri, in the hilly country; a small one in northeastern Arkansas, in the swampy and alluvial region; and one in the similar country in the Yazoo bottom lands in western Mississippi. Along the coast of Florida are found two patches of considerable size, which are confined to the swampy coast regions. The same is the case along the coast of Louisiana. The sparse settlements of Texas are also interspersed with several patches devoid of settlement. In southern Georgia the large vacant space heretofore noted, extending also into northern Florida, has disappeared, and the Florida settlements have already reached southward to a considerable distance in the peninsula, being now free to extend without fear of hostile Seminoles, the greater part of whom have been removed to the Indian territory.

The frontier line, which now extends around a considerable part of Texas and issues on the Gulf coast at the mouth of the Nueces river, is 4,500 miles in length. The aggregate area included by it is 1,005,213 square miles, from which deduction is to be made for vacant spaces, in all, 64,339 square miles. The isolated settlements lying outside this body in the western part of the country amount to 4,775 square miles.

It is no longer by a frontier line drawn around from the St. Croix river to the Gulf of Mexico that we embrace all the population of the United States, excepting only a few outlying posts and small settlements. We may now, from the Pacific, run a line around 80,000 miners and adventurers, the pioneers of more than one state of the Union soon to arise on that coast. This body of settlement has been formed, in the main, since the acquisition of the territory by the United States, and, it might even be said, within the last year (1849-1850), dating from the discovery of gold in California. These settlements may be computed rudely at 33,600 square miles, making a total area of settlement of 979,249 square miles, the aggregate population being 23,191,876, and the average density of settlement 23.68 to the square mile.

1860.

Between 1850 and 1860 the territorial changes noted are as follows: the territory of New Mexico has been created, and the territory south of the Gila river, which has been acquired from Mexico by the Gadsden purchase (1853), has been added to it; Minnesota has been admitted as a state; Kansas and Nebraska territories have been formed from parts of Missouri territory; California and Oregon have been admitted as states, while in the unsettled parts of the Cordilleran region two new territories (Utah and Washington) have been formed out of parts of that terra incognita which we bought from France as a part of Louisiana, and of that which we acquired by conquest

from Mexico. At this date we note the first extension of settlements beyond the line of the Missouri river. The march of settlement up the slope of the Great Plains has begun. In Kansas and Nebraska population is now found beyond the ninety-seventh meridian. Texas has filled up even more rapidly, its extreme settlements reaching to the one hundredth meridian, while the gaps noted at the date of the last census have all been filled by population. The incipient settlements about St. Paul in Minnesota, have grown like Jonah's gourd, spreading in all directions, and forming a broad band of union with the main body of settlement down the line of the Mississippi river. In Iowa settlements have crept steadily northwestward along the course of the drainage, until the state is nearly covered. Following up the Missouri population has reached out beyond the northern border of Nebraska territory. In Wisconsin the settlements have moved at least one degree farther north, while in the lower peninsula of Michigan they have spread up the lake shores, nearly encircling it on the side next Lake Michigan. On the upper peninsula the little settlements which appeared in 1850 in the copper region on Keweenaw point have extended and increased greatly in density as that mining interest has developed in value. In northern New York there is apparently no change in the unsettled area. In northern Maine we note, for the first time, a decided movement toward the settlement of its unoccupied territory in the extension of the settlements on its eastern and northern border up the St. John river. The unsettled regions in southern Missouri, northeastern Arkansas, and northwestern Mississippi have become sparsely covered by population. Along the gulf coast there is little or no change. There is to be noted a slight extension of settlement southward in the peninsula of Florida.

The frontier line now measures 5,300 miles, and embraces 1,126,518 square miles, lying between latitude $28^{\circ} 30'$ and $47^{\circ} 30'$ north, and between longitude 67° and $99^{\circ} 30'$ west. From this deduction should be made on account of vacant spaces, amounting to 39,139 square miles, found mainly in New York and along the Gulf coast. The outlying settlements beyond the one hundredth meridian are now numerous. They include, among others, a strip extending far up the Rio Grande in Texas, embracing 7,475 square miles (a region given over to the raising of sheep), while the Pacific settlements, now comprising two sovereign states, are nearly three times as extensive as at 1850, embracing 99,900 square miles. The total area of settlement in 1860 is thus 1,194,754 square miles, the aggregate population being 31,443,321 and the average density of settlement 26.32 to the square mile.

1870.

During the decade from 1860 to 1870 a number of territorial changes have been effected in the extreme west. A great tract stretching into Arctic regions and containing few people was purchased in 1867 from Russia and is called Alaska. Arizona, Colorado, Dakota, Idaho, Montana, Nevada, and Wyoming have been organized as territories. Kansas, Nebraska, and Nevada have been admitted as states. West Virginia has been cut off from the mother commonwealth and made a separate state.

In 1870 we note a gradual and steady extension of the frontier line westward over the great plains. The unsettled areas in Maine, New York, and Florida have not greatly diminished, but in Michigan the extension of the lumber interests northward and inward from the lake shore has reduced considerably the unsettled portion. On the upper peninsula the settlements have increased somewhat, owing to the discovery of the rich iron deposits destined to play so important a part in the manufacturing industry of the country.

Settlement has spread westward to the boundary of the state in southern Minnesota, and up the Big Sioux river in southeastern Dakota. Iowa is entirely reclaimed, excepting a small area of perhaps 1,000 square miles in its northwestern corner. Through Kansas and Nebraska the frontier line has moved steadily westward, following in general the courses of the larger streams and of the newly constructed railroads. The frontier in Texas has changed but little, that little consisting of a general westward movement. In the Cordilleran region settlements have extended but slowly. Those upon the Pacific coast show little change, either in extent or in density. In short, we see everywhere the effects of the war in the partial arrest of the progress of development.

The settlements in the west, beyond the frontier line, have arranged themselves mainly in three belts. The most eastern of these is located in central Colorado, New Mexico, and Wyoming, along the eastern base of and among the Rocky mountains. To this region settlement was first attracted in 1859 and 1860 by the discovery of mineral deposits, and has been retained by the richness of the soil and by the abundance of water for irrigation, which have promoted the agricultural industry.

The second belt of settlement is that of Utah, settled in 1847 by the Mormons fleeing from Illinois. This community then differed, and still differs, radically from that of the Rocky mountains, being essentially agricultural, mining having been discountenanced from the first by the church authorities, as tending to fill the "Promised land" with Gentile adventurers, and thereby imperil Mormon institutions. The settlements of this group, as seen on the map for 1870, extend from southern Idaho southward through central Utah, and along the eastern base of the Wahsatch range to the Arizona line. They consist mainly of scattered hamlets and small towns, about which are grouped the farms of the communities.

The third strip is that in the Pacific states and territories, extending from Washington territory southward to southern California and eastward to the system of "sinks", in western Nevada. This group of population owes its existence to the mining industry. Originated in 1849 by a great immigration movement, it has grown by successive impulses as new fields for rapid money getting have been developed. Latterly, however, the value of this region to the agriculturist has been recognized, and the character of the occupations of the people is undergoing a marked change.

These three great western groups comprise nine-tenths of the population west of the frontier line. The remainder is scattered about in the valleys and the mountains of Montana, Idaho, and Arizona, at military posts, isolated mining camps, and on cattle ranches.

The frontier line in 1870 embraces 1,178,068 square miles, all between $27^{\circ} 15'$ and $47^{\circ} 30'$ north latitude, and between 67° and $99^{\circ} 45'$ west longitude. From this, however, deduction is to be made of 37,739 square miles on account of interior spaces containing no population. To what remains we must add 11,810 square miles on account of settled tracts east of the one hundredth meridian, lying outside of the frontier line, and 120,100 square miles on account of settlements in the Cordilleran region and on the Pacific coast, making the total area of settlement for 1870 not less than 1,272,239 square miles, the aggregate population being 38,558,371, and the average density of settlement 30.31 to the square mile.

1880.

In 1880 we find that during the decade Colorado has been added to the sisterhood of states. The first point that strikes us in examining the map showing the areas of settlement at this date, as compared with previous ones, is the great extent of territory which has been brought under occupation during the past ten years. Not only has settlement spread westward over large areas in Dakota, Nebraska, Kansas, and Texas, thus moving the frontier line of the main body of settlement westward many scores of miles, but the isolated settlements of the Cordilleran region and of the Pacific coast show enormous accessions of occupied territory.

The migration of farming population to the northeastern part of Maine has widened the settled area to a marked extent, probably more than has been done during any previous decade. The vacant space in the Adirondack region of northern New York has been lessened in size, and its limits have been reduced practically to the actual mountain tract. The most notable change, however, in New England and the middle states, including Ohio and Indiana, has been the increase in density of population and the migration to cities, with the consequent increase of the urban population, as indicated by the number and the size of the spots representing these cities upon the map. Throughout the southern states there is to be noted, not only a general increase in the density of population and a decrease of unsettled areas, but a greater approach to uniformity of settlement throughout the whole region. The unsettled area of the peninsula of Florida has decreased decidedly, while the vacant spaces heretofore seen along the upper coast of Florida and Louisiana have entirely disappeared. Although the Appalachian Mountain system is still distinctly outlined by its general lighter color on the map, its density of population more nearly approaches that of the country on the east and on the west. In Michigan there is seen a very decided increase of the settled region. Settlements have not only surrounded the head of the lower peninsula, but they leave only a very small body of unsettled country in the interior. In the upper peninsula the copper and the iron interests, and the railroads which subserve them, have peopled quite a large extent of territory. In Wisconsin the unsettled area is rapidly decreasing as railroads stretch their arms out over the vacant tracts. In Minnesota and in eastern Dakota the building of railroads, and the development of the latent capabilities of this region in the cultivation of wheat, have caused a rapid flow of settlement, and now the frontier line of population, instead of returning to Lake Michigan, as it did ten years ago, meets the boundary line of the British possessions west of the ninety-seventh meridian. The settlements in Kansas and Nebraska have made great strides over the plains, reaching at several points the boundary of the humid region, so that their westward extension beyond this point is to be governed hereafter by the supply of water in the streams. As a natural result, we see settlements following these streams in long ribbons of population. In Nebraska these narrow belts have reached the western boundary of the state at two points: one upon the South Platte and the other upon the Republican river. In Kansas, too, the settlements have followed the Kansas river and its branches and the Arkansas nearly to the western boundary of the state. Texas also has made great strides, both in the extension of the frontier line of settlement and in the increase in the density of population, due both to the building of railroads and to the development of the cattle, sheep, and agricultural interests. The heavy population in the prairie portions of the state is explained by the railroads which now traverse them. In Dakota, beside the agricultural region, in the eastern part of the territory, we note the formation of a body of settlement in the Black Hills, in the southwest corner, which, in 1870, was a part of the reservation of the Sioux Indians. This settlement is the result of the discovery of valuable gold deposits. In Montana there appears a great extension of the settled area, which, as it is mainly due to agricultural interests, is found chiefly along the courses of the streams. Mining has, however, played not a small part in this increase in settlement. Idaho, too, shows a decided growth from the same causes. The small settlements which, in 1870, were located about Boise city, and near the mouth of the Clearwater, have now extended their areas to many hundreds of square miles. The settlement in the southeastern corner of the territory is almost purely of Mormons, and has not made a marked increase.

Of all the states and territories of the Cordilleran region Colorado has made the greatest stride during the decade. From a narrow strip of settlement, extending along the immediate base of the Rocky mountains, the belt has increased so that it comprises the whole mountain region, beside a great extension outward upon the plains. This increase is the result of the discovery of very extensive and very rich mineral deposits about Leadville, producing a "stampede" second only to that of 1849 and 1850 to California. Miners have spread over the whole

[The text in this section is extremely faint and illegible, appearing as a series of light gray lines and shapes across the page.]

mountain region, till every range and ridge swarms with them. New Mexico shows but little change, although the recent extension of railroads in the territory and the opening up of mineral resources promise in the near future to add largely to its population. Arizona, too, although its extent of settlement has increased somewhat, is but just commencing to enjoy a period of rapid development, owing to the extension of railroads and to the suppression of hostile Indians. Utah presents us with a case dissimilar to any other of the territories—a case of steady, regular growth, due almost entirely to its agricultural capabilities, as was noted previously. This is due to the policy of the Mormon church, which has steadily discountenanced mining and speculation in all forms, and has encouraged in every way agricultural pursuits. Nevada shows a slight extension of settlement due mainly to the gradual increase in the agricultural interest. The mining industry is probably not more flourishing at present in this state than it was ten years ago, and the population dependent upon it is, if anything, less in number. In California, as the attention of the people has become devoted more and more to agricultural pursuits, at the expense of the mining and cattle industries, we note a tendency to a more even distribution of the inhabitants. The population in some of the mining regions has decreased, while over the area of the great valley, and in the fertile valleys of the coast ranges it has increased. In Oregon the increase has been mainly in the section east of the Cascade range, a region drained by the Des Chutes and the John Day rivers, and by the smaller tributaries of the Snake, a region which, with the corresponding section in Washington territory, is now coming to the front as a wheat producing district. In most of the settled portions here spoken of irrigation is not necessary for the cultivation of crops, and consequently the possibilities of the region in the direction of agricultural development are very great. In Washington territory, which in 1870 had been scarcely touched by immigration, we find the valley west of the Cascade mountains tolerably well settled throughout, while the stream of settlement has poured up the Columbia into the valleys of the Wallawalla and the Snake rivers and the great plain of the Columbia, induced thither by the facilities for raising cattle and by the great profits of wheat cultivation.

The length of the frontier line in 1880 is 3,337 miles. The area included between the frontier line, the Atlantic and the Gulf coast, and the northern boundary is 1,398,940 square miles, lying between 26° and 49° north latitude and 67° and 102° west longitude. From this must be deducted, for unsettled areas, as follows:

	SQUARE MILES.
Maine	12, 000
New York	2, 200
Michigan	10, 200
Wisconsin	10, 200
Minnesota	34, 000
Florida	20, 800

making a total of 89,400 square miles, leaving 1,309,540 square miles.

To this must be added the isolated areas of settlement in the Cordilleran region and the extent of settlement on the Pacific coast, which amount, in the aggregate, to 260,025 square miles, making a total settled area of 1,569,565 square miles. The population is 50,155,783, and the average density of settlement 31.96 to the square mile.

1890.

This census completes the history of a century; a century of progress and achievement unequalled in the world's history. A hundred years ago there were groups of feeble settlements sparsely covering an area of 239,935 square miles, and numbering less than 4,000,000. The century has witnessed our development into a great and powerful nation; it has witnessed the spread of settlement across the continent until not less than 1,947,280 square miles have been redeemed from the wilderness and brought into the service of man, while the population has increased and multiplied by its own increase and by additions from abroad until it numbers 62,622,250.

During the decade just past a trifling change has been made in the boundary between Nebraska and Dakota by which the area of Nebraska has been slightly increased. Dakota territory has been cut in two and the states of North Dakota and South Dakota admitted. Montana, Wyoming, Idaho, and Washington have also been added to the sisterhood of states. The territory of Oklahoma has been created out of the western half of the Indian territory, and to it has been added the strip of public land lying north of the panhandle of Texas.

The most striking fact connected with the extension of settlement during the past decade is the numerous additions which have been made to the settled area within the Cordilleran region. Settlements have spread westward up the slope of the plains until they have joined the bodies formerly isolated in Colorado, forming a continuous body of settlement from the east to the Rocky mountains. Practically the whole of Kansas has become a settled region, and the unsettled area of Nebraska has been reduced in dimensions to a third of what it was ten years ago. What was a sparsely settled region in Texas in 1880 is now the most populous part of the state, while settlements have spread westward to the escarpment of the Staked Plains. The unsettled regions of North Dakota and South Dakota have been reduced to half their former dimensions. Settlements in Montana have spread until they now occupy one-third of the state. In New Mexico, Idaho, and Wyoming considerable extensions of area are to be noted. In Colorado, in spite of the decline of the mining industry and the depopulation of its mining regions, settlement has spread, and two-thirds of the state are now under the dominion of man. Oregon and Washington

show equally rapid progress, and California, although its mining regions have suffered, has made great inroads upon its unsettled regions, especially in the south. Of all the western states and territories Nevada alone is at a standstill in this respect, its settled area remaining practically the same as in 1880. When it is remembered that the state has lost one-third of its population during the past ten years, the fact that it has held its own in settled area is surprising until it is understood that the state has undergone a material change in occupations during the decade, and that the inhabitants, instead of being closely grouped and engaged in mining pursuits, have become scattered along its streams and have engaged in agriculture.

Settlement is spreading with some rapidity in Maine, its unsettled area having dwindled from 12,000 to about 4,000 square miles. The unsettled portion of the Adirondack region in New York has also diminished, there being now but 1,000 square miles remaining. The frontier has been pushed still farther southward in Florida, and the unsettled area has been reduced from 20,800 to 13,000 square miles.

Lumbering and mining interests have practically obliterated the wilderness of Michigan and have reduced that of Wisconsin to less than one-half of its former area. In Minnesota the area of the wild northern forests has been reduced from 34,000 to 23,000 square miles. The population is 62,622,250, and the average density of settlement 32.16 to the square mile.

VACANT SPACES ON THE DENSITY MAP.

Within the settled portions of the United States are several areas which, for various reasons, have thus far remained unsettled. There are also areas which, though long ago, perhaps early in our history, were occupied by inhabitants, and which now remain sparsely settled, notwithstanding the vast increase of population in the general regions in which they are situated. The former have been enumerated above. It may be instructive to glance at them in detail, in order to discover the reasons why settlement has passed them by.

The northern portion of Maine, comprising 4,000 square miles, is practically without settlement. The only inhabitants of this region are the occupants of logging camps, who remain there only in the winter, and a handful of enterprising summer tourists. The country is a dense forest, mainly level, but diversified here and there by hills, which in a few instances rise to the dignity of mountains. It is traversed by numerous small streams, strung upon which are many lakes and lakelets, the whole forming a most complicated system of water communication, navigable, however, only by canoes, owing to numerous falls and rapids.

The climate is severe, and this, added to the poverty of the soil and the labor involved in clearing it for agriculture, has prevented its occupation, while rich farming lands can be obtained under liberal homestead laws in the west. Another, and slightly more remote, cause has operated, to a considerable extent, in preventing the spread of settlement in this state. This is the decline in shipbuilding, especially of wooden vessels—a business in which this state was largely interested. This has not only checked the general prosperity of the state, but has injured the lumber business greatly. During recent years there has been a slight movement into this region. A line of settlement has extended up the eastern border of the state, and this is now spreading very gradually westward. It is safe to predict, however, that not until all that part of the prairie country which lies east of the limit of the arid region shall have been settled will population move decidedly toward this section.

A second section which has thus far defied settlement is the Adirondack region. This presents very serious obstacles to settlement—so serious that the central portion of it remains today without inhabitants. It consists of scattered groups of mountains, standing in short ranges or ridges. These mountains rise to heights of 4,000 to 5,000 feet, a few peaks exceeding the latter figures. The valleys are all at a considerable elevation. On the east the mountains descend abruptly to Lakes George and Champlain; on the west, they fall off into a sort of plateau, extending toward the St. Lawrence and Lake Ontario. On the north and south the ridges fall off gradually to the lower country. The whole region is densely covered with forests. It is watered by numerous mountain torrents, while the valleys and the plateau on the west are dotted with numberless lakes and ponds. The elevation and the consequently severe climate of the valleys, and the country immediately adjacent, are such as to discourage, if not to preclude, agriculture.

Elsewhere in the Appalachian region there are no unsettled areas of sufficient magnitude to be represented on our map, although in many localities the population is very sparse. In Pennsylvania the narrow ridges of this system are covered with coal and iron miners; in Virginia the grain fields extend to and over their summits; in North Carolina and Tennessee the high mountains are without settlements, owing to their rugged character and their great elevation. But these areas, although large in the aggregate, are severally very small.

In northern Wisconsin the case is not dissimilar to that of northern Maine. This is a region of heavy forest, lying far to the north, under a severe climate. Settlement has, to a certain extent, passed it by, following westward the belt of open, fertile prairie. But, on the other hand, immigration to this state is still going on; the lumber business, which is here the pioneer of settlement, is being actively prosecuted, and every year settlement is closing in upon this vacant space, and its area is constantly and rapidly diminishing.

The unsettled portion of Minnesota is under conditions somewhat similar. The prairie portion of the state is now occupied, and settlements have encroached heavily upon the region of forests. The northern part of this unsettled region, unlike Wisconsin, is not occupied by forests, but is covered with a scrubby growth of hackmatack and other brush. A large proportion of the surface is occupied by lakes and swamps.

A large proportion of the area of the peninsula of Florida is practically without settlement. This appears to be due in part to the direction of the general movement of population, which has been westward from Georgia and the Carolinas; in part to the want of good harbors, and other inducements to settle upon the coast, and thus to create starting points for the settlement of the interior; but also, and very largely, to the fact that a considerable portion of the area is swampy and difficult of access, and, consequently, remote from markets.

The peninsula is underlain mainly by a limestone formation, geologically very recent. Its surface consists largely of hummocks and ridges, alternating with belts and patches of swamp and myriads of swampy lakes. The Everglades, which occupy an immense area in the southern portion of the peninsula, seem to be a culmination of the general characteristics of the peninsula, and the following description of them, from the pen of Professor E. A. Smith, illustrates the extreme of these characteristics:

The Everglades, which form so singular and unique a feature of Florida, may be described, in general terms, as consisting of a shallow lake of vast extent, occupying a basin or depression in the limestone of the country. From surveys recently made, it is known that the whole bed of the Everglades has considerable elevation above the sea, so that the draining of this area is merely a question of time and expense. All the streams which flow from the Everglades are interrupted by falls or rapids. The Caloosahatchee is navigable by steamers to within 10 miles of Lake Okeechobee, where the rapids begin.

The water over the Everglades varies in depth from 6 inches to as many feet, and teems with aquatic and semi-aquatic grasses and other plants. From this maze of water and vegetation rise innumerable islands, containing from 1 to 100 acres of land. These islands are covered with a growth of cypress, sweet bay, crab wood, mastic, cocoa palms, cabbage palmetto, and live and water oaks, beneath which bloom flowers in almost endless variety. Notwithstanding the shallowness of the water in the Everglades, and the profuseness of the vegetation growing in it, it is comparatively pure and clear, and abounds in fish, turtles, and alligators. Bears, panthers, wild-cats, and deer inhabit the islands.

Lake Okeechobee is about 50 miles long from northwest to southeast, and about 20 miles broad, and from 8 to 20 feet deep. Its northeastern and eastern shores are skirted with a low hummock of red bay, live oak, water oak, and other timber; its western and southwestern shore with a dense growth of saw grass.

The lake has no visible outlet, except as its waters soak through the Everglades, and the lands around the lake can never be made available till the waters are lowered by artificial canals.

Having thus gone through the successive census years, tracing the course of the outside line of population and estimating the settled area inclosed between this line and the ocean, let us now go back to 1790, and follow out the movement of population along the several degrees of latitude, to note the relative rapidity and steadiness of advance within each belt of territory. Owing to the difficulty of locating with precision the numerous small patches of population in the Pacific states and territories up to and including 1870, the computations shown in the following table are restricted to the country east of the one hundredth meridian up to that period. The figures for 1880 and 1890 are for the whole country.

Before the results of such computations can be satisfactorily stated, an explanation must be given of the method followed.

First. The successive parallels are taken as the central lines of zones half a degree wide; and where any parallel passes through vacant spaces, any body of population lying within a quarter degree, upon either side thereof, is referred thereto, after being reduced to the width of half a degree in latitude. Where a solid body of population lies close up against a parallel on one side, however, no reduction is made on account of the absence of population on the other side. The only important exception to the rule is in the case of the thirty-fourth parallel, where, after crossing the ninety-fourth meridian, it runs through the southern portion of the Indian territory, shortly above the northern line of Texas. As the absence of population as known to the census (Indians in tribal relations not being recognized by the census law) from the line of this parallel in this part of its course is the result of express exclusion by treaty stipulations the population just below is not referred to it.

Second. The starting point on the coast is taken, not from the extreme end of any cape or promontory upon which the parallel may chance to emerge from the Atlantic, but from the average projection of the coast line in the general neighborhood of the parallel. In the case of Long Island, the eastern half was taken to fill up the western end of the sound, and the forty-first parallel was assumed, for the purposes of these computations, to begin with 73° west longitude.

Third. The northern lakes and all considerable bays were omitted from consideration, as also the British possessions when crossed by the parallels under measurement.

Fourth. All spaces vacant of population were skipped, the same rule being adopted for measuring and referring to parallels spaces which are not directly upon any parallel, as in the case of the populated areas lying above or below a parallel when passing through vacant spaces.

The result of the application of these rules to our measurements is to give the populated areas along each parallel either in one continuous body or in several groups, as population is broken by foreign territory, by lakes or bays, or by large vacant spaces. Consolidating all such, however, and reducing all the populated spaces on each parallel to a continuous line, we have the following as the breadth of the settled area in miles along the successive parallels at each census from 1790 to 1890:

EXTENT OF SETTLED AREA: 1790 TO 1890.

[Miles.]

DEGREE OF NORTH LATITUDE.	1790	1800	1810	1820	1830	1840	1850	1860	1870	1880	1890

In all this discussion regarding the population and the area of the United States, Alaska is intentionally omitted.

THE SETTLED AREA IN 1890.

In the following tables are presented the results of computations relating to the density of the rural, as distinguished from the urban, population at the census of 1890, in comparison with the corresponding results of previous enumerations. In this discussion it is to be understood that all cities of 8,000 inhabitants or more are taken out of consideration, and, as explained previously, in connection with the density maps, the deduction of the population of cities sometimes brings the county into a lower population group than at the preceding census, notwithstanding the actual increase of population in both rural and urban parts. Thus we may suppose a county, with an area of 400 square miles, to have had in 1880 a population of 20,000, and its county town 6,500 inhabitants. The county would therefore, if treated as a whole, fall into group 4; that is, the group having a density 45 to 90 to the square mile. In 1890, however, we will suppose the population to have increased to 24,000, of which 8,500 are now found in the county town, which thereupon becomes a city within our definition, and is therefore excluded from the mass of population. The county then sinks into class 3; that is, the group having between 18 and 45 inhabitants to the square mile. Such cases are, of course, few in number. The lowest grade of settlement taken for this discussion is that which contains a population of 2 to the square mile. All the region outside this line may be regarded as practically unsettled territory, peopled, if at all, by a few scattering graziers, wandering prospectors, lumbermen, or hunters.

For purposes of discussion this region may be divided, according to density of population, into five groups corresponding to those upon the general density maps. These groups are as follows:

1. A population of from 2 to 6 to a square mile.
2. A population of from 6 to 18 to a square mile.
3. A population of from 13 to 45 to a square mile.
4. A population of from 45 to 90 to a square mile.
5. A population of 90 or more to a square mile.

Of these groups of population of different density, as they may be called, the first three indicate a predominantly agricultural condition. Speaking broadly, agriculture in the United States is not carried to such a point as to afford employment and support to a population in excess of 45 to a square mile; and, consequently, the fourth and fifth groups do not appear with us, except as trade and manufactures arise and the classes rendering personal and professional services are multiplied.

Of the agricultural groups, the first represents a very sparse population, such as in our western country might be sustained by the grazing industry, without any cultivation of the soil; and accordingly we find this group at the present time mainly represented in the states and territories of the far west. The poorest tillage regions also sink into this group, and hence we find not inconsiderable portions of some of the older states in this class. In 1790, however, No. 1 was the largest single group in what is now Maine, in New York, Pennsylvania, South Carolina, and in what is now the state of West Virginia.

The second group—6 to 18 inhabitants to the square mile—indicates almost universally the existence of defined farms or plantations and the systematic cultivation of the ground, but this either in an early stage of settlement or upon more or less rugged soil. Thus we find this group still large in many of the western and southwestern states and in the mountainous regions of the Atlantic slope. In 1790, however, this group far exceeded in area Nos. 3, 4, and 5 combined.

The third group—18 to 45 inhabitants to the square mile—almost universally indicates a highly successful agriculture. Here and there the presence of petty mechanical industries raises a difficult farming or planting region into this group, but in general, where manufactures exist at all, they induce a population of 45 or more to the square mile.

We should therefore expect to find, as is the case, No. 3 the predominant group in northern New England, in the southern states, and, of the northern central states, Illinois, Michigan, Wisconsin, Iowa, Missouri, and Kansas. In 1790, No. 3 was the largest single group in Delaware, Maryland, Massachusetts, New Hampshire, New Jersey, and Virginia (exclusive of what is now West Virginia).

The fourth group almost universally indicates the existence of commercial and manufacturing industry and the multiplication of personal and professional services. Massachusetts, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Maryland, Ohio, and Indiana are the states in which this group is found in excess of any other. In none of these states was this group in excess in 1790. Two of them, Ohio and Indiana, can scarcely be said to have been settled at all (Marietta, Ohio, having been founded in 1788, while in Indiana there were but two or three small settlements, the remains of French occupation). In New York and Pennsylvania, at that date, group 1 was predominant.

The fifth group represents a very advanced condition of industry, as this degree of settlement is only reached where manufacturing and trading cities are numerous. At the First Census only a few counties, and even at the Eleventh Census less than 25,000 square miles, were found populated to this extent. In Rhode Island and the District of Columbia alone is this degree of density found in excess of every other.

Having thus sought to give a general, but necessarily somewhat vague, impression of the meaning of these groups of population, the following tables are presented with a view of illustrating the present status of our population in regard to extent and density of settlement.

The following table presents the areas in square miles of the total settled area and of the different groups of settlement at the date of each census:

CENSUS YEARS.	Total area of settlement: 2 or more to the square mile.	GROUP 1.	GROUP 2.	GROUP 3.	GROUP 4.	GROUP 5.
		2 to 6 to the square mile.	6 to 18 to the square mile.	18 to 45 to the square mile.	45 to 90 to the square mile.	90 or more to the square mile.
1790.....	239,935	83,436	83,346	59,282	13,051	820
1800.....	305,708	81,010	123,267	82,504	17,734	1,193
1810.....	407,945	116,629	154,419	108,155	27,499	1,243
1820.....	508,717	140,827	177,153	150,390	39,004	1,343
1830.....	632,717	151,460	225,894	186,503	65,446	3,414
1840.....	807,292	183,607	291,819	241,587	84,451	5,828
1850.....	979,249	233,697	294,698	338,796	100,794	11,264
1860.....	1,194,754	260,866	353,341	431,601	134,722	14,224
1870.....	1,272,239	245,897	363,475	470,529	174,036	18,302
1880.....	1,569,565	384,820	373,890	554,300	231,410	25,145
1890.....	1,947,280	592,037	393,943	701,845	235,148	24,307

Notwithstanding the constant passage of territory from lower into higher groups by reason of increase in the number of inhabitants, the lower groups have been so rapidly increased by settlement of new territory that they have increased in every case, except that in 1800 and 1870 slight diminutions are noted in group 1. In 1890 a trifling reduction is seen in the highest group. This is doubtless an indirect result of the rapid development of cities in the territory falling into this group, as each city, upon reaching a population of 8,000, is subtracted from the population of its county, thereby materially reducing the apparent density of the population of the county. To a certain extent the case is similar in the next group, that of 45 to 90 inhabitants to a square mile, which during the past decade increased in area but 3,738 square miles.

It will be noted that the settled area has constantly and rapidly increased, but by no means at a uniform rate or at rates proportional to the increase of population. The following table shows the rates of increase of the settled area and of the population placed in juxtaposition:

CENSUS YEARS.	Settled area.	Population.	PER CENT OF INCREASE.	
			Settled area	Population.
1790.....	239,935	3,929,214		
1800.....	305,708	5,308,483	27.41	35.10
1810.....	407,945	7,239,881	33.44	36.38
1820.....	508,717	9,633,822	24.70	33.07
1830.....	632,717	12,866,020	24.38	33.55
1840.....	807,292	17,069,453	27.59	32.67
1850.....	979,249	23,191,876	21.30	35.87
1860.....	1,194,754	31,443,321	22.01	35.58
1870.....	1,272,239	38,558,371	6.49	22.63
1880.....	1,569,565	50,155,788	23.37	30.08
1890.....	1,947,280	62,622,250	24.06	24.86

In 1890 the population was nearly 16 times as great as in 1790, while during the century the settled area was increased only about eightfold. In general, the increase of population has gone on at a much more rapid rate than that of settled area.

During the decade from 1880 to 1890 the inroads upon the unsettled region have been unprecedented in amount, not less than 377,715 square miles having been redeemed, exceeding by 80,389 square miles the area settled between 1870 and 1880.

The following table shows the percentage of the area of each group of population of the total area of settlement at each census. The total for each census year equals 100 per cent in all cases.

CENSUS YEARS.	GROUP 1.	GROUP 2.	GROUP 3.	GROUP 4.	GROUP 5.
1790.....	34.77	34.74	24.71	5.44	0.34
1800.....	26.50	40.32	26.99	5.80	0.39
1810.....	28.59	37.85	26.51	6.74	0.31
1820.....	27.68	34.82	29.56	7.67	0.27
1830.....	23.94	35.70	29.48	10.34	0.54
1840.....	22.74	36.15	29.93	10.46	0.72
1850.....	23.87	30.09	34.60	10.29	1.15
1860.....	21.83	29.57	36.13	11.28	1.19
1870.....	19.33	28.57	36.98	13.68	1.44
1880.....	24.52	23.82	35.32	14.74	1.60
1890.....	30.40	20.23	36.04	12.08	1.25

THE SETTLED AREA IN 1890.

xxxiii

The following table presents in detailed form, by states and territories, the extent of settled area and the area in each of the density groups:

AREAS IN SQUARE MILES OF THE DIFFERENT GROUPS OF SETTLEMENT IN 1890.

STATES AND TERRITORIES.	Total area of settlement: 2 or more to the square mile.	GROUP 1.	GROUP 2.	GROUP 3.	GROUP 4.	GROUP 5.
		2 to 6 to the square mile.	6 to 18 to the square mile.	18 to 45 to the square mile.	45 to 90 to the square mile.	90 or more to the square mile.

Up to and including 1880 the country had a frontier of settlement, but at present the unsettled area has been so broken into by isolated bodies of settlement that there can hardly be said to be a frontier line. In the discussion of its extent and its westward movement it can not, therefore, any longer have a place in the census reports.

DENSITY OF POPULATION.

The following statement shows the gross area (land and water surface) which the country, exclusive of Alaska, had at the date of each census, from 1790 to 1890:

	SQUARE MILES.		SQUARE MILES.
1790	827, 844	1850	2, 980, 959
1800	827, 844	1860	3, 025, 600
1810	1, 999, 775	1870	3, 025, 600
1820	1, 999, 775	1880	3, 025, 600
1830	2, 059, 043	1890	3, 025, 600
1840	2, 059, 043		

At the time of the first two censuses the United States comprised only the territory between the Atlantic ocean and the Mississippi river. In 1803 the enormous area of the Louisiana purchase was added, which, as it was entirely unsettled at that time, reduced the number of inhabitants to the square mile to a little more than one-half what it was previously. In 1821 the purchase of the Floridas from Spain increased our territory by nearly 60,000 square miles. Between 1840 and 1850 the acquisition of territory from Mexico under the treaty of Guadalupe Hidalgo, and in 1853 by the Gadsden purchase, made a vast increase of territory, which again reduced the average number of inhabitants to the square mile. The last acquisition of territory, that of Alaska, containing nearly 600,000 square miles, was made in 1867.

Notwithstanding these great acquisitions of territory (excluding Alaska), which have increased our domain from 827,844 to 3,025,600 square miles, the density of population (see page xxxv) has increased from 4.89 to 21.31 inhabitants to the square mile within the century.

The following table shows for 1890 the gross areas (land and water surface) of states and territories in square miles:

STATES AND TERRITORIES.	Gross area.	Water surface.	Land surface.	STATES AND TERRITORIES.	Gross area.	Water surface.	Land surface.
Total	3, 025, 600	55, 600	2, 970, 000	Nebraska	77, 510	670	76, 840

a Dakota territory.

The above table shows that, with the exception of the District of Columbia, which is in effect a municipality, the most densely settled state is Rhode Island, and next to that Massachusetts. In these states the density of population is as great as in many of the most densely settled European states. Indeed the entire North Atlantic

division of states, which is pre-eminently the manufacturing section of the country, contains an average of over 100 inhabitants to the square mile. The South Atlantic and South Central divisions, which are pre-eminently farming regions, are much less densely peopled. The scattered character of the population of the western states and territories is illustrated by the low density of population.

CENTER OF POPULATION.

By the Eleventh Census the center of population in 1890 was in the following position:

Latitude.....	39° 11' 56"
Longitude.....	85 32 53

In ten years the center of population has moved westward 53' 13", or about 48 miles, and northward 7' 48", or about 9 miles. It rests now in southern Indiana, at a point a little west of south of Greensburg, the county seat of Decatur county, and 20 miles east of Columbus, Indiana.

The closeness with which the center of population, through such rapid westward movement as has been recorded, has clung to the parallel of 39° of latitude can not fail to be noticed. The most northern point reached was at the start in 1790; the most southern point was in 1830, the preceding decade having witnessed a rapid development of population in the southwest, Alabama, Arkansas, Mississippi, and Louisiana having been admitted as states and Florida annexed and organized as a territory. The extreme variation in latitude has been less than 19 minutes, while the hundred years of record have accomplished a movement of longitude of over 9 degrees. Assuming the westward movement to have been uniformly along the parallel of 39° of latitude, the westward movement of the several decades has been as follows: 1790-1800, 41 miles; 1800-1810, 36 miles; 1810-1820, 50 miles; 1820-1830, 39 miles; 1830-1840, 55 miles; 1840-1850, 55 miles; 1850-1860, 81 miles; 1860-1870, 42 miles; 1870-1880, 58 miles, and 1880-1890, 48 miles, a total westward movement of 505 miles. The sudden acceleration of movement between 1850 and 1860 was due to the transfer of a considerable body of population from the Atlantic to the Pacific coast, 12 individuals in San Francisco exerting as much pressure at the then pivotal point, viz, the crossing of the eighty-third meridian and the thirty-ninth parallel, as 40 individuals at Boston.

The center of population is the center of gravity of the population of the country, each individual being assumed to have the same weight. The method of determination used, in order that the result might be comparable with that obtained in 1880, was in brief as follows:

The population of the country was first distributed by "square degrees", as the area included between consecutive parallels and meridians has been designated. A point was then assumed tentatively as the center, and corrections in latitude and longitude to this tentative position were computed. In this case the center was assumed to be at the intersection of the parallel of 39° with the meridian of 86° west of Greenwich. The population of each square degree was assumed to be located at the center of that square degree, except in cases where it was manifest that this assumption would be untrue, as, for instance, where a part of the square degree was occupied by the sea or other large body of water, or where it contained a city of considerable magnitude which was situated "off center". In these cases the position of the center of the population of the square degree was estimated as nearly as possible. The distance of each such center of population of a square degree, whether assumed to be at the center of the square degree or at a distance from the center, from the assumed parallel and from the assumed meridian, was then computed. The population of each square degree was then multiplied by its distance from the assumed parallel of latitude, and the sums of the products, or moments, north and south of that parallel were made up. Their difference, divided by the total population of the country, gave a correction to the latitude. In a similar manner the east and west moments were made up, and from them a correction in longitude was obtained.

In 1790 the center of population was at 39° 16.5' north latitude and 76° 11.2' west longitude, which a comparison of the best maps available would seem to place about 23 miles east of Baltimore. During the decade from 1790 to 1800 it appears to have moved almost due west to a point about 18 miles west of the same city, being in latitude 39° 16.1' and longitude 76° 56.5'.

From 1800 to 1810 it moved westward and slightly southward to a point about 40 miles northwest by west of Washington, being in latitude 39° 11.5' and longitude 77° 37.2'. The southward movement during this decade appears to have been due to the annexation of the territory of Louisiana, which contained quite extensive settlements.

From 1810 to 1820 it moved westward and again slightly southward to a point about 16 miles north of Woodstock, Virginia, being in latitude 39° 5.7' and longitude 78° 33'. This second southward movement appears to have been due to the extension of settlements in Mississippi, Alabama, and eastern Georgia.

From 1820 to 1830 it moved still westward and southward to a point about 19 miles southwest of Moorefield, in the present state of West Virginia, being in latitude 38° 57.9' and longitude 79° 16.9'. This is the most decided southward movement that it has made during any decade. It appears to have been due in part to the addition of Florida to our territory and in part to the great extension of settlements in Alabama, Louisiana, Mississippi, and Arkansas, or generally, it may be said, in the southwest.

From 1830 to 1840 it moved still farther westward, but slightly changed its direction northward, reaching a point 16 miles south of Clarksburg, in the present state of West Virginia, being in latitude 39° 2' and longitude 80° 18'. During this decade settlement had made decided advances in the prairie states and in the southern portions of Michigan and Wisconsin, the balance of increased settlement evidently being in favor of the northwest.

From 1840 to 1850 it moved westward and slightly southward again, reaching a point about 23 miles southeast of Parkersburg, in the present state of West Virginia, in latitude 38° 59' and longitude 81° 19', the change of direction southward being largely due to the annexation of Texas.

From 1850 to 1860 it moved westward and slightly northward, reaching a point 20 miles south of Chillicothe, Ohio, this being in latitude 39° 0.4', longitude 82° 48.8'.

From 1860 to 1870 it moved westward and sharply northward, reaching a point about 48 miles east by north of Cincinnati, Ohio, in latitude 39° 12', longitude 83° 35.7'. This northward movement was due in part to waste and destruction in the south consequent upon the civil war, and in part probably to the fact that the census of 1870 was defective in its enumeration of the southern people, especially of the newly enfranchised negro population.

In 1880 the center of population had returned southward to nearly the same latitude which it had in 1860, being in latitude 39° 4.1', longitude 84° 39.7'. This southward movement was due only in part to an imperfect enumeration at the south in 1870. During the decade from 1870 to 1880 the southern states made a large positive increase, both from natural growth and from immigration southward.

During the past decade the center of population has moved northward into practically the same latitude which it occupied in 1870. It has moved westward 53' 13'', or 48 miles, being less by 10 miles than its movement during the preceding decade, 6 miles greater than the movement between 1860 and 1870, and slightly less than the average westward movement since the First Census, its present position being in latitude 39° 11' 56'' and longitude 85° 32' 53''. The most salient point of its progress during the past decade is the northing which has been made, which is largely due to the great development in the cities of the northwest and in the state of Washington, and also in no small degree to the increase of population in New England.

The center of the area of the United States, excluding Alaska, is in northern Kansas in approximate latitude 39° 55' and approximate longitude 98° 50'. The center of population is therefore about three-fourths of a degree south and more than 13 degrees east of the center of area.

The following table shows the movement of the center of population since 1790:

POSITION OF THE CENTER OF POPULATION: 1790 TO 1890.

CENSUS YEARS.	North latitude.	West longitude.	Approximate location by important towns.	Westward movement in miles during preceding decade.
1790.....	39° 16.5'	76° 11.2'	23 miles east of Baltimore, Maryland.....	
1800.....	39 16.1	76 56.5	18 miles west of Baltimore, Maryland.....	41
1810.....	39 11.5	77 37.2	40 miles northwest by west of Washington, District of Columbia.....	36
1820.....	39 5.7	78 33.0	16 miles north of Woodstock, Virginia.....	50
1830.....	38 57.9	79 16.9	19 miles west-southwest of Moorefield, in the present state of West Virginia.....	39
1840.....	39 2.0	80 18.0	16 miles south of Clarksburg, in the present state of West Virginia.....	55
1850.....	38 59.0	81 19.0	23 miles southeast of Parkersburg, in the present state of West Virginia.....	55
1860.....	39 0.4	82 48.8	20 miles south of Chillicothe, Ohio.....	81
1870.....	39 12.0	83 35.7	48 miles east by north of Cincinnati, Ohio.....	42
1880.....	39 4.1	84 39.7	8 miles west by south of Cincinnati, Ohio.....	58
1890.....	39 11.9	85 32.9	20 miles east of Columbus, Indiana.....	48

GEOGRAPHICAL DISTRIBUTION OF POPULATION.

DISTRIBUTION OF POPULATION ACCORDING TO DRAINAGE BASINS.

In the tables appended are given the approximate area of each drainage basin in square miles (land and water surface), and the aggregate population, foreign born population, and negro population, of each such drainage basin in 1890, 1880, and 1870, together with the number of inhabitants of each such class to the square mile.

The drainage areas are classified primarily by the two oceans and the Great Basin; second, by sections of the coast; third, by the principal rivers, the rivers of each section of the coast being arranged under that section, and the branches of a river placed under the main river.

The primary divisions are set at the margin of the page. Under each primary division its secondary divisions are placed, being indented one space. Under each of these secondary divisions the tertiary divisions are placed, and so on, the subdivisions of a drainage basin being in every case indented within that of the stream comprising them.

The New England coast comprises the area and population of the basins of the several rivers given beneath it, and, in addition to these, the area and population of the minor streams and of the immediate coast from the eastern border of Maine to the Hudson river.

The Middle Atlantic coast comprises, besides the basin of the rivers under it, in like manner the basins of the minor streams and of the coast itself as far as the mouth of the Potomac, including that stream.

The South Atlantic coast, in like manner, comprises the country from the Potomac southward to Florida.

The Gulf of Mexico, commencing with the peninsula of Florida, embraces the coast and the whole Mississippi valley to the mouth of the Rio Grande, including the latter stream.

The population of the various subdivisions was obtained by using the county as a unit, and subdividing the counties into tenths in cases where they lie partly in one basin and partly in another. Of course, in making these divisions of counties, population and not area was considered.

The areas of the different river basins were measured approximately from maps, and were finally adjusted to suit a total area of the United States of 3,025,600 square miles, exclusive of Alaska.

From the first table it appears that 96.16 per cent of the inhabitants live in the country which is drained to the Atlantic ocean; that 52.69 per cent of the population live in the region drained by the Gulf of Mexico, and that 43.77 per cent of the entire population of the country are congregated in the drainage area of the Mississippi river; that only 0.41 per cent live in the Great Basin, and 3.43 per cent on the Pacific coast. It shows, further, that the proportion living within the region drained to the Atlantic is steadily diminishing, while of this region the part drained to the Gulf of Mexico is becoming relatively more populous, as is the case in a still more marked degree in the region drained to the Pacific.

From the second of these tables it appears that of the foreign born population nearly 93 per cent live within the Atlantic drainage basin; that three-fourths of 1 per cent live in the Great Basin, and a little over 6 per cent upon the Pacific slope. The proportion living in the region drained by the Atlantic is slowly diminishing, while that upon the Pacific slope is increasing. In the region draining to the Gulf of Mexico there are about 37 per cent, and in the Mississippi basin 34.50 per cent.

The third table shows the distribution of the population of pure and mixed negro blood. It appears that 99.76 per cent, or 9,976 persons out of every 10,000, live within the Atlantic drainage basin, leaving only the most trifling number for the Great Basin and the Pacific slope. It appears also that in the region draining into the Gulf of Mexico there are 61 per cent or a little over three-fifths of the entire negro element, while in the Mississippi basin there is one-third of this entire element.

DISTRIBUTION OF THE AGGREGATE POPULATION ACCORDING TO DRAINAGE BASINS: 1870 TO 1890.

The following table, which is a condensation of the table that appears on pages xxxviii and xxxix, shows the percentage of the total population of the principal drainage basins of the country as it existed in the three decades mentioned:

DIVISIONS.	1890	1880	1870
	<i>Per cent.</i>	<i>Per cent.</i>	<i>Per cent.</i>
The United States.....	100.00	100.00	100.00
Atlantic ocean.....	96.16	97.11	97.79
New England coast.....	7.16	7.60	8.52
Middle Atlantic coast.....	18.34	19.23	20.85
South Atlantic coast.....	6.78	7.39	7.26
Great Lakes.....	10.80	10.58	10.95
Red River of the North.....	0.39	0.14	0.01
Gulf of Mexico.....	52.69	52.17	50.20
Great Basin.....	0.41	0.42	0.33
Pacific ocean.....	3.43	2.47	1.88

Of the percentages given in the preceding table for the drainage basin of the Gulf of Mexico, the tertiary division of the Mississippi river embraces 43.77 per cent for 1890, 43.42 for 1880, and 42.36 for 1870.

DISTRIBUTION OF POPULATION IN ACCORDANCE WITH TOPOGRAPHIC FEATURES.

Considering the surface of the United States broadly, it is seen to contain two great elevated areas. The eastern, known as the Appalachian Mountain system, is separated from the Atlantic by a broad plain sloping gently eastward. The western, known as the Cordilleran Mountain system, is many times as broad as the eastern system, more than twice as high, and the mountain ranges which crown it are vastly greater in number and more complex. It extends westward to the Pacific coast.

Between these two systems lies a broad valley, most of which is drained by the Mississippi river to the Gulf of Mexico. The northeastern part is drained by the St. Lawrence river and the system of the Great Lakes to the Gulf of St. Lawrence, while along the gulf coast are considerable areas drained by other streams.

The country thus broadly outlined contains every variety of surface found upon the globe. The various effects due to differences in slope, elevation, and climate are all represented.

An attempt has been made in the table shown on page xlvi to subdivide the country into areas differing in the character of their surface, their products, and their climate, and to classify the population in accordance therewith. These subdivisions are briefly characterized as follows:

COAST SWAMPS.—These swamps are found along the South Atlantic and Gulf coasts, extending inland to varying distances, in some places as much as 100 miles. They have the greatest breadth in North Carolina and Louisiana, but border the coast nearly all the way from southeast Virginia to the mouth of the Rio Grande, Texas. Upon the Atlantic coast the surface of these swamps, while exceedingly level, has ample slope for drainage, and accordingly as the land becomes valuable their borders are being drained and converted into farms. In the Carolinas a considerable area of them is utilized for rice plantations. In the main they are well timbered, principally with cypress and juniper, among which is a luxuriant growth of cane. The population of this region is mainly of the negro race, the climate being very unhealthy for the white race.

ATLANTIC PLAIN.—The Atlantic plain comprises the strip of land lying between the Coast swamps and the fall line throughout the Atlantic states south of New York and the Gulf states as far as the Mississippi river. It is characterized by a level surface, a low elevation, scarcely reaching 200 feet above the sea, is underlaid by recent sedimentary rocks, and, except where they have been removed by the hand of man, is covered with pine forests.

PIEDMONT REGION.—This region comprises a strip of country extending from Maine to Alabama, lying between the fall line on the east and the Blue Ridge on the west. It is underlaid by metamorphic rocks and forested with a mixed growth of broad and narrow leaf trees. The lower portion is comparatively level, being broken only by the beds of streams, but in the neighborhood of the Blue Ridge and throughout New England it is hilly.

NEW ENGLAND HILLS.—This name has been applied to the hill country in the upper part of New England, including all of the upper part of Maine, the White mountains of New Hampshire, the Green mountains of Vermont, and the Adirondacks of New York, all of which is a broken, mountainous country, ranging in elevation from 1,000 to 6,000 feet, and covered with forests.

APPALACHIAN MOUNTAIN REGION.—This region includes the Blue Ridge and the Appalachian valley lying immediately north and west of it, and extends from New Jersey to Georgia and Alabama. The Blue Ridge consisting of a single range throughout Pennsylvania, Maryland, and Virginia, expands in North Carolina into a very complex mass of mountains, and there reaches its maximum elevation, namely, 6,700 feet.

The Appalachian valley is drained in New Jersey and Pennsylvania by the Delaware and Susquehanna rivers, in Virginia by the Potomac, James, and Kanawha rivers, and in Tennessee mainly by the Tennessee river. It is traversed by numerous ranges, some of them assuming the dignity of separate mountain ranges, and all of them running closely parallel to one another and to the general direction of the valley.

CUMBERLAND-ALLEGHENY PLATEAU.—Rising from the northwest border of the Appalachian valley is an escarpment extending more or less continuously from northeastern Pennsylvania down through Maryland, Virginia, and Tennessee into Alabama. From the summit of this escarpment a plateau stretches with a general northwestern slope. This plateau is everywhere deeply scored by streams with a general northwesterly direction. These streams have cut the plateau into a mass of very irregular ridges and gorges, making it one of the most intricate mountain regions on the globe. The entire region is densely covered with forests, the hand of man having removed but a very small part of them.

INTERIOR TIMBERED REGION.—This region comprises southern Ohio and Indiana, the western half of Kentucky and Tennessee, and the northeastern part of Mississippi, together with small areas in adjoining states. It possesses no characteristic features beyond the fact that, except in the settled regions, it is covered with forests.

LAKE REGION.—A narrow strip of country bordering on the Great Lakes has been segregated under this name. It includes small parts of New York, Pennsylvania, and Ohio, and most of Michigan, Wisconsin, and northern Minnesota. Owing to the proximity of large bodies of water this region has many of the characteristics of a coast climate. The atmosphere being moist, the winters are abnormally warm and the summers abnormally cool. This region contains great pine forests, which are still serving as a main source of supply of that timber.

OZARK MOUNTAIN REGION.—This region is located in northwest Arkansas, southwest Missouri, and the eastern part of the Indian territory. In Arkansas it is made up of a succession of narrow ranges 2,000 to 3,000 feet high, having a generally east and west trend, separated by somewhat broad valleys. Farther to the northeast, in Missouri, the hills become merely a confused mass, without order or system.

ALLUVIAL REGION OF THE MISSISSIPPI.—This region extends in a rapidly widening strip from Cairo, at the mouth of the Ohio, to the coast swamps in Louisiana, into which it merges without any sharp line of demarcation. It includes parts of the states of Missouri, Arkansas, Mississippi, and Louisiana, besides a trifling area in Kentucky and Tennessee. Much the larger portion of it is marshy, and is below the level of the water in the rivers. The dry land lies mainly along the immediate banks of the streams, having been formed by deposition from overflows. With the exception of the cultivated land, this region is entirely covered with forests. The soil is of the highest

degree of fertility, but the climate is hostile to the white race, and by far the larger proportion of its inhabitants is of the negro race.

PRAIRIE REGION.—This region comprises a small portion of western Indiana, most of Illinois and Iowa, southern Wisconsin and Minnesota, northern Missouri, and eastern North Dakota, South Dakota, Kansas, and Nebraska, and extends in a broad belt down through the Indian territory and Texas.

On the east it merges by insensible degrees into the forest-clad regions, and on the west by equally insensible degrees into the Great Plains. It is a region of transition from the one to the other. Its climate is such that without protection forests can not thrive.

Its surface is level or slightly undulating, and was, in its natural state, covered with luxuriant grasses, but timber growth was scarce, and was confined almost entirely to the bluffs and the borders of streams. With the protection afforded by man, the growth of forests has increased in this region, until now it presents a landscape diversified by a tree growth the extent of which is constantly increasing. It is the granary of the country.

GREAT PLAINS.—Merging with the prairie region by insensible degrees are the Great Plains, extending from approximate longitude 99° to the foot of the Rocky mountains, and from the Canadian border to the Rio Grande. It is a region devoid of timber, except in the narrowest strips along certain streams, but sparsely covered with bunch grass, changing in the more arid regions to sage, artemisia, cactus, and yucca. Its surface is a monotonous, billowy expanse, broken only here and there by lines of cliffs and buttes.

Throughout this region the rainfall is insufficient for the needs of agriculture, and irrigation is necessary for the cultivation of the soil. The supply of water in the flowing streams is sufficient to irrigate only a small part of the land, and the extent to which settlement is possible will in the future become, therefore, a question of the abundance of water and not of land.

CORDILLERAN REGION.—The Cordilleran region is naturally subdivided into districts which differ from one another in certain features and have other features in common. Except in the extreme northwest, in Washington, western Oregon, and northwest California, the climate is arid and the rainfall is insufficient for agriculture. This aridity of climate and deficiency of rainfall increase southward and reach a maximum in southern Nevada, California, and Arizona. The prevalence of forests accompanies the rainfall. Upon the northwest coast and inland as far as the Cascade range in Oregon and Washington the country is densely covered with forests of great trees. This forest belt extends inland through northern Washington and Idaho into the mountainous region of Montana, and thence southeastward, accompanying the mountain ranges into the Yellowstone Park. Elsewhere no forests are found except upon the mountains, and in the more arid regions of the south even the mountains are bare to their summits. The valleys produce only the vegetation characteristic of an arid region. Where the rainfall is abundant bunch grass is found, but as the rainfall diminishes and the dryness of the atmosphere increases, the vegetation of the valleys changes to artemisia, cactus, yucca, and other desert plants.

ROCKY MOUNTAIN REGION.—This region, including the easternmost portion of the Cordilleran system, comprising western Montana, eastern Idaho, western Wyoming, central Colorado, and New Mexico, with a little of Texas, is composed of a series of ranges separated by valleys of greater or less breadth, trending parallel to one another a little west of north and east of south. It is naturally subdivided into two parts. The northern part extends from Canada southeastward into central Wyoming; thence for a distance of 100 miles or thereabout the mountain ranges disappear, leaving in their place only broad plateaus. The ranges reappear in southern Wyoming and extend thence southward. In the northern part the mountains range in altitude from 9,000 to 13,000 feet or more, rising from a base of 4,000 or 5,000 feet. In the southern part the base is much higher, rising in Colorado to 6,000 or 8,000 feet, with high mountain valleys reaching 10,000 feet above the sea, while many of the ranges exceed 14,000 feet in altitude. Both the general level of the country and the mountain ranges diminish in altitude southward.

PLATEAU REGION.—This region comprises most of the drainage basin of the Colorado river above the mouth of the Virgin, in southern Nevada. It is a region of great plateaus, whose surfaces are level or slightly inclined, and which terminate with great lines of cliffs, in some cases thousands of feet in height. From the mountains which border this range on the east, north, and west these plateaus descend by a succession of gigantic steps from an elevation of 12,000 feet down to 1,000 or 2,000 feet above the sea. Every stream is in a canyon, and as the rainfall is light and spasmodic a great majority of these canyons are dry during the greater part of the year. In many regions these canyons are so abundant as to have reduced the plateau to a mere skeleton, or the process of erosion may have gone still further, so that nothing is left of the upper plateau but fragments in the form of mesas and buttes.

The higher plateaus in the neighborhood of the mountains are green and forested from the abundant rainfall. The lower plateaus, on the other hand, have only the sparsest vegetation or are absolutely sterile.

BASIN REGION.—In the interior of the Cordilleran region is an area comprising practically all of Nevada, western Utah, part of eastern California, and southern Oregon, which has no drainage to the sea. It is a closed basin. The only discharge of its waters is by sinking into the thirsty soil or by evaporation into the thirsty atmosphere. This is the most desert part of the country, with the exception of the course of the lower Colorado and Gila rivers. The rainfall is scanty, even upon the mountains; so scanty, indeed, that there are but two or three running streams of any magnitude within it. Its surface is diversified by many ranges of mountains having a general parallel trend

rising from flat valleys filled with alluvium. These ranges divide the basin into numerous minor basins, in each of which water collects and sinks. In the eastern part the largest basin is that known as the Great Salt Lake, into which several small streams flow from the Wasatch mountains. In the western part the principal basin is that of the Humboldt river. The elevation of the floor of the basin ranges from 6,000 feet near its middle line, downward, reaching in Death valley, in eastern California, an elevation of 200 feet below the level of the sea.

COLUMBIAN MESAS.—The drainage basin of the Snake river, in Idaho, Oregon, and Washington, together with a part of the basin of the Columbia, in the latter state, has been in great part covered by eruptions of basalt, which, bursting out of the soil at various points, has spread over the country, forming a table land.

SIERRA NEVADA.—Separating the Great Basin from the California valley, in eastern California, is a broad, heavy, forest-covered range of mountains with long slopes to the west and an abrupt ascent to the east.

PACIFIC VALLEY.—West of the Cascade range and the Sierra Nevada and stretching from Puget sound to southern California is a valley drained in Oregon by the Willamette and in California by the Sacramento and San Joaquin rivers. In its southern part, south of the latitude of the bay of San Francisco, the climate is such that irrigation is necessary, while north of it the rainfall is sufficient, and in Oregon and Washington is more than sufficient, for the farmers' needs. Where the rainfall is insufficient this valley is treeless, but farther north, and especially in Oregon and Washington, it is covered with dense forests.

CASCADE RANGE.—Stretching northward in line with the Sierra Nevada, but distinguished sharply from it by the character of its formation, is the Cascade range. It is a series of extinct volcanoes, rising from a high plateau of volcanic rock. This range is densely forested.

COAST RANGES.—Separating this valley from the Pacific is a succession of ranges trending parallel with the coast, and known as the Coast ranges. In southern California the valleys among these ranges are of the highest degree of fertility, and produce grapes and tropical fruits in profusion. Farther north the country is but little settled or even explored.

The following tables show, for each of the subdivisions characterized above, the aggregate population, foreign born population, and negro population, in thousands at each of the last three censuses, namely, 1890, 1880, and 1870. They show also the numerical increase expressed in even thousands, the per cent of increase, the number in each 100,000 of the total population, the density or the population per square mile and, finally, the increase per square mile in each subdivision.

Grouping these subdivisions, it will be seen from the first table that in the swamp regions of the country, including in that term the coast marshes and the alluvial region of the Mississippi river, there are 2,694,000 inhabitants, or 4.30 per cent of the total population. This, as was previously stated, consists mainly of the negro race. In the desert and semi-desert regions of the country in 1890 there are found 1,469,000, or 2.35 per cent of the population. In the mountain region of the west there are found 1,535,000 people, or about 2.45 per cent, and in the eastern mountain region 10,888,000 people, or about one-sixth of the entire population.

The following table relating to the distribution of the foreign born shows that more than one-fourth of this element is found in the prairie region. The next most populous regions are the Atlantic plain, with its great cities, and the lakeregion. These three areas taken together include more than one-half of the entire foreign born element. A notable proportion of this element is also found in the subdivisions of the western Cordilleran region. On the other hand, the low coast swamps, the alluvial region of the Mississippi and the Ozark mountains contain very few of this element.

DISTRIBUTION OF THE FOREIGN BORN POPULATION IN ACCORDANCE WITH TOPOGRAPHIC FEATURES: 1870 TO 1890.

a Decrease.

The following table showing the distribution of the negro element is sharply contrasted with that of the foreign born element. The interior timbered region contains more than one-fourth of the negro element of the country, and the Atlantic plain another fourth. The coast swamps and the alluvial region of the Mississippi contain large proportions. Indeed, these regions, together with the Piedmont region, contain nearly nine-tenths of the negro population.

DISTRIBUTION OF POPULATION IN ACCORDANCE WITH ALTITUDE.

During recent years the active prosecution of topographic surveys by the United States Geological Survey and the extension of railroads into remote regions have added greatly to our knowledge of the relief of the country, and greatly increased the material available for making a contour map of the country. This material has been compiled in the office of the United States Geological Survey, and among other uses to which it has been put a map has been prepared from it on a scale of 1: 2,500,000, or about 40 miles to 1 inch, showing approximate contour lines at 100 feet, 500 feet, 1,000 feet, 1,500 feet, 2,000 feet, and thence by intervals of 1,000 feet up to 12,000 feet above sea level. This map has been used in the distribution of population herewith presented. From it the counties falling between the different contour lines have been drawn off and tabulated. In cases where a contour divides a county, the portions upon each side of the contour have been estimated to the nearest tenths of counties, having due regard in each case to the distribution of population within the county. The population in 1870, 1880, and 1890 was then classified in accordance with the tabulated list of counties.

The following table shows the distribution of the aggregate population in accordance with altitude:

DISTRIBUTION OF THE AGGREGATE POPULATION IN ACCORDANCE WITH ALTITUDE: 1870 TO 1890.

^a Decrease.

The figures of distribution in 1870 and 1880, herewith presented, have been obtained by the use of a much more elaborate map than that used in 1880, and therefore differ somewhat from those published in the report of the Tenth Census.

It is seen by the table and diagram accompanying that about one-sixth of the people of the country live less than 100 feet above sea level, namely, along the immediate seaboard and in the swampy and alluvial regions of the south, and that more than three-fourths live below 1,000 feet, while below 5,000 feet are found nearly 99 per cent of the inhabitants. At great altitudes there is found only the most trifling proportion.

In the area below 500 feet is included nearly all that part of the population which is engaged in manufacturing and in the foreign commerce of the country and most of that engaged in the culture of cotton, rice, and sugar.

The interval between the 500 feet and 1,500 feet contours comprises the greater part of the prairie states and the grain-producing states of the northwest.

East of the ninety-eighth meridian the contour of 1,500 feet is practically the upper limit of population, all the country lying above that elevation being mountainous.

The population between 2,000 and 5,000 feet is found mainly on the slope of the great western plains. In this region the belt between 2,000 and 3,000 feet is almost everywhere the debatable ground between the arid region of the Cordilleran plateau and the humid region of the Mississippi valley. Above 3,000 feet irrigation is almost universally necessary for success in agricultural operations.

Between 4,000 and 5,000 feet, and more markedly between 5,000 and 6,000 feet, it will be noticed that the population is decidedly in excess of the grade or grades below it. This is mainly due to the fact that the densest settlement at high altitudes in the Cordilleran region is at the eastern base of the Rocky mountains and in the valleys about Great Salt Lake, which regions lie between 4,000 and 6,000 feet. Of these the extensive settlements at the base of the mountains in Colorado are mainly between 5,000 and 6,000 feet.

Above 6,000 feet the population, which is confined, of course, to the Cordilleran region, is almost entirely engaged in the pursuit of mining, and the greater part of it is located in Colorado, New Mexico, Nevada, and California.

While the population is increasing numerically in all altitudes, its relative movement is decidedly toward the region of greater altitudes, and is most marked in the country lying between 1,000 and 6,000 feet above the sea.

The density of population is greatest near sea level in the narrow strip along the seaboard which contains our great seaports. The density diminishes gradually and rather uniformly up to 2,000 feet, where the population becomes quite sparse.

The average elevation of the country, excluding Alaska, is about 2,500 feet. The average elevation at which the inhabitants lived, taking cognizance of their distribution, in 1870 was 687 feet; in 1880 it had increased to 739 feet, and in 1890 to 788 feet.

The following table shows the distribution of the foreign born element in altitude above sea level:

DISTRIBUTION OF THE FOREIGN BORN POPULATION IN ACCORDANCE WITH ALTITUDE: 1870 TO 1890.

ALTITUDE IN FEET.	FOREIGN BORN POPULATION IN THOUSANDS.			NUMBER IN EACH 100,000 OF TOTAL FOREIGN BORN POPULATION WITHIN EACH GIVEN ALTITUDE.			CHANGE IN NUMBER IN EACH 100,000. a Decrease.

It is seen that about one-fourth of all the foreign born live at an altitude less than 100 feet above the sea, that more than three-fourths live at an altitude less than 1,000 feet, and 99 per cent live below the contour of 6,000 feet. A larger proportion live at low altitudes than is the case with the total population, which is doubtless due to the fact that many of this element live in our large cities, which are mainly upon the seaboard. On the other hand, at great altitudes there are found a larger proportion than of the total population.

The direction of spread of the foreign born element is toward the regions of great altitude. There has been during the past twenty years a diminution in the proportion living below the contour of 1,000 feet and a general increase in the number at great elevations.

The average altitude at which the foreign born element lived in 1890 is 890 feet, which is decidedly greater than that of the total population.

The table on the following page shows the distribution of the negro population in accordance with altitude. From this it is seen that not quite one-fourth of this element live at less than 100 feet, being a smaller proportion than in the case of the foreign born element, but a larger proportion than is the case with the total population. About 70 per cent live at a less altitude than 500 feet, which is a vastly greater proportion than in the case either of the total population or of the foreign born element, while below 1,000 feet we find 94.5 per cent, and below 2,000 feet are found 99 out of every 100 of the negro inhabitants.

No decided movement of the negro population in altitude is perceptible.

The average elevation at which the negro element was living in this country in 1890 is 427 feet. It will be noted that this is greatly below that of the total population and the foreign born element. Indeed, these results emphasize the tendency of the negro element toward low and hot parts of the country.

DISTRIBUTION OF POPULATION IN ACCORDANCE WITH MEAN ANNUAL TEMPERATURE.

The great increase in the amount of data concerning the distribution of temperature in the country during the past ten years, produced by the extension of State Weather Services, rendered it advisable to collect material and prepare a new map showing the distribution of the isothermals, and to make therefrom a recomputation of the distribution of population in 1870 and 1880. The necessary data have been freely contributed by the Chief Signal Officer of the Army, General A. W. Greely, and by the several directors of the State Weather Services, to whom this office is under great obligations. The information collected from these various sources has been placed upon a map of the United States, and isothermals have been drawn in accordance with their indications, combined with a knowledge of the relief of the country and the influence of the relief upon temperature. The counties falling between the different isothermal lines have been drawn from the maps in tabular form and the population classified in accordance therewith.

The following table is presented as embracing the results of this investigation. In this table the first column shows the degrees of temperature; the second, third, and fourth columns show a distribution of population in thousands in accordance with the isothermal lines; the fifth, sixth, and seventh columns show the number in each 100,000 of the total population, at the date designated, living between the various isothermal lines; the eighth and ninth columns show the change in the number from census to census under the assumption that the entire population was 100,000; the tenth, eleventh, and twelfth columns show the number of inhabitants, the total population being assumed as 100,000, living under temperature conditions below each of the several grades; the thirteenth, fourteenth, and fifteenth columns show the density of population, that is, the number of inhabitants per square mile in each of the several grades, while the last two columns show the increase in density.

DISTRIBUTION OF THE AGGREGATE POPULATION IN ACCORDANCE WITH MEAN ANNUAL TEMPERATURE: 1870 TO 1890.

GEOGRAPHICAL DISTRIBUTION OF POPULATION.

A glance at the table will show that in 1870, 1880, and 1890 more than half the population was living under a temperature between 45 and 55 degrees, and that between 45 and 60 degrees were found from 70 to 75 per cent of the inhabitants. Only a trifle over 1 per cent were living where the temperature was greater than 70 degrees, while in the region where the mean annual temperature was above 75 degrees the number of inhabitants was trifling. The number of inhabitants to the square mile not only expresses the density of population, but also gives a comparative measure of the absolute number and the increase in absolute number. The greatest density has been, since 1870, where the temperature ranges from 50 to 55 degrees. From this as a maximum it diminishes rapidly both with an increase and decrease in temperature. The most rapid proportional increase in population has taken place at the two extremes, where it has trebled during the twenty years intervening between 1870 and 1890, while in the same time it has increased but about 50 per cent in the most densely settled group.

The average annual temperature of the territory of the United States, excluding Alaska from consideration, is 53 degrees. The average annual temperature under which the people of the country live, taking into account the density of settlement, is practically the same.

The following table, when contrasted with that showing the distribution of the total population in accordance with mean annual temperature, develops the fact that, as a whole, the foreign born live under temperature conditions considerably lower than the total population. These differences may be summarized in the statement that while the average temperature under which the total population lives is 53 degrees, that of the foreign born is 48 degrees. Nearly 41 per cent live where the temperature ranges from 45 to 50 degrees, while between 40 and 55 degrees of temperature are found more than 86 per cent of the entire foreign born.

DISTRIBUTION OF THE FOREIGN BORN POPULATION IN ACCORDANCE WITH MEAN ANNUAL TEMPERATURE:

The following table, showing the distribution of the negro element in accordance with the mean annual temperature, presents a sharp contrast to both the preceding tables, and especially to that showing the distribution of the foreign born population. The average temperature under which the negro element exists in this country, namely, 61 degrees, is no less than 8 degrees higher than that of the total population and 13 degrees higher than the foreign born population.

DISTRIBUTION OF THE NEGRO (a) POPULATION IN ACCORDANCE WITH MEAN ANNUAL TEMPERATURE: 1870 TO 1890.

a Includes all persons of negro descent.

The negro population is the most numerous in that region which has a mean annual temperature between 60 and 65 degrees, where there are found 36 per cent of their whole number; between 55 and 60 degrees there are found 24 per cent, and between 65 and 70 degrees there are 24 per cent of the total number. Thus between 55 and 70 degrees there are living 84 per cent of the entire negro element.

DISTRIBUTION OF POPULATION IN ACCORDANCE WITH MEAN ANNUAL RAINFALL.

Through the courtesy of the Chief Signal Officer of the Army, General A. W. Greely, and of the directors of the Weather Services of the various states, the latest and most reliable data regarding the rainfall of the country have been placed at the disposal of this office. In addition to this, a compilation has been made of all other accessible material, including the Smithsonian collections and the records of the state engineer of California. From these various sources data from nearly 2,000 stations have been obtained, platted upon a map of the United States, and the curves of mean annual rainfall, at intervals of 10 inches, sketched in accordance with their indications, supplemented by our knowledge of the relief of the country and its known influence upon rainfall.

From the map thus prepared the counties falling between the different curves of mean annual rainfall were drawn off in lists. In cases where the county was cut in parts by a curve, due weight was given in the partition of the county to any inequality in distribution of population. The population was then distributed by counties, in accordance with the lists. The result is shown in the table appended:

DISTRIBUTION OF THE AGGREGATE POPULATION IN ACCORDANCE WITH MEAN ANNUAL RAINFALL: 1870 TO 1890.

INCHES OF RAINFALL.	POPULATION IN THOUSANDS.			NUMBER IN EACH 100,000 OF TOTAL POPULATION WITHIN EACH GRADE.			CHANGE IN NUMBER IN EACH 100,000.		NUMBER IN EACH 100,000 OF TOTAL POPULATION BELOW EACH GRADE.			POPULATION PER SQUARE MILE.			INCREASE PER SQUARE MILE.

50 to 60.....	10,122	8,393	6,251	16,164	16,734	16,212	-570	+522	98,672	98,692	98,625	25.16	20.87	15.54	4.29	5.33
60 to 70.....	798	638	524	1,274	1,272	1,359	+2	-87	99,946	99,964	99,984	18.20	14.55	11.95	3.65	2.60
70 and over.....	34	18	6	54	36	16	+18	+20	100,000	100,000	100,000	3.98	2.11	0.70	1.87	1.41

In this table the first column shows the grades, expressed in inches of rainfall; the second, third, and fourth columns show the population in thousands found in each grade in 1890, 1880, and 1870; the fifth, sixth, and seventh columns show the number in each 100,000 of the population in each of these grades at the periods under consideration; the eighth and ninth columns show the increase or decrease in number; the tenth, eleventh, and twelfth columns show the number of inhabitants in each 100,000 below each grade, and therefore are cumulative columns; the thirteenth, fourteenth, and fifteenth columns show the population per square mile in each grade in 1890, 1880, and 1870, and the last two columns show the increase in population per square mile.

It will be noticed that the main body of the population of the country inhabits the region in which the annual rainfall is between 30 and 50 inches, nearly three-fourths of the inhabitants being found there. On either side, as the rainfall increases or diminishes, the population diminishes rapidly. It will be seen further that the arid region of the west, where the rainfall is less than 20 inches, a region which comprises two-fifths of the entire area of the country, contains at present less than 3 per cent of the population.

The greatest density of population is in the area enjoying from 40 to 50 inches of annual rainfall, the average of this region being 59.08 inhabitants to the square mile. Next to that is the area having from 30 to 40 inches, where the density is 43.19. The density of population has increased rapidly in these regions. It is apparent, however, that the most rapid increase, as expressed by density of population, is where the rainfall ranges from 20 to 30 inches; that is, in the eastern portion of the Great Plains ranging from Texas to Dakota, where the density has increased in twenty years from 1.59 to 8.16.

The average annual rainfall upon the surface of the United States, as deduced from the map previously mentioned, is 29.6 inches. The average annual rainfall with relation to the population, deduced by giving weight to each area of country in proportion to the number of its inhabitants, was, in 1870, 42.5 inches; in 1880 it had diminished to 42 inches, and in 1890 to 41.4 inches, the diminution being caused mainly by the settlement of the Great Plains and the arid regions of the west.

GEOGRAPHICAL DISTRIBUTION OF POPULATION.

The following table shows the distribution of the foreign born element with reference to rainfall in 1890, 1880, and 1870:

DISTRIBUTION OF THE FOREIGN BORN POPULATION IN ACCORDANCE WITH MEAN ANNUAL RAINFALL: 1870 TO 1890.

a Decrease.

It will be seen that by far the greater proportion of the foreign born population lives where the rainfall ranges from 30 to 50 inches annually, the proportion ranging from 90 per cent in 1870 down to about 83 per cent in 1890. As to the proportion of the foreign born living within these limits in recent years, it has not increased in the regions where the rainfall is greater, but where it is less, that is, in the western states and territories. The proportion of the foreign born living under a rainfall of 20 to 30 inches has increased in twenty years from less than 5 per cent up to more than 10 per cent. It has increased in approximately the same proportion in those regions where the rainfall is still less, that is, between 10 and 20 inches.

The following table shows the distribution of the negro element in respect to mean annual rainfall:

DISTRIBUTION OF THE NEGRO (a) POPULATION IN ACCORDANCE WITH MEAN ANNUAL RAINFALL: 1870 TO 1890.

INCHES OF RAINFALL.	NEGRO POPULATION IN THOUSANDS.			NUMBER IN EACH 100,000 OF TOTAL NEGRO POPULATION WITHIN EACH GRADE.			CHANGE IN NUMBER IN EACH 100,000.		NUMBER IN EACH 100,000 OF TOTAL NEGRO POPULATION BELOW EACH GRADE.			NEGRO POPULATION PER SQUARE MILE.			INCREASE PER SQUARE MILE.

a Includes all persons of negro descent.

The above table shows that the vast majority of the negro race, more than nine-tenths of their whole number, live where the rainfall ranges from 40 to 60 inches, and that no less than 60 per cent live where the rainfall is between 50 and 60 inches. Their habitat is thus again strongly contrasted with that of the inhabitants of foreign birth.

While there is little movement of this race perceptible in the above table, what little thus appears is in the direction of a region of greater rainfall. Thus in twenty years the negro element living where the rainfall was between 40 and 50 inches has materially diminished, while it has materially increased in the region having between 50 and 60 inches.

DISTRIBUTION OF POPULATION IN ACCORDANCE WITH MEAN RELATIVE HUMIDITY OF THE ATMOSPHERE.

The atmosphere along the Atlantic, Gulf, and Lake coasts, and the entire Pacific coast is heavily charged with moisture. It is especially so upon the coast of Oregon and Washington, where the atmosphere is more highly charged with moisture than elsewhere within our territory. The high mountain regions of the Appalachian and to a considerable extent those of the Rocky mountain ranges also have a moist atmosphere. The moisture is less in the Piedmont region east of the Appalachians and in the Upper Mississippi valley. Passing across the prairies and the Great Plains, the amount of moisture in the atmosphere diminishes still more, while the minimum is reached in the Great Basin, in Utah, Nevada, southern Arizona, and southeastern California. In a general way, the amount of moisture in the atmosphere increases and decreases with the rainfall, but this is not always the case. The upper lake region, with an atmosphere as moist as that of Washington city, has a much smaller rainfall. The coast of southern California, with a deficient rainfall, has as moist an atmosphere as the Atlantic coast.

In the following table, showing this distribution, the population is given to the nearest thousands, as the results aimed at are merely general relations. The first column defines the groups, expressed in percentages of saturation; the second, third, and fourth columns, the absolute number of inhabitants in thousands in the various groups at the Eleventh, Tenth, and Ninth censuses; the fifth, sixth, and seventh columns, the number in each 100,000 of the total population within each group; the eighth and ninth columns, the change in number in each 100,000 of the total population; the tenth, eleventh, and twelfth columns, the number in each 100,000 of the total population below each group; the thirteenth, fourteenth, and fifteenth columns show the density of population, that is, the number of inhabitants per square mile, while the last two columns show the increase in density.

DISTRIBUTION OF THE AGGREGATE POPULATION IN ACCORDANCE WITH MEAN RELATIVE HUMIDITY: 1870 TO 1890.

PERCENTAGE OF SATURATION.	POPULATION IN THOUSANDS.			NUMBER IN EACH 100,000 OF TOTAL POPULATION WITHIN EACH GROUP.			CHANGE IN NUMBER IN EACH 100,000.		NUMBER IN EACH 100,000 OF TOTAL POPULATION BELOW EACH GROUP.			POPULATION PER SQUARE MILE.			INCREASE PER SQUARE MILE.

80 and over	344	200	130	549	399	337	+150	+62	100,000	100,000	100,000	5.53	3.21	2.09	2.32	1.12

A glance at this table shows that nearly all the population breathe an atmosphere containing 65 to 75 per cent of its full capacity of moisture; that is, the atmosphere is from two-thirds to three-fourths saturated. In 1890, 57,036,000 out of 62,622,250 were found in this region; in 1880, 46,559,000 out of 50,155,783, and in 1870, 36,273,000 out of 38,558,371. The number of inhabitants living in a drier atmosphere was at each census comparatively trifling, numbering in 1870 less than 500,000, and in 1890 less than 2,000,000. In the moister atmosphere were found larger numbers scattered along the Gulf coast and the shores of Washington and Oregon.

The most rapid increase is found near the top and bottom of the scale, and particularly in the more arid region, where the population has nearly doubled during each of the last two periods.

GEOGRAPHICAL DISTRIBUTION OF POPULATION.

The following table shows that with the persons of foreign birth nearly two-thirds breathe an atmosphere which has a relative humidity between 70 and 75 per cent, and that nearly one-fourth of them are found where the atmosphere is charged to the extent of 65 to 70 per cent, the proportion of this element of the population being trifling elsewhere:

DISTRIBUTION OF THE FOREIGN BORN POPULATION IN ACCORDANCE WITH MEAN RELATIVE HUMIDITY: 1870 TO 1890.

DISTRIBUTION OF POPULATION IN ACCORDANCE WITH LATITUDE AND LONGITUDE.

Three tables are given on the following pages, the first showing the population of the country in 1890 by thousands, distributed by square degrees; that is, by areas included between consecutive parallels and consecutive meridians. It is in effect a population map of the country, showing not only the total population of each square degree, but an approximation to the relative density of population in each square degree. The magnitude of the numbers betrays the whereabouts of the great centers of population, as New York, Chicago, etc., while, on the other hand, the sparseness of population upon the Cordilleran plateau is shown in an equally forcible manner.

The second and third tables are abstracts from the first table. The second table shows the distribution of the population in accordance with latitude, giving first the absolute population in thousands between each two consecutive parallels across the country in 1890, 1880, and 1870; the percentages of increase in population between each two parallels; the number of inhabitants in each group, upon the assumption that the total population was 100,000 at each of these three censuses; the number in 100,000 north of each parallel of latitude; the number of inhabitants per square mile, and the increase or decrease in the density of population.

The third table presents similar facts regarding the distribution of population in accordance with longitude, arranged in a similar manner.

GEOGRAPHICAL DISTRIBUTION OF POPULATION.

DISTRIBUTION OF THE AGGREGATE POPULATION IN ACCORDANCE WITH LONGITUDE: 1870 TO 1890.

DEGREES OF LONGITUDE.	POPULATION IN THOUSANDS.			PER CENT OF INCREASE.		NUMBER IN EACH 100,000 OF TOTAL POPULATION WITHIN THE MERIDIANS.			NUMBER IN EACH 100,000 OF TOTAL POPULATION EAST OF EACH MERIDIAN.			POPULATION PER SQUARE MILE.			INCREASE PER SQUARE MILE.

PROGRESS OF THE NATION.

Naturally the greater density of population in a square degree is governed by the location of the larger cities. Thus the two square degrees between latitudes 40° and 41° and longitudes 73° and 75°, comprising New York, Brooklyn, Jersey city, and other large cities, contain 3,653,000 inhabitants. The square degree between latitudes 42° and 43° and longitudes 71° and 72°, comprising Boston and its suburbs, has 1,233,000 inhabitants; that between latitudes 39° and 40° and longitudes 75° and 76°, which comprises most of Philadelphia, has 1,414,000, while that between latitudes 41° and 42° and longitudes 87° and 88°, in which is situated most of Chicago, contains 950,000 people.

The following diagrams show graphically the distribution of the aggregate population in accordance with latitude and longitude at each of the three censuses under consideration:

POPULATION BY MILLIONS.

GEOGRAPHICAL DISTRIBUTION OF POPULATION.

The following tables show the distribution of the foreign born population in accordance with latitude and longitude:

DISTRIBUTION OF THE FOREIGN BORN POPULATION IN ACCORDANCE WITH LATITUDE: 1880 AND 1890.

DEGREES OF LATITUDE.	FOREIGN BORN POPULATION IN THOUSANDS.		PER CENT OF INCREASE.	NUMBER IN EACH 100,000 OF TOTAL FOREIGN BORN POPULATION WITHIN THE PARALLELS. b Decrease.

PROPORTION OF URBAN TO TOTAL POPULATION, BY STATES AND TERRITORIES—HISTORICAL.

NOTE.—Colorado, Nevada, and Florida are not shown, because these states had urban population in 1880 and 1890 only.

URBAN POPULATION.

In the published records of former censuses urban population has been defined as that element living in cities, or other closely aggregated bodies of population, containing 8,000 inhabitants or more. This definition of the urban element, although a somewhat arbitrary one, is used in the present discussion of the results of the Eleventh Census in order that they may be compared directly with those of earlier censuses.

Throughout the United States, with the exception of the New England states, there is no difficulty or uncertainty in carrying out the above definition of urban population. Excepting in these states, municipal charters are generally granted only to dense bodies of population, and all such bodies are incorporated and their limits sharply defined by the acts of incorporation. In the New England states, on the contrary, the general practice is to subdivide the counties into towns, which are, so far as area and distribution of population are concerned, similar as political divisions to the townships of the states of the Upper Mississippi valley. When certain conditions of population are fulfilled these towns are chartered bodily as cities. Thus these cities may contain considerable numbers of rural population, and, conversely, certain towns may contain dense bodies of population of magnitude sufficient to be classed as urban. It is therefore possible in these states to make only an approximate separation of the urban and rural elements. According to this definition the urban population of the country was 18,284,385 in 1890, the total population being 62,622,250. The urban population in 1890 constituted 29.20 per cent of the total population. Corresponding figures for the several censuses are given in the following table:

CENSUS YEARS.	Population of the United States.	Population of cities having 8,000 inhabitants or more.	Inhabitants of specified cities in each 100 of the total population.
1790.....	3,929,214	131,472	3.35
1800.....	5,308,483	210,873	3.97
1810.....	7,239,881	356,920	4.93
1820.....	9,633,822	475,135	4.93
1830.....	12,866,020	864,509	6.72
1840.....	17,069,453	1,453,994	8.52
1850.....	23,191,876	2,897,586	12.49
1860.....	31,443,321	5,072,256	16.13
1870.....	38,558,371	8,071,875	20.93
1880.....	50,155,783	11,318,547	22.57
1890.....	62,622,250	18,284,385	29.20

It will be seen that the proportion of urban population has increased gradually during the past century from 3.35 up to 29.20 per cent, or from one-thirtieth up to nearly one-third of the total population. The increase has been quite regular from the beginning up to 1880, while from 1880 to 1890 it has made a leap from 22.57 up to 29.20 per cent, thus illustrating in a forcible manner the accelerated tendency of our population toward urban life. The number of cities having a population of 8,000 or more increased from 6 in 1790 to 286 in 1880, whence it has leaped to 448 in 1890.

The urban element in 1890 is distributed very unequally over the country, as is shown below by geographical divisions:

GEOGRAPHICAL DIVISIONS.	Urban population.	Per cent of entire urban population.
The United States.....	18,284,385	100.00
North Atlantic.....	9,015,383	49.31
South Atlantic.....	1,419,964	7.76
North Central.....	5,793,896	31.69
South Central.....	1,147,089	6.27
Western.....	908,053	4.97

The North Atlantic division contains nearly one-half the urban population of the country, while the North Atlantic and North Central divisions together contain nearly five-sixths.

In the North Atlantic division 51.81 per cent, or more than one-half the entire population, is contained in cities of 8,000 inhabitants or more. During the past ten years the urban element in this division has increased 44.15 per cent, while the total population has increased but 19.95 per cent. This relative increase is well distributed among the several states of this division, with the single exception of Vermont, whose urban element has increased but little. In Maine, Vermont, Massachusetts, Rhode Island, and New York the numerical increase in the urban element is greater than the increase of the total population, so that in these states the rural population has actually diminished in number. This rapid increase in the urban element of the North Atlantic division is due to the equally rapid extension of manufactures and commerce, requiring the aggregation of the inhabitants into compact bodies.

In the North Central division 25.91 per cent, or a trifle more than one-fourth of the inhabitants, are classed as urban. In the past ten years the number of the urban element has nearly doubled, while the total population has increased but 28.78 per cent. The number of cities has increased from 95 in 1880 to 152 in 1890. The increase in number of urban population, viz, 2,769,217, is comprised mainly in a few large cities; thus the total increase in the 11 largest cities, comprising a trifle more than one-half of the urban population of this section, is 1,446,089, or more than half the entire gain in urban population in this division.

In the South Atlantic and South Central divisions the proportion of urban population is comparatively small, being in the first named but 16.03 per cent of the entire population, or less than one-sixth, and in the second but 10.45 per cent, the proportion of urban to the total population in all the southern states being less than 13 per cent. The industries of these states are mainly agricultural, and while manufactures and mining are making some progress they are still in their infancy. The progress in these branches of industry may be measured roughly by the growth of the urban element. In 1880 this element numbered 1,616,095, and constituted less than 10 per cent of the population. In 1890 it numbered 2,567,053, having increased 58.84 per cent, while the total population had increased but 20.07 per cent.

In certain of these states the proportion of urban population is still trifling; thus, in Mississippi it constitutes but 2.64, in North Carolina but 3.87, and in Arkansas but 4.89 per cent of the total population.

Mining, commerce, and manufactures in the western states and territories are in a much more advanced stage, as is shown by the greater proportion of the urban element. Considered as a whole, the urban element in the Western division in 1890 constituted 29.99 per cent of the whole population, while in 1880 it constituted 23.97 per cent. It has therefore gained much more rapidly than the total population.

In 1880 there was but 1 city, New York, which had a population in excess of a million. In 1890 there were 3, New York, Chicago, and Philadelphia.

In 1870 there were but 14 cities each containing more than 100,000 inhabitants. In 1880 this number had increased to 20, and in 1890 to 28.

The relative rank of the cities having a population of 100,000 or more at the date of each of these censuses is set forth in the following table:

RANK.	1890	1880	1870
1	New York, N. Y.	New York, N. Y.	New York, N. Y.
2	Chicago, Ill.	Philadelphia, Pa.	Philadelphia, Pa.
3	Philadelphia, Pa.	Brooklyn, N. Y.	Brooklyn, N. Y.

* Population of Dakota in 1880 apportioned according to the present limits of North Dakota and South Dakota.

URBAN AND TOTAL POPULATION, BY STATES AND TERRITORIES: 1890.

NOTE.—The total length of each column represents the aggregate population of the state or territory, while the black part of the column represents the urban element, that is, the proportion contained in cities having 8,000 inhabitants or more.

In defining what constitutes a city, in each case the Census Office has consistently maintained the policy of including only such population as lives within the charter limits, because no other defined limits exist. In many cases, however, this does not give to the city all the population which naturally belongs to it. There may be populous suburbs, which are to all intents and purposes parts of the city, whose inhabitants transact business within the city, who may be served by the same post office, but who, living without the charter limits, are not included in the city's population. Of this our greatest city, New York, is a forcible example. Within a radius of 15 miles of the city hall, on Manhattan island, the people are in effect citizens of New York, so far as their business and social interests go, although politically they live in different cities, counties, and states. This body of population contains considerably in excess of 3,000,000 persons, or two-thirds the number in London, which is, similarly, a congeries of municipalities. Next to London, New York and its suburbs form the largest city of the globe. Other cases are those of St. Paul and Minneapolis, whose corporate limits join one another, and Bristol, Tennessee, and Bristol, Virginia, two corporations whose line of division follows the middle of the main street of the city, and which have a joint population of 6,226. Texarkana, Texas, and Texarkana, Arkansas, form a similar case. Knoxville, Tennessee, has large suburbs immediately adjoining, whose population would, if added, increase it to very nearly 40,000 inhabitants.

The rate of growth of many of these cities, especially those situated west of the Mississippi river, has been amazing. Chicago has added over half a million to her inhabitants, thus more than doubling her size in ten years. Minneapolis, St. Paul, Omaha, and Denver have expanded to triple or quadruple their former size, while all over the west smaller cities have sprung up as if by magic.

RURAL POPULATION.

During the last decade the rural population has diminished in numbers over a considerable part of the country, especially in the eastern and north central states. The areas over which this diminution has occurred are represented on the accompanying map, which has been prepared upon the following basis: from the total population of each county in 1890 has been subtracted the population of all cities or other compact bodies of population which number 1,000 or more. From the population of the same counties in 1880 has been subtracted the population of the same places at that time, and the remainders, which are assumed to be the rural population, are compared for increase or decrease. This process presents no difficulties or uncertainties in any part of the country except in the New England states, where the town system prevails, and where, as a rule, no smaller political units exist than these towns. The towns contain in most cases both urban and rural population in varying proportions, and unless one has personal acquaintance with them he has no basis for obtaining the relative proportion of these elements in any town except as indicated by the total population of the town. If the town be large the presumption is that it contains a considerable urban population, while if it is small it is probably all or nearly all rural. In the case of these towns the elimination of the urban element has been largely a matter of personal acquaintance, an estimate based thereon being guided to some extent by the population of the town, a population in excess of 2,500 indicating that a considerable proportion of the people were living under urban conditions.

The first table on the following page shows the proportion which the areas in which the rural population has diminished bears to the total areas of the states. This was prepared by footing up the counties in which such diminution had taken place and comparing the totals with the areas of the states. It shows that upon 16 per cent of the area of the country the rural population has diminished; that this diminution has been much greater in the North Atlantic division than elsewhere and least in the South Central division. It is greatest in New York state, where nearly five-sixths of the area has lost rural population; in Vermont, where more than three-fourths has lost; in Maine and New Hampshire, where nearly two-thirds has lost. It is surprisingly low in Massachusetts, but here it should be added as a qualification of the figures that the majority of the counties of that state have gained only a trifling amount; have barely held their own in this respect. In the North Central division the states of Illinois, Ohio, Indiana, and Iowa, together with southern Michigan and Wisconsin, have diminished in rural population over great areas. These areas in Illinois and Ohio comprise over three-fifths of the state and in Indiana and Iowa more than two-fifths.

Among the southern states Maryland has lost over the greatest territory, an area which exceeds half that of the state, while in Virginia much of the country lying east of the Blue Ridge has lost in rural population. The cotton states as a rule have lost very little.

Among the western states Nevada has lost rural population over nine-tenths of its area, and Utah, California, and Colorado have lost over areas which are notable because they occur in these newly settled states. The losses in these states are doubtless due not to a reduction in farming area, for they are not of strictly rural population, but to a reduction in the scattered mining population of those states.

Out of a total increase of population in the United States of 12,466,467 the rural population has increased 4,078,422, as is seen from the second table on the following page; in other words, about one-third of the total increase of the country during the past decade has been in its rural element. This increase has been distributed among the states in a most irregular manner. The North Atlantic division has suffered a decrease of rural population to the extent of 37,941. In all the other divisions of the country there has been an increase, but this increase has been in no way proportional to the total increase of population.

a No rural population.

Among the states in the North Atlantic division there has been a loss of rural population throughout New England and New York, the only states of this division in which the rural population has increased being New Jersey and Pennsylvania.

In the South Atlantic division the only state which has suffered a loss is Maryland, although Delaware has but a small gain. Virginia has lost heavily in certain parts, but the net result for the state has been a gain. In the other states of this division most of the increase in population has consisted in an increase of this element.

In the North Central division there has been a loss of rural population in Ohio and Illinois, while in Indiana the gain is trifling. In the other states of this division the gain in rural population has been substantial, especially in those upon the plains.

In every state of the South Central division there has been a considerable gain in the rural population. The same is true also of the states and territories comprising the Western division, with the exception of Nevada, which, with its great loss in total population, has suffered a corresponding loss in the rural element.

SEX.

The aggregate population on June 1, 1890, was 62,622,250. Of this number 32,067,880 were males and 30,554,370 were females. The following table shows for the United States as a whole the proportion which the number of each sex bears to the total population at each census from 1850 to 1890:

CENSUS YEARS.	Males.	Females.
	<i>Per cent.</i>	<i>Per cent.</i>
1850.....	51.04	48.96
1860.....	51.16	48.84
1870.....	50.56	49.44
1880.....	50.88	49.12
1890.....	51.21	48.79

From the above table it is apparent that for 1890 in the United States males were in excess of females in the proportion of 51.21 and 48.79. This excess of males is to be expected in this case, owing to the effects of immigration. Where natural increase is not interfered with either by immigration or emigration, wars or pestilence, the proportion of the sexes is nearly equal, females being slightly in excess of males. This is shown (but rather imperfectly, on account of the effect of emigration) in the following table, which presents the proportions of the sexes in certain European countries:

COUNTRIES.	Males.	Females.
	<i>Per cent.</i>	<i>Per cent.</i>
United Kingdom.....	48.54	51.46
Austria.....	48.92	51.08
Denmark.....	48.76	51.24
Germany.....	49.03	50.97
Netherlands.....	49.42	50.58
Spain.....	49.04	50.96
Sweden.....	48.43	51.57
Norway.....	47.87	52.13

In every one of these countries, without exception, females are in excess, constituting from 50.58 to 52.13 per cent of the whole population. In the United Kingdom, Denmark, Germany, Sweden, and Norway it may be accounted for by emigration, but in the cases of Austria, Netherlands, and Spain there is little emigration, and the figures are practically those of undisturbed natural increase. Judging, therefore, from these cases, it would appear that under undisturbed conditions the female sex outnumbers the male sex nearly in the proportion of 51 to 49.

The effect of emigration upon the population of the other countries is roughly measured by the fact that the average proportion of females to males in them is about 51.5 to 48.5. In the case of the United States, however, normal conditions are modified by immigration. Among the immigrants to this country males are in excess of females in the proportion of 3 to 2, and to this fact, coupled with the excessive immigration during the past decade, is to be attributed the large proportion of males.

If the history of the distribution of the population by sex from 1850 to 1890 is examined it is seen that males have always been in excess of females; that between 1850 and 1860 the proportion increased slightly, while between 1860 and 1870 it diminished by six-tenths of 1 per cent, which in such a matter as this is a very large reduction. This was doubtless due in great measure to the mortality of the civil war, the ravages of which were confined to the male sex, and in which probably not far from a million of our citizens lost their lives. Between 1870 and 1880 and 1880 and 1890 the proportion of males had again increased, reaching at the latter date a proportion slightly in excess of that which was shown in 1860.

The following table shows the proportion of males and females in each state and territory in 1890, 1880, 1870, 1860, and 1850:

PERCENTAGE OF MALES AND FEMALES OF TOTAL POPULATION: 1850 TO 1890.

a Dakota territory.

The above table shows the wide range among the states and territories in the proportion which the sexes bear to each other. The extreme on one side is the District of Columbia, where no less than 52.44 per cent of the

total population are females. This is followed at some distance by Massachusetts, where women form 51.42 per cent of the whole number. On the other hand are the newer states and territories of the far west, where we find Montana, with a population made up of 2 parts male to 1 female, and Wyoming, where but 35.19 per cent of the population are females. In both the North Atlantic and South Atlantic divisions females are slightly in excess of males. In the South Central division males are slightly in excess, and in the North Central division they are in excess to a much larger extent, while in the Western division nearly three-fifths of the population are males.

These differences are easy of explanation. The Atlantic divisions form an old settled region whence naturally for many decades a stream of emigration has flowed westward. This emigration has consisted in considerable proportion of the male element. In this way the eastern communities have been depleted. It is true that in the northeastern states the place of these emigrants has been filled to some extent by foreign immigration from Europe, otherwise its effect would be vastly more marked. The manufacturing centers of the northeastern states have attracted not only males from among the immigrants but to a large extent females also, especially of Irish and French-Canadian extraction, who form the bulk of the factory operatives. The same cause which has reduced the proportion of males in the Atlantic states has increased it in the central and western states. In the North Central division and in the Western division to this cause is to be added foreign immigration, which, consisting largely of males, increases still further the proportion of that sex.

Glancing at the history unfolded by this table, it is seen that in the North Atlantic division females have been in excess at each census since 1850; that this excess reached its maximum in 1880, and is now diminishing, as the effect of immigration from Europe overcomes that of emigration to the west. In each of the states composing this division this proportionate increase of the female element can be traced, reaching its maximum in 1870 or 1880, and thereafter diminishing. The effect of the civil war upon the elements of the population of these states is scarcely perceptible.

In the South Atlantic division different conditions prevail. Immigration to these states is but slight, and not sufficient to affect the constitution of the population as regards sex. These states are found to be almost equally divided between the sexes in 1850 and 1860. In 1870 the proportion of males has diminished 1.13 per cent, the effect undoubtedly of the civil war. Since then the proportion of males has increased, and the numbers of the sexes are nearly equal in 1890. Among the various states composing this division there is considerable variety as regards sex. In Delaware, Maryland, and the District of Columbia there is little evidence of the effect of the civil war, while in the other states that effect is very strongly marked. Indeed, in North Carolina and Georgia there is a reduction in the proportion of males due to this cause of about 1.5 per cent, which in most cases has been recovered during the past twenty years.

In the North Central division still different conditions have prevailed. In 1850 many of these states were upon the frontier, and in the forty years that have elapsed the frontier has moved away beyond them and they have assumed the conditions of old settled communities. There has been as a rule comparatively little emigration from these states. On the other hand, there has been a vast amount of immigration to them, both from states farther east and from Europe, and of course it is understood that this immigration is disproportionately male. Starting then in 1850, this division of the states comprised a considerable excess of the male element. This element diminished appreciably by 1870, and since then has somewhat more than held its own. The influence of the war was probably slight, but, whether large or small, it can not be distinguished from the effect of other causes, to which it must be secondary. Among the various states considerable diversity exists, since this division stretches from Ohio, which in 1850 was an old settled community, to Kansas, Nebraska, North Dakota, and South Dakota, which even at present are sparsely settled on their western borders.

The South Central division comprises a group of states extending from Alabama, a well settled state even in 1850, on the east, to Texas, which in 1845 was admitted to the Union, on the west. It is a section which has received little foreign immigration, but which has been filled up by immigration from the South Atlantic states and by natural increase. In 1850 this section contained a considerable excess of the male element. In 1860 this had increased a little, and in 1870 had decidedly diminished, owing, doubtless, to the ravages of the civil war. Between 1870 and 1880 these losses were being repaired.

The Western division comprises states and territories some of which were not known by name in 1850, and others which at that date contained but a few thousand white inhabitants. Even now, without exception, they are sparsely settled. In 1850 this division was peopled with 3 males to 1 female. In 1860 the proportion had declined to 2 to 1; in 1870 and 1880 more than 6 out of 10 were males, and in 1890 the proportion of males was a little smaller. Indeed, in 1890 the least proportion of males in all these states and territories was in Utah, where 53.13 per cent were of that sex, and the largest proportion of males was in Montana, where they outnumbered the females in the proportion of 2 to 1. Considering these states and territories as regards extreme cases of disproportion between the sexes, it is seen that the population of Colorado in 1860 was composed of 95.37 per cent of males; that the population of Nevada in the same year was composed of 89.50 per cent of males, and that California in 1850, in the height of the gold excitement, contained only 7.58 per cent of women.

For the United States as a whole there are for every 100,000 males 95,280 females in 1890. In 1880 there were 96,544 females to every 100,000 males, while in 1870 there were 97,801 females to every 100,000 males.

The following table gives, by states and territories, arranged geographically, the whole number of males and females as returned under the census of 1890, and the number of females to each 100,000 males for the censuses of 1890, 1880, and 1870:

RELATIVE PROPORTIONS OF FEMALES TO MALES: 1870 TO 1890.

California	700,059	508,071	72,575	66,873	60,309

a Dakota territory.

The greatest preponderance of females in 1890 is found in the District of Columbia, or 110,242 females to every 100,000 males. In 1880 also the District of Columbia contained the highest proportion of females to males, or 112,525 females to every 100,000 males. In Massachusetts, the state having the next greatest excess of females over males in 1890, there are 105,840 females to every 100,000 males, while in Rhode Island, the state showing the third largest excess of females over males, there are 105,628 females to every 100,000 males. In 1880 Rhode Island was second as to the excess of females, with 107,871 females to every 100,000 males, and Massachusetts third, with 107,712 females to every 100,000 males.

Grouping the states with reference to the proportion of the sexes, it is seen that, besides the District of Columbia, there are 10 states, namely, Connecticut, Maryland, Massachusetts, New Hampshire, New Jersey, New York, North Carolina, Rhode Island, South Carolina, and Virginia, in which females are in excess. Every one of these, it will be noticed, is in one of the two Atlantic divisions.

In the remaining states males are in excess. Of these there are 13, namely, Alabama, Delaware, Georgia, Indiana, Kentucky, Louisiana, Maine, Mississippi, Ohio, Pennsylvania, Tennessee, Vermont, and West Virginia, in which the whole number of females represents 95 per cent or more of the whole number of males.

In 14 states and territories the number of females is between 80 and 95 per cent of the number of males. These are as follows: Arkansas, Florida, Illinois, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, New Mexico, South Dakota, Texas, Utah, and Wisconsin. In the remaining states and territories the whole number of females represents from 50 to 80 per cent of the whole number of males. These are Arizona, California, Colorado, Idaho, Montana, Nevada, North Dakota, Oklahoma, Oregon, Washington, and Wyoming.

The constitution of the population of many of the states with regard to sex has changed materially since 1880, while throughout the country at large there has been an increase in the proportion of males.

The increase of the male element in the country at large has resulted in transferring from the list of states in which females were in excess in 1880 to those in which males are in excess no fewer than 6 states, namely, Alabama, Georgia, Louisiana, Maine, Pennsylvania, and Tennessee. In general, it has increased the proportion of males in the northern and southern central states. On the other hand, the development of settled conditions in the group of western states and territories has reduced the proportion of males among them.

The whole number of states and territories where the females exceed the males in 1890 is 11 as against 17 in 1880. All of the states and territories showing an excess of females over males in 1890 are found in the North Atlantic and South Atlantic divisions, as was also true of the states and territories having an excess of females over males in 1880, with the exception of Alabama, Louisiana, and Tennessee, in the South Central division.

In 1880 there were 5 states and territories in which the number of females was less than 50 per cent of the number of males, namely, Arizona, Idaho, Montana, Nevada, and Wyoming, while in 1890 there is no state or territory where the number of females is not at least 50 per cent of the number of males.

In 1890 there are 11 states and territories, mainly in the Western division, in which the number of females is from 50 to 80 per cent of the number of males as against 5 states and territories in 1880.

For the remaining states and territories the number of females is over 80 per cent but less than 100 per cent of the number of males.

The females as compared with the males have lost relatively since 1880 in the United States as a whole, the numerical loss being 1,264 females to each 100,000 males as against a relative loss in 1880 of 1,257 females to each 100,000 males. There has been a relative loss during the decade of 2,070 females to each 100,000 males in the North Atlantic division; of 1,716 females to each 100,000 males in the South Atlantic division, and 1,411 females to each 100,000 males in the South Central division. There has been a slight increase relatively, on the other hand; of 269 females to each 100,000 males in the North Central division, and 4,650 females to each 100,000 males in the Western division. In 19 states and territories there has been a relative increase of females to each 100,000 males, while in 29 states and territories there has been a relative decrease of females to each 100,000 males, as is shown by the following table, giving in addition to the increase or decrease in 1890, on the assumed basis of 100,000 males, the increase or decrease as shown by the census of 1880 as compared with 1870:

RELATIVE INCREASE OF FEMALES TO EACH 100,000 MALES.

New Hampshire	1,662	-1,027			

The increase of females since 1880 for North Dakota and South Dakota is for these 2 states combined as compared with Dakota territory in 1880 and 1870.

In all the states and territories comprising the North Atlantic and South Atlantic divisions the females have decreased relatively as compared with males. This is also largely true of the South Central division, the females having decreased relatively in all the states and territories, with the exception of Texas. In Oklahoma in 1890 there are 78,027 females to each 100,000 males. The females have increased relatively as compared with males in all the states comprising the North Central division, with the exception of Ohio and Wisconsin. The females have also increased relatively as compared with the males in the states and territories comprising the Western division, with the exception of New Mexico, Utah, and Washington.

The following table shows, by states and territories, the numerical increase in males and females for each decade since 1850:

INCREASE IN MALES AND FEMALES: 1850 TO 1890.

STATES AND TERRITORIES.	INCREASE IN MALES.				INCREASE IN FEMALES.

c North Dakota and South Dakota combined.

d Dakota territory.

GENERAL NATIVITY.

The tabulations of the Eleventh Census show a total population of 62,622,250, of which persons of foreign birth number 9,249,547 and those of native birth 53,372,703.

In the census of 1850 statistics were for the first time obtained concerning the number of persons of foreign birth in the country. The following table shows the number of persons of native and foreign birth at each census since and including that date:

CENSUS YEARS.	Native born.	Foreign born.
1850.....	20,947,274	2,244,602
1860.....	27,304,624	4,138,697
1870.....	32,991,142	5,567,229
1880.....	43,475,840	6,679,943
1890.....	53,372,703	9,249,547

The following table shows the proportion which each of these elements bore to the total population at each census since the distinction was first made:

CENSUS YEARS.	Native born.	Foreign born.
	<i>Per cent.</i>	<i>Per cent.</i>
1850.....	90.32	9.68
1860.....	86.84	13.16
1870.....	85.56	14.44
1880.....	86.68	13.32
1890.....	85.23	14.77

Thus it appears that the proportion of foreign born inhabitants, starting with 9.68 per cent in 1850, rose at a leap to 13.16 per cent in 1860, and in 1890 it has sustained a further increase to 14.77 per cent. The increased proportion in 1870 is doubtless due in great measure, if not entirely, to the incompleteness of that census in the southern states, the omissions having been entirely of the native born element.

For nearly half a century immigration to this country has been upon an enormous scale. For many years prior to 1820 it was but trifling in amount, and, indeed, it was not until 1847 that immigration upon a considerable scale set in. At that time the succession of famines in Ireland caused an exodus from that country, the vast body of the emigration coming to this country, and from that time to the present there has been a very large migration across the Atlantic.

The following statement shows by decades the number of alien passengers to the United States from 1821 to 1867, and the number of immigrants from 1868 to 1890:

1821 to 1830.....	143,439
1831 to 1840.....	599,125
1841 to 1850.....	1,713,251
1851 to 1860.....	2,598,214
1861 to 1870.....	2,314,824
1871 to 1880.....	2,812,191
1881 to 1890.....	5,246,613
Total.....	15,427,657

It will be seen that the immigration, which between 1830 and 1840 was a little short of 600,000, sprung to 1,713,251 in the decade from 1840 to 1850, and thence to nearly 2,600,000 in the ten years from 1850 to 1860. There was a slight falling off in the succeeding decade, owing to our internal disorders, which was made up between 1870 and 1880, while during the past decade immigration has been unparalleled in amount, reaching a total of nearly 5,250,000, almost twice as great as during the preceding decade, and more than twice as great as during any other 10 year period in the country's history. More than one-third of the total immigration to this country since 1820 came during the last ten years.

The following table shows for each decade the number of immigrants of each of the principal nationalities represented between 1821 and 1890:

IMMIGRANTS ARRIVING IN THE UNITED STATES: 1821 TO 1890.

NATIONALITIES.	1821 to 1830	1831 to 1840	1841 to 1850	1851 to 1860	1861 to 1870	1871 to 1880	1881 to 1890

^a Includes Great Britain not specified.

^b 1881 to 1885.

From this it appears that the Irish were the first people represented in considerable proportion among our immigrants; that they increased rapidly in number up to the decade from 1850 to 1860, falling off in the two succeeding decades to less than one-half the maximum, but increasing again in the decade just past. During the first three decades their number was in excess of that of any other nationality. During the past decade they have been greatly exceeded in number by the Germans.

The Germans, starting from small beginnings in the first decade, increased rapidly and reached a maximum of nearly a million in the decade from 1850 to 1860. After that they, like the Irish, fell off decidedly, but again increased in the last decade to nearly a million and a half, more than double the number from any other nationality. Next in importance are the natives of England and Wales, which also started in with small beginnings and have increased gradually but more regularly until in the last decade they reached a number in excess of the Irish and second only to the Germans. The history of the Scotch immigration has been very similar to that of the English, although it is very much less in amount.

The immigration of the French has been more regular than that of any other nationality. It has never been great and is apparently diminishing at present. That of the Netherlands, while it has increased with some regularity, has not yet reached great importance, nor does it appear likely to do so. Immigration from the British Provinces of North America was notable in the decade from 1840 to 1850, and since then it has increased at a very rapid rate, reaching nearly 400,000 in the decade from 1870 to 1880, and still more in the first five years of the decade just past. In all probability were the statistics of immigration of these people available for the entire decade it would be found that fully 800,000 of them had crossed our border.

The Norwegian and Swedish immigration was of no importance prior to 1840, nor, indeed, did they begin to come in any considerable number until 1860; but since that time, and especially during the past decade, they have increased with extraordinary rapidity. The Russians and Poles were almost unknown in the statistics of immigration prior to 1870, and in the decade following that year immigrants of that nationality numbered only about 50,000, while during the decade just past their number increased to more than a quarter of a million. The case is almost precisely similar with the Hungarians and Italians. Of these only a few scores or hundreds reached our shores in each year prior to 1870. In the decade following these nationalities first appeared in numbers of importance, while in the decade from 1880 to 1890 their numbers were increased many fold.

Of the immigration during 1821 to 1830 the Irish constituted 35 per cent and British immigrants, including the natives of England, Wales, Scotland, and Ireland, constituted nearly 53 per cent of the total immigration. The next nationality contributing in that decade was France, with but 6 per cent. Between 1830 and 1840 the proportion of Irish was the same as before, while that of the British diminished to 47 per cent. It was followed in magnitude by the German immigration, which had increased until it constituted not less than 25 per cent of all. The French immigration likewise increased and constituted 8 per cent in that decade.

In the next decade, 1840 to 1850, the proportion of Irish had increased to 46 per cent of all immigrants and that of the British to 61 per cent, while the proportion of Germans remained the same as before, at 25 per cent.

In the decade from 1850 to 1860 the proportion of Irish for the first time diminished, standing at 35 per cent, and for the first time also it was exceeded by any other nationality, the Germans constituting in that decade

37 per cent of the entire immigration. The British immigration in that year constituted 52 per cent of the entire immigration. The Chinese, almost unknown in the previous history of immigration, first assumed importance during this decade.

In the decade from 1860 to 1870 the importance of the Irish relative to the other elements still further diminished, the proportion having fallen to 19 per cent, while that of the British collectively reached 45 per cent, and the Germans 34 per cent of the entire immigration. In that decade the immigration from Norway and Sweden became prominent, amounting to 5 per cent of the total, and was exceeded by that from the British North American Provinces, which amounted to 7 per cent of the total immigration.

In the next decade, that from 1870 to 1880, still further changes in the constitution of the immigration are to be noted. The Irish still further diminished and amounted to but 16 per cent of the total. They were exceeded slightly in number by the natives of England and Wales, while together the British formed 35 per cent of the entire immigration. In this decade, as in the previous one, the British exceeded the Germans, the Germans constituting but 26 per cent of all. The British Americans constituted 14 per cent and the natives of Norway and Sweden constituted 8 per cent. In this decade the Russians and Poles became of some importance, constituting 2 per cent of the immigration. The Hungarians constituted nearly 3 per cent and the Italians 2 per cent.

In the last decade the changes in the constitution of the immigration were greater than in any previous one. Of the enormous number of immigrants, 5,246,613, only 12.5 per cent, or one-eighth, were Irish, and only 28 per cent were from the United Kingdom. The proportion from Germany has more than held its own, being 28 per cent. Of Norwegians and Swedes the proportion has risen to 11 per cent, of Russians and Poles to 5 per cent, of Hungarians to nearly 7 per cent, and of Italians to 6 per cent.

Thus it appears that on the whole the proportion of Irish has fallen off, and while that of the English and Scotch has diminished, the diminution has been less. The German immigration has also diminished, but in a slight degree. The immigration of Swedes and Norwegians has greatly increased in recent years, while of Hungarians, Poles, Russians, Italians, and Bohemians almost all who have reached this country have come during the past decade. The proportion of increase of this class of immigration is very rapid, and should it continue at the present rate these elements will soon outnumber all others.

The following statement shows the countries from which the principal elements of the total immigration of the past 70 years have been derived:

United Kingdom (including Great Britain not specified).....	6, 235, 277
England and Wales.....	1, 637, 065
Scotland.....	323, 823
Ireland.....	3, 481, 074
Germany.....	4, 504, 128
Norway and Sweden.....	925, 031
Austria-Hungary.....	434, 488
Italy.....	388, 558
France.....	366, 346
Russia, including Poland.....	324, 892
China.....	290, 655
Switzerland.....	171, 269
Denmark.....	142, 517
Netherlands.....	100, 874

Thus it appears that out of a total immigration since 1820 of 15,427,657 not less than 40.42 per cent has been derived from the United Kingdom and 29.20 per cent from Germany. The United Kingdom and Germany together have supplied 69.62 per cent, or more than two-thirds, of all immigration to this country. The German immigration is now in excess of that from Ireland, which at one time, and that not very long ago, furnished the bulk of the immigration. The Norwegians and Swedes have thus far supplied but 6 per cent of all immigration and other nations a still smaller proportion.

The following table shows, by states and territories, the percentages of the native and foreign born of the total population in 1890:

STATES AND TERRITORIES.	Native born.	Foreign born.	STATES AND TERRITORIES.	Native born.	Foreign born.
The United States	85.23	14.77	North Central division—Continued.		
North Atlantic division.....	77.66	22.34	Minnesota	64.10	35.90

Indiana.....	93.33	6.67	Utah.....	74.48	25.52
Illinois.....	77.99	22.01	Nevada.....	67.86	32.14
Michigan.....	74.03	25.97	Idaho.....	79.31	20.69
Wisconsin.....	69.22	30.78	Washington.....	74.24	25.76
			Oregon.....	81.73	18.27
			California.....	69.68	30.32

The preceding table, in which the states and territories are arranged in geographical order, illustrates in a general way the distribution of the foreign born element. It is confined almost entirely to the northern and western states, the southern states containing but a trifling proportion. In the North Atlantic division the proportion of the foreign born element is not much less than one-fourth of the population, the proportion ranging from 30.77 per cent in Rhode Island down to 11.94 in Maine. The average proportion in the North Central division is 18.16 per cent, and the states of this division show a wide range in this proportion. In North Dakota 44.58 per cent of the people are of foreign birth. Next is Minnesota, with 35.90 per cent, then Wisconsin, with 30.78 per cent. The smallest proportion is found in Indiana, where about one-sixteenth of the inhabitants are of foreign birth, and in Missouri, where a little more than one-twelfth are foreign born.

In the Western division the proportion of foreign born is 25.46 per cent, and the proportions in the various states and territories composing this division range from 32.61 in Montana and 32.14 in Nevada to 7.33 in New Mexico.

The South Atlantic division contains on an average but 2.35 per cent of the foreign born element. The state having the largest proportion is Maryland, where it is 9.05 per cent, and from this it ranges down to 0.23 per cent in North Carolina.

The proportion in the South Central division is but little greater, being on the average but 2.93 per cent. The state having the greatest proportion is Texas, where it is 6.84, and that having the least is Mississippi, with only 0.62 per cent.

a Dakota territory.

The preceding table shows that the condition of the various states and territories of the country, as regards the native and the foreign born elements of the population, has been since 1850 very much the same as at present. The foreign born element has been practically confined to the northern and western states, and the southern states have from the first contained only a trifling proportion. As the proportion of the foreign born element has risen from 9.68 per cent in 1850 to 14.77 per cent in 1890, this increase has gone to the northern and western states. The proportion of the North Atlantic division has risen from 15.37 to 22.34 per cent; in the North Central division it has risen from 12.04 to 18.16 per cent, and in the Western division from 15.11 to 25.46 per cent. In every state in the North Atlantic division the proportion has increased. In the North Central division it has increased in every state except Wisconsin, Missouri, Nebraska, and Kansas, and of these the proportion still remains excessively large in Wisconsin.

The following table shows the percentage of the total foreign born element which was contained in each of the five divisions of the country at each of the past five censuses, and illustrates very well its distribution:

GEOGRAPHICAL DIVISIONS.	1890	1880	1870	1860	1850
	<i>Per cent.</i>				
The United States	100.00	100.00	100.00	100.00	100.00
North Atlantic	42.04	42.13	45.27	48.90	59.06
South Atlantic	2.25	2.61	3.00	3.93	4.67
North Central	43.90	43.66	41.91	37.29	28.98
South Central	3.48	4.11	4.19	5.56	6.09
Western	8.33	7.49	5.63	4.32	1.20

It is seen that in the North Atlantic and North Central divisions there are contained no less than 85.94 per cent of the entire foreign born element, and if to these the Western division is added, 94.27 per cent are accounted for, leaving only 5.73 per cent in the southern states. The south is the home of the native American.

The table on the following page gives for each state and territory, arranged geographically, the whole number of native and foreign born returned in 1890, together with the number of foreign born to each 100,000 native born, as returned in 1890, 1880, and 1870.

a Dakota territory.

There are in the United States as a whole 17,330 foreign born persons to each 100,000 native born persons in 1890 as against 15,365 in 1880 and 16,875 in 1870. There has been an increase in the number of foreign born to each 100,000 native born for the North Atlantic division from 24,070 in 1880 to 28,773 in 1890 and in the North

Central division from 20,189 to 22,184. In the Western division there has been a decrease in the number of foreign born to each 100,000 native born in 1890 as compared with 1880, or 34,161 in 1890 as against 39,418 in 1880. In the South Atlantic and South Central divisions the foreign born element is not numerically of importance, there being only 3,021 foreign born to each 100,000 native born in 1890 in the South Central division and but 2,411 in the South Atlantic division.

In 2 states in 1890 the foreign born represent more than 50 per cent of the native born, or 80,449 foreign born in North Dakota and 56,006 foreign born in Minnesota, to each 100,000 native born. In 1880 there were 5 states and territories in which the foreign born represented more than 50 per cent of the native born, namely, Nevada, with 70,065 foreign born to each 100,000 native born; Arizona, with 65,799 foreign born to each 100,000 native born; Dakota, with 62,118 foreign born to each 100,000 native born; Minnesota, with 52,169 foreign born to each 100,000 native born, and California, with 51,218 foreign born to each 100,000 native born.

The foreign born represent from 25 to 50 per cent of the native born in 18 states and territories in 1890 as compared with 13 states and territories in 1880, 9 of the states and territories in 1890 being in the Western division, while the remainder are about equally divided between the North Atlantic and North Central divisions.

The foreign born represent from 10 to 25 per cent of the native born in 9 states in 1890 as compared with 11 states and territories in 1880; from 2 to 10 per cent in 12 states and territories in 1890 as against 10 states and territories in 1880, and less than 2 per cent in 8 states in both 1890 and 1880.

The following table shows the relative increase or decrease since 1880 of foreign born as compared with native born, on the assumed basis of 100,000 native born, together with the relative increase or decrease for the decade from 1870 to 1880:

RELATIVE INCREASE OF FOREIGN BORN TO EACH 100,000 NATIVE BORN.

a North Dakota and South Dakota combined.

In 24 states and territories the foreign born have increased relatively since 1880, while in 24 they have decreased relatively.

In the above table the results for North Dakota and South Dakota in 1890 have been combined for purposes of comparison with the results for Dakota territory in 1880 and in 1870.

In Oklahoma in 1890 there are 4,637 foreign born to each 100,000 native born.

In the United States as a whole the foreign born element has increased relatively in 1890, an increase of 1,965 to each 100,000 native born, as against a relative decrease in 1880 of 1,510 to each 100,000 native born.

GENERAL NATIVITY.

The following table shows the numerical increase in native and foreign born, by states and territories, for each decade since 1850:

INCREASE IN NATIVE AND FOREIGN BORN: 1850 TO 1890.

a Decrease.

b Decrease; due to loss of territory, West Virginia having been set off from Virginia December 31, 1862.

c North Dakota and South Dakota combined.

d Dakota territory.

If the proportion of the foreign born in the principal cities is contrasted with the proportion of the foreign born in the country at large, a very fair measure is obtained of their appetency for urban life as compared with that for rural life. In 1890 there were 124 cities having a population of 25,000 or more which, taken collectively, represented a total population of 13,989,568. The total foreign born element in these same 124 cities in 1890 numbered 4,081,927 and constituted 29.18 per cent of their total population. The foreign born element in the country at large in 1890 constituted, as already stated, 14.77 per cent of the whole population. In other words, the proportion of foreign born in the principal cities is very nearly twice as great as the proportion of foreign born in the country at large. If we go a step further, and contrast the proportions of foreign born in the principal cities and in the remainder of the country, outside of these 124 cities, it is seen that the proportions are very nearly as 3 to 1, the foreign born element in the country, exclusive of that contained in the 124 principal cities, constituting but 10.63 per cent of the total population of the country outside of these cities.

Putting the matter in another form it appears that the total foreign born element in these 124 cities (4,081,927) constitutes not less than 44.13 per cent of all the persons of foreign birth in the country, while in these same cities the persons of native birth number 9,907,641, or only 18.56 per cent of the total number of persons of native birth in the country. That is to say, the proportion of the foreign born who live in these cities is more than double the proportion of the native born. It appears, then, from these figures, that, taken as a whole, the element of foreign birth seeks the cities with far greater avidity than does the element of native birth.

The distribution of the population as a whole and of the foreign born element in the principal cities and in the remainder of the country outside of these cities is shown in detail by states and territories on the following page.

PROGRESS OF THE NATION.

THE PROPORTION OF FOREIGN BORN IN THE PRINCIPAL CITIES, AND IN THE REMAINDER OF THE COUNTRY, COMPARED WITH THE TOTAL POPULATION: 1890.

The 56 principal cities in the North Atlantic division as a whole constitute 41.02 per cent of the total population and 59.44 per cent of the total foreign born in that division. The foreign born element in these 56 cities constitutes 32.38 per cent of their total population, as against 15.37 per cent of foreign born among the total population of this division outside of the principal cities.

In the South Atlantic division the population of the 10 principal cities constitutes only 12.12 per cent of the whole population, while the foreign born element in the same cities constitutes 56.32 per cent of the total foreign born in the division. The per cent of foreign born of the total population living in the 10 cities in this division is 10.93, while the per cent of foreign born of the total population living in the division outside of these 10 cities is but 1.17.

In the North Central division the population of the 36 principal cities constitutes only 19 per cent of its whole population, and the foreign born element in the same cities but 32.18 per cent of the total foreign born in the division. The per cent of foreign born of the total population living in these 36 cities is 30.74, while the per cent of foreign born of the total population exclusive of that contained in the principal cities is 15.20.

In the South Central division the conditions are very similar to those of the South Atlantic division. The population of the 13 principal cities constitutes only 7.53 per cent of the whole population, while the foreign born element in these cities constitutes 31.98 per cent of the whole number of foreign born in the division. The per cent of foreign born of the total population living in the 13 cities of this division is 12.46, while the per cent of foreign born of the total population living outside of the 13 cities is 2.16.

In the Western division the per cent of foreign born in the principal cities as compared with their total population is 34.78 as against 22.66 per cent of foreign born for the remainder of the division exclusive of principal cities.

The table on the following pages gives the number and per cent of persons of native and foreign birth for each of the 124 principal cities, that is, those having a population of 25,000 or more, together with corresponding figures for each state or territory containing one or more of these cities.

NATIVE AND FOREIGN BORN POPULATION OF THE PRINCIPAL CITIES AND OF THE STATES IN WHICH THEY ARE SITUATED: 1890.

						Sacramento	26,386	18,712	7,674	70.92	29.08
						San Francisco	298,997	172,186	126,811	57.59	42.41

The foreign born element in the city of Fall River, in Massachusetts, constitutes more than one-half of its entire population, or 50.72 per cent., and is closely followed in the same state by Holyoke, with 47.89 per cent, Lawrence with 45.95 per cent, and Lowell with 44.53 per cent. In Manchester, New Hampshire, 45.53 per cent of the whole population are of foreign birth.

The whole number of persons of foreign birth in New York city constitutes 42.23 per cent of its total population, while the foreign born in Chicago constitutes 40.98 per cent of the total population of that city. The percentage of foreign born of the total population in the other large cities is 25.74 in Philadelphia, 32.46 in Brooklyn, 25.43 in St. Louis, 35.27 in Boston, and 15.88 in Baltimore.

The proportion of foreign born to total population in Duluth, Minnesota, is 48.99 per cent and in San Francisco, California, 42.41 per cent.

In 79 of these principal cities, or very nearly two-thirds of all the cities considered, the foreign born element constitutes more than one-fifth of the total population; in 63 cities, or a little more than one-half of the whole number, this element is more than one-fourth of the total population, while in 30 cities it is more than one-third. In 9 cities the foreign born comprise more than two-fifths of the whole population.

COLOR.

The Eleventh Census shows that out of a total population of 62,622,250 the persons of negro descent numbered 7,470,040. In addition there were enumerated 107,475 Chinese, 2,039 Japanese, and 58,806 Indians competent to be enrolled among the general population, making the total colored element of the country 7,638,360 as compared with a total white population in 1890 of 54,983,890.

The persons of negro descent are further classified under the law, as follows: negroes, 6,337,980; mulattoes, 956,989; quadroons, 105,135, and octoroons, 69,936. These figures are of little value. Indeed, as an indication of the extent to which the races have mingled, they are misleading. Excluding the small per cent of Chinese, Japanese, and civilized Indians from the general discussion, it is seen that the white constituted 87.80 per cent and the negro 11.93 per cent of the whole population returned in 1890. Ten years ago there were 6,580,793 persons of negro descent in the country, and the proportions of the two races were 86.54 per cent white and 13.12 per cent negro. For the discussion of the broader facts regarding the history of these two races in the country it is necessary to present the statistics bearing upon them. The following table shows the number of each, white and negro, at each census during the past century. The figures for 1870 are given as returned at that census, no attempt having been made at their correction.

CENSUS YEARS.	White.	Negro. (a)
1790	3,172,006	757,208
1800	4,300,446	1,002,037
1810	5,862,073	1,377,808
1820	7,862,166	1,771,656
1830	10,537,378	2,328,042
1840	14,195,805	2,873,648
1850	19,553,068	3,638,808
1860	26,922,537	4,441,830
1870	33,589,377	4,880,009
1880	43,402,970	6,580,793
1890	54,983,890	7,470,040

a Includes all persons of negro descent.

The next table shows the proportions of the two races given in percentages of the total at each census:

CENSUS YEARS.	White.	Negro. (a)
	<i>Per cent.</i>	<i>Per cent.</i>
1790.....	80.73	19.27
1800.....	81.12	18.88
1810.....	80.97	19.03
1820.....	81.61	18.39
1830.....	81.90	18.10
1840.....	83.16	16.84
1850.....	84.31	15.69
1860.....	85.62	14.33
1870.....	87.11	12.66
1880.....	86.54	13.12
1890.....	87.80	11.93

a Includes all persons of negro descent.

For the censuses from 1790 to 1850, inclusive, the population was classified as white, free negro, and slave only, while for the censuses from 1860 to 1890, inclusive, the population included, besides the white and negro elements, the few Chinese, Japanese, and civilized Indians reported at each of those censuses. In the above tables, however, these persons are not considered for the censuses from 1860 to 1890, and for this reason the number and per cent of white and negro in 1860, 1870, 1880, and 1890 do not represent the whole population for those censuses, as is the case for all censuses prior to 1860.

The preceding tables show that the proportion of white persons has increased and the proportion of those of negro descent has diminished at each census with the exception of the censuses of 1810 and 1880. In 1880 the apparent decrease of white and increase of negro is due to the deficient enumeration of 1870.

In this period of 100 years the proportion of white has increased from 80.73 to 87.80 per cent and that of the negro element has correspondingly diminished from 19.27 to 11.93 per cent. The proportion of the negro element is to-day less than two-thirds what it was at the beginning of the century.

The great relative increase in the negro population in the two decades, 1790 to 1800 and 1800 to 1810, was due to the slave trade, which did not cease by constitutional prohibition until 1808, during which year there was an unusual accession from that source.

The following table shows the percentages of increase of the two races for each decade since 1790:

DECADES.	PER CENT OF INCREASE.	
	White.	Negro. (a)
1790 to 1800.....	35.76	32.33
1800 to 1810.....	36.12	37.50
1810 to 1820.....	34.12	28.59
1820 to 1830.....	34.03	31.44
1830 to 1840.....	34.72	23.40
1840 to 1850.....	37.74	26.63
1850 to 1860.....	37.69	22.07
1860 to 1870.....	24.76	9.86
1870 to 1880.....	24.24	34.85
1880 to 1890.....	26.65	13.51

a Includes all persons of negro descent.

The figures expressing these percentages of increase between 1860 and 1870 and 1870 and 1880 are of no value, owing, as has been frequently stated, to the omissions of the Ninth Census. Throwing this out of account, it is seen that with the exception of the decade from 1800 to 1810 the increase of the white has been at a greater rate than that of the negro in every case, and that during the past ten years the increase has been nearly twice as rapid.

The relative rate of increase of the white and negro population has been, especially since the war, a matter of great general interest and attention. The exaggerated rate which was given it from 1870 to 1880, by reason of the faulty census of 1870, aroused much needless anxiety in certain quarters concerning the future of the two races and the welfare of the country. The facts that the Ninth Census was imperfect, and that its omissions were proportionately vastly greater among the negro element than among the white, were overlooked. The probabilities of the case, moreover, were not considered. From the history of the races during the existence of slavery it should have been seen that all the probabilities were in favor of a smaller rate of increase than that of the white. During the seventy years that the negro race was in a condition of slavery its increase was less rapid than that of the white, with the exception of the ten years from 1800 to 1810, and in this time the proportion of the negro element diminished from 19.27 per cent to 14.13 per cent of the entire population. The negro element is increasing

RATES OF INCREASE OF THE WHITE AND OF THE NEGRO POPULATION: 1790 TO 1890.

much less rapidly than the white element not only in the country at large but in the southern states also, and in all probability the relative rates of increase of the two races in that part of the country will differ more widely and the white will increase more rapidly in proportion to the negro element as the inevitable change of industries progresses in that region and manufactures assume greater importance relative to agriculture.

The following table shows, by states and territories, the percentage of the two races at each census since 1850:

PERCENTAGE OF WHITE AND NEGRO (a) OF TOTAL POPULATION: 1850 TO 1890.

a Includes all persons of negro descent.

b Dakota territory.

In 1850 the population was classified as white, free negro, and slave only, and the percentages of white and negro given in the preceding table equal in all cases 100 per cent. For the censuses from 1860 to 1890, however, the percentages of white and negro do not equal 100 per cent, except for those states where the number of Chinese, Japanese, and civilized Indians is so small as not to be appreciable in figuring percentages of total population, these classes having been excluded from the general discussion.

From this table it appears that in the North Atlantic, North Central, and Western divisions the proportion of the negro element has always been trifling, and has, on the whole, rather tended to decrease than increase. Of all the states in these divisions Missouri is the only one which has ever contained any notable proportion of the negro element, and in this state the proportion has diminished almost continuously from 13.20 per cent in 1850 down to 5.61 per cent in 1890. Practically all the negro element of the country is found in the South Atlantic and South Central divisions. For these two divisions, therefore, it is important to show for each state the proportion which the negro has borne to the whole population at each census since 1790. The percentages are given in the following table:

PERCENTAGE OF NEGRO (a) OF TOTAL POPULATION: 1790 TO 1890.

STATES AND TERRITORIES.	1890	1880	1870	1860	1850	1840	1830	1820	1810	1800	1790

a Includes all persons of negro descent.

In the first of these divisions this element in 1790 comprised 36.37 per cent of the population and in 1890 it comprised 36.83 per cent, the proportion at the beginning and end of the century being almost identical. During the century, however, the proportion has oscillated within wide limits. It increased until 1830, when it was 41.95 per cent. Since that time it has gradually diminished, with only one apparent break in the continuity, that shown by the faulty census of 1870.

The South Central division presents a different picture. In the early years of the republic many of these states lay upon the frontier and were first peopled mainly by white persons. The negro was never a pioneer. In 1790 the proportion of the negro element in these states collectively was 14.92 per cent. This proportion increased steadily up to 1860, when it reached 35.34 per cent, since which time it has diminished and now stands at 31.71 per cent.

Thus we find in the south, taken as a whole, a proportional increase of the negro element up to 1840 or 1850 and since then a marked diminution of that proportion.

Turning now to individual states we find the proportion of the negro element in Delaware increasing up to 1840 and then progressively diminishing. In Maryland the maximum is reached much earlier, in 1810, and for the past eighty years there has been a proportional diminution of the negro element in that state. The District of Columbia has been subjected to unusual conditions in this regard, which make its history more complicated. The negro element reached a maximum proportion in 1810, from which it diminished slowly at first, then rapidly until 1860, when it was but 19.07 per cent. Then came the civil war; many thousands of our negro population flocked into Washington, and the proportion was raised so that in 1870 it was not less than 32.96 per cent and in 1880 even a trifle larger. The last census shows a slight diminution. The proportion in Virginia increased until 1810, when it reached its height, and has been diminishing ever since, although that diminution is not apparent in the decade following 1860, owing to the division of the state.

Turning now to Kentucky there is seen a similar history. The proportion of the negro element increased up to 1830 and since then has diminished. All these are border states, and throughout they exhibit a similar history, the proportion of the negro element having increased for thirty, forty, or fifty years and diminished during the balance of the century.

The states of the South Atlantic division south of Virginia, and those of the Gulf, with Arkansas and Tennessee, show, with the exception of Florida and Texas, quite a different history. In all these states, with the two exceptions noted, the proportion of the negro element has increased continuously, or practically so, up to comparatively recent times, and the diminution in the proportion of the negro element has commenced only in the past ten or twenty years. Thus the proportion in North Carolina has increased with scarcely a break up to 1880, only the censuses of 1840 and 1890 showing a reduction. The proportion in South Carolina has similarly increased up to 1880, with the exception of 1800 and 1860, and the last census shows but a trifling reduction. So in Georgia, although there has been some oscillation in past times, this element reached its maximum in 1880, and the falling off in 1890 is trifling. In Tennessee, again, the maximum was reached in 1880; in Alabama in 1870; while in Mississippi the proportion has, with two exceptions, 1850 and 1870, gone on increasing up to the present time, the census of 1890 showing a proportion of 57.58 per cent. In Louisiana a maximum was reached in 1830, after which the proportion fell off continuously until 1860. Then for two decades it increased, while during the past ten years it again shows a reduction. In Arkansas the proportion has continuously increased, except 1870, the census of 1890 showing the greatest proportion of any census in that state.

Texas and Florida present conditions different from those of the other states in the extreme south, having received extensive immigration in recent years, and since that immigration is almost entirely white, it has reduced the proportion of the negro element.

There has occurred, therefore, a massing of the negro element in the far southern states, but the extent and importance of this movement have been grossly exaggerated. In the thirty years which have elapsed since 1860 the proportion of the negro element has been increased by this movement in only 5 states, namely, South Carolina, where the proportion has increased from 58.59 to 59.85; Georgia, from 44.05 to 46.74; Mississippi, from 55.28 to 57.58; Louisiana, from 49.49 to 49.99, and Arkansas, from 25.55 to 27.40.

The story, however, is not complete until the last chapter has been told. In the past ten years the proportion has increased in only 2 of these states, namely, Mississippi, where the change in the proportion is from 57.47 to 57.58, and Arkansas, from 26.25 to 27.40. In the other 3 of these states the proportion has diminished during the past decade.

It appears from a study of these figures that while this southward movement of the negro race may be still progressing it is gradually being overcome and its effects neutralized by the greater rate of increase of the white race. It appears probable that this southward movement will continue in the future as industries increase in the border states, and the foreign element of our population, following in the wake of these industries, gradually crowds the negro element out of these states.

The table on the following page gives for each state and territory, arranged geographically, the whole number of white and negro persons as returned under the census of 1890, together with the number of negroes to each 100,000 whites, as returned at the censuses of 1890, 1880, and 1870.

a Includes all persons of negro descent.

b Dakota territory.

The negroes exceed the whites in 1890 in 3 states only, namely, in South Carolina, or 149,117 negroes to each 100,000 whites; in Mississippi, or 136,287 negroes to each 100,000 whites, and in Louisiana, or 100,143 negroes to each 100,000 whites. These same states also showed an excess of negroes in 1880 as follows: South Carolina, 154,519 negroes to each 100,000 whites; Mississippi, 135,647 negroes to each 100,000 whites, and Louisiana, 106,309 negroes to each 100,000 whites.

In 5 states in 1890 the negroes represent more than 50 per cent of the whites, namely, Georgia, Alabama, Florida, Virginia, and North Carolina. In these same states in 1880 the negro also represented more than 50 per cent of the white population. The negro population of the District of Columbia represented in 1880 more than 50 per cent of the white population, while in 1890 it represents but 48.85 per cent of the white population.

Besides the District of Columbia there are 4 states in 1890 where the negro population represents from 25 to 50 per cent of the white population, the same as in 1880, namely, Arkansas, Tennessee, Texas, and Maryland.

In 1890 and also in 1880 there are but 2 states where the negro population represents from 10 to 25 per cent of the white population, namely, Delaware and Kentucky.

Of the remaining states and territories in 1890, 10 have a negro population which represents from 2 to 10 per cent of the white population as compared with 8 states in 1880, while in 24 states and territories the negro element represents less than 2 per cent of the white population, both in 1890 and in 1880.

The following table shows the relative increase or decrease since 1880 of negroes as compared with whites, on the assumed basis of 100,000 whites, together with the relative increase or decrease from 1870 to 1880:

RELATIVE INCREASE OF NEGRO (a) POPULATION TO 100,000 WHITE POPULATION.

b North Dakota and South Dakota combined.

In the table on the preceding page the results for North Dakota and South Dakota in 1890 have been combined for comparison with those for Dakota territory in 1880 and 1870.

For the United States as a whole in 1890 there has been a relative decrease of negroes, or 1,576 to each 100,000 whites, as compared with a relative increase from 1870 to 1880 of 634 to each 100,000 whites. In the South Atlantic division there has been a relative decrease in 1890 of 4,852 negroes to each 100,000 whites, and in the South Central division of 4,584 negroes to each 100,000 whites.

The number of Chinese in the country has increased to only a trifling extent during the past ten years, numbering in 1890 but 107,475, as against 105,465 in 1880. As in 1880, by far the greater proportion of these was found in the states and territories of the Western division, although a perceptible amount of distribution has taken place. In 1890 the number in the Western division was 96,844, while in 1880 it was 102,102. Of the total number of Chinese in the country in 1890, 72,472, or a little over two-thirds, were in California and 9,540 were in Oregon, while the remainder was scattered widely over the country.

Of Japanese there were but 2,039 in the United States in 1890, more than half of whom were in California.

Of North American Indians 58,806 were enumerated as a part of the general population in 1890, as compared with 66,407 enumerated in 1880, showing a considerable reduction. This diminution in number, however, is utterly meaningless, since the question as to whether an Indian should or should not be enumerated in the constitutional population is one not easy of settlement. The test usually applied, that is, that he neither lives upon a reservation nor in tribal relations, fails in numerous ways. In the first place, under the treaty of Guadalupe Hidalgo, by which were acquired the southwestern states and territories from Mexico, it was provided that all persons within these territories who were at the time citizens of Mexico should become citizens of the United States. All Indians not at war with the Mexican people were at that time regarded as citizens of that country, and, therefore, under that treaty the Pueblo, Moqui Pueblo, Jicarilla Apache, Ute, Mojave, and Navajo tribes, in short, nearly all the tribes of this country, became legal citizens. Indeed, the only exception which is known to exist were the Apaches of Arizona. Of course this interpretation is utterly at variance with the definition given above, since many of these tribes are in every sense Indians still on reservations and in tribal relations. Again, it is a very common practice for Indians to abandon reservations temporarily to seek employment among the whites, returning to the reservations at opportune times for obtaining food and clothing. In view of these difficulties it may be advisable hereafter to include in the general population all human beings within the limits of the country, whether Indians in tribal relations or otherwise.

The following table shows, by states and territories, the numerical increase in the white and negro elements for each decade since 1850:

INCREASE IN THE WHITE AND NEGRO (a) POPULATION: 1850 TO 1890.

a Includes all persons of negro descent.

b Decrease.

c Decrease; due to loss of territory, West Virginia having been set off from Virginia December 31, 1862.

d North Dakota and South Dakota combined.

e Dakota territory.

These tables simply confirm what is brought out in rather more condensed form by the preceding tables, showing the proportion in which the population is made up of whites and negroes. Throughout these tables is distinctly traceable a greater rate of increase of the whites than the negroes in the south generally, and accompanying this a slight southward movement of the negro race; but more apparent than either of these features is the rapid westward migration of this race, which has nearly kept pace in this regard with the white. While the rate of increase of the negroes in the South Atlantic states has been from the first comparatively slight, the rate of increase in the South Central division has been very rapid, and indeed that rapid rate has only recently been checked.

STATE OR TERRITORY OF BIRTH.

The native born population of the United States in 1890 numbered 53,372,703 and constituted 85.23 per cent of the total population. The proportion of native born persons to total population at each census since 1850 has been considered in detail for each state and territory under the heading of "General Nativity" (page lxxix).

The whole number of native born persons in 1890 who were born in the state or territory where enumerated was 41,871,611, or 78.45 per cent of the entire native born population of the United States; in 1880 the percentage was very nearly as large, or 77.93. On the other hand, there were 11,501,092 native born persons in 1890, or 21.55 per cent, who were born either in states and territories other than those where enumerated, or in some part of the United States, the specific state or territory not being stated, or at sea and abroad of native parentage; in 1880 they numbered 9,593,106 and constituted 22.07 per cent of all the native born at that census. Both in 1880 and 1890 this class of native born persons exceeded the number of foreign born in the country as a whole, the foreign born numbering 9,249,547 in 1890 and 6,679,943 in 1880.

The proportion of persons born in the state or territory where enumerated varies greatly in individual states and territories, for both 1880 and 1890, as shown by the following table:

NUMBER AND PERCENTAGE OF NATIVE BORN PERSONS CLASSIFIED AS PERSONS BORN AND LIVING IN SPECIFIED STATE OR TERRITORY AND OTHER NATIVE BORN: 1880 AND 1890.

a Dakota territory.

In the North Atlantic division 87.53 per cent of all the native born in 1890 were born in the state where enumerated, the largest percentage in any one state being in Maine, or 95.16, and the smallest percentage in Rhode Island, or 74.88. In the South Atlantic division 90.14 per cent of all the native born in 1890 were born in the state where enumerated. In this division the largest percentages of natives of the state where enumerated are 97.20 in South Carolina, 96.73 in North Carolina, and 95.08 in Virginia, while the smallest percentages are 48.50 in the District of Columbia and 68.98 in Florida.

In the North Central division the percentages of persons born in the state where enumerated in 1890 range from 86.27 in Ohio to 35.01 in South Dakota, the percentage for the division being 69.93. In the South Central division 78.98 per cent of all the native born in 1890 were born in the state or territory where enumerated. Over four-fifths of the native born persons living in Kentucky, Tennessee, Alabama, Mississippi, and Louisiana were natives of the state, while in Texas and Arkansas the percentages were 65.80 and 59.25, respectively. In Oklahoma but 2.15 per cent of its native born population were natives of that territory, consisting mainly of young children born within the limits of that portion of the Indian territory now known as Oklahoma and opened to settlement just prior to the census enumeration in June, 1890. The states and territories comprising the Western division, with the exception of New Mexico and Utah, contained in 1890 the smallest percentages of natives of the state or territory where enumerated. In New Mexico 81.68 per cent, and in Utah 77.36 per cent, of the total native born persons were natives of the territory where enumerated. The next largest percentages of natives were 56.53 in California and 46.79 in Nevada, while the smallest percentages were 18.51 in Wyoming and 20.91 in Washington.

A comparison of the percentages for 1890 with those for 1880 does not show marked differences regarding the eastern states, where the native born elements of our population are not subject to fluctuation to the same extent as in the more westerly states and territories. In the more recently settled states, however, the proportion of persons born in the state where enumerated in 1890 was considerably larger, as a rule, than in 1880.

The table on the following page shows for 1880 and 1890 the number of native born persons among the white and colored who were natives of the states or territories where enumerated.

NUMBER OF NATIVE WHITE AND COLORED PERSONS CLASSIFIED AS PERSONS BORN AND LIVING IN SPECIFIED STATE OR TERRITORY AND OTHER NATIVE BORN: 1880 AND 1890.

a Persons of negro descent, Chinese, Japanese, and civilized Indians.

b Dakota territory.

For the United States as a whole, the percentage of persons born in the state where enumerated in 1890 was larger among the colored than among the white, or 84.52 per cent for the colored as against 77.46 per cent for the white. In 1880 the percentages were relatively the same as in 1890. In the South Atlantic division more than nine-tenths of all the native colored were natives of the state where enumerated, both in 1880 and 1890. In the South Central division the percentages of white and colored who were born in the state where enumerated were about the same as for the country at large, except that in 1880 the percentage of colored was only 79.56 as against 84.02 for the whole country. In the remainder of the country the number of native colored is comparatively small, and need not be discussed in this connection.

STATE OR TERRITORY OF BIRTH.

The native white population in 1890 is further subdivided according to native and foreign parentage, as follows:

NUMBER AND PERCENTAGE OF NATIVE WHITE PERSONS OF NATIVE AND FOREIGN PARENTAGE CLASSIFIED AS PERSONS BORN AND LIVING IN SPECIFIED STATE OR TERRITORY AND OTHER NATIVE BORN: 1890.

STATES AND TERRITORIES.	NATIVE WHITE—NATIVE PARENTS.					NATIVE WHITE—FOREIGN PARENTS.

PROGRESS OF THE NATION.

In the country at large the percentage of native white of foreign parentage who were born in the state where enumerated in 1890 was larger than that of the native white of native parentage, or 82.19 per cent as against 75.87 per cent. This is also true as regards the North Atlantic division, although the difference is very small. In the South Atlantic division the native white of native parentage had a much larger percentage of natives of the state where enumerated than the native white of foreign parentage, or 88.95 per cent as compared with 80.70 per cent. In the South Central division the percentages for the two elements are very nearly the same, while in the North Central and Western divisions there is a marked excess in favor of the native white of foreign parentage. In the North Central division 65.86 per cent of the native white of native parentage were born in the state where enumerated as compared with 79.80 per cent for the native white of foreign parentage. In the Western division the disparity is greater, or 38.89 per cent for the native white of native parentage as compared with 59.44 per cent for the native white of foreign parentage.

Of the 11,501,092 native born persons in 1890 who are classified in the preceding tables as "Other native born", 11,094,430 were born in states and territories other than those in which they were enumerated ; 396,652 were reported as having been born in the United States, without specifying the state or territory, and 10,010 were either born abroad or at sea of native parentage.

STATE OR TERRITORY OF BIRTH.

The distribution of this portion of the native born population of each state and territory in detail is shown by the following table:

NUMBER AND PERCENTAGE OF "OTHER NATIVE BORN" PERSONS CLASSIFIED AS PERSONS BORN IN OTHER STATES AND TERRITORIES, IN THE UNITED STATES NOT SPECIFIED, OR AT SEA AND ABROAD: 1890.

The number of native born persons living in 1890 in each state or territory who were born in other states and territories is distributed in the following table, according to the principal states or territories of birth, giving in each case the percentage of the total native born of the state where enumerated. It presents the principal states which have contributed to any extent to the native born population of each state and territory, and needs but little explanation. There were in 1890, for illustration, 26,614 native born persons living in Maine who were born in other states and territories, and this number constituted 4.57 per cent of all the native born in that state. The largest contribution made by any state to the native born population of Maine was that of Massachusetts, numbering 10,386 persons, and constituting 1.78 per cent of all the native born in Maine. New Hampshire contributed 7,640 persons, or 1.31 per cent of all the native born, and was followed by New York with 2,307 persons, and Vermont with 1,575 persons. The details concerning each state and territory are given in their order geographically, and can be easily read.

The table on the two following pages presents the number of persons living in each state or territory who were born in other states and territories, arranged geographically by groups and sections. In reading the table it must be understood that where the number is given for any state in the group of which it forms a part, it means that there were that number of persons living in the state who were born in the other states included in that group, as, 9,215 persons living in Maine who were born in New Hampshire and Vermont, 30,295 persons living in New Hampshire who were born in Maine and Vermont, or 11,170 persons living in Vermont who were born in Maine and New Hampshire.

PROGRESS OF THE NATION.

DISTRIBUTION OF PERSONS LIVING IN EACH STATE OR TERRITORY WHO WERE

a Dakota territory.

Considering the relative proportions of the total population of each state and territory contributed by foreign born persons, native born persons born and living in the state or territory, and native born persons living in the state or territory who were born in some other state or territory, it is seen that of the whole population of the United States in 1890 the foreign born element contributed 14.77 per cent, persons born and living in the state where enumerated 66.86 per cent, and native born persons living in the state but born elsewhere 18.37 per cent. In 1880 the percentages were 13.32, 67.55, and 19.13, respectively.

In the North Atlantic division persons born and living in the state where enumerated constituted 67.97 per cent of the total population in 1890 and 71.44 per cent in 1880. In the South Atlantic division this same class comprised 88.02 per cent in 1890 and 87.56 per cent in 1880. In both of these divisions about one-tenth of the population was comprised of native born persons born outside of the state where enumerated. In the South Central division the percentages of persons born and living in the state where enumerated were 76.66 in 1890 and 74.32 in 1880.

In the North Central division those born and living in the state where enumerated constituted 57.23 per cent in 1890 as against 55.15 per cent in 1880. Other native born persons living in said states, although born elsewhere, constituted 24.61 per cent in 1890 and 28.05 per cent in 1880. In the Western division there were in 1890 only 34.26 per cent of persons born and living in the state or territory where enumerated, which was slightly less than the proportion in 1880, or 37.34 per cent. Other native born persons living in the state or territory but born elsewhere constituted 40.28 per cent in 1890 and 34.37 per cent in 1880. In this division the foreign born constituted 25.46 per cent in 1890 as compared with 28.29 per cent in 1880.

The total number of persons born in each state or territory, without regard to where they were found living at the time of the census enumeration, is shown for 1880 and 1890 by the table on the following page, giving the number and percentage of persons who were born and living in the state or territory and the number and percentage of persons who were born in the state or territory but who were living in other states and territories.

STATE OR TERRITORY OF BIRTH.

DISTRIBUTION OF THE TOTAL NUMBER OF PERSONS BORN IN EACH STATE OR TERRITORY ACCORDING TO THE NUMBER AND PERCENTAGE LIVING IN STATE OR TERRITORY OF BIRTH OR IN OTHER STATES AND TERRITORIES: 1880 AND 1890.

a Dakota territory.

In this table the total number born in each state or territory does not include persons born either in Alaska, the Indian territory, the United States (the state or territory not being specified), or at sea and abroad of native parentage, and for this reason does not equal the number of native born persons in the country as a whole.

Comparing the total number born in each state or territory with the total population and its native born element, as given in the table just preceding, it appears that in 1880 in 13 states, namely, Maine, New Hampshire, Vermont, Delaware, Maryland, Virginia, North Carolina, South Carolina, Georgia, Ohio, Kentucky, Tennessee, and Alabama, the total number of persons who were born in each specified state exceeded not only the total native born persons living in the state but also the total population of the state at that census. In 1890 there were only 11 such states, being the above-named with the exception of New Hampshire and Delaware. In 1880 in 5 states and territories, namely, Massachusetts, Connecticut, New York, Pennsylvania, and New Mexico, the total number of persons who were born in each specified state was greater than the number of native born persons living in the state but less than the total population of the state. In 1890 there were 9 such instances, namely, New Hampshire, Connecticut, New York, Pennsylvania, Delaware, Indiana, Illinois, Wisconsin, and Mississippi.

The largest percentage of persons born and living in any state or territory in 1890 is that reported for Texas, or 94.78 per cent; in 1880 the percentage was 95.16. Florida, Louisiana, and California had in 1890 a little more than 90 per cent of the whole number born in the state who were living in the state at the time of the census enumeration, while in South Dakota and New Mexico this class constituted very nearly 90 per cent. The smallest percentages of persons born and living in the same state or territory in 1890 were 59.09 in Vermont, 61.92 in Nevada, and 65.86 in New Hampshire.

Considering in detail the number born in each state and territory who were found living in other states and territories in 1890, the following table is obtained, showing the states and territories to which each state or territory has contributed of its numbers most largely. The whole number of persons in the United States born in each state or territory who were living in other states and territories is considered as 100 per cent, and the respective proportions contributed to other states and territories can be readily comprehended by a casual inspection of the table. For instance, the whole number of natives of Maine living in other states and territories in 1890 was 210,248. Of this number, 86,988, or 41.37 per cent, were living in Massachusetts; 15,623, or 7.43 per cent, in California; 14,876, or 7.08 per cent, in New Hampshire; 12,847, or 6.11 per cent, in Minnesota, and so on. The natives of Oklahoma are intentionally omitted, as the number of those born in the territory and living outside is insignificant.

The largest percentages of persons born in the state in which the city is located were found in 1890 in the more easterly cities, while the smallest percentages were found in the western cities. The largest percentages of natives of the state living in cities within its limits were 90.67 in Charleston, S. C., and 90.14 in Richmond, Va., while the smallest percentages were found in the state of Washington, or 6.18 in Tacoma and 8.17 in Seattle. The next larger percentages are 14.32 in Denver, Colo., 20.74 in Duluth, Minn., 21.06 in Omaha, Neb., 22.03 in Portland, Ore., 23.92 in Los Angeles, Cal., 24.65 in Lincoln, Neb., and 24.72 in Kansas city, Kan.

Taking the native born element in the 124 principal cities as a whole, and distributing it according to the state or territory of birth, the following table is obtained :

DISTRIBUTION OF NATIVE BORN PERSONS IN THE 124 PRINCIPAL CITIES AS A WHOLE ACCORDING TO STATE OR TERRITORY OF BIRTH: 1890.

STATES AND TERRITORIES.	PERSONS LIVING IN 124 PRINCIPAL CITIES BORN IN EACH SPECIFIED STATE OR TERRITORY.		PERSONS LIVING IN PRINCIPAL CITIES SITUATED OUTSIDE OF SPECIFIED STATE OR TERRITORY OF BIRTH.		STATES AND TERRITORIES.	PERSONS LIVING IN 124 PRINCIPAL CITIES BORN IN EACH SPECIFIED STATE OR TERRITORY.		PERSONS LIVING IN PRINCIPAL CITIES SITUATED OUTSIDE OF SPECIFIED STATE OR TERRITORY OF BIRTH.

Missouri	365,429	3.69	54,122	2.24	United States, not specified ..	183,823	1.86	183,823	7.60

In the above table there is shown, first, the number and percentage of persons living in these cities born in each specified state or territory, and, second, the number and percentage of persons living in principal cities situated outside of specified state or territory of birth.

The whole number of native born persons living in the 124 principal cities in 1890 was 9,907,641, of which 2,078,892, or 20.98 per cent, were born in New York, including its own cities, and 1,364,262, or 13.77 per cent, in Pennsylvania, including its own cities. Excluding persons living in cities which are situated in the state or territory where born, as persons living in New York city who were born in the state of New York, it is seen that of the 2,417,081 persons living in cities outside of their state or territory of birth, 337,540, or 13.96 per cent, were born in New York; 202,721, or 8.39 per cent, were born in Pennsylvania; 165,791, or 6.86 per cent, in Ohio; 139,218, or 5.76 per cent, in Virginia; 126,315, or 5.23 per cent, in Illinois; and 105,284, or 4.35 per cent, in Massachusetts. Other states that have contributed more than 3 per cent are Maine, New Jersey, Maryland, Indiana, and Kentucky. In addition, there were 183,823 persons, or 7.60 per cent, reported as born in the United States, but for whom the state or territory of birth was not specified. The total number of such persons in the country at large was 396,652, of which very nearly one-half were found living in the 124 principal cities, as above indicated.

STATE OR TERRITORY OF BIRTH.

CXXIX

In the census report of 1880 information was given for the 50 principal cities at that census as to the percentages of persons in each city who were born either within the limits of the state or territory in which the city is situated or in some other state or territory. The following table shows the percentages of such persons in each of these cities in 1880 and in 1890, together with the percentage in each case of the foreign born of the total population:

TOTAL POPULATION OF THE 50 PRINCIPAL CITIES IN 1880 CLASSIFIED ACCORDING TO THE PERCENTAGE OF FOREIGN BORN PERSONS, PERSONS BORN IN STATE IN WHICH EACH CITY IS SITUATED, AND OTHER NATIVE BORN PERSONS: 1880 AND 1890.

CITIES.	1890				1880

PROGRESS OF THE NATION.

Considering these same 50 cities as a whole in 1880 and 1890 the following table is obtained, showing for each census the percentage of persons living in these cities who were born in each state or territory, and also the percentage living in principal cities outside of the specified state or territory:

DISTRIBUTION OF THE NATIVE BORN PERSONS IN THE 50 PRINCIPAL CITIES IN 1880 AS A WHOLE ACCORDING TO STATE OR TERRITORY OF BIRTH: 1880 AND 1890.

STATES AND TERRITORIES.	PER CENT OF PERSONS LIVING IN 50 PRINCIPAL CITIES IN 1880 BORN IN EACH STATE OR TERRITORY. a Dakota territory.

The decrease in 1890 as compared with 1880 of the relative proportions of persons living in said cities who were born in the principal eastern states, whether including or excluding their own cities, is due to the great increase in the population of western cities since 1880, the increase in native born persons born in states and territories other than those in which these cities are situated being largely in the states of the North Central division, where the relative proportions have increased in 1890 as compared with 1880.

STATE OR TERRITORY OF BIRTH.

The following table, which needs no analysis, shows the principal states which have contributed to the native born population of each of the 28 cities having 100,000 inhabitants or more in 1890, these figures being in each case exclusive of the number contributed by the state in which the city is situated :

DISTRIBUTION OF PERSONS LIVING IN EACH SPECIFIED CITY WHO WERE BORN IN A STATE OR TERRITORY OTHER THAN THAT IN WHICH THE CITY IS SITUATED: 1890.

In the above table no presentation is made regarding Florida, North Dakota, South Dakota, Oklahoma, and all the states and territories of the Western division with the exception of California.

In analyzing this table for any given state it should be remembered that the total number given represents all the natives of the state found in the 124 principal cities, taken collectively, while the details regarding each city represent the number, and corresponding percentage of the whole, found in that city. For obvious reasons this presentation must be limited to the cities to which each state has contributed the largest proportions. It furnishes, however, a sufficiently comprehensive idea of the extent to which each state has been a factor in the make-up of the population of the larger cities of the country.

COUNTRY OF BIRTH.

In the discussion of the native and foreign born elements of the population as a whole (pages lxxix-xciii), it was shown that in 1850, the first census in which the nativities of the population were ascertained, the foreign born numbered 2,244,602, and that in 1890 their number had been increased to 9,249,547. They constituted 9.68 per cent of the entire population of the country in 1850 and 14.77 per cent of the population in 1890.

As a part of the same discussion it was also shown that since 1820 there had been brought to this country 15,427,657 immigrants, of which more than one-third had come during the 10 years ending in 1890.

The statistics of the nativities of the foreign born, by countries of birth in detail, are of peculiar value, therefore, as indicating the number of persons of different nationalities who were present in the United States at the census of 1890, and their relative importance as a contributing element to this constantly increasing portion of our population.

In presenting the results regarding country of birth, the various countries from which our foreign born element is derived are grouped, for convenience, as follows: persons born in Canada and Newfoundland, Mexico, Central America, South America, and Cuba and the West Indies are grouped under the head of "North and South Americans"; persons born in England, Scotland, Wales, and Ireland, under the head of "Great Britain and Ireland"; persons born in Germany, Austria, Holland, Belgium, Luxemburg, and Switzerland, under the head of "Germanic nations"; persons born in Norway, Sweden, and Denmark, under the head of "Scandinavian nations"; persons born in Russia, Hungary, Bohemia, and Poland, under the head of "Slav nations"; persons born in France, Italy, Spain, Portugal, and Greece, under the head of "Latin nations"; persons born in the various countries of Asia, under the head of "Asiatic nations", and persons born in other countries, of minor importance as regards numbers, under the head of "All others".

NATIVITY OF FOREIGN BORN POPULATION 1890.

HUNDREDS OF THOUSANDS.

a.— Includes Natives of Newfoundland.

COUNTRY OF BIRTH.

Considering, first, country of birth for the entire foreign born element in the United States in 1890, the following table is presented, giving the number of persons of each nationality and the corresponding percentage of all the foreign born :

TOTAL FOREIGN BORN POPULATION DISTRIBUTED ACCORDING TO COUNTRY OF BIRTH: 1890.

COUNTRY OF BIRTH.	Number.	Per cent.	COUNTRY OF BIRTH.	Number.	Per cent.

			Born at sea.....	5,533	0.06
			Other countries.....	479	0.01

From this statement it is seen that the Germans have contributed far more than any other nationality to the foreign born element of the country. The next in point of numbers are the Irish. These two nationalities together have contributed 4,656,403 persons and constitute a little more than one-half of the entire foreign born element. The British, if we include in that distinction the natives of England, Scotland, and Wales, stand third, and the natives of Canada and Newfoundland fourth. If we add together the natives of Great Britain, Greenland, and Canada and Newfoundland, it is found that they numbered in 1890 over 4,000,000, or about four-ninths of all the foreign born, this total exceeding by a considerable amount the number of natives of Germany who were living in the United States in 1890.

Next to natives of Canada and Newfoundland come the Scandinavians, who number over 900,000, of which Norway and Sweden have contributed 800,000. Russia, Italy, Poland, Austria, Bohemia, France, China, and Switzerland follow in the order named, each having contributed between 100,000 and 200,000. Of all the other countries, Holland, Mexico, and Hungary are the only ones that have contributed any considerable numbers to the foreign born population in 1890.

The various nationalities comprising the foreign born in 1890 have become distributed over the United States in widely different proportions, as shown by the following table, which gives for each country of birth in detail the number and percentage found in each of the 5 geographical divisions of the country:

TOTAL PERSONS BORN IN EACH SPECIFIED COUNTRY, DISTRIBUTED ACCORDING TO GEOGRAPHICAL DIVISIONS: 1890.

Of the foreign born element as a whole, 42.04 per cent were found in the North Atlantic division and 43.90 per cent in the North Central division, leaving only 14.06 per cent in the three remaining divisions, of which the Western division contained 8.33 per cent. The South Atlantic and South Central divisions together contained in 1890 less than 6 per cent of the foreign born.

Of the natives of Canada and Newfoundland, very nearly one-half, or 49.98 per cent, were found in the North Atlantic division and a little more than two-fifths, or 40.95 per cent, in the North Central division.

Of the natives of England, Scotland, and Wales, about one-half, or 49.34 per cent, were found in the North Atlantic division and about one-third, or 34.24 per cent, in the North Central division.

Of the whole number of persons born in Ireland, very nearly two-thirds, or 66.32 per cent, were found in the North Atlantic division and less than one-fourth, or 23.17 per cent, in the North Central division.

Of the German element of our population, more than one-half, or 56.38 per cent of all the persons born in Germany, were found in the North Central division and less than one-third, or 32.26 per cent, in the North Atlantic division.

The greater part of the natives of Norway, Sweden, and Denmark were found in the North Central division, this division containing 87.97 per cent of the Norwegians, 70.26 per cent of the Swedes, and 67.62 per cent of the Danes.

Very nearly 85 per cent of all the Bohemians and considerably more than one-half of all the Poles were found in the North Central division; a little more than one-half of all the Russians and very nearly three-fourths of all the Hungarians were found in the North Atlantic division.

Very nearly two-thirds of all the Italians were in the North Atlantic division. The natives of France, however, were more evenly distributed as regards these two divisions, 36.06 per cent having been found in the North Atlantic and 34.12 per cent in the North Central division. Very nearly nine-tenths, or 89.49 per cent, of all the Chinese were found in the Western division.

In the next table the distribution of the foreign born according to principal countries of birth is given in detail for each state and territory comprising the North Atlantic and North Central divisions, with the exception that the results for Maine, New Hampshire, and Vermont, in the North Atlantic division, and for North Dakota and South Dakota, in the North Central division, are combined. In addition, the distribution of the foreign born is given in detail for the states of Maryland, Texas, and California, the results for the remainder of the country being combined and shown in one column as "Other states and territories".

This presentation brings into compact form all the more important elements of our foreign born population and distributes them among the several states which contain by far the greatest proportion of all the foreign born. It comprehends also every distinctive nationality of importance as regards numbers, with the exception of 4,504 persons in New Mexico and 11,534 persons in Arizona who were born in Mexico; 12,282 persons in Florida who were born in the West Indies; 9,859 persons in California and 3,051 persons in Massachusetts who were born in Portugal; and 2,587 persons in California and 4,973 persons in Massachusetts who were born in the islands of the Atlantic ocean, principally in the Azores, a province of Portugal. The number of persons reported as having been born in Portugal, particularly in the two states named, is probably too large, as very many natives of the Azores, speaking, as they do, the Portuguese language and being generally considered as natives of Portugal itself, in all probability have been erroneously credited to that country by the census enumerators.

a Includes Great Britain, not specified.

If a comparison is made regarding the principal elements of the foreign born at each census since 1850, the relative growth of each class is shown, as well as their increasing or decreasing importance with respect to the whole body of foreign born. Taking as a basis those countries for which there were at least 50,000 persons reported in 1890, the following table shows the number of persons of each nationality, and the percentage which they represented of the total foreign born, at each census from 1850 to 1890, inclusive:

FOREIGN BORN POPULATION DISTRIBUTED ACCORDING TO PRINCIPAL COUNTRIES OF BIRTH: 1850 TO 1890.

PRINCIPAL COUNTRIES OF BIRTH.	1890		1880		1870		1860		1850

a Includes Great Britain, not specified.

In 1850 the leading foreign nationality was the Irish, which comprised nearly 43 per cent of the whole foreign born element, while the natives of the United Kingdom jointly constituted nearly three-fifths of all the foreign born. Next to the Irish were the natives of Germany, who constituted one-fourth of the entire foreign born population.

In 1860 the Irish as well as the natives of the United Kingdom had relatively diminished, the Irish constituting less than 39 per cent and natives of the United Kingdom as a whole constituting but little more than one-half of the foreign born population, while the Germans had increased to nearly one-third.

In 1870 the proportion of Irish and of natives of the United Kingdom had still further diminished, the proportion of Germans had remained practically at a standstill, while that of natives of Canada and Newfoundland had slightly increased.

In 1880 the proportional diminution of the Irish had continued, the Germans showed a slightly diminished proportion, while the proportion of natives of Canada and Newfoundland had still further increased.

In 1890 the proportional reduction of Irish had continued; the natives of the entire United Kingdom constituted barely one-third of the whole foreign born element; the Germans had slightly increased; the natives of Canada and Newfoundland had held their own; the Scandinavians had largely increased, while several other elements, especially the Russians, Hungarians, Bohemians, Poles, and Italians, which previously constituted very small proportions, became noticeable.

The course of this movement will perhaps be better appreciated if we present separately in the following table the percentages of the total foreign born represented by those foreign countries which have contributed most largely to our population and which for 40 years have been the chief elements in the foreign born population of the United States:

CENSUS YEARS.	Ireland.	Germany.	England and Wales.	Canada and Newfoundland.	Norway, Sweden, and Denmark.
	<i>Per cent.</i>	<i>Per cent.</i>	<i>Per cent.</i>	<i>Per cent.</i>	<i>Per cent.</i>
1850.....	42.85	26.01	13.75	6.58	0.81
1860.....	38.93	30.83	11.58	6.04	1.75
1870.....	33.34	30.37	11.31	8.86	4.34
1880.....	27.76	29.44	11.19	10.74	6.59
1890.....	20.23	30.11	10.91	10.61	10.09

The Irish have in 40 years diminished from 42.85 to 20.23 per cent. They have become relatively less than half as important in 1890 as in 1850. The Germans have increased from 26.01 to 30.11 per cent, but this increase has not been continuous, since this nationality constituted a larger percentage of the foreign born population in 1860 and in 1870 than in 1890. The natives of England and Wales, who in 1850 constituted 13.75 per cent, have diminished continuously until in 1890 they constituted 10.91 per cent. The natives of Canada and Newfoundland have in the 40 years increased from 6.58 to 10.61 per cent, the maximum being reached in 1880, when the proportion was slightly greater than in 1890. The Scandinavians, starting in 1850 with the insignificant proportion of 0.81 per cent, have increased until in 1890 they constituted 10.09 per cent of the total foreign born element, this increase having been the most rapid in recent years.

The following statement shows the proportion which the natives of the United Kingdom, including England, Scotland, Wales, and Ireland, bore to the total foreign born population at each census since 1850:

	PER CENT.
1850.....	59.74
1860.....	53.13
1870.....	47.18
1880.....	41.50
1890.....	33.76

From this statement it is seen that the proportion of natives of the United Kingdom, which in 1850 was nearly 60 per cent, has diminished until in 1890 it constituted but a trifle more than 33 per cent of the total foreign born.

The following table shows the proportion to the total foreign born of natives of Austria, Bohemia, China, France, Holland, Hungary, Italy, Mexico, Poland, Russia, and Switzerland in the United States at each of the last five enumerations:

COUNTRY OF BIRTH.	1890	1880	1870	1860	1850
	<i>Per cent.</i>				
Austria.....	1.33	0.58	0.55	0.61	0.04
Bohemia.....	1.28	1.28	0.72		
China.....	1.15	1.56	1.13	0.86	0.03
France.....	1.22	1.60	2.09	2.66	2.41
Holland.....	0.88	0.87	0.84	0.68	0.44
Hungary.....	0.68	0.17	0.07		
Italy.....	1.98	0.66	0.31	0.25	0.16
Mexico.....	0.84	1.02	0.76	0.66	0.59
Poland.....	1.59	0.73	0.26	0.18	
Russia.....	1.97	0.54	0.08	0.08	0.06
Switzerland.....	1.13	1.33	1.35	1.29	0.60

All of these countries, with the exception of France, were either not represented at all or represented in very insignificant numbers in 1850, but in recent years the natives of most of them have been increasing in the United States at a comparatively rapid rate. Thus, the Austrians have increased from 0.04 per cent in 1850 to 1.33 per cent in 1890. The Bohemians, who until 1870 were in too small numbers to be recognized by the census authorities, in 1880 and in 1890 constituted 1.23 per cent of the foreign born element. The Chinese, who in 1850 constituted but 0.03 per cent, increased until in 1880 they constituted 1.56 per cent, and in 1890, although they had made in the past decade a slight numerical increase, the percentage of the whole foreign born had diminished to 1.15. The percentage of natives of France has diminished from 2.41 in 1850 and 2.66 in 1860 to 1.22 in 1890. The proportion of natives of Holland has doubled within the past 40 years. The Hungarians, like the Bohemians, were in too small numbers to be recognized by the census authorities until 1870, when they constituted 0.07 per cent of the entire foreign born element, and in 1890 constituted 0.68 per cent. The Italians were found in 1850 to constitute 0.16 per cent. They increased slowly until 1880, when they constituted 0.66 per cent, but in 1890 they had further increased to 1.98 per cent. The Mexicans started with 0.59 per cent in 1850, increased gradually to 1.02 per cent in 1880, and diminished to 0.84 per cent in 1890. The Poles were first recognized in 1860, when they constituted 0.18 per cent. They increased with some degree of rapidity until in 1890 they constituted 1.59 per cent, the greater part of this increase having been made during the latter part of the decade. The history of the Russians is quite similar. They constituted less than one-tenth of 1 per cent up to 1880, when they represented 0.54 per cent, which had increased to 1.97 per cent in 1890. The Swiss reached their maximum in 1870 with 1.35 per cent, since which time they have not held their own proportionally.

Of the above nationalities, the Bohemians, Hungarians, Italians, Poles, and Russians have made the most rapid increase in recent years. The following statement shows the percentage of the total foreign born represented by these five nationalities combined at each census:

	PER CENT.
1850	0.22
1860	0.51
1870	1.44
1880	3.38
1890	7.49

From this statement it appears that these five elements jointly constituted in 1850 but 0.22 per cent of the foreign born; that they increased until in 1880 they constituted 3.38 per cent, and that in 1890 they formed no less than 7.49 per cent of the large foreign born element enumerated at that census.

The following table shows the proportion of the total population, expressed in percentages, represented by the entire foreign born element, and by the natives of each of the principal countries, at each census since 1850:

PRINCIPAL COUNTRIES OF BIRTH.	1890	1880	1870	1860	1850
	<i>Per cent.</i>

a Includes Great Britain, not specified.

For the purposes of discussion on a somewhat broader basis the foreign born element in 1890 is grouped for convenience of view, nationally and ethnically, as follows:

British Americans, comprising the natives of Canada and Newfoundland.

Irish, comprising the natives of Ireland.

British, comprising the natives of England, Scotland, and Wales.

Teutons, comprising the natives of Germany, Austria, Holland, Belgium, Luxemburg, and Switzerland.

Scandinavians, comprising the natives of Norway, Sweden, and Denmark.

Slavs, comprising the natives of Russia, Hungary, Bohemia, and Poland.

Greco-Latins, comprising the natives of France, Italy, Spain, Portugal, and Greece.

Asiatics, comprising the natives of China, Japan, and other parts of Asia.

For each of the above groups there are shown for the United States and for each state and territory in a series of tables the proportions, expressed in percentages, which their number bore to the total population and to the total foreign born in 1890, and in addition the density, or number of each group to a square mile, thus illustrating the distribution of each of these elements throughout the country.

The following table relates to the British Americans:

STATES AND TERRITORIES.	Per cent of total population.	Per cent of total foreign born.	Number per square mile.	STATES AND TERRITORIES.	Per cent of total population.	Per cent of total foreign born.	Number per square mile.

The British Americans in 1890 were found mainly in the New England states, especially in Massachusetts and Rhode Island. A considerable number was also found in Michigan.

The proportion to the total population was greatest in the states nearest the northern boundary, particularly in North Dakota, New Hampshire, Massachusetts, Michigan, Rhode Island, Maine, and Vermont.

The proportion to the total foreign born was greatest in Maine and New Hampshire, in which states very nearly two-thirds of the entire foreign born element consisted of British Americans. In Vermont the proportion was more than one-half, in Michigan about one-third, while in Massachusetts the proportion was not very much less. In North Dakota and Rhode Island the proportion exceeded one-fourth and in Montana and Washington it was about one-fifth.

The following table relates to the Irish :

The Irish in 1890 were found mainly in the North Atlantic division, and to a certain extent in some of the states of the North Central and Western divisions. The number per square mile, outside of the District of Columbia, which is practically a municipality, was greatest in Rhode Island and Massachusetts. These states were followed in this respect by Connecticut, New Jersey, New York, and Pennsylvania, and these again by Delaware, Illinois, Maryland, and Ohio.

Somewhat similar conditions are observed when the proportion which the Irish bore to the whole population in 1890 is considered. In the North Atlantic division they constituted 7.13 per cent. Of the states in this division, the proportion was greatest in Massachusetts, Rhode Island, and Connecticut. Next to these were New York, New Jersey, and Pennsylvania, in the order named. In the North Central division they represented only 1.94 per cent. The proportion is quite uniform in the states of this division, with the exception of Illinois, where they constituted 3.25 per cent, this being due, undoubtedly, to the large number that have settled in the city of Chicago. In the Western division they represented noticeable proportions of the total population in Nevada, California, and Montana. In the South Atlantic and South Central divisions, with the exception of Delaware and Maryland, the proportions were very small.

In the proportion which the Irish bore to the total foreign born in 1890 there is greater diversity shown. This proportion was found to be greatest in the North Atlantic division, where in Connecticut, Massachusetts, and Rhode Island they comprised over one-third of the foreign born element, and in New York and New Jersey nearly one-third. The proportions in a number of the states in the South Atlantic and South Central divisions in 1890 were quite large, but, with the exception of Delaware and, possibly, Maryland, are of little importance, owing to the small number of foreign born in these states.

COUNTRY OF BIRTH.

The British, comprising the natives of England, Scotland, and Wales, predominate in the North Atlantic division; in Rhode Island the number per square mile in 1890 was 24.05 and in Massachusetts 12.43.

In proportion to the total population this group appears to be widely dispersed over the whole country outside of the South Atlantic and South Central divisions. The largest proportions were found in the Western division, this class constituting nearly 13 per cent of the entire number of inhabitants in Utah, and more than 8 per cent in Wyoming. Noticeable proportions were found also in the North Atlantic division, the British constituting 7.55 per cent of the total population of Rhode Island and 4.46 per cent of that of Massachusetts.

In proportion to the total foreign born the largest percentage was also found in Utah, where a little more than one-half of the foreign born in 1890 were English, Scotch, or Welsh. In Rhode Island nearly one-fourth of the foreign born were British, while in Pennsylvania the proportion was but little less. In the south larger proportions were found, but, since the foreign born element there is comparatively small, the proportions represented by the various nationalities are of slight importance.

The following table relates to the Teutons:

STATES AND TERRITORIES.	Per cent of total population.	Per cent of total foreign born.	Number per square mile.	STATES AND TERRITORIES.	Per cent of total population.	Per cent of total foreign born.	Number per square mile.

Minnesota	9.93	27.65	1.63	California	6.32	20.84	0.49

The Teutons consist almost entirely of Germans, the other contributing nationalities being relatively of slight importance. These people were found in 1890 in considerable bodies in New Jersey, New York, Connecticut, Pennsylvania, and Maryland, and also in the eastern states of the North Central division, particularly in Illinois, Ohio, and Wisconsin.

The proportion of Teutons to the total population in 1890 was greatest in Wisconsin, where they comprised more than one-sixth of its population. They comprised nearly one-tenth in Minnesota, Illinois, and New York, while in every one of the North Atlantic and North Central states outside of New England they comprised a notable proportion of the population.

The proportion which they bore to the total foreign born element in 1890 was greatest in Indiana, where more than three-fifths of all the foreign born were of this class. In Missouri, Maryland, Ohio, and Wisconsin they constituted more than one-half of the total foreign born, while in Iowa, Illinois, Nebraska, New Jersey, Kansas, and New York they constituted between one-third and one-half of all the foreign born. Large proportions were also found in nearly all of the states of the South Atlantic and South Central divisions, but these figures, with the exception of those for Maryland, are of little importance, owing to the small number of foreign born in these states.

The following table relates to the Scandinavians:

STATES AND TERRITORIES.	Per cent of total population.	Per cent of total foreign born.	Number per square mile.	STATES AND TERRITORIES.	Per cent of total population.	Per cent of total foreign born.	Number per square mile.

The Scandinavians, comprising the Norwegians, Swedes, and Danes, appeared in 1890 in a considerable body in Rhode Island, Massachusetts, and Connecticut, in the North Atlantic division, and in Minnesota, Illinois, Wisconsin, and Iowa, in the North Central division.

In the proportions which they bore to the total population and the total foreign born in 1890 they were of importance mainly in the North Central division and to a secondary extent in the Western division. In Minnesota they constituted about one-sixth of the entire population and not far from one-half of the total foreign born; in North Dakota considerably more than one-sixth of the population and more than two-fifths of the foreign born, and in South Dakota very nearly one-tenth of the population and more than one-third of the foreign born. In Utah, Washington, Nebraska, Iowa, and Idaho they constituted more than one-fifth of the entire foreign born element in 1890.

The following table relates to the Slavs:

STATES AND TERRITORIES.	Per cent of total population.	Per cent of total foreign born.	Number per square mile.	STATES AND TERRITORIES.	Per cent of total population.	Per cent of total foreign born.	Number per square mile.

Minnesota.....	1.97	5.49	0.32	California.....	0.39	1.27	0.03

The Slavs in 1890 were found mainly in the North Atlantic division and to a secondary extent in the North Central division. The number to the square mile in 1890 was relatively large in New York, New Jersey, Pennsylvania, Massachusetts, Connecticut, and Illinois.

The largest proportions of Slavs to the total population in 1890 were 4.71 per cent in South Dakota, 3.10 per cent in North Dakota, and 2.36 per cent in Nebraska. In several other states of the North Central division and in New York, Pennsylvania, and Wyoming they constituted between 1 and 2 per cent of the entire population.

The largest proportions of Slavs to the total foreign born were found in South Dakota and Nebraska, where they were between 10 and 20 per cent, while in all the other states of the North Central division and also in Pennsylvania, New York, New Jersey, and Connecticut they exceeded 3 per cent. The proportion was also quite large in some of the states of the South Atlantic and South Central divisions, but, as the total foreign born in most of these states is small, the figures are of but little importance.

MAP SHOWING THE DENSITY, IN 1890, OF THE ITALIAN, FRENCH, SPANISH AND PORTUGUESE POPULATION.

MAP SHOWING THE DENSITY, IN 1890, OF THE RUSSIAN, POLE AND BOHEMIAN POPULATION.

COUNTRY OF BIRTH.

For this group, which comprises the natives of the Mediterranean countries, the greatest density in 1890 was found in the North Atlantic division, principally in Rhode Island, New Jersey, Massachusetts, New York, and Connecticut.

The largest proportions to the total population for this group in 1890 were found in the states of Nevada, California, Louisiana, New York, Colorado, New Jersey, Rhode Island, and Connecticut.

The proportion which they bore to the total foreign born in 1890 was greatest in Louisiana. Of the other states that contained noticeable proportions, Nevada and California are the most prominent. Considerable proportions were also found in some of the states of the North Atlantic division, particularly in New York and New Jersey. Quite large proportions were also found in some of the other states, principally those of the South Atlantic and South Central divisions, but, as the number of foreign born in most of them is small, the figures are of but little importance.

PROGRESS OF THE NATION.

The following table relates to the Asiatics:

The Asiatics consist mainly of the Chinese. They are found principally in the Western division, comparatively few having spread to other states. The largest proportions, both to the population and to the foreign born element in 1890, were found in California and Nevada. In the eastern part of the country their numbers and proportions in 1890 were insignificant.

The presence of the foreign born element as a whole in the principal cities has already been considered under "General Nativity". The relative proportions of persons of the various nationalities found in cities as compared with the whole number of such persons found in the country at large are shown by the following table, which gives for each nationality having more than 50,000 persons in the United States in 1890 the total number in the country at large, the number found in the 124 principal cities (those having 25,000 inhabitants or more), taken collectively, and the proportion which the whole number in these cities bears to the total number in the United States:

PRINCIPAL COUNTRIES OF BIRTH.	Total number in United States.	Number in principal cities.	Per cent in principal cities.	PRINCIPAL COUNTRIES OF BIRTH.	Total number in United States.	Number in principal cities.	Per cent in principal cities.

a Includes Great Britain, not specified.

COUNTRY OF BIRTH.

The percentages in the last column of the preceding table are to be contrasted both with one another and with the proportion which the persons of native birth in these cities bear to the total native born in the country, namely, 18.56 per cent.

With the single exception of Mexico, a considerably greater proportion of the natives of each of these foreign countries in 1890 was found in the cities under consideration than has been contributed by the native born element to the same cities, and in several instances the proportion was two or three times as great. Of those born in Ireland, Russia, Poland, and Italy, more than one-half were found in these cities in 1890, while of those born in Germany, Austria, Hungary, Bohemia, and France, very nearly one-half were found in these cities. Of all the nationalities considered, the Mexicans showed the least appetency for urban life.

The following table of percentages shows the distribution according to principal countries of birth of the foreign born element in each of the 28 cities having in 1890 a population of 100,000 or more, similar percentages for the entire United States being also shown, for purposes of comparison:

a Includes Great Britain, not specified.

The German element, which in 1890 constituted three-tenths of all the foreign born in the United States, constituted a much larger proportion of the foreign born in about three-fourths of the cities under consideration. In two cities, Cincinnati and Milwaukee, it constituted more than two-thirds of all the foreign born, while in three other cities, Louisville, Baltimore, and St. Louis, the proportion was very nearly three-fifths. In Indianapolis and Allegheny the Germans constituted more than 50 per cent, in Newark and Buffalo very nearly 50 per cent, and in Rochester, Detroit, and Cleveland over 40 per cent. In Boston the Germans constituted less than 7 per cent, and in Providence a little more than 4 per cent, of the entire foreign born element.

The Irish element of our foreign born population, numerically next in importance to the Germans, constituted in 1890 between 40 and 50 per cent of all the foreign born in Providence, Boston, Jersey city, and Philadelphia. It was relatively of least importance in Detroit, Minneapolis, and Milwaukee, of all the cities considered.

Natives of Canada and Newfoundland were found to be relatively most numerous in Boston and Detroit, where they constituted in 1890 very nearly one-fourth of the whole foreign born element. In New York they constituted a little more than 1 per cent, and in Chicago about 5 per cent, of all the foreign born.

Natives of Great Britain, including the English, Scotch, and Welsh, constituted in 1890 important elements of the foreign born population of Providence, Pittsburg, Denver, Philadelphia, Allegheny, Kansas city, Washington, Cleveland, Rochester, and Jersey city, considered relative to the presence of this element in the other cities under discussion.

The Scandinavian element, which constituted in 1890 about one-tenth of the total foreign born of the country at large, does not constitute, as a rule, any considerable proportion of the total foreign born in cities. A most notable exception, however, was found in the case of Minneapolis, where more than one-half of the whole foreign born element were of Scandinavian birth, mostly Norwegians and Swedes. The Scandinavian element constituted over 30 per cent of the whole foreign born element in both Omaha and St. Paul. Considerable proportions of Scandinavians were also found in Denver, Chicago, and Kansas city.

Of the remaining elements of the foreign born population in 1890, the Russians and Italians were relatively the most numerous in New York, and the Bohemians and Poles in Chicago; the Bohemians constituted over 10 per cent of all the foreign born in Cleveland and more than 7 per cent of all the foreign born in Omaha; the Poles were relatively the most numerous in Milwaukee, Buffalo, and Detroit. Of the total foreign born in New Orleans, natives of France constituted over 16 per cent and natives of Italy over 10 per cent. The Chinese constituted very nearly one-fifth of all the foreign born in San Francisco.

The following table of percentages shows the distribution according to principal countries of birth of the foreign born element in each of the cities having in 1890 less than 100,000 inhabitants but containing more than 20,000 persons of foreign birth:

PRINCIPAL COUNTRIES OF BIRTH.	Albany.	Syracuse.	Worcester.	Toledo.	New Haven.	Paterson.	Lowell.	Scranton.	Fall River.	Cambridge.	Lawrence.	Manchester.

a Includes Great Britain, not specified.

The predominating foreign element in more than half of these cities in 1890 was the Irish. They were particularly strong in Albany, Worcester, New Haven, Lowell, Scranton, Cambridge, and Lawrence, in all of which they constituted from 30 to 50 per cent of the large foreign born element.

The next in point of numbers were the Germans. They exceeded the Irish in Syracuse and Toledo, where they constituted 37 and 53 per cent, respectively, of the foreign born element. They were also noticeably strong in Albany, where they constituted 34 per cent of the foreign born.

The natives of Great Britain were found in noticeable proportions in nearly all of the cities under consideration. They were particularly strong in Scranton, Fall River, Lawrence, and Paterson, in all of which they constituted from 30 to 35 per cent of the foreign born. They were, as a rule, English, although the Scotch were relatively numerous in Paterson and Lawrence. The Welsh constituted very nearly one-fifth of the foreign born in Scranton, exceeding all other natives of Great Britain combined and nearly equalling the Germans.

The natives of Canada and Newfoundland in 1890 were found in noticeable proportions in nearly all of these cities, but were particularly strong in such as are located in Massachusetts, and also in Manchester, N. H., all of which are large manufacturing centers, and in which this element constituted from one-fifth to three-fifths of the foreign born.

Of the remaining foreign born elements in these cities in 1890, natives of Holland constituted 14.28 per cent of the total foreign born in Paterson; the Swedes constituted 17.07 per cent of the foreign born in Worcester, and considerably less in New Haven, Cambridge, and Manchester; the Russians in New Haven constituted 5.04 per cent, the Poles in Toledo 8.88 per cent, and the Italians in New Haven 8.16 per cent, of the whole number of foreign born in each city, respectively.

In 1880 the foreign born population, distributed according to country of birth, was shown for the 50 principal cities at that census. Making a comparison for the same cities as a whole in 1880 and 1890, the following results are obtained:

PRINCIPAL COUNTRIES OF BIRTH.	1890		1880	
	Number.	Per cent.	Number.	Per cent.
Total foreign born	3,441,165	100.00	2,330,347	100.00
Canada and Newfoundland	218,772	6.36	133,614	5.73

Other countries	39,392	1.15	24,866	1.07

a Includes Great Britain, not specified.

Of the 6,679,943 foreign born persons in the United States in 1880, 2,330,347, or 34.89 per cent, were found in the 50 principal cities under consideration, while 3,441,165, or 37.20 per cent, in 1890, out of a total of 9,249,547 foreign born, were found in the same cities.

Considering the distribution of the foreign born population found in these 50 cities in 1880 and 1890 according to countries of birth, it is seen that the persons born in Ireland constituted 26.38 per cent in 1890 as against 36.45 per cent in 1880, and the persons born in Germany 33.69 per cent of the whole in 1890 as against 33.19 per cent in 1880. For the persons born in England, Scotland, and Wales there had been relatively no change in 1890 as compared with 1880. It is seen that the Swedes, Russians, Poles, and Italians have increased to a noticeable extent.

FOREIGN PARENTAGE.

Since 1850 the foreign born population has been classified according to country of birth at each decennial census of the United States. Until the census of 1870, however, no effort was made to determine the proportion of the total population of foreign parentage, that is, the number of persons, whether themselves of native or foreign birth, who had either one or both parents foreign born. As a result of the compilations made in 1870 it was ascertained that the whole number of persons of foreign parentage was 10,892,015, and that they constituted 28.25 per cent of the total population at that census. The whole number of persons in 1870 who were themselves of foreign birth was 5,567,229, very nearly all of whom were of foreign parentage, that is, with the exception of a very small number whose parents were both native born, the exact number not being stated.

No information was afforded by the census of 1870, however, as to the extent to which each of the principal foreign countries had contributed to that element of the population who were of native birth but who had one or both parents foreign born, so that in compiling the census of 1880 an elaborate tabulation, as stated in the Tenth Census report, was undertaken in order to ascertain the proportions contributed to the whole element of foreign parentage by each of the following nationalities: Ireland, Germany, Great Britain, Scandinavia, British America, and "Other countries". This tabulation was completed for 36 states and territories, including the District of Columbia, and the ratios derived therefrom, that is, the number of persons having fathers and mothers born in each of the above-named countries to each 1,000 persons born in the same country, were applied to the whole number of persons of each of these nationalities in the United States, in order to determine, approximately at least, the number of persons, both native born and foreign born, in the United States in 1880 who had fathers and mothers born as stated, and indirectly the whole number of persons of foreign parentage. Whether or not these ratios, derived from partial tabulations only, produced substantially accurate results for the whole country can not be definitely determined, except by completing the tabulation for the states not tallied in 1880, which included, besides the territory of Utah, some of the largest states in point of population, and which contained the largest proportions of the foreign born population, namely, New York, New Jersey, Pennsylvania, Ohio, Indiana, Illinois, Michigan, Iowa, Kansas, and Maine.

Assuming that the results are approximately correct, it appears that out of a total population in 1880 of 50,155,783, there were 14,922,744, or 29.75 per cent, who had either one or both parents born in foreign countries.

In the 36 states and territories for which the tabulations were completed, the whole number having either one or both parents foreign born was 5,758,811, or 21.85 per cent of the total population (26,354,124) of the states and territories considered. In these states and territories there were 2,673,217 persons of foreign birth, or 40.02 per cent only of all the foreign born in the United States in 1880, of which number 13,307 were of native parentage, that is, although of foreign birth themselves their parents were both native born. The whole number of persons of foreign birth who were of foreign parentage, that is, who had either one or both parents foreign born, in these 36 states and territories was 2,659,910, leaving 3,098,901 persons who were of native birth but of foreign parentage. In the United States as a whole the foreign born persons in 1880 numbered 6,679,943 and the foreign born persons of native parentage were estimated to be 33,252, making the whole number of foreign born persons of foreign parentage, approximately, 6,646,691, while the whole number of native born persons of foreign parentage was, approximately, 8,276,053.

In 1890 the tabulations regarding foreign parentage comprehended for white persons not only Ireland and Germany, which were the only countries separately tabulated in 1880, but also each of the countries comprising the nationality groups used in 1880, as England, Scotland, and Wales instead of Great Britain; Sweden, Norway, and Denmark instead of Scandinavia; a separation according to French and English extraction for Canada and Newfoundland, besides giving in addition thereto those countries from which more recent contributions of noticeable proportions have been received, particularly during the past decade, as Bohemia, Hungary, France, Italy, and Russia. The colored population in 1890 was only tabulated as regards the number who were either of native or foreign parentage.

Considering first the results arrived at in 1890 in a general way, it appears that the whole number of persons of foreign parentage, without regard to color, was 20,676,046, or 33.02 per cent of the total population, which in 1890 was 62,622,250. The whole number of white persons of foreign parentage in 1890 was 20,519,643, while the colored persons of foreign parentage numbered 156,403. The foreign white in 1890 numbered 9,121,867, of which 105,899, or 1.16 per cent, were of native parentage, that is, had both parents native born. The whole number of foreign white persons of foreign parentage in 1890 was, therefore, 9,015,968, leaving 11,503,675 native white persons of foreign parentage. The number of foreign colored who were of native parentage was not separately tabulated in 1890.

The table on the following page gives the total population together with the number and percentage of persons of foreign parentage by states and territories for 1870 and 1890 in detail, and for the 36 states and territories in 1880 for which foreign parentage figures were compiled.

a Estimated; foreign parentage in 1880 was tabulated for only 36 states and territories.

b Not compiled in 1880.

c Dakota territory.

The proportion of persons of foreign parentage to the total population, as shown by the preceding table, has steadily increased from 1870 to 1890 in all the states of the North Atlantic division, the largest increases in the proportion being in New Hampshire, Rhode Island, Massachusetts, and Connecticut. This is also true as regards the states of the North Central division, with the single exception of Missouri. The largest increases in the proportion in this division were found in North Dakota, South Dakota, Michigan, Minnesota, Illinois, and Iowa.

In the South Atlantic division the proportion has increased materially in Florida and but slightly in Delaware, Maryland, Virginia, and North Carolina. In all the other states of this division there was a less proportion of persons of foreign parentage to the total population in 1890 than in 1870, the largest decreases being in the District of Columbia and West Virginia. In the South Central division there has been a perceptible increase in the proportion of persons of foreign parentage in 1890 as compared with 1870 in Texas and Arkansas, a very slight increase in Alabama and Tennessee, and a decrease in Louisiana, Kentucky, and Mississippi, the loss in Louisiana being particularly noticeable.

In the Western division the proportion of persons of foreign parentage has increased from 1870 to 1890 in Colorado, Oregon, Washington, New Mexico, and Montana. In Colorado and Oregon the increase was mainly from 1870 to 1880, while in the remaining states the increase has been almost wholly since 1880. There has been a loss in the other states and territories in this division, the decrease in the proportion being especially noticeable in Idaho, Arizona, and Wyoming.

Considering the proportion of persons of foreign parentage to total population in the several states and territories in 1890, it is seen that the largest proportions were 78.98 per cent in North Dakota and 75.42 per cent in Minnesota, or, in other words, more than three-fourths of the entire population of those two states in 1890 were of foreign extraction. In Wisconsin the element of foreign extraction constituted very nearly three-fourths of the total population, or 73.69 per cent, and in Utah very nearly two-thirds of the population, or 66.28 per cent. In South Dakota the persons of foreign parentage constituted a trifle over 60 per cent, while in Nevada, Rhode Island, California, New York, Massachusetts, Montana, Arizona, Michigan, and Connecticut they constituted between 50 and 60 per cent of the total population. In Illinois, New Jersey, and Wyoming they constituted very nearly 50 per cent. North Carolina had the smallest proportion of persons of foreign parentage, or seven-tenths of 1 per cent only, and was closely followed by South Carolina with 1.53 per cent and Georgia with 1.78 per cent. In Mississippi, Alabama, and Virginia less than 3 per cent of the total population were of foreign parentage, while in Tennessee and Arkansas there was a trifle more than 3 per cent.

In the North Atlantic, North Central, and Western divisions more than two-fifths of the population in 1890 were of foreign parentage, the percentages being 47.21, 43.02, and 48.67, respectively. The smallest percentages in these three divisions were 22.87 in Maine, 20.40 in Indiana, and 15.44 in New Mexico. In the South Atlantic division but 6.02 per cent of the population were of foreign parentage, the largest percentages being found in Delaware, Maryland, and the District of Columbia. In the South Central division only 7.59 per cent were of foreign parentage, the largest percentages being found in Louisiana, Texas, and Oklahoma.

The relative proportions of white and colored persons of native and foreign parentage in the United States in 1890 are summarized as follows :

COLOR.	Total population.	PERSONS OF NATIVE PARENTAGE.		PERSONS OF FOREIGN PARENTAGE.	
		Number.	Per cent.	Number.	Per cent.
All classes.....	62,622,250	41,946,204	66.98	20,676,046	33.02
Total white.....	54,983,890	34,464,247	62.68	20,519,643	37.32
Native white.....	45,862,023	34,358,348	74.92	11,503,675	25.08
Foreign white.....	9,121,867	105,899	1.16	9,015,968	98.84
Total colored.....	7,638,360	7,481,957	97.95	156,403	2.05

As already stated, the term "foreign parentage" includes all persons, whether themselves of native or foreign birth, who had either one or both parents foreign born. The term "native parentage", on the other hand, includes all persons, irrespective of birth, who had either both parents native born, one parent native born and one parent for whom the birthplace was "unknown", or for whom the birthplace of both parents was "unknown". The chief point being to determine the number having one or both parents foreign born, that is, the purely foreign element and its proportion to the entire population, all other persons have been considered, for convenience, as being of native parentage.

FOREIGN PARENTAGE.

For this reason, and because of the small proportion of the whole population for whom the birthplace of both parents was "unknown", it was not deemed necessary to present the unknown element separately. Of the whole number of native white persons included as of native parentage, less than 3 per cent had both parents "unknown", as shown by the following statement:

PARENTAGE.	Number.	Per cent.
Native white persons of native parentage.....	34,358,348	100.00
Both parents native	32,945,946	95.89
Father native, mother unknown.....	174,996	0.51
Father unknown, mother native	237,641	0.75
Both parents unknown	979,765	2.85

As compared with the whole population (62,622,250), the percentage of "unknown" is of no significance whatever, assuming that among the colored of native parentage there were practically none of "unknown" parentage.

Among the foreign white there has been found a small percentage (1.16) of persons of either native or unknown parentage, or 105,899 out of a total of 9,121,867 foreign white persons. Of this number, 67,869, or 64.09 per cent, had both parents unknown, while the remaining 38,030, or 35.91 per cent, had either both parents native or one parent native and one parent unknown. This last named element, constituting a little more than one-third of the whole number of foreign white persons of native parentage, should be really considered as native born and should have been returned as "American citizens born abroad". This was not done to any extent by the enumerators, although they were specially instructed on this point, as only 8,547 persons were so returned and included under the heading of "Native born". The number erroneously reported is comparatively small and has no particular bearing on the question of foreign parentage.

The entire element of foreign parentage in 1890 was, therefore, 20,676,046, or 33.02 per cent of the total population, made up of 20,519,643 white persons, or 37.32 per cent of all the white, and 156,403 colored persons, or 2.05 per cent of all the colored. The white population of foreign parentage is further subdivided according to native white and foreign white, there being 11,503,675 native white persons of foreign parentage and 9,015,968 foreign white persons of foreign parentage.

The population of the United States in 1890, subdivided as white and colored and distributed according to native and foreign parentage, giving in each case the percentage of the total population, is summarized as follows:

PARENTAGE.	Number.	Per cent.
Total population.....	62,622,250	100.00
Of native parentage	41,946,204	66.98
Of foreign parentage	20,676,046	33.02
Total white population.....	54,983,890	87.80
Of native parentage	34,464,247	55.03
Of foreign parentage	20,519,643	32.77
Total colored population.....	7,638,360	12.20
Of native parentage	7,481,957	11.95
Of foreign parentage	156,403	0.25

White persons of foreign parentage in 1890 constituted 32.77 per cent of the total population, while colored persons of foreign parentage constituted but 0.25 per cent, the whole element of foreign parentage constituting, as before stated, 33.02 per cent.

The following table shows the number and percentage of persons of foreign parentage among the white and colored population of each state and territory in 1890:

NUMBER AND PERCENTAGE OF WHITE AND COLORED POPULATION OF FOREIGN PARENTAGE: 1890.

a Persons of negro descent, Chinese, Japanese, and civilized Indians.

FOREIGN PARENTAGE.

The percentages of persons of foreign parentage among the white population do not differ materially from those already shown for the whole population irrespective of color, except for a few states only. This is particularly the case in the North Atlantic, North Central, and Western divisions. In the South Atlantic and South Central divisions, however, the proportions of white persons of foreign parentage are somewhat increased, especially in the District of Columbia, Maryland, Florida, Delaware, Louisiana, Texas, and Mississippi.

Among the colored population, which includes persons of negro descent, Chinese, Japanese, and civilized Indians, the percentage of persons of foreign parentage was quite large in certain states, although for the United States as a whole they constituted only 2.05 per cent of the colored. This is especially true in the Western division, with the exception of New Mexico, and in several of the states along the Canadian border. These large percentages are principally due in the Western division to the large number of Chinese, and in the border states to the presence of civilized Indians and persons of negro descent who have come from Canada.

The element of foreign parentage among the white population has been distributed, as already stated, according to the principal nationalities of the parents. This was not done for the colored, as colored persons of foreign parentage constituted but 2.05 per cent of all the colored, and because, in conformity to the classification of countries used for the white element of foreign parentage, the nationality of the parents for fully 95 per cent could not be specifically stated, but would be included under the heading of "Other countries". For these reasons no tabulation regarding the colored population was considered necessary beyond a general statement of the number having either native or foreign parentage, as already defined.

Considering the element of foreign parentage among the white population in greater detail, the following table is obtained:

PARENTAGE.	WHITE PERSONS OF FOREIGN PARENTAGE.		NATIVE WHITE PERSONS OF FOREIGN PARENTAGE.		FOREIGN WHITE PERSONS OF FOREIGN PARENTAGE.	
	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.
The United States.....	20,519,643	100.00	11,503,675	100.00	9,015,968	100.00
Both parents foreign.....	17,011,781	82.90	8,085,019	70.28	8,926,762	99.01
Father foreign, mother native.....	2,424,693	11.82	2,378,729	20.68	45,964	0.51
Father native, mother foreign.....	1,083,169	5.28	1,039,927	9.04	43,242	0.48

Of the total white persons of foreign parentage, 17,011,781, or 82.90 per cent, had both parents foreign born, leaving 3,507,862, or 17.10 per cent, with one parent foreign and one parent native. Among the native white those having both parents foreign constituted 70.28 per cent, while among the foreign white all but 1 per cent had both parents foreign. Of the total white persons with but one parent foreign, 2,424,693, or 11.82 per cent of all white persons of foreign parentage, had a foreign father and a native mother, and 1,083,169, or 5.28 per cent of all white persons of foreign parentage, had a foreign mother and a native father.

Of the whole number of white persons of foreign parentage in 1890 who had both parents foreign born, 16,089,513, or 78.41 per cent of all the white persons of foreign parentage, had both parents born in the same country, leaving only 922,268, or 4.49 per cent of the whole number of white persons of foreign parentage, who were of mixed foreign parentage, that is, father born in Ireland and mother born in England, father born in England and mother born in Ireland, father born in Germany and mother born in France, and so on. The figures in detail for the native white and foreign white are as follows:

PARENTAGE.	WHITE PERSONS OF FOREIGN PARENTAGE.		NATIVE WHITE PERSONS OF FOREIGN PARENTAGE.		FOREIGN WHITE PERSONS OF FOREIGN PARENTAGE.	
	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.
The United States.....	20,519,643	100.00	11,503,675	100.00	9,015,968	100.00
Both parents born in the same country.....	16,089,513	78.41	7,370,749	64.07	8,718,764	96.70
Of mixed foreign parentage.....	922,268	4.49	714,270	6.21	207,998	2.31
One parent foreign, one parent native.....	3,507,862	17.10	3,418,656	29.72	89,206	0.99

As already stated, the whole number of white persons of foreign parentage in 1890 constituted 32.77 per cent of the entire population of the United States. The table on the following page shows the number of native and foreign white persons of foreign parentage in each state and territory in 1890, together with the percentage of the total population in each case.

PROGRESS OF THE NATION.

NUMBER OF NATIVE AND FOREIGN WHITE PERSONS OF FOREIGN PARENTAGE AND PERCENTAGE OF TOTAL POPULATION: 1890.

In the United States as a whole, the native white persons of foreign parentage in 1890 numbered 11,503,675 and constituted 18.37 per cent of the total population, while the foreign white persons of foreign parentage numbered 9,015,968 and constituted 14.40 per cent, the whole number of white persons of foreign parentage being, as before stated, 20,519,643, or 32.77 per cent of the total population.

In the North Atlantic division the whole number of white persons of foreign parentage constituted 47.10 per cent of the total population in 1890, the native white persons of foreign parentage constituting 25.03 per cent and the foreign white persons of foreign parentage 22.07 per cent. In Maine, New Hampshire, Massachusetts, and Rhode Island the foreign white persons of foreign parentage constituted a larger percentage of the total population than the native white persons of foreign parentage, the largest difference being in New Hampshire, where the percentage for the native white persons was 13.28 as against 18.88 for foreign white persons. This excess is caused by the fact that, as compared with the other states in this division, these states have received a larger proportion of the immigration which came to this country during the last years of the decade from 1880 to 1890, particularly the French Canadian element. In all the other states of this division the native white population of foreign parentage exceeded the foreign white population of foreign parentage, showing that the effect of the great influx of foreign blood into this country in recent years has not been so marked as in the more easterly states.

In the North Central division 25.08 per cent of the total population in 1890 consisted of native white persons of foreign parentage as compared with 17.89 per cent of foreign white persons of foreign parentage, the entire element, both native white and foreign white, of foreign parentage constituting 42.97 per cent of the total population. In all the states of this division, with the single exception of North Dakota, the proportion of native white persons of foreign parentage to the total population in 1890 was larger than the proportion of foreign white persons of foreign parentage. In North Dakota, however, the native white element of foreign parentage constituted 34.67 per cent of the total population, while the foreign white element of foreign parentage constituted 44.20 per cent.

In the Western division the white persons of foreign parentage constituted 45.27 per cent of the total population, the native white element of foreign parentage constituting 23.44 per cent and the foreign white element of foreign parentage 21.83 per cent. In Montana, Arizona, and Washington the proportions of foreign white persons of foreign parentage were considerably more than those of native white persons of foreign parentage, while in Wyoming, Colorado, and Oregon the proportions were relatively the same. In the remaining states and territories the reverse was true, especially in Utah and Idaho.

In the states comprising the South Atlantic and South Central divisions, with the single exception of Florida, there was an excess in the proportion of native white persons of foreign parentage as compared with foreign white persons of foreign parentage. In the South Atlantic division the native white persons of foreign parentage in 1890 constituted 3.64 per cent of the total population and the foreign white persons of foreign parentage 2.25 per cent. In the South Central division 4.62 per cent of the total population were native white persons of foreign parentage and 2.86 per cent foreign white persons of foreign parentage.

The presence of native and foreign white persons of foreign extraction in the 124 principal cities of the United States, in proportion to the total population, is shown in the following table:

NUMBER OF TOTAL, WHITE, NATIVE WHITE, AND FOREIGN WHITE PERSONS OF FOREIGN PARENTAGE, AND PERCENTAGE OF TOTAL POPULATION, FOR CITIES HAVING 25,000 INHABITANTS OR MORE: 1890.

CITIES.	Total population.	TOTAL PERSONS OF FOREIGN PARENTAGE.		WHITE PERSONS OF FOREIGN PARENTAGE.		NATIVE WHITE PERSONS OF FOREIGN PARENTAGE.		FOREIGN WHITE PERSONS OF FOREIGN PARENTAGE.	
		Number.	Per cent of total population.	Number.	Per cent of total population.	Number.	Per cent of total population.	Number.	Per cent of total population.

In New York city and in Chicago practically four-fifths of the total population in 1890 were of foreign parentage, the exact percentages being 80.46 for New York and 77.90 for Chicago. Of the other cities having a population of 400,000 or more, the percentages were 56.58 for Philadelphia, 71.04 for Brooklyn, 67.46 for St. Louis, 67.96 for Boston, and 41.67 for Baltimore. Of all the cities considered, the largest percentage was found in Milwaukee, Wis., where 86.36 per cent of its population in 1890 was of foreign parentage. The next largest percentages were found in Holyoke and Fall River, in Massachusetts, where 82.98 per cent and 82.71 per cent, respectively, were of foreign parentage. Lawrence, in the same state, had also 79.88 per cent of foreign parentage. Hoboken, in New Jersey, had 81.46 per cent of its population of foreign parentage, and Long Island city, in New York, 80.62 per cent, or practically the same as for New York city. Other cities which had at least 75 per cent of their population of foreign parentage in 1890 were San Francisco, in California, with 78.15 per cent; Detroit and Bay city, in Michigan, with 77.17 per cent and 76.20 per cent, respectively; Buffalo, in New York, with 77.11 per cent; Scranton, in Pennsylvania, with 75.23 per cent; Duluth and St. Paul, in Minnesota, with 75.21 per cent and 75.14 per cent, respectively, and Cleveland, in Ohio, with 74.98 per cent.

Classifying native and foreign white persons of foreign parentage according to the number either having both parents born as specified, having one parent so born and one parent native, or who were of mixed foreign parentage, the following table is obtained :

SPECIFIED COUNTRIES.	WHITE PERSONS OF FOREIGN PARENTAGE.			NATIVE WHITE PERSONS OF FOREIGN PARENTAGE.			FOREIGN WHITE PERSONS OF FOREIGN PARENTAGE.		
	Total.	Having both parents born as specified.	Having one parent born as specified and one parent native.	Total.	Having both parents born as specified.	Having one parent born as specified and one parent native.	Total.	Having both parents born as specified.	Having one parent born as specified and one parent native.

Taking the whole number of white persons of foreign parentage and classifying them according to the nationality of the parents, the following table of percentages is obtained, showing the percentage of the whole number of white persons having one or both parents born as specified, and, in addition, the percentage of the whole number represented by those having both parents so born and those having one parent so born and one parent native:

SPECIFIED COUNTRIES.	WHITE PERSONS OF FOREIGN PARENTAGE.			SPECIFIED COUNTRIES.	WHITE PERSONS OF FOREIGN PARENTAGE.		
	Total.	Having both parents born as specified.	Having one parent born as specified and one parent native.		Total.	Having both parents born as specified.	Having one parent born as specified and one parent native.
All classes	Per cent. 100.00	Per cent. 82.90	Per cent. 17.10	Norway	Per cent. 2.91	Per cent. 2.68	Per cent. 0.23
Ireland	23.94	20.18	3.76	Denmark	1.04	0.95	0.09
Germany	33.39	28.15	5.24	Bohemia	1.05	1.00	0.05
England	9.37	6.48	2.89	France	1.25	0.87	0.38
Scotland	2.64	1.92	0.72	Hungary	0.35	0.34	0.01
Wales	1.07	0.83	0.24	Italy	1.21	1.15	0.06
Canada (English)	4.58	2.45	2.13	Russia	1.24	1.21	0.03
Canada (French)	2.50	2.15	0.35	Other countries	5.43	4.69	0.74
Sweden	3.54	3.36	0.18	Of mixed foreign parentage	4.49	4.49

From these two tables it is seen that the white persons in 1890 who had both parents born in Germany numbered 5,776,186, or 28.15 per cent of the whole number of white persons of foreign parentage, and those who had one parent born in Germany and one parent native, 1,075,378, or 5.24 per cent, these two classes combined numbering 6,851,564 and constituting 33.39 per cent. The whole number of white persons who had both parents born in Ireland was 4,142,199, or 20.18 per cent, and those who had one parent so born and one parent native, 771,039, or 3.76 per cent, making a combined total of 4,913,238, or 23.94 per cent. Taken together, white persons of German and Irish parentage, as just defined, constituted in 1890 considerably more than one-half of all white persons of foreign parentage. White persons of English parentage numbered 1,922,638, or 9.37 per cent of all white persons of foreign parentage, those having both parents born in England numbering 1,330,123 and

constituting 6.48 per cent, and those having one parent born in England and one parent native, 592,515, or 2.89 per cent; including those of Scotch and Welsh extraction, the entire element of British parentage constituted 13.08 per cent. Of the remaining nationalities, white persons of British American parentage, combining those of English Canadian and French Canadian extraction, constituted 7.08 per cent, and those of Scandinavian parentage, including Denmark, 7.49 per cent. White persons of Bohemian, French, Italian, and Russian parentage constituted, in each case, a little more than 1 per cent, while those of Hungarian parentage constituted a little more than one-third of 1 per cent. Those having one or both parents born in other countries not specified constituted 5.43 per cent, and, as previously stated, those of mixed foreign parentage 4.49 per cent.

The following table shows the percentages of white persons having both parents born as specified or having one parent born as specified and one parent native:

SPECIFIED COUNTRIES.	WHITE PERSONS OF FOREIGN PARENTAGE.		SPECIFIED COUNTRIES.	WHITE PERSONS OF FOREIGN PARENTAGE.	
	Having both parents born as specified.	Having one parent born as specified and one parent native.		Having both parents born as specified.	Having one parent born as specified and one parent native.
	<i>Per cent.</i>	<i>Per cent.</i>		<i>Per cent.</i>	<i>Per cent.</i>
Ireland	84.31	15.69	Norway	92.30	7.70
Germany	81.30	15.70	Denmark	91.28	8.72
England	69.18	30.82	Bohemia	95.29	4.71
Scotland	72.70	27.30	France	69.23	30.72
Wales	77.01	22.99	Hungary	97.54	2.46
Canada (English)	53.55	46.45	Italy	94.93	5.07
Canada (French)	86.10	13.90	Russia	97.46	2.54
Sweden	95.04	4.96	Other countries	86.29	13.71

White persons of English Canadian parentage had in 1890 the smallest percentage of both parents born as specified, or a little more than one-half, and were followed by those of English and of French parentage, or a little more than two-thirds in each case.

The whole number of white persons of foreign parentage in 1890 constituted, as has been previously stated, 32.77 per cent of the total population. The following table shows the proportion of the total population represented by each class of persons of foreign extraction, when considered according to the nationality of their parents:

SPECIFIED COUNTRIES.	Per cent of total population.	SPECIFIED COUNTRIES.	Per cent of total population.
All classes	32.77	Norway	0.95
Ireland	7.85	Denmark	0.34
Germany	10.94	Bohemia	0.34
England	3.07	France	0.41
Scotland	0.86	Hungary	0.12
Wales	0.35	Italy	0.40
Canada (English)	1.50	Russia	0.41
Canada (French)	0.82	Other countries	1.78
Sweden	1.16	Of mixed foreign parentage	1.47

From this table it is seen that the white persons of German parentage constituted 10.94 per cent of the total population in 1890 and those of Irish parentage 7.85 per cent. White persons of English parentage constituted 3.07 per cent of the entire population, while, if those of Scotch and Welsh parentage are included, those of British parentage constituted 4.28 per cent. White persons of British American parentage constituted 2.32 per cent of the total population and those of Scandinavian parentage 2.45 per cent.

The table on the two following pages shows for each state and territory the number of white persons in 1890 who had either both parents born as specified or one parent so born and one parent native, or who were of mixed foreign parentage, together with the percentage in each case of all white persons of foreign parentage.

PROGRESS OF THE NATION.

Taking into consideration such states as contained in 1890 a large number of whites of foreign parentage, it is seen that for white persons of Irish parentage the largest proportions were found in the North Atlantic division, where in Massachusetts, Rhode Island, and Connecticut nearly one-half, and in New York, New Jersey, and Pennsylvania a little more than one-third, of all white persons of foreign parentage were of this element. Large proportions were also found in nearly all of the remaining states and territories, particularly in Delaware, where they constituted more than one-half of all whites of foreign parentage, but in many of them, the whole number of white persons of foreign parentage being comparatively small, the proportions are of little moment.

For white persons of German parentage the largest proportions were found in the states of the North Central division, where in Ohio, Indiana, Wisconsin, and Missouri more than one-half of the whole number of white persons of foreign parentage were of this element. In Maryland and Kentucky they constituted more than one-half, and in New York, New Jersey, and Pennsylvania very nearly one-third, of all whites of foreign parentage. Large proportions were also found in some of the other states, but in most of them the foreign element being numerically small the proportions are not of importance.

It will be noticed that white persons of Irish and German parentage combined constituted more than one-half of all whites of foreign parentage in the country, and that in Ohio and Missouri they constituted nearly three-fourths, and in New York, New Jersey, and Pennsylvania about two-thirds, of the whole number of whites of foreign parentage found living in these states.

White persons of English parentage were found in noticeable proportions throughout the whole country, particularly in Utah, where they constituted 42.77 per cent of all white persons of foreign parentage, this figure exceeding that for the descendants of any other nationality found in that territory.

White persons of Scotch parentage were found in small proportions in nearly all of the states and territories, the largest being those for North Carolina and Wyoming, where they constituted 13.99 and 9.15 per cent, respectively.

For white persons of Welsh parentage the proportions were in all cases small, the largest being found in Pennsylvania and Ohio, where they constituted 4.05 and 2.58 per cent, respectively.

White persons of English and French Canadian extraction were found in the largest proportions in the states immediately adjoining and adjacent to the Canadian line. The largest proportions for those of English Canadian extraction were found in Maine, New Hampshire, Vermont, Massachusetts, Michigan, North Dakota, and Washington, where they ranged from 10.84 per cent in Washington to 29.91 per cent in Maine. The proportions for those of French Canadian extraction were largest in Maine, New Hampshire, Vermont, Massachusetts, and Rhode Island, where they ranged from 11.89 per cent in Massachusetts to 39.40 per cent in New Hampshire. These large proportions, particularly for the latter class, are due to the large manufacturing industries in the eastern states and their contiguity to that part of Canada inhabited by these people, conditions that have induced large numbers of them to emigrate to this country during recent years.

White persons of Scandinavian parentage were found in quite large proportions in most of the states and territories of the North Central and Western divisions. The proportions for the Swedes were largest in Minnesota, Nebraska, Washington, Kansas, Colorado, Utah, and Illinois, where they ranged from 7.04 per cent in Illinois to 15.81 per cent in Minnesota. The proportions for the Norwegians were largest in North Dakota, Minnesota, South Dakota, Wisconsin, Washington, and Iowa, ranging from 7.18 per cent in Iowa to 33.22 per cent in North Dakota. The proportions for the Danes were largest in Utah and Idaho, being 14.43 and 7.31 per cent, respectively.

Of the remaining countries shown in the table, the largest proportion was found for white persons of Bohemian parentage in Nebraska, where it was 6.66 per cent; for white persons of French parentage in Louisiana, where it was 16.42 per cent; for white persons of Hungarian parentage in Pennsylvania, where they comprised but 1.43 per cent of all white persons of foreign parentage in that state; for white persons of Italian parentage in Louisiana, or 8.59 per cent, with less noticeable proportions in Nevada, California, Colorado, New York, and New Jersey; and for white persons of Russian parentage in South Dakota, where they constituted 9.28 per cent, the next largest proportions being found in Kansas, North Dakota, and Oregon.

FOREIGN PARENTAGE.

The following table shows the whole number of white persons of foreign parentage, distributed according to the nationality of the parents, for each of the seven cities that in 1890 had a population of 400,000 or more:

Of the large number of white persons of foreign parentage living in these cities in 1890, those of Irish and German extraction constituted by far the greater proportions. In fact, for these two classes combined, the proportions in Baltimore, St. Louis, Philadelphia, Brooklyn, and New York exceeded two-thirds, and in Boston and Chicago one-half, of the whole number of white persons of foreign parentage in each of these cities.

For those of Irish extraction the proportions were large in all of these cities. In Boston they constituted more than one-half of all whites of foreign parentage, or 53.39 per cent; in Philadelphia, more than two-fifths, or 44.15 per cent, and in Brooklyn and New York, a little over one-third, or 35.36 and 33.73 per cent, respectively. The smallest proportions for this element were found in St. Louis, Baltimore, and Chicago, in each of which they constituted about one-fifth of all whites of foreign parentage.

The proportions for those of German parentage were also large in all of these cities except Boston, where this element constituted but 7.30 per cent. In Baltimore and St. Louis it was more than one-half, or 61.66 and 59.69 per cent, respectively; in Chicago, 37.35 per cent; in Brooklyn, 36.75 per cent; in New York, 35.04 per cent, and in Philadelphia, 29.29 per cent.

The largest proportions for those of English parentage were found in Philadelphia and Brooklyn, where they constituted about one-tenth of the whole number of whites of foreign parentage. The only proportion for the Canadians of English extraction that is of any moment was found in Boston, where it was 13.10 per cent. The largest proportions for those of Swedish, Norwegian, and Bohemian extraction were found in Chicago, being 7.06 per cent for the Swedes, 3.66 per cent for the Norwegians, and 4.89 per cent for the Bohemians. The largest proportions for those of Italian and Russian extraction were found in New York, being, respectively, 4.52 and 5.68 per cent.

For white persons of Scotch, Welsh, French Canadian, French, and Hungarian parentage, the proportions were in all cases very small.

The following table shows, for the United States as a whole, the distribution of the 922,268 white persons of mixed foreign parentage according to the various combinations of parentage in detail:

COMBINATIONS OF PARENTAGE.	WHITE PERSONS OF MIXED FOREIGN PARENTAGE.			COMBINATIONS OF PARENTAGE.	WHITE PERSONS OF MIXED FOREIGN PARENTAGE.		
	Total white.	Native white.	Foreign white.		Total white.	Native white.	Foreign white.

In the above table the combinations of parentage are arranged in the order of their numerical importance, and can be easily understood. For instance, in 1890 there were 137,282 white persons who had one parent born in Ireland and one parent born in England, of which 106,846 were native white persons and 30,436 foreign white persons. The other lines are to be read in the same way. In this table, the term "Other countries" is used in its limited sense, meaning thereby all other countries not specified, the same as in the general tables showing parentage according to certain specified nationalities.

FOREIGN PARENTAGE.

The number of white persons in 1890 who had either fathers or mothers born in certain specified countries is shown for the United States as a whole in the following table:

SPECIFIED COUNTRIES.	Number of white persons having fathers born as specified.	Number of white persons having mothers born as specified.	Excess of white persons having fathers born as specified.	Excess of white persons having mothers born as specified.
All classes.....	19,436,474	18,094,950	1,341,524	16,443

^a Net excess of white persons having foreign fathers, 1,341,524.

From this table it appears that, with the exception of Canada (English), there was an excess of white persons having fathers born in each specified country over white persons having mothers so born. The excess of white persons having English Canadian mothers over those having English Canadian fathers was practically confined to the North Atlantic and North Central divisions, largely in Massachusetts, New York, and Michigan. The net excess of fathers is 1,341,524, there being 19,436,474 white persons having foreign fathers as compared with 18,094,950 white persons having foreign mothers.

On the other hand, white persons having native mothers and foreign fathers exceeded those having native fathers and foreign mothers to the number of 1,341,524, which offsets the excess of white persons having foreign fathers, as just stated. These figures, although applying directly to the marriage of persons one generation removed, indicate, to a certain extent at least, that native women have intermarried more freely with foreign men than native men with foreign women. To what extent persons of foreign birth had intermarried with persons native born but of the same extraction, as persons of German birth who had married persons born in the United States but of German parentage, can not be determined from the data at hand. In general, however, it may be safely stated that the relatively freer intermarriage of native born women with foreign born men was principally due to the fact that the males in the country were largely in excess, particularly as regards the foreign born, fully three-fifths of all the immigrants being males, who were largely of marriageable age, if not already married, upon their arrival.

This predominance of white persons with native mothers but foreign fathers existed in 1890 in every state and territory of the Union. It was greatest in the South Central division, where there were over three and one-half times as many white persons with native mothers and foreign fathers as there were white persons with native fathers and foreign mothers, and in the South Atlantic division, where there were very nearly three times as many such persons. In these two divisions, however, the element of foreign parentage among the whites was not numerically large, and it was probably due to this fact that the scattered foreign male element had sought marriage so freely with native born women. In the North Central division there were not quite two and one-half times as many white persons with native mothers and foreign fathers as there were white persons with native fathers and foreign mothers, while in the Western division the white persons having native mothers and foreign fathers were just about double the number having native fathers and foreign mothers. The smallest excess was found in the North Atlantic division, or about one and nine-tenths more white persons with native mothers and foreign fathers than white persons with native fathers and foreign mothers.

Taking the nationality of the father as the basis, the intermarriage of mothers born in the United States with fathers born in each of the various foreign countries can be measured relatively, as shown by the table on the following page.

SPECIFIED COUNTRIES.	Total white persons having foreign fathers.	WHITE PERSONS HAVING FATHERS BORN AS SPECIFIED—					
		Mothers born as specified.		Mothers born in other foreign countries.		Mothers native.	
		Number.	Per cent.	Number.	Per cent.	Number.	Per cent.

Italy.....	254,555	236,008	92.72	7,210	2.83	11,337	4.45
Russia.....	266,884	248,165	92.99	13,579	5.09	5,140	1.92
Other countries.....	1,140,921	961,325	84.26	69,881	6.12	109,715	9.62

From this table it appears that 10.54 per cent of all the white persons with Irish fathers had mothers born in the United States, as compared with 12.33 per cent for those with German fathers, 20.63 per cent for those with English fathers, 17.09 per cent for those with Scotch fathers, 15.83 per cent for those with Welsh fathers, 29.46 per cent for those with English Canadian fathers, and 21.59 per cent for those with French fathers. It is at once apparent from these percentages that native born women have married most freely with those nationalities which were among the earliest contributors to our foreign born element, and for this reason it is impossible to determine accurately the proportion of these women who are themselves native born but of foreign extraction.

The percentage of persons with French Canadian fathers and native mothers makes this assumption all the more plausible, for the reason that this class is not disposed to marry much, if at all, outside of its own people. There were, however, in 1890 very nearly 9 per cent of persons reported with French Canadian fathers and native mothers, which can be accounted for only on the assumption that the larger share of these native born mothers were themselves of French Canadian extraction. This point is further illustrated by the proportions of persons who had Scandinavian fathers and native mothers, there having been but 3.27 per cent of persons with Swedish fathers and native mothers, 5.10 per cent with Norwegian fathers and native mothers, and 6.10 per cent with Danish fathers and native mothers. The comparatively small proportions of persons who had fathers born in Bohemia, Hungary, Italy, or Russia and native mothers are also noted, these nationalities having only assumed importance during the past decade as a part of our foreign born population.

The following table gives similar results for white persons having mothers born in certain specified countries:

SPECIFIED COUNTRIES.	Total white persons having foreign mothers.	WHITE PERSONS HAVING MOTHERS BORN AS SPECIFIED—

Both of these tables point to certain indications but do not afford definite information, for the reasons stated, as to the freedom of intermarriage between foreign born persons and natives of this country. This is also true as regards intermarriage between persons of the various specified nationalities. No conclusive results in this respect can be derived from the figures showing foreign parentage, as they do not give the origin of the persons considered, that is, the stock from which they have sprung. In this connection, however, an attempt has been made to determine for the first time the approximate number of persons in this country who were of French Canadian extraction, so far as it is possible to obtain such information through the medium of the census enumerators. The work of the enumerators was supplemented in this office by a most careful scrutiny of the statements made on the schedules regarding all persons of Canadian birth or parentage, for the purpose of affording as accurate results as possible concerning the French Canadian element of our population. The following table shows the number of persons reported as having been born in Canada and Newfoundland separated according to English or French extraction:

NUMBER OF PERSONS BORN IN CANADA AND NEWFOUNDLAND OF ENGLISH OR FRENCH EXTRACTION: 1890.

STATES AND TERRITORIES.	PERSONS BORN IN CANADA AND NEWFOUNDLAND.			STATES AND TERRITORIES.	PERSONS BORN IN CANADA AND NEWFOUNDLAND.

This table shows that of the 980,938 persons in 1890 who were born in Canada and Newfoundland, 678,442, or 69.16 per cent, were of English extraction and 302,496, or 30.84 per cent, were of French extraction. Of the whole number of those of French extraction, 229,354, or 75.82 per cent, were found in the North Atlantic division, Massachusetts alone containing 96,286. In certain states of the North Central division also this class was numerous, as shown by 30,446 in Michigan, 10,910 in Minnesota, 8,748 in Wisconsin, and 5,944 in Illinois.

Of the whole number of English extraction, 335,947, or 49.52 per cent, were found in the North Central division, of which very nearly one-half were in Michigan alone, and 260,875, or 38.45 per cent, in the North Atlantic division.

The foregoing table applies only to persons born in Canada and Newfoundland of English or French extraction, and does not present, therefore, a complete showing of the English and French Canadian elements of our population at the time the census was taken in 1890, inasmuch as it does not comprehend those persons who were born in the United States or elsewhere who had either one or both parents of English or French Canadian extraction. The table on the following page gives the whole number of each element, classified according to the number having both parents of English or French Canadian extraction, or one parent only, the other parent having been born either in the United States or in some foreign country other than Canada or Newfoundland.

NUMBER OF WHITE PERSONS HAVING EITHER ONE OR BOTH PARENTS BORN IN CANADA AND NEWFOUNDLAND OF ENGLISH OR FRENCH EXTRACTION: 1890.

STATES AND TERRITORIES.	WHITE PERSONS OF ENGLISH CANADIAN PARENTAGE.						WHITE PERSONS OF FRENCH CANADIAN PARENTAGE.

From this table it appears that the whole number of the French Canadian element in this country in 1890, so far as it could be determined through the medium of the census, was 537,298, while that of the English Canadian element (including Newfoundland) was 1,163,645. There is an unavoidable duplication in this table of 6,930 white persons having both parents born in Canada, one parent being of English extraction and the other parent being of French extraction. This duplication is small, however, as compared with the whole number of each element, and has no bearing upon this discussion.

Of all the persons of French Canadian parentage, 442,041 had French Canadian fathers and mothers, 55,609 had French Canadian fathers only, and 39,648 had French Canadian mothers only. Of the whole number of English Canadian parentage, 503,266 had English Canadian fathers and mothers, 321,968 had English Canadian fathers only, and 338,411 had English Canadian mothers only.

The French Canadian element is largely confined to the North Atlantic division, 387,580 out of a total of 537,298, or very nearly three fourths of their entire number, having been found in the states comprising this division. Considerable numbers were also found in the border states of the North Central division, the total for the division being 137,168. In the Western division there were 10,963 persons of French Canadian parentage, while in the South Central and South Atlantic divisions this element was found in small numbers only.

The English Canadian element is more evenly divided between the North Atlantic and North Central divisions, the larger proportion having been found in the latter division, while in the Western division there were over 100,000 persons of this extraction, and in the South Central and South Atlantic divisions about 23,000 persons.

In the Canadian census taken in 1891 an attempt was made to ascertain the number of French Canadians and French Acadians in the several provinces of the Dominion. The following statement relative to this inquiry is taken from the official report of that census:

* * * Each person who was asked the other questions in the census schedules, was also asked if he or she was a French Canadian (or Canadian French), or a French Acadian (or Acadian French), and the answers given were noted in these columns by the enumerators.

It has been claimed, however, with much appearance of reason, that the column headed "French Canadians" does not show the number of persons of French origin in Canada; that in the case of Acadians in the maritime provinces and the half breeds of Manitoba and the Northwest territories, the question was misunderstood, and that in the province of Ontario, owing to various causes, many persons of French Canadian origin have not been so enumerated.

This fact is here noted so that persons using the results published may not be misled by supposing that the number of persons of French Canadian origin has been ascertained with precision, or that the actual increases or decreases are such as a comparison with former census returns might seem to show.

The answers given to the enumerators have been correctly compiled and placed before the public.

The number of French Canadians returned in the Canadian census is given in Table 3 of their census report, and shows that out of a total of 4,833,239 persons, 1,404,974, or 29.07 per cent, were reported as French Canadians. In the United States census in 1890 the French Canadian element constituted 31.59 per cent of all the persons of Canadian extraction, including English and French.

It can not be claimed, of course, that the actual number of persons of French Canadian extraction in this country in June, 1890, as opposed to those of English Canadian extraction, was ascertained by the census, but it is believed that a careful study of the figures given herein will demonstrate the substantial accuracy of the enumeration in this respect. It represents the first attempt in the United States census to present these classes separately, and the results can be assumed to be at least fairly approximate.

PERSONS OF SCHOOL AGE.

The significance of the term "school age" varies in the different states and territories, and there is no school age in the national statutes. The term has found a place in national census reports, but it is perplexing, since its limitations are not always clear.

In addition to the general variation already indicated, certain states take account of those between two or three sets of age limits, using each for a different purpose.

The variations of age limits for the school census as required by the various state laws in 1890 are shown by the following statement, both years in each case being inclusive:

Alabama.....	7—20	Maine.....	4—20	Ohio.....	6—20
Arizona.....	6—17	Maryland.....	5—19	Oklahoma.....	6—20
Arkansas.....	6—20	Massachusetts.....	5—14	Oregon.....	4—19

Kansas.....	5—20	North Carolina.....	6—20	Wisconsin.....	4—19
Kentucky.....	6—19	North Dakota.....	7—19	Wyoming.....	6—20
Louisiana.....	6—17				

In Vermont the former maximum of 20 years has been restored since 1890, although at the time the census was taken the age limitations were 5 to 17 under a then recent law by which the maximum was reduced to 17.

Oklahoma organized public schools after the close of the census year.

In the published reports of previous censuses, statements concerning persons commonly considered as being of school age, that is, of the ages when children are found attending school, have been limited to 5 to 17 years, both inclusive. Under the census of 1890, however, results are given by sex, general nativity, and color, covering persons from 5 to 17 years, from 18 to 20 years, and from 5 to 20 years as a total, both years in each case being inclusive.

The following table shows for 1890 the number and percentage of persons of school age, classified according to general nativity, color, and age periods:

AGES.	Total persons of school age.	NATIVE AND FOREIGN BORN.				COLOR.							
		Native.		Foreign.		Native white—native parents.		Native white—foreign parents.		Foreign white.		Colored. (a)	
		Number.	Per cent.	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.
The United States...	22, 447, 392	21, 103, 353	94. 01	1, 344, 039	5. 99	12, 604, 550	56. 15	5, 513, 470	23. 67	1, 332, 545	5. 94	3, 196, 827	14. 24
5 to 17 years.....	18, 543, 201	17, 621, 692	95. 03	921, 509	4. 97	10, 546, 885	56. 88	4, 400, 105	23. 73	917, 475	4. 95	2, 678, 736	14. 44

a Persons of negro descent, Chinese, Japanese, and civilized Indians.

The whole number of persons from 5 to 17 years of age in the United States under the census of 1890 was 18,543,201 as against 15,065,767 returned in 1880, showing an increase during the decade of 3,477,434, or 23.08 per cent. The whole number of persons from 18 to 20 years of age in the United States in 1890 was 3,904,191 as against 3,254,063 in 1880, the increase during the decade being 650,128, or 19.98 per cent. Taking the period from 5 to 20 years of age as a whole, there were returned in 1890 for the entire United States 22,447,392 persons as against 18,319,830 persons in 1880, the general increase during the decade for the period of years considered being, therefore, 4,127,562, or 22.53 per cent. The increase in aggregate population for the United States as a whole during the same decade was 24.86 per cent.

The native born persons from 5 to 17 years of age numbered 17,621,692, or 95.03 per cent of the whole number between those ages, while the foreign born numbered 921,509, or 4.97 per cent. Of the whole number from 18 to 20 years of age, 3,481,661, or 89.18 per cent, were native born and 422,530, or 10.82 per cent, were foreign born. Of the 18,543,201 persons from 5 to 17 years of age, 10,546,885, or 56.88 per cent, were native white of native parentage; 4,400,105, or 23.73 per cent, were native white of foreign parentage; 917,475, or 4.95 per cent, were foreign white,

MALES OF MILITIA AGE.

clxxvii

and 2,678,736, or 14.44 per cent, were colored. In the same way, of the 3,904,191 persons from 18 to 20 years of age, 2,057,665, or 52.70 per cent, were native white of native parentage; 913,365, or 23.40 per cent, were native white of foreign parentage; 415,070, or 10.63 per cent, were foreign white, and 518,091, or 13.27 per cent, were colored.

MALES OF MILITIA AGE.

Males of militia age include all those from 18 to 44 years of age, both inclusive, and constitute the potential militia of the country. This class in 1890 numbered 13,230,168 as against 10,231,239 in 1880, showing an increase of 29.31 per cent, as compared with an increase for the total population of 24.86 per cent. This increase in males of militia age was due to the excessive immigration of the preceding decade, as is shown by the fact that the increase in the native born males of militia age from 1880 to 1890 was only about 3 per cent greater than the increase in the native born population as a whole, or 22.76 per cent, while the increase in the foreign born males of militia age was about 40 per cent.

The following table shows for 1890, by geographical divisions, the number and percentage of males of militia age, classified according to general nativity and color:

GEOGRAPHICAL DIVISIONS.	Total males of militia age.	NATIVE AND FOREIGN BORN.				COLOR.							
		Native.		Foreign.		Native white—native parents.		Native white—foreign parents.		Foreign white.		Colored. (a)	
		Number.	Per cent.	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.
The United States.	13,230,168	10,424,086	78.79	2,806,082	21.21	6,774,265	51.20	2,311,801	17.48	2,717,898	20.54	1,426,204	10.78
North Atlantic	3,798,522	2,677,078	70.48	1,121,444	29.52	1,723,186	45.36	888,462	23.39	1,113,001	29.30	73,873	1.95
South Atlantic	1,617,981	1,563,647	96.64	54,334	3.36	935,720	57.83	73,928	4.57	51,908	3.21	556,425	34.39
North Central	4,835,926	3,648,599	75.45	1,187,327	24.55	2,466,649	51.01	1,082,864	22.39	1,183,835	24.48	102,578	2.12
South Central	2,061,560	1,968,044	95.46	93,516	4.54	1,256,094	60.93	108,881	5.28	91,825	4.45	604,760	29.34
Western	916,179	566,718	61.86	349,461	38.14	392,016	42.85	157,666	17.21	277,329	30.27	88,568	9.67

a Persons of negro descent, Chinese, Japanese, and civilized Indians.

The native born males of militia age numbered 10,424,086, or 78.79 per cent of the whole number, and the foreign born numbered 2,806,082, or 21.21 per cent. This may be contrasted with similar elements of the total population, of which 85.23 per cent were native born and 14.77 per cent were foreign born.

Of the total potential militia, 68.68 per cent, or more than two-thirds, were native white, while of the total population, 73.23 per cent were native white; 10.78 per cent of the potential militia were colored, while of the total population, 12.20 per cent were colored.

Of the total males of militia age, a little more than one-half, namely, 51.20 per cent, were native white of native parentage, while 48.80 per cent were either native white of foreign parentage, foreign white, or colored.

The following table shows the percentage of the potential militia which was contained in each of the five divisions of the country contrasted with a similar percentage of the total population:

GEOGRAPHICAL DIVISIONS.	Potential militia.	Population.
	Per cent.	Per cent.
The United States.....	100.00	100.00
North Atlantic	28.71	27.79
South Atlantic	12.23	14.15
North Central	36.55	35.71
South Central	15.58	17.52
Western	6.93	4.83

It will be seen that in the northern and western states the proportion of the potential militia was greater than that of the population, showing a preponderance of the mature male element, while in the southern states the proportion of potential militia was somewhat less than that of the population.

MALES OF VOTING AGE.

The number of males 21 years of age and upward, that is, potential voters, in 1890 was 16,940,311; in 1880 the number was 12,830,349. The increase during the 10 years intervening was 32.03 per cent, which was far in excess of that of population, and was due undoubtedly, as in the case of the potential militia, to the excessive immigration of the decade, which consisted largely of adult males. The potential voters in 1890 formed 27.05 per cent of the population, while in 1880 the same class constituted 25.58 per cent, showing a notable increase in the proportion.

The following table shows for 1890, by geographical divisions, the number and percentage of males of voting age, classified according to general nativity and color:

GEOGRAPHICAL DIVISIONS.	Total males of voting age.	NATIVE AND FOREIGN BORN.				COLOR.							
		Native.		Foreign.		Native white—native parents.		Native white—foreign parents.		Foreign white.		Colored. (a)	
		Number.	Per cent.	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.
The United States...	16,940,311	12,591,852	74.33	4,348,459	25.67	8,807,223	51.99	2,150,273	12.69	4,242,360	25.04	1,740,455	10.28
North Atlantic	5,055,239	3,375,389	66.77	1,679,850	33.23	2,471,712	48.89	823,422	16.29	1,671,027	33.06	80,078	1.76
South Atlantic	2,015,578	1,913,400	94.93	102,178	5.07	1,162,060	57.65	76,915	3.82	99,393	4.93	677,210	33.60
North Central	6,202,901	4,281,800	69.03	1,921,101	30.97	3,166,438	51.05	992,528	16.00	1,917,326	30.91	126,609	2.04
South Central	2,512,704	2,348,167	93.45	164,537	6.55	1,505,200	59.90	106,057	4.22	182,090	6.45	739,357	29.43
Western	1,153,889	673,096	58.33	480,793	41.67	501,813	43.49	151,351	13.11	392,524	34.02	108,201	9.38

a Persons of negro descent, Chinese, Japanese, and civilized Indians.

Of the potential voting strength of the nation, 12,591,852, or 74.33 per cent, were native born, and 4,348,459, or 25.67 per cent, were foreign born. The corresponding figures regarding the total population were 85.23 per cent native born and 14.77 per cent foreign born. As shown by these figures, the foreign born males of voting age in 1890 constituted over one-fourth of all the males of voting age, while the foreign born element as a whole constituted only a little more than one-seventh of the total population.

The native white of native parentage, or, as nearly as may be, the whites of native extraction, constituted but 51.99 per cent of the voting strength of the nation, nearly one-half of the possible voters being either native white of foreign parentage, foreign white, or colored. Like the corresponding element of the total population, the strength of the white element of native extraction is in the south, while in the northwest it is in many states outnumbered, and in a few states greatly outnumbered, by the white element of foreign extraction. Thus the white voters of native extraction in North Dakota formed but 21.13 per cent of the total number of possible voters; in Minnesota they constituted but 23.05 per cent, and in Wisconsin, 22.26 per cent. In each of these cases more than three-fourths of the voting strength of the state was of foreign extraction.

The following table shows the percentage of the potential voters contained in each geographical division of the United States contrasted with the corresponding percentage of the total population:

GEOGRAPHICAL DIVISIONS.	Potential voters.	Population.
	Per cent.	Per cent.
The United States	100.00	100.00
North Atlantic	29.84	27.79
South Atlantic	11.90	14.15
North Central	36.62	35.71
South Central	14.83	17.52
Western	6.81	4.83

As in the case of the potential militia, it is seen that in the northern and western states the percentage of potential voters in 1890 was disproportionately large as compared with the total population, while the reverse was the case in the southern states.

CONJUGAL CONDITION.

Statistics regarding the conjugal condition of the people of the United States are presented in this report for the first time as a part of the United States census. In the Ninth and Tenth censuses the material for preparing similar statistics was obtained by the enumerators, but means were not at hand for its compilation. The discussion of the subject is, therefore, necessarily confined to the figures of the present census.

These figures present simply the status of the population on June 1, 1890. They give only the number and percentage of the single, married, widowed, and divorced on that date. They take no account of the widowed and divorced who have remarried.

Of the entire population of the United States in June, 1890, very nearly three-fifths, or 59.29 per cent, were single, a little more than one-third, or 35.66 per cent, were married, not quite one-twentieth, or 4.74 per cent, were widowed, while but one-fifth of 1 per cent were divorced. The proportion of the population whose conjugal condition was unknown is too small to materially affect the figures, and for this reason it is eliminated from the discussion of the results. In considering the statistics of conjugal condition as applied to the whole population, it should be remembered that children as well as adults are included, and that for this reason there is a very much larger proportion of single persons among the population than of married, widowed, or divorced persons. The number and percentage of each class in the aggregate and by sex are shown by the following table:

CONJUGAL CONDITION.	AGGREGATE.		MALES.		FEMALES.	
	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.
The United States	62,622,250	100.00	32,067,880	100.00	30,554,370	100.00
Single	37,129,564	59.29	19,945,576	62.20	17,183,988	56.24
Married	22,331,424	35.66	11,205,228	34.94	11,126,196	36.41
Widowed	2,970,052	4.74	815,437	2.54	2,154,615	7.05
Divorced	120,996	0.20	49,101	0.15	71,895	0.24
Unknown	70,214	0.11	52,538	0.17	17,676	0.06

Considering briefly the results regarding the conjugal condition of males and females, respectively, it appears that of the 32,067,880 males in the country, 62.20 per cent were single, 34.94 per cent were married, 2.54 per cent were widowed, and 0.15 per cent were divorced. The total number of females in the country was less than that of the males, being 30,554,370, of whom 56.24 per cent were single. This proportion, it will be noted, is considerably less than that of the males. The percentage of married females was 36.41, which is greater than that of married males. The widowed females constituted 7.05 per cent of the total number of females, or nearly three times the percentage of widowed males, showing that a greater proportion of widowers remarry than of widows. The divorced women constituted 0.24 per cent, or considerably more than the percentage of divorced males. This indicates that divorced men have remarried to a greater extent than divorced women.

Of the total population in 1890, the males constituted 51.21 per cent and the females 48.79 per cent. Of all the single persons, the single males constituted 53.72 per cent and the single females 46.28 per cent; of all the married persons, the married males constituted 50.18 per cent and the married females 49.82 per cent. The percentage of widowed females of all the widowed was very much more than that of widowed males, or 72.54 for widowed females and 27.46 for widowed males. The divorced females constituted 59.42 per cent of all the divorced persons as against 40.58 per cent of divorced males. Of all the persons whose conjugal condition was unknown, 74.83 per cent were males and 25.17 per cent females.

Classification by general nativity and color is in a measure a classification by station in life, and the results derived from it throw much light upon the conjugal condition of social classes. The native white of native parentage form the highest class in the community, as indicated by education, occupation, and freedom from criminality and pauperism. The native white of foreign parentage occupy a middle position in this regard, while the foreign white in the north and the negro in the south occupy the lowest position in the scale. The ranks of unskilled labor are supplied mainly from these classes. The differences in conjugal condition among these classes are shown by the table on the following page.

CONJUGAL CONDITION.	WHITE.		NATIVE WHITE— NATIVE PARENTS.		NATIVE WHITE— FOREIGN PARENTS.		FOREIGN WHITE.		COLORED. (a)		PERSONS OF NEGRO DESCENT.

Unknown.....	54,893	0.10	35,587	0.10	3,052	0.02	16,254	0.18	15,321	0.20	9,501	0.13

a Persons of negro descent, Chinese, Japanese, and civilized Indians.

Classifying the population by color, it appears that of the total number of white 58.84 per cent were single, 36.23 per cent were married, 4.64 per cent were widowed, and 0.19 per cent were divorced.

The white element comprises three distinct classes, whose conjugal conditions differ widely, namely, native white of native parentage, native white of foreign parentage, and foreign white. Of the native white of native parentage, the percentages were as follows: single, 59.76 per cent; married, 35.40 per cent; widowed, 4.52 per cent, and divorced, 0.22 per cent, while among the native white of foreign parentage the percentages were: single, 76.77 per cent; married, 21.47 per cent; widowed, 1.63 per cent, and divorced, 0.11 per cent. The proportion of single persons among the native white of foreign parentage was very much larger than among the native white of native parentage, while conversely the proportion of married, widowed, and divorced persons was much smaller. This result is due to the fact that a large proportion of white persons of native birth but foreign parentage consisted of children. The entire native white element, classified according to conjugal condition, shows the following percentages: single, 64.02 per cent; married, 31.91 per cent; widowed, 3.80 per cent, and divorced, 0.19 per cent.

The foreign white element shows the following percentages: single, 32.76 per cent; married, 57.95 per cent; widowed, 8.91 per cent, and divorced, 0.20 per cent. Thus the proportions of single and married were nearly reversed in the native and foreign white elements. The reason for the great disproportion between married and single of the foreign white element suggests itself at once. It is that our immigrants are largely of mature age and that a considerable proportion of them are married.

Of the negro element, the percentages were as follows: single, 62.51 per cent; married, 31.64 per cent; widowed, 5.51 per cent, and divorced, 0.21 per cent. Thus it appears that the proportion of the single was much greater among the negro element than among the white, the proportion of married correspondingly less, of widowed somewhat greater, and of divorced persons practically the same.

The proportions among the colored element as a whole vary but little from those just stated for the negro element, which constitutes practically all the colored, except in a few states in the Western division where the Chinese and civilized Indians are more numerous.

The differences in conjugal condition between the sexes when classified according to general nativity and color are shown by the following table:

CONJUGAL CONDITION.	WHITE.		NATIVE WHITE— NATIVE PARENTS.		NATIVE WHITE— FOREIGN PARENTS.		FOREIGN WHITE.		PERSONS OF NEGRO DESCENT.	
	Males.	Females.	Males.	Females.	Males.	Females.	Males.	Females.	Males.	Females.
	Per cent.	Per cent.	Per cent.	Per cent.	Per cent.	Per cent.	Per cent.	Per cent.	Per cent.	Per cent.
Single	61.71	55.82	62.68	56.74	79.77	73.74	37.18	27.51	65.73	59.31
Married.....	35.43	37.07	34.51	36.32	19.23	23.73	57.57	58.40	31.55	31.72
Widowed	2.56	6.84	2.48	6.64	0.89	2.37	4.81	13.79	2.46	8.55
Divorced	0.15	0.23	0.17	0.26	0.08	0.14	0.19	0.21	0.14	0.29
Unknown.....	0.15	0.04	0.16	0.04	0.03	0.02	0.25	0.09	0.12	0.13

The proportion of single males exceeds the proportion of single females in each element of the population. This is particularly noticeable regarding the foreign white, where the percentage of single males was 37.18 and of single females 27.51. This difference is due to the large immigration during the past decade, the greater part of which was comprised of adult males.

As regards the married, the proportions vary but slightly, the greatest difference being in the native white of foreign parentage, where 19.23 per cent of the males were married as compared with 23.73 per cent of females married.

As regards the widowed, greater differences in the proportions are noticeable, particularly among the foreign white and persons of negro descent, the percentage of widowed males among the foreign white being 4.81 and of widowed females 13.79, while for persons of negro descent the percentage of widowed males was 2.46 and of widowed females 8.55.

Of the males under 15 years, the proportion of married was inappreciable, while of the females under 15, about 1 in every 10,000 was married. For the ages from 15 to 19, only 0.52 per cent of the males were married and 9.49 per cent of the females. Among those 20 years of age and upward the proportion of the married increased with great rapidity with both sexes. For the ages from 20 to 24, less than one-fifth of the males were found to be married, while of the females nearly one-half were married.

For the ages from 25 to 29, over one-half of the males and nearly three-fourths of the females were married. For the ages from 30 to 34, nearly three-fourths of the males and four-fifths of the females were married. Up to this point the proportion of married females in each age group was considerably in excess of that of males.

For the ages from 35 to 44, the proportions were practically equal, the married comprising about four-fifths of the total number for this age group. At this age the proportion of females who were married reached a maximum. Above this age the proportion of married women diminished, owing to the increased proportion of widows. From 45 to 54 years of age the married males comprised five-sixths of the whole number. In this age period the proportion of males who were married reached a maximum, and from this point diminished, owing to the increasing proportion of widowers. In this age period, also, the proportion of married females had declined to less than three-fourths of all females.

For the ages from 55 to 64, the percentage of married males had diminished to 82.34 and that of married females to 60.38. For persons 65 years of age and upward, seven-tenths of the males were found to be married, while the percentage of females was only one-half as great, or 35.35 per cent of all females of the ages stated.

The proportion of widows was greater than that of widowers at all ages. It became appreciable for the ages from 15 to 19 and increased rapidly. For females 65 years of age and upward, the proportion of widows exceeded the proportion of married women. The proportion of widowers was less than that of married men for each age period considered.

The table on the following page shows the percentage of single, married, widowed, and divorced males and females for each element of the population, subdivided by age periods.

CONJUGAL CONDITION.

Contrasting the white with the negro race, it is seen in the first place that the latter married earlier and that a greater proportion were married. The proportion of widowed was also greater among the negroes.

Contrasting the native white of native parentage with the native white of foreign parentage, it is seen that the former class married earlier in life, and that a much greater proportion of them were married at all ages. In the latter class there was, as a rule, a greater proportion of widowed than in the former class.

The statistics relating to white persons of foreign birth when compared with those relating to the native white of native parentage show that the latter married younger, and at most ages in greater proportion, than the foreign white. The proportion of widowed was also greater among the foreign white.

As previously stated, persons of foreign birth are largely of marriageable age, if not already married, when they come to this country, so that the proportion of the married, widowed, and divorced among this class is very much greater than among the native population. This is also due to the very much larger number of children of native birth than of children of foreign birth that are included necessarily among the single persons, when conjugal conditions are considered without regard to age limitations. If the adult population only is considered, therefore, that is, persons 20 years of age and over, a very much fairer basis for comparison is obtained. The number and percentage of adults who were either single, married, widowed, or divorced are shown in the following table for native white persons of native parentage, native white persons of foreign parentage, foreign white persons, and persons of negro descent, respectively:

CONJUGAL CONDITION OF PERSONS 20 YEARS OF AGE AND OVER, CLASSIFIED BY SEX, GENERAL NATIVITY, AND COLOR: 1890.

From this table it appears that the married among the native white population of native parentage represented 66.96 per cent of the whole number, or approximately the same percentage as of married persons among the foreign white population (66.89), and of married persons among the negro population (67), when persons of adult age only are considered. Among the native white population of foreign parentage, the married constituted but 53.68 per cent of the whole number as against two-thirds for each of the other elements of the population.

Approximately the same conditions regarding males and females of adult age are shown by the table, except for the native white of foreign parentage, in which the married females constituted 58.76 per cent of all the females of that class as against 48.65 per cent of married males.

The following table shows, by geographical divisions, the number and percentage of persons 20 years of age and over who were either single, married, widowed, or divorced, in the aggregate and by general nativity and color:

The largest percentage of single and the smallest percentage of married adults were found in each case in the Western division. In the North Atlantic division there was a large percentage of single and a relatively small percentage of married, but not to such a marked extent as in the Western division. In the other three divisions there were no great differences in the percentages of single and married, except in the North Central division for the foreign white, a somewhat larger percentage of whom were married than in the other divisions.

These variations in the conjugal conditions of persons of adult age in the several divisions are due to the differences in the composition of the population as well as to the uneven distribution of the sexes. In the Western division the males of adult age are largely in excess, constituting 63.85 per cent of all persons 20 years of age and over in that division. This excess is mainly among the native white of native parentage and the foreign white, comprehending both classes of immigrants, those who have come from foreign countries and native born persons who have emigrated from the older and more easterly states of the Union.

The same conditions are noticed in the North Central division, the adult males exceeding the adult females in all cases, but not in the same proportions as in the Western division. Of all the persons 20 years of age and over in the North Central division, the males constituted 52.94 per cent and the females 47.06 per cent. In the South Central division the adult males exceeded the adult females, except for persons of negro descent, in which

CONJUGAL CONDITION.

clxxxv

class the adult females were slightly in excess. In the North Atlantic and South Atlantic divisions there was a small excess of females among persons 20 years of age and over, except for the foreign white, in which class the males predominated.

The following table shows, by geographical divisions, the number and percentage of single, married, widowed, and divorced males and females 20 years of age and over, classified by general nativity and color:

The 28 cities which in 1890 had 100,000 inhabitants or more represent the population living under thoroughly urban conditions. These cities, taken collectively, had a population in 1890 of 9,697,960 and constituted 15.49 per cent of the total population. Of the combined population of these cities, 5,853,007 were persons 20 years of age and over, of whom 2,952,238 were males and 2,900,769 were females. The following table shows the number of single, married, widowed, and divorced among these persons of adult age, classified by general nativity and color, together with the percentage of each class in the 28 cities contrasted with a similar percentage for the country at large:

CONJUGAL CONDITION OF PERSONS 20 YEARS OF AGE AND OVER, CLASSIFIED BY GENERAL NATIVITY, COLOR, AND SEX, IN THE 28 PRINCIPAL CITIES AND IN THE COUNTRY AT LARGE: 1890.

GENERAL NATIVITY, COLOR, SEX, AND CONJUGAL CONDITION.	Number in each class in the 28 principal cities.	Percent-age in each class in the 28 principal cities.	Percent-age in each class in the country at large.	GENERAL NATIVITY, COLOR, SEX, AND CONJUGAL CONDITION.	Number in each class in the 28 principal cities.	Percent-age in each class in the 28 principal cities.	Percent-age in each class in the country at large.

Married.....	299,143	45.60	48.65	Married.....	76,666	51.94	65.02
Widowed.....	13,327	2.03	2.25	Widowed.....	33,539	22.72	18.41
Divorced.....	889	0.13	0.20	Divorced.....	894	0.61	0.60
Unknown.....	573	0.09	0.08	Unknown.....	246	0.17	0.26

Of the adult male population in these cities, 36.22 per cent were single, 58.99 per cent were married, 4.21 per cent were widowed, and 0.16 per cent were divorced. Of the adult female population in these cities, 26.28 per cent were single, being a much smaller percentage than of males; 58.78 per cent were married, being only slightly less than that of males; 14.51 per cent were widowed, or more than three times as large as that of males, while 0.31 per cent were divorced, being almost twice as large as that of males.

Comparing these percentages with similar percentages for the adult population of the country at large, it is seen that the percentages of single are greater, of married less, of widowed less for males and greater for females, and of divorced less. The differences in the percentages of single, married, and widowed are due to the difference in the constitution of the population of the cities and of the country at large as regards the native and foreign elements, the foreign element both of birth and of parentage being much greater proportionally in the cities than in the country at large.

The difference in the proportion of divorced is not to be explained in this way, but all the evidence appears to indicate that the proportion of divorced persons in the cities was less than that in the country at large.

Of the native white of native parentage, it appears that the percentage of single persons, both male and female, was greater in these cities than in the country at large, and the percentage of married less. Of the native white of foreign parentage, the percentage of single in the cities was more than in the country at large, and the percentage of married persons less, showing that whatever the effect of urban life may be upon the native white of native parentage, that effect is apparent, but to a less extent, upon the native white of foreign parentage.

Among the foreign white the percentages of single and of married in the cities and in the country at large differ with the sex. Of the males the percentage of single persons was less and that of married persons greater in the cities, while of the females the percentage of single persons was greater and that of married less.

The foregoing tables and discussion rest upon comparisons of the single, married, widowed, and divorced with the total number in each class, and the results are largely dependent upon the character of the population making up that class. This variation in the composition of each class, particularly in the case of the native white of foreign parentage and the foreign white, affects the results, especially regarding divorce, very markedly. A fairer measure of the extent to which divorce is prevalent is afforded by the following table, which gives, by geographical divisions, the proportion of divorced persons with reference to the number of married persons:

GEOGRAPHICAL DIVISIONS.	Aggregate population.	Native white—native parents.	Native white—foreign parents.	Foreign white.	Persons of negro descent.
The United States	0.54	0.61	0.50	0.34	0.67
North Atlantic	0.38	0.54	0.30	0.15	0.45
South Atlantic	0.31	0.28	0.33	0.22	0.38
North Central	0.68	0.82	0.58	0.43	1.36
South Central	0.55	0.41	0.53	0.43	0.85
Western	1.13	1.29	1.21	0.92	2.45

For the United States as a whole, it is seen that for every 100 married persons among the aggregate population there were 0.54 divorced persons, that is, there was 1 divorced person to 185 married. This proportion, however, ranged in different parts of the country from 0.31 in the South Atlantic division and 0.38 in the North Atlantic division to 1.13 in the Western division. The proportion in the North Central division was considerably larger than in the South Central division.

Turning to the next column, it is seen that divorce was more common among the native white of native parentage than among the total population, the proportion to each 100 married persons being for the United States 0.61. This proportion was least in the South Atlantic division, next in the South Central division, rose to 0.54 in the North Atlantic division, and 0.82 in the North Central division, and reached a maximum in the Western division, where it was not less than 1.29.

The native white of foreign parentage show a smaller proportion of divorced, being for the United States but 0.50 as against 0.61 among the native white of native parentage. In the North Atlantic division this proportion was 0.30, in the North Central division 0.58, and in the Western division 1.21. In the south the number of this element was so small as to render the results of little importance.

The foreign white show a still smaller proportion of divorced, being for the United States but 0.34, or only a little more than half the proportion of the native white of native parentage. In the North Atlantic division this proportion was but 0.15. In the North Central division the proportion was but 0.43, and in the Western division 0.92, which figures are in strong contrast with corresponding figures for the native white of native parentage.

Among the negro population the divorced were found to be more prevalent than among any of the other classes. For the whole United States the proportion of divorced among the negro element to each 100 married was 0.67. In the South Atlantic division it was 0.38 and in the South Central division 0.85. In other sections of the country the negro element was not of sufficient importance numerically to render the results of value.

The following table shows the proportion which the total number of divorced bore to the total number of married in all cities having in 1890 a population in excess of 100,000:

CITIES.	Aggre- gate.	Native white— native parents.	Native white— foreign parents.	Foreign white	Persons of negro descent.	CITIES.	Aggre- gate.	Native white— native parents.	Native white— foreign parents.	Foreign white.	Persons of negro descent.
New York	0.16	0.38	0.18	0.11	0.18	Detroit	0.51	0.86	0.68	0.35	0.52
Chicago	0.40	0.74	0.47	0.26	1.50	Milwaukee	0.49	1.00	0.53	0.40	1.76
Philadelphia	0.31	0.47	0.35	0.13	0.35	Newark	0.18	0.25	0.21	0.11	0.61
Brooklyn	0.14	0.25	0.15	0.08	1.08	Minneapolis	0.75	1.10	0.68	0.52	1.61
St. Louis	0.57	0.77	0.56	0.42	1.08	Jersey city	0.12	0.18	0.15	0.06	0.79
Boston	0.44	0.87	0.38	0.19	0.43	Louisville	0.99	0.89	0.90	0.44	2.13
Baltimore	0.33	0.37	0.34	0.19	0.48	Omaha	0.73	1.00	0.47	0.40	1.74
San Francisco	1.05	1.93	1.30	0.73	2.10	Rochester	0.29	0.49	0.26	0.19
Cincinnati	0.43	0.72	0.46	0.24	0.71	St. Paul	0.48	0.68	0.44	0.40	1.09
Cleveland	0.59	1.05	0.70	0.37	1.51	Kansas city	0.93	0.95	0.97	0.62	1.45
Buffalo	0.21	0.34	0.26	0.15	Providence	1.00	1.80	0.65	0.35	1.54
New Orleans	0.51	0.38	0.47	0.40	0.74	Denver	0.79	0.94	0.58	0.57	1.86
Pittsburg	0.24	0.33	0.36	0.13	0.54	Indianapolis	1.26	1.44	1.10	0.55	2.35
Washington	0.58	0.63	0.64	0.49	0.53	Allegheny	0.34	0.41	0.47	0.18	0.76

Of the 28 cities named in the foregoing table, the largest proportions of divorced to married were found in San Francisco, Minneapolis, Louisville, Providence, and Indianapolis. Of the first three cities of the country, New York had the smallest proportion of divorced to married, or 0.16, as compared with 0.40 for Chicago, and 0.31 for Philadelphia.

DWELLINGS AND FAMILIES.

The total number of occupied dwellings in the United States in June, 1890, according to the returns made under the Eleventh Census, was 11,483,318; in 1880 a total of 8,955,812 dwellings was returned. A dwelling, for census purposes, means any building or place of abode in which any person was living at the time the census was taken, whether a room above a warehouse or factory, a loft above a stable, a wigwam on the outskirts of a settlement, a hotel, a boarding or lodging house, a large tenement house, or a dwelling house as ordinarily considered.

In 1860 and 1870 the total number of dwellings reported included both occupied and unoccupied dwellings, so that no analysis can be made except for 1880 and 1890.

The general increase in the number of dwellings from 1880 to 1890 for the whole country was 2,527,506, or 28.22 per cent. There has been an increase in the Western division of 73.49 per cent and in the North Central division of 35.14 per cent. The number and percentage of increase since 1880 for each geographical division are as follows:

GEOGRAPHICAL DIVISIONS.	INCREASE IN DWELLINGS, 1880 TO 1890.	
	Number.	Per cent.
The United States	2,527,506	28.22
North Atlantic	532,163	21.90
South Atlantic	242,879	17.56
North Central	1,114,752	35.14
South Central	383,615	23.63
Western	254,097	73.49

The average number of persons to a dwelling in 1890, for the United States, was 5.45 as against 5.60 in 1880 and 5.94 for the white and free colored population in 1850. For the North Atlantic division there were, on the average, 5.87 persons to a dwelling in 1890, 5.97 in 1880, and 6.21 in 1850; for the South Atlantic division, 5.45 in 1890, 5.49 in 1880, and 5.71 in 1850; for the North Central division, 5.22 in 1890, 5.47 in 1880, and 5.83 in 1850; for the South Central division, 5.47 in 1890, 5.49 in 1880, and 5.81 in 1850; for the Western division, 5.05 in 1890, 5.11 in 1880, and 4.27 in 1850. For each of the three censuses named, Massachusetts, Rhode Island, and New York were reported as having, on the average, the largest number of persons to a dwelling, being in each case more than 6 persons. In 1880 Maryland and the District of Columbia were also credited with an average of more than 6 persons.

The word family, for the purposes of the census, includes not only the normal family, as generally understood, but also all persons living alone, and all larger aggregations of people having only the tie of a common roof and table, as the inmates of hotels, hospitals, prisons, and asylums. Considered as regards great bodies of population, the presence of these large "census" families does not probably have any very appreciable effect on the average size of the family. A very good illustration of this point is afforded by the state census of Massachusetts in

1885 (a), where, after eliminating all aggregations of people which could not properly be considered as constituting a normal family, it was found that the average size of family for the state as a whole was reduced from 4.58 to 4.45, or a difference of but 0.13. For small bodies of population, as counties, cities, and towns, in which these large aggregations of people are located, the average size of family will of course be affected according to the number and size of such institutions.

According to the returns of the Eleventh Census the total number of families, as just defined, living in the United States in June, 1890, was 12,690,152, with an aggregate population of 62,622,250, or 4.93 persons, on the average, to each family. In 1880 there were returned 9,945,916 families, the average size of family at that census being 5.04 persons for the entire country, with a population of 50,155,783.

The number and percentage of increase in families during each decade since 1850, for the United States and for each geographical division, is as follows:

GEOGRAPHICAL DIVISIONS.	INCREASE IN FAMILIES.							
	1880 to 1890		1870 to 1880		1860 to 1870		1850 to 1860	
	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.
The United States	2,744,236	27.59	2,366,553	31.22	2,368,429	45.45	1,612,694	44.82
North Atlantic	688,501	22.77	526,247	21.07	449,179	21.93	465,337	29.40
South Atlantic	224,406	15.33	330,740	29.20	480,225	73.61	114,539	21.30
North Central	1,209,588	35.69	908,706	36.64	797,121	47.36	748,317	80.04
South Central	373,570	22.01	455,139	36.63	558,387	81.63	184,257	36.87
Western	248,171	66.67	145,721	64.33	83,517	58.40	100,244	234.41

As shown by the above table there has been an increase in the United States since 1880 of 2,744,236 families, or 27.59 per cent. The numerical increase from 1870 to 1880 was only slightly less than in the decade from 1860 to 1870, while the percentage of increase was about a third less, or 31.22 per cent from 1870 to 1880 as against 45.45 per cent from 1860 to 1870. The numerical increase from 1850 to 1860 was 1,612,694, and the percentage of increase 44.82, very nearly the same per cent as for 1860 to 1870.

The excess of families over dwellings in 1890, 1880, and 1850 is given in the following summary by geographical divisions:

GEOGRAPHICAL DIVISIONS.	1890		1880		1850	
	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.
The United States	1,206,834	10.51	990,104	11.06	235,903	7.02
North Atlantic	749,897	25.31	593,559	24.42	192,973	13.88
South Atlantic	61,395	3.77	79,868	5.77	9,261	1.75
North Central	311,119	7.26	216,283	6.82	23,308	2.56
South Central	63,841	3.18	73,886	4.55	9,487	1.94
Western	20,582	3.43	26,508	7.67	874	2.09

In 1890 there were in the United States 1,206,834, or 10.51 per cent, more families than dwellings, while in 1880 there was an excess of 990,104, or 11.06 per cent, and in 1850 an excess of 235,903, or 7.02 per cent. In 1880 and 1890 three-fifths and in 1850 four-fifths of this excess were comprised in the North Atlantic division. The percentages of excess for this division were also very much greater than those reported for any other division, being 25.31 in 1890, 24.42 in 1880, and 13.88 in 1850. Analyzing the results for each state comprising this division, we find that this excess was largely concentrated in the states of New York, Massachusetts, and Rhode Island, where the crowded conditions of life in cities and factory towns largely prevail. The results in detail for each state were as shown in the table on the following page.

^aCensus of Massachusetts, 1885; Population and Social Statistics, Part I, pages 49, 50.

The average number of persons to a family for the United States has steadily decreased since 1850. At that census there were, on the average, 5.55 persons to a family; in 1860 there were 5.28 persons; in 1870, 5.09 persons; in 1880, 5.04 persons, and in 1890, 4.93 persons. The decrease in the North Atlantic division has been particularly marked, the average size of family in 1890 being 4.69 as against an average in 1850 of 5.45. The greatest decrease in this division is found in Maine, the average in 1850 of 5.64 persons having been reduced to 4.40 persons in 1890. In the North Central division there has also been a considerable decrease, or from 5.69 in 1850 to 4.86 in 1890. In Ohio there has been a decrease in the average size of family since 1850 of 1 person and in Indiana of 1.07 persons. In Nebraska, North Dakota, South Dakota, and Kansas there has been, on the other hand, an increase in the average size of family since 1860, the first census in which they appear.

This is also largely true of the states and territories comprising the Western division, the general average for the division being 4.88 persons in 1890 as against 4.18 persons in 1850. In the newly settled territories the average size of family is small at first, but increases steadily as settlement goes on. When the population becomes more or less urban in character the maximum is reached, and a constantly receding average is likely to be shown at each census thereafter. This is now the case in all the older states, except the more southern, where the colored element is large. In these states, although there has been a decrease in 1890 as compared with 1850, there has been a general increase since 1870. For instance, in the South Atlantic division the average size of family in Virginia has increased from 5.29 in 1870 to 5.44 in 1890; in North Carolina from 5.20 to 5.27; in South Carolina from 4.67 to 5.16; in Georgia from 4.98 to 5.22, and in Florida from 4.77 to 4.89, although there has been a slight decrease in the latter state since 1880. In the South Central division similar increases are shown, as in Alabama from 4.92 in 1870 to 5.27 in 1890; in Mississippi from 4.96 to 5.35, and in Louisiana from 4.60 to 5.22. In Texas and Arkansas increases are also noticed, due partly to the greatly accelerated increase in population since 1870. The average size of family for Oklahoma, just opened for settlement, is small.

The tendency to decrease in the average size of family in thickly settled communities is shown in the table on the following page, which gives for the 124 cities having 25,000 inhabitants and upward in 1890 the total number of dwellings and families, the average number of persons to a dwelling and to a family, and for 95 of these cities comparisons as to the average number with similar results for 1880. The figures for 1880 are taken from a table in the printed report of that census, giving for 100 principal cities statistics as to dwellings and families. Of the cities named in this table, five are not included among the cities having in 1890 a population of 25,000 or more.

DWELLINGS AND FAMILIES.

With few exceptions, these cities show a decrease in the average size of family since 1880, the exceptions being mainly in the south and west. In New York city the average size of family has decreased from 4.96 in 1880 to 4.84 in 1890, and the average number of persons to a dwelling increased from 16.37 in 1880 to 18.52 in 1890. For Brooklyn there has been a decrease in the average size of family from 4.92 to 4.72, but an increase in the average number of persons to a dwelling from 9.11 to 9.80. Similar results are also shown for Jersey city, Newark, and Paterson. Trenton and Elizabeth show large decreases in the average size of family, and also decreases in the average number of persons to a dwelling. Long Island city in 1890 had, on the average, 4.87 persons to a family and 7.65 persons to a dwelling.

The average size of family for Chicago has decreased from 5.19 to 4.99, and the average number of persons to a dwelling has increased from 8.24 to 8.60. Philadelphia shows a slight decrease in both the average number of persons to a family and to a dwelling. Similar deductions concerning the other large cities are obtainable from the table and need not be mentioned in detail.

The following summary shows for each number of persons as classified, the percentage of the total number of dwellings in 1890, and the percentage which the population represented by each classified number is of the total population of the United States and of each geographical division, respectively:

GEOGRAPHICAL DIVISIONS.	PERSONS TO A DWELLING.							
	1 person.		2 to 6 persons.		7 to 10 persons.		11 persons and over.	
	Per cent of dwellings.	Per cent of population.	Per cent of dwellings.	Per cent of population.	Per cent of dwellings.	Per cent of population.	Per cent of dwellings.	Per cent of population.
The United States.....	3.22	0.59	68.79	50.77	23.04	35.05	4.35	13.59
North Atlantic.....	2.43	0.41	69.18	46.90	21.31	29.27	7.08	23.42
South Atlantic.....	3.16	0.58	65.51	49.03	27.88	41.68	3.45	8.71
North Central.....	3.05	0.58	71.63	55.31	21.90	33.66	3.42	10.45
South Central.....	2.77	0.50	65.52	48.99	28.45	42.41	3.26	8.10
Western.....	10.08	2.00	66.36	51.14	20.02	32.34	3.54	14.52

Briefly analyzed, this table shows that the number of dwellings having only 1 person represented 3.22 per cent of the whole number of dwellings in the United States, while the population of such dwellings was but 0.59 per cent of the total population. The same general results are noticed for each geographical division except the Western, where 10.08 per cent of the dwellings had but 1 person, and represented 2 per cent of the total population of that division. Dwellings containing from 2 to 6 persons, for the United States, represented over two-thirds of all the dwellings and about one-half of the whole population. Dwellings containing more than 10 persons represented 4.35 per cent of all dwellings and 13.59 per cent of the total population.

Similar results for the 28 cities having in 1890 a population of 100,000 or more are as follows:

CITIES.	PERSONS TO A DWELLING.							
	1 person.		2 to 6 persons.		7 to 10 persons.		11 persons and over.	
	Per cent of dwellings.	Per cent of population.	Per cent of dwellings.	Per cent of population.	Per cent of dwellings.	Per cent of population.	Per cent of dwellings.	Per cent of population.

In New York city there were in June, 1890, out of a total of 81,828 occupied dwellings, 41,059, or 50.18 per cent, which contained from 1 to 10 persons, and 40,769, or 49.82 per cent, which contained more than 10 persons. The population represented by dwellings in New York city having 10 persons or less was 250,002, or 16.50 per cent only, while the population represented by dwellings having more than 10 occupants was 1,265,299, or 83.50 per

cent of its entire population. As already stated, for the United States as a whole, only 4.35 per cent of the dwellings contained more than 10 persons, and their occupants represented but 13.59 per cent of the total population. In Chicago there were 96,493 dwellings, or 75.46 per cent of the whole, which contained from 1 to 10 persons, and 31,378, or 24.54 per cent, which contained more than 10 persons. The total population of Chicago was about evenly divided between the two classes of dwellings, 558,927, or 50.82 per cent, being in dwellings having from 1 to 10 occupants, and 540,923, or 49.18 per cent, in dwellings containing more than 10 persons. In Philadelphia, the third city having 1,000,000 inhabitants, a widely different condition of affairs is apparent. Out of a total of 187,052 dwellings, which was more than twice the number of dwellings in New York city and about one-half again as many as in Chicago, 178,839, or 95.61 per cent, contained 10 persons or less, and 8,213, or 4.39 per cent only, more than 10 persons. In Philadelphia dwellings with 10 persons or less contained 87.21 per cent of its total population, or 913,076 out of a total of 1,046,964, leaving only 12.79 per cent of population, or 133,888 in number, for dwellings having more than 10 occupants. In Brooklyn 56.65 per cent of the population lived in dwellings having more than 10 occupants, in St. Louis 36.26 per cent, in Boston 47.80 per cent, in Baltimore 14.14 per cent, in Cincinnati 51.52 per cent, in Buffalo 30.02 per cent, in Newark 40.01 per cent, in Jersey city 49.41 per cent, and in Providence 37.76 per cent.

Taking the 12 cities just named and analyzing further the figures concerning persons in dwellings having more than 10 occupants, the following table is obtained, which shows the number and percentage of dwellings having from 1 to 10 persons, from 11 to 15 persons, from 16 to 20 persons, and 21 persons and over, together with the population, by number and percentage, contained in such dwellings:

CITIES.	Total dwellings.	DWELLINGS WITH—				Total population.	POPULATION OF DWELLINGS WITH—			
		1 to 10 persons.	11 to 15 persons.	16 to 20 persons.	21 persons and over.		1 to 10 persons.	11 to 15 persons.	16 to 20 persons.	21 persons and over.

Providence.....	100.00	81.41	12.85	3.81	1.93	100.00	62.24	21.37	8.00	7.49

From this table it is seen that in New York city 23,596 dwellings, or 28.83 per cent of all the dwellings, had more than 20 persons to each dwelling, and contained in the aggregate 1,010,786 persons, or 66.70 per cent of its total population. Of this number of dwellings, it has been found, by a special tally for New York city, that 8,313 contained from 21 to 30 persons, 9,350 from 31 to 50 persons, 5,460 from 51 to 100 persons, and 473 over 100 persons. In Brooklyn 25.70 per cent, in Jersey city 23.53 per cent, and in Cincinnati 21.92 per cent of the total population lived in dwellings containing more than 20 persons. The percentage of population living in dwellings with more than 20 persons to a dwelling in Chicago was 16.63, in St. Louis 10.14, in Boston 13.93, in Buffalo 8.09, in Newark 10.25, and in Providence 7.49. In Philadelphia only 3.41 per cent and in Baltimore but 2.56 per cent of the population were contained in dwellings with more than 20 persons.

Considering persons to a family in 1890 for each geographical division, according to the number of families and population represented by each classified number of persons, the following results are obtained:

GEOGRAPHICAL DIVISIONS.	PERSONS TO A FAMILY.							
	1 person.		2 to 6 persons.		7 to 10 persons.		11 persons and over.	
	Per cent of families.	Per cent of population.	Per cent of families.	Per cent of population.	Per cent of families.	Per cent of population.	Per cent of families.	Per cent of population.
The United States.....	3.64	0.74	73.33	58.46	20.96	34.15	2.07	6.65
North Atlantic.....	3.23	0.69	78.05	63.98	17.00	28.88	1.72	6.45
South Atlantic.....	3.45	0.66	67.70	51.78	26.16	40.50	2.69	7.06
North Central.....	3.43	0.71	74.96	60.95	19.84	32.53	1.77	5.81
South Central.....	3.00	0.57	67.40	51.33	26.97	41.39	2.63	6.71
Western.....	10.15	2.08	68.16	53.76	18.85	31.46	2.84	12.70

Of the whole number of families in the United States, 3.64 per cent contained 1 person only, 73.33 per cent from 2 to 6 persons, 20.96 per cent from 7 to 10 persons, and 2.07 per cent 11 persons and over. Families of from 2 to 6 persons contained 58.46 per cent of the total population of the United States, families of from 7 to 10 persons 34.15 per cent, and families of more than 10 persons 6.65 per cent.

Taking the 28 cities having 100,000 inhabitants or more in 1890, and analyzing the figures in the same manner as for geographical divisions, we have the following table of percentages:

CITIES.	PERSONS TO A FAMILY.							
	1 person.		2 to 6 persons.		7 to 10 persons.		11 persons and over.	
	Per cent of families.	Per cent of population.	Per cent of families.	Per cent of population.	Per cent of families.	Per cent of population.	Per cent of families.	Per cent of population.

Providence, R. I.....	3.78	0.84	79.28	66.08	15.20	26.68	1.74	6.40
Denver, Colo.....	3.75	0.69	72.05	51.79	20.31	30.97	3.89	16.55
Indianapolis, Ind.....	3.44	0.75	80.38	66.98	14.80	25.72	1.38	6.55
Allegheny, Pa.....	1.97	0.39	74.61	58.70	21.22	33.53	2.20	7.38

In all the cities named in this table, with the single exception of Omaha, families containing from 2 to 6 persons represented between 70 and 80 per cent of all families, the percentage for the United States as a whole being 73.33. The largest percentages of families having more than 10 persons, and population represented by such families, are found in San Francisco, or 4.05 for families and 19.82 for population; in Minneapolis, or 3.75 for families and 14.11 for population; in Omaha, or 4.76 for families and 17.94 for population; in St. Paul, or 3.70 for

DWELLINGS AND FAMILIES.

CXCX

families and 13.31 for population; in Kansas city, Mo., or 2.88 for families and 11.68 for population, and in Denver, or 3.89 for families and 16.55 for population. In Boston 3.18 per cent of families had more than 10 persons to a family and represented 11.90 per cent of its population, while in Washington, D. C., 2.84 per cent of families contained more than 10 persons and represented 10.42 per cent of its population.

For the larger cities it is also important to know the number of dwellings containing 1 family, 2 families, and so on. This information was furnished in 1890, for the first time, regarding the 28 cities having upward of 100,000 inhabitants, including wards for New York, Chicago, Philadelphia, Brooklyn, St. Louis, Boston, Baltimore, and Cincinnati.

The following summary gives for each of these 28 cities the total number of dwellings and families and the average number of families to a dwelling:

CITIES.	Total dwellings.	Total families.	Average number of families to a dwelling.
New York, N. Y	81,828	312,766	3.82
Chicago, Ill	127,871	220,320	1.72
Philadelphia, Pa	187,052	205,135	1.10
Brooklyn, N. Y	82,282	170,970	2.08
St. Louis, Mo	60,937	91,756	1.51
Boston, Mass	52,669	89,716	1.70
Baltimore, Md	72,112	86,654	1.20
San Francisco, Cal	47,183	52,535	1.11
Cincinnati, Ohio	33,487	63,530	1.90
Cleveland, Ohio	43,835	53,052	1.21
Buffalo, N. Y	37,290	51,461	1.38
New Orleans, La	43,000	48,582	1.13
Pittsburg, Pa	37,725	45,584	1.21
Washington, D. C	38,798	43,967	1.13
Detroit, Mich	36,992	42,209	1.14
Milwaukee, Wis	32,888	41,519	1.26
Newark, N. J	23,296	38,906	1.67
Minneapolis, Minn	25,281	52,901	1.30
Jersey city, N. J	18,562	34,434	1.86
Louisville, Ky	24,999	32,970	1.32
Omaha, Neb	20,194	22,485	1.11
Rochester, N. Y	23,954	27,312	1.14
St. Paul, Minn	20,976	25,832	1.23
Kansas city, Mo	23,140	26,734	1.16
Providence, R. I	17,639	29,242	1.66
Denver, Colo	18,010	19,730	1.10
Indianapolis, Ind	21,138	23,063	1.09
Allegheny, Pa	16,543	20,805	1.26

In New York city and in Brooklyn there were, on the average, more than two families to a dwelling, or 3.82 families for New York and 2.08 for Brooklyn. The average number of families to a dwelling in Cincinnati was 1.90, in Chicago 1.72, in Boston 1.70, in St. Louis 1.51, in Baltimore 1.20, and in Philadelphia 1.10. Among the smaller cities the highest averages were 1.86 for Jersey city, 1.67 for Newark, and 1.66 for Providence.

Taking the results by wards for the first 8 cities named, given on pages 954-957, it is seen in New York city that in 3 wards only was the average number of families to a dwelling less than two families, and in 2 wards between two and three families; in 9 wards the average was between three and four, in 3 wards between four and five, in 2 wards between five and six, in 4 wards between six and seven, and in 1 ward it was very nearly eight, or 7.85 families to a dwelling. In other words, in 19 wards out of 24 in New York city the average number of families to a dwelling was three or more. The highest average for any one ward in Chicago was 3.04 families, in Philadelphia 1.43, in Brooklyn 3.72, in St. Louis 2.38, in Boston 2.46, in Baltimore 1.56, and in Cincinnati 3.56.

In Chicago, with 34 wards, the average number of families to a dwelling in 24 wards was between one and two, in 9 wards between two and three, and in 1 ward three or more. In Philadelphia, with 34 wards, and in Baltimore, with 22 wards, the average number of families was between one and two in each case. In Brooklyn, with 26 wards, the average number of families to a dwelling was between one and two in 11 wards, between two and three in 12 wards, and three or more in 3 wards. In Cincinnati, with 30 wards, 15 wards had an average of one to two families to a dwelling, 12 wards an average of two to three families, and 3 wards an average of three families or more. In Boston 17 wards out of 25 had an average of one to two families to a dwelling, and 8 wards an average of two to three families, while in St. Louis, out of a total of 28 wards, there were 24 wards with from one to two families to a dwelling and 4 wards with from two to three families.

The following table shows for the 28 cities the percentage of dwellings having one family, two families, and three families and over:

CITIES.	PER CENT OF DWELLINGS HAVING SPECIFIED NUMBER OF FAMILIES.			CITIES.	PER CENT OF DWELLINGS HAVING SPECIFIED NUMBER OF FAMILIES.		
	1 family.	2 families.	3 families and over.		1 family.	2 families.	3 families and over.
New York	45.95	11.28	42.77	Detroit	88.37	9.76	1.87
Chicago	60.37	22.54	17.09	Milwaukee	79.12	16.98	3.90
Philadelphia	92.83	5.73	1.44	Newark	58.82	25.72	15.46
Brooklyn	51.21	23.19	25.60	Minneapolis	76.24	20.07	3.69
St. Louis	66.94	24.14	8.92	Jersey city	60.30	20.91	18.79
Boston	59.00	23.77	17.23	Louisville	79.53	14.25	6.22
Baltimore	83.56	13.79	2.65	Omaha	91.27	7.07	1.66
San Francisco	92.02	6.09	1.89	Rochester	89.80	8.17	2.03
Cincinnati	60.63	18.55	20.82	St. Paul	82.60	14.44	2.96
Cleveland	83.91	13.19	2.90	Kansas city	88.59	8.95	2.46
Buffalo	74.58	17.83	7.59	Providence	49.63	40.78	9.59
New Orleans	91.35	6.41	2.24	Denver	92.77	5.89	1.34
Pittsburg	83.54	13.56	2.90	Indianapolis	94.01	4.75	1.24
Washington	89.24	8.95	1.81	Allegheny	78.85	17.63	3.52

Dwellings containing three families or more are generally considered as tenement houses, and include, in addition to tenement houses as ordinarily considered, high class apartment houses. This class of dwellings in New York city represented 42.77 per cent of all dwellings, while in Brooklyn 25.60 per cent of all the dwellings contained three families or more. In Cincinnati 20.82 per cent contained three families or more, in Chicago 17.09 per cent, in St. Louis 8.92 per cent, in Boston 17.23 per cent, in Newark 15.46 per cent, and in Jersey city 18.79 per cent. Dwellings with three families or more in Philadelphia represented but 1.44 per cent, and in Baltimore but 2.65 per cent, of the whole number of dwellings.

The results presented thus far concerning families in dwellings have related only to the number of dwellings containing a certain specified number of families. The following table presents, for the 28 cities having 100,000 inhabitants and upward in 1890, the distribution of families in dwellings according to specified number of families, expressed in percentages:

CITIES.	PER CENT OF FAMILIES IN DWELLINGS ACCORDING TO SPECIFIED NUMBER OF FAMILIES.			CITIES.	PER CENT OF FAMILIES IN DWELLINGS ACCORDING TO SPECIFIED NUMBER OF FAMILIES.		
	1 family.	2 families.	3 families and over.		1 family.	2 families.	3 families and over.
New York	12.02	5.90	82.08	Detroit	77.44	17.11	5.45
Chicago	35.04	26.16	38.80	Milwaukee	62.67	26.90	10.43
Philadelphia	84.64	10.46	4.90	Newark	35.22	30.80	33.98
Brooklyn	24.64	22.33	53.03	Minneapolis	58.58	30.84	10.58
St. Louis	44.46	32.07	23.47	Jersey city	32.50	22.55	44.95
Boston	34.63	27.91	37.46	Louisville	60.30	21.61	18.09
Baltimore	69.53	22.95	7.52	Omaha	81.97	12.69	5.34
San Francisco	82.65	10.93	6.42	Rochester	78.76	14.33	6.91
Cincinnati	31.96	19.55	48.49	St. Paul	67.08	23.45	9.47
Cleveland	69.33	21.79	8.88	Kansas city	76.68	15.49	7.83
Buffalo	54.05	25.84	20.11	Providence	29.94	49.20	20.86
New Orleans	80.86	11.34	7.80	Denver	84.68	10.76	4.56
Pittsburg	69.14	22.44	8.42	Indianapolis	86.16	8.72	5.12
Washington	78.75	15.79	5.46	Allegheny	62.70	28.04	9.26

In New York city only 12.02 per cent of the total number of families lived in dwellings containing but one family, 5.90 per cent only lived in dwellings containing two families each, while 82.08 per cent lived in dwellings containing three or more families. In Chicago 35.04 per cent of the families lived in dwellings by themselves, 26.16 per cent two families to a dwelling, and 38.80 per cent three families or more to a dwelling. In Philadelphia, on the other hand, 84.64 per cent of the total number of families in that city lived in dwellings by themselves, 10.46 per cent two families to a dwelling, and but 4.90 per cent in dwellings containing three families or more. Families living in dwellings containing three families or more represented in Brooklyn 53.03 per cent of the whole number of families, in St. Louis 23.47 per cent, in Boston 37.46 per cent, in Baltimore 7.52 per cent, in Cincinnati 48.49 per cent, in Buffalo 20.11 per cent, in Newark 33.98 per cent, and in Jersey city 44.95 per cent.

DWELLINGS AND FAMILIES.

The results regarding families and dwellings in New York city differ so widely in all respects from those for any other city that it is highly instructive to pursue the analysis in detail, by wards arranged geographically, as follows: wards 1, 2, and 3, representing the extreme lower end of the city; wards 4, 6, 7, 10, 14, 13, 17, and 11, representing the tenement house district on the east side below Fourteenth street; wards 5, 8, 9, and 15, representing the business districts on the west side below Fourteenth street; wards 16, 18, 20, and 21, representing partly business and residence districts between Fourteenth and Fortieth streets, and wards 22, 19, 12, 23, and 24, representing the residence districts above Fortieth street.

The following table gives for each ward and for each district, as just described, the total population, dwellings, and families, the average number of persons and families to a dwelling, and the average number of persons to a family:

WARDS.	Total population.	Total dwellings.	Total families.	Average persons to a dwelling.	Average families to a dwelling.	Average persons to a family.
New York city	1,515,301	81,828	312,766	18.52	3.82	4.84
Ward 1	11,122	736	2,277	15.11	3.09	4.88

Ward 24	20,137	3,275	3,718	6.15	1.14	5.42
Total above Fortieth street.....	707,854	44,685	144,486	15.84	3.23	4.90

Briefly analyzed, this table shows that in the lower wards of the city there were, on the average, 15.39 persons and 2.79 families to a dwelling; in the wards below East Fourteenth street, comprising the tenement house quarter, 30.27 persons and 6.39 families to a dwelling; in the wards below West Fourteenth street, 15.75 persons and 3.27 families to a dwelling; in the wards between Fourteenth and Fortieth streets, 17.57 persons and 3.62 families to a dwelling, and in the wards above Fortieth street 15.84 persons and 3.23 families to a dwelling.

PROGRESS OF THE NATION.

Considering persons to a dwelling in detail, the following table shows for each ward and for each district the number and percentage of dwellings containing 1 to 10 persons, 11 to 20 persons, and 21 persons and over, together with the number and percentage of population represented in dwellings containing such numbers of persons:

WARDS.	DWELLINGS CONTAINING—						POPULATION OF DWELLINGS CONTAINING—					
	1 to 10 persons.		11 to 20 persons.		21 persons and over.		1 to 10 persons.		11 to 20 persons.		21 persons and over.	
	Num-ber.	Per-cent.	Num-ber.	Per-cent.	Num-ber.	Per-cent.	Number.	Per-cent.	Number.	Per-cent.	Number.	Per-cent.

From this table it is seen that while for the entire city 28.83 per cent of the dwellings contained more than 20 persons, the percentage for the tenement house wards below East Fourteenth street, taken collectively, was 51.34; for wards 10 and 11 the percentages were 57.49 and 57.75, respectively. For these same wards combined, dwellings containing more than 20 persons represented 82.97 per cent of their total population. In the other districts of the city the percentage of population in dwellings with 21 persons or more ranged from very nearly 50 to upward of 70, except in the extreme northern wards, being 22.75 per cent for ward 23 and 6.41 per cent for ward 24; in ward 2 also, a small ward at the lower end of the city, the percentage was only 39.18.

DWELLINGS AND FAMILIES.

cxcix

The following table gives the results in detail by wards, classified as to the percentage of dwellings having one family, two families, three to five families, six to nine families, and ten families and over:

WARDS.	PER CENT OF DWELLINGS HAVING SPECIFIED NUMBER OF FAMILIES.				
	1 family.	2 families.	3 to 5 families.	6 to 9 families.	10 families and over.
New York city	45.95	11.28	19.56	12.61	10.60
Ward 1	60.06	10.73	12.77	8.56	7.88
Ward 2	82.98	10.64	4.25	2.13
Ward 3	60.10	15.15	15.66	5.56	3.53
Total lower end	62.16	11.58	12.55	7.39	6.32
Ward 4	32.00	16.28	22.75	12.69	16.28
Ward 6	36.30	8.77	20.65	16.06	18.22
Ward 7	19.02	16.19	32.47	13.96	18.36
Ward 10	19.79	11.43	18.98	13.90	35.90
Ward 14	27.03	11.35	19.80	13.79	28.03

Ward 17	20.95	9.92	23.34	19.49	26.30
Ward 11	10.92	9.12	33.50	23.25	23.21
Total below East Fourteenth street	19.99	11.57	26.21	17.49	24.74
Ward 5	35.13	17.12	26.43	13.36	7.96
Ward 8	25.76	19.78	35.82	11.39	7.25
Ward 9	35.28	21.20	28.68	7.98	6.86
Ward 15	60.18	12.47	17.38	6.56	3.41
Total below West Fourteenth street	39.12	18.45	27.37	8.85	6.21
Ward 16	45.49	12.82	25.74	9.52	6.43
Ward 18	56.24	4.48	16.27	12.72	10.29
Ward 20	28.31	12.80	29.97	15.54	13.38
Ward 21	57.58	7.97	16.79	10.92	6.74
Total Fourteenth to Fortieth street	46.37	9.60	22.35	12.32	9.36
Ward 22	46.18	7.09	18.52	14.16	14.05
Ward 19	50.25	8.37	16.78	14.24	10.36
Ward 12	51.86	9.48	17.16	14.88	6.62
Ward 23	60.86	22.73	11.63	4.25	0.53
Ward 24	90.05	7.66	2.14	0.09	0.06
Total above Fortieth street	54.48	10.48	15.42	12.01	7.61

Dwellings containing ten families or more represented 24.74 per cent of all the dwellings in the wards on the east side below Fourteenth street, the highest percentage for any ward being 35.90 for ward 10. In the remaining districts the percentage of dwellings having ten families or more did not exceed 10 per cent in any case, although it was a trifle more than 10 per cent in wards 18 and 19, 13.38 per cent in ward 20, and 14.05 per cent in ward 22.

PROGRESS OF THE NATION.

The percentage of families in dwellings according to specified number of families for each ward and district in New York city is as follows:

WARDS.	PER CENT OF FAMILIES IN DWELLINGS ACCORDING TO SPECIFIED NUMBER OF FAMILIES.				
	1 family.	2 families.	3 to 5 families.	6 to 9 families.	10 families and over.
New York city	12.02	5.90	19.27	24.21	38.60
Ward 1	19.41	6.94	15.90	19.98	37.77
Ward 2	61.91	15.87	10.32	11.90
Ward 3	25.59	12.90	25.16	16.13	20.22
Total lower end	22.28	8.30	17.16	19.00	33.26
Ward 4	6.50	6.62	17.49	18.87	50.52
Ward 6	6.60	3.19	14.45	21.23	54.53
Ward 7	3.47	5.91	21.99	18.77	49.86
Ward 10	2.52	2.91	9.13	13.22	72.22
Ward 14	4.18	3.51	11.81	15.65	64.85
Ward 13	2.30	3.74	15.93	19.10	58.93
Ward 17	3.26	3.09	13.95	22.63	57.07
Ward 11	1.62	2.71	19.07	25.29	51.31
Total below East Fourteenth street	3.13	3.62	15.58	20.24	57.43
Ward 5	9.43	9.19	26.44	25.72	29.22
Ward 8	6.70	10.29	34.25	21.12	27.64
Ward 9	10.55	12.67	30.74	17.19	28.85
Ward 15	24.65	10.22	26.09	19.28	19.76
Total below West Fourteenth street	11.95	11.28	30.41	19.41	26.95
Ward 16	14.18	7.99	29.95	21.16	26.72
Ward 18	15.80	2.51	17.24	25.96	38.49
Ward 20	6.20	5.61	24.40	24.52	39.27
Ward 21	19.01	5.26	21.28	25.82	28.63
Total Fourteenth to Fortieth street	12.80	5.30	23.17	24.48	34.25
Ward 22	10.80	3.32	16.39	24.51	44.98
Ward 19	13.40	4.46	17.15	23.21	36.78
Ward 12	15.67	5.73	19.96	33.21	25.43
Ward 23	33.08	24.71	22.46	16.16	3.59
Ward 24	79.32	13.50	6.02	0.59	0.57
Total above Fortieth street	16.85	6.48	18.08	27.43	31.16

In the tenement house district on the east side 3.13 per cent only of families lived in dwellings by themselves, 3.62 per cent lived two families to a dwelling, 15.58 per cent three to five families to a dwelling, 20.24 per cent six to nine families to a dwelling, and 57.43 per cent ten families and upward to a dwelling. In the remaining districts from one-fourth to one-third of the families lived in dwellings containing ten families or more.

INDIAN POPULATION.

The whole number of Indians in the United States, exclusive of Alaska, in 1890 was 248,253. Of this number, 58,806 were returned as "civilized Indians" and included in the general enumeration of population, while 189,447 were enumerated in the Indian territory and on Indian reservations under a special provision of the census law. There were also enumerated in the Indian territory and on Indian reservations 117,368 white persons, 18,636 negroes, and 13 Chinese, making a total of 325,464 persons in all, who were not included in the general enumeration. Detailed statements concerning the number and condition of Indians and other persons living in the Indian territory and on Indian reservations in 1890 are contained in the special report on Indians.

ALASKA.

The information obtained in 1890 concerning Alaska was obtained under a special provision of the census law and is printed as a separate report. For convenience, the statistics regarding population are briefly summarized.

For the purposes of enumeration and investigation in 1890 Alaska was divided into 7 districts, based chiefly upon the geographical divisions of the territory.

The First, or Southeastern, district comprised the coast and islands from the British Columbian boundary, latitude 54° 40', northward and westward to Mount St. Elias.

The Second, or Kadiak, district embraced the territory lying between the North Pacific and the coast range of mountains from Mount St. Elias to Chignik bay, in the Alaskan peninsula, and the adjoining islands, including the Kadiak group.

The Third, or Unalaska, district included the almost continuous chain of islands from the Shumagin group to Attu, our ultimate west, and the south coast of the Alaskan peninsula from Chignik bay to Issanak strait, including also the Pribilof or Seal islands.

The Fourth, or Nushagak, district covered the region drained by the rivers emptying into the Bering sea and Bristol bay between Port Haiden and Cape Newenham, with adjoining islands.

The Fifth, or Kuskokwim, district consisted of the whole region drained by the river Kuskokwim and the flat lake country lying between its mouth and Capes Rumiantzof and Vancouver, with the adjoining island of Nunivak.

The Sixth, or Yukon, district comprised the territory drained by the Yukon and its tributaries from the British American boundary westward.

The Seventh, or Arctic, district had for its southern boundary the watershed between the Yukon basin and the Arctic, and it embraced the north shores of Norton sound, Bering strait, Kotzebue sound, and our whole Arctic coast, with the islands of King (or Ukivok) and St. Lawrence.

The population of each district, as above described, was in 1890 as follows:

	NUMBER.
The territory	32,052
First, or Southeastern, district.....	8,038
Second, or Kadiak, district	6,112
Third, or Unalaska, district.....	2,361
Fourth, or Nushagak, district.....	2,726
Fifth, or Kuskokwim, district.....	5,681
Sixth, or Yukon, district.....	3,912
Seventh, or Arctic, district.....	3,222

As shown by the above statement, the whole number of persons enumerated in Alaska in 1890, and who were not included as a part of the general enumeration, was 32,052. Of this number, 19,248 were males and 12,804 were females. The native born numbered 15,381 as against 16,671 foreign born. Subdivided by color, there were 4,298 white persons, mostly males; 23,531 Indians, including all the native tribes in Alaska; 2,288 Mongolians, all males; 1,823 persons of mixed origin, that is, a class formed by the descendants of intermarriage between Russians and natives, who, under the Russian régime, were invested with special privilèges as "colonial citizens", and 112 persons classified in the report as "All others".

The Indian population of Alaska, classified according to linguistic stocks, in 1890 was as follows:

LINGUISTIC STOCKS.	Number.	Per cent.
Total	23,531	100.00
Eskimauan (Eskimo)	14,012	59.55
Koluschan (Thlingit).....	4,737	20.13
Athapascan	3,439	14.61
Chimmesyan (Tsimpsean).....	952	4.05
Skittagetan (Haida).....	291	1.66

The Indians in 1890 embraced 73.42 per cent of the total population of Alaska.

Of the total white population of Alaska in 1890, 2,277 were temporary and 2,021 permanent inhabitants. Under existing circumstances a large proportion of the white residents must be transient, chiefly those employed in the salmon canneries and in the whaling industry. It should be understood, also, that the Mongolian element is largely transient, though probably about the same numbers are employed from year to year.

FORM OF SCHEDULE AND METHOD OF TABULATION.

In the Tenth Census the inquiries made regarding each person enumerated were printed on large sheets of 4 pages each, containing spaces for 50 names to a page, or 200 names to a sheet. Whether for purposes of enumeration, examination, or tabulation, these large schedules were somewhat cumbersome, and for this reason and in order to test the use of a prior schedule, especially in large cities, the form of the population schedule was changed and the family schedule, that is, a separate schedule for each family, without regard to the number of persons in the family, was adopted for use in the Eleventh Census. (For form of schedule see pages cciv and ccv.) By the use of the prior schedule is meant the distribution of the family schedule prior to the enumeration, for the purpose of having the answers to the inquiries filled in by the heads or responsible members of the families themselves, ready for collection by the census enumerators when they called. This was tried by way of experiment in several instances, but to what extent the prior schedule aided enumerators in their work can not be definitely stated. The impression is, however, that in places where it can be used intelligently and methodically the work is facilitated and the accuracy of the enumeration increased. Of course a family schedule meant many million separate schedules to be filled and greatly increased the bulk of paper to be used, but with ample accommodations and improved methods of tabulation they were easily handled.

For purposes of detailed tabulation the information concerning each person enumerated in the census was transferred by punching to a separate card, and then the punched card took the place of the schedule. The use of the punched card was the outcome of the adoption, after a preliminary test, of the electric tabulating system invented by Mr. Herman Hollerith, it having been generally acknowledged that if all the information on the population schedule was to be aggregated and in the form most desirable for presentation, some system of tabulation other than the old hand-tally method was absolutely essential. Heretofore the amount of such information which could be evolved from the schedules by the use of hand-tally sheets had been limited, especially in the degree of complexity of the results thus obtained. It had not been possible to secure related statistics to any considerable extent, but with the improved methods of tabulation used in the present census the most complicated forms of tabulation were made as readily and probably at no greater expense than the much simpler ones secured by the hand-tally methods in vogue in previous censuses. This point becomes at once apparent when the amount of information obtained at a single handling of the punched cards is considered. For instance, the first count of the punched cards made on the tabulating machines gave for each enumeration district a primary classification of the population according to native white of native parentage, native white of foreign parentage, foreign white, native colored, and foreign colored, each of these primary classifications being in turn subdivided by sex and the following age periods: less than 1 year; 1 to 4 years; 5 to 9 years; 10 to 17 years; 18 to 20 years; 21 to 44 years; 45 years and upward. For all adult males of foreign birth a classification was also made as to the number who had been naturalized, had taken out naturalization papers, or who were aliens, besides a separate classification as to the number of aliens who could not speak the English language. In the same way the native and foreign colored were separately tabulated according to the number of blacks, mulattoes, quadroons, octoroons, Chinese, Japanese, and civilized Indians. For all householders, also, a separate classification was made as to the number who hired or owned their homes or farms, and if owned, the number of homes or farms that were free or mortgaged. The results of this first or preliminary count are shown by states, counties, cities, and wards of cities, and comprehend not only the simple statements as to the number of males and females, the number of native born and foreign born, the number of whites, negroes of pure or mixed blood, Chinese, Japanese, and civilized Indians, but the various combinations of facts relating to sex, color, and general nativity for each of the principal divisions of the population as regards age, including children less than 1 year of age and children under 5 years of age, of special importance for purposes of vital statistics; the number of children between 5 and 20 years of age, or the ages covering most school attendants; the number of males between the ages of 18 and 44 years, or the militia ages; the number of males 21 years of age and upward, representing the potential voting ages, and the number of persons 45 years of age and upward.

The second count of the punched cards gave for each of the five primary divisions of the population the number of single, married, widowed, and divorced, subdivided by sex, 10 age periods, and 14 birthplaces of mothers, the classification for birthplaces of mothers being needed especially for vital statistics purposes. Incidental to this count by conjugal condition, the foreign white and foreign colored were further distributed without regard to sex, according to country of birth in detail, the alien element, that is, foreign born males of voting age who had not been naturalized, being also separately counted according to country of birth and according to the number of years they had been in the United States.

The third count of the punched cards gave a classification of the population, and for each of its 5 primary divisions, first, by sex according to single years of age; second, without regard to sex, according to native or foreign parentage, giving the number having one or both parents born in each of 18 specified foreign countries; third, by 18 birthplaces of mothers according to quinquennial age periods, for vital statistics purposes; fourth, for persons of school age according to months of school attendance, and for all persons 10 years of age and over according to their ability to read and write, and to speak the English language, each of these classes being

distinguished by sex and quinquennial age periods; fifth, for the surviving veterans of the civil war, both United States and Confederate, and for the widows of such as have died, a classification according to quinquennial age periods. In connection with this count there was obtained for the three elements of the native born, namely, native white of native parentage, native white of foreign parentage, and native colored, a distribution, without regard to sex, according to state or territory of birth, those born and living in the state where enumerated being further distinguished by sex and quinquennial age periods.

The fourth count of the punched cards comprehended all persons 10 years of age and over engaged in remunerative occupations, subdivided by sex, general nativity, color, 10 age periods, conjugal condition, months unemployed during the census year, 14 countries of birth, 14 birthplaces of mothers, illiteracy, inability to speak English, ownership of homes or farms, and whether veterans of the late war, United States or Confederate, or widows of such as have died.

Besides the information obtained by the successive sorting and counting of the punched cards, as enumerated above, there was also obtained by the first "rough" count, as it was termed, made direct from the schedules, a classification of the population according to the number of persons to a dwelling and to a family. This preliminary count of the population, upon which the new apportionment was based, was completed early in the fall of 1890 and the official returns of the population were ready on the convening of Congress in December of that year. This count gave not only the aggregate population by states, counties, cities, wards of cities, villages, towns, townships, and all minor civil divisions for which population was separately returned by the census enumerators, but also presented for each of the specified areas the total number of dwellings and families, the number of persons to a dwelling and to a family in detail, the average number of persons to a dwelling and to a family, and for the larger cities a special classification of the number of families to a dwelling.

26	Is the home you live in hired, or is it owned by the head or by a member of the family?					
27	If owned by head or member of family, is the home free from mortgage incumbrance?					
28	If the head of family is a farmer, is the farm which he cultivates hired, or is it owned by him or by a member of his family?					
29	If owned by head or member of family, is the farm free from mortgage incumbrance?					
30	If the home or farm is owned by head or member of family, and mortgaged, give the post-office address of owner.					

TO ENUMERATORS: The inquiries numbered 26 to 30, inclusive, must be made concerning each family and each farm visited.

APPORTIONMENTS.

APPORTIONMENTS

APPORTIONMENTS.

As the primary object of the census is to secure an accurate count of the people for the purpose of fixing the membership of the House of Representatives of Congress and apportioning the same among the several states, a limited space in this report is devoted to a brief statement of all acts relating to the various apportionments, together with tables showing in a concise form the total membership of the House and the number of representatives assigned to each of the states under each act from the formation of the government to the present time.

The following table shows what may be termed the constitutional population of the United States in 1890, the number of representatives prior to apportionment, and the number of representatives provided for by the act which passed the House of Representatives December 17, 1890, and the Senate January 29, 1891, and which was signed by the President February 7, 1891:

STATES.	Constitu- tional popula- tion.	Member- ship prior to appor- tionment.	Member- ship after appor- tionment.	STATES.	Constitu- tional popula- tion.	Member- ship prior to appor- tionment.	Member- ship after appor- tionment.

				Wyoming.....	60,705	1	1

The apportionment of representatives in Congress, according to the enumeration of the First, Second, Third, Fourth, Fifth, and Sixth Censuses, was made by Congress. At these apportionments Congress set the ratio of population for each member allowed, and also at each apportionment fixed the total number of members of the House.

The law for the taking of the Seventh Census was intended to be permanent (act of May 23, 1850, 9 Stats., 428). It presented a rule of apportionment, fixed the number of members of the House at 233, and directed the Secretary of the Interior thereafter to make the apportionment to each state.

The apportionment under the Eighth Census was made under this law, but Congress on March 4, 1862, fixed the total number of members at 241, and the Secretary of the Interior apportioned the new quotas to the states.

The ninth and tenth apportionments were made by Congress; hence it may be assumed that the power conferred on the Secretary of the Interior by the act of May 23, 1850, was repealed by implication. Heretofore all apportionments have been made at the long sessions of Congress, being the second session after each census year, but early enough for the election of representatives to the next ensuing Congress.

The apportionment under the Eleventh Census was relatively about two years earlier than any before made.

APPORTIONMENTS.

APPORTIONMENTS.

The Constitution, Article I, section 2, made the first apportionment, fixing the number of representatives for each state on the ratio of 1 representative for every 30,000 persons, in all 65 representatives.

FIRST CENSUS.

The act of April 14, 1792 (1 Stats., 253), on the ratio of 1 member for 33,000 persons, fixed the number of representatives for each state (in all 105) to take effect after March 3, 1793.

SECOND CENSUS.

The act of January 14, 1802 (2 Stats., 128), on the ratio of 1 member for 33,000 persons, fixed the number of representatives for each state (in all 141) to take effect after March 3, 1803.

THIRD CENSUS.

The act of December 21, 1811 (2 Stats., 669), on the ratio of 1 member for 35,000 persons, fixed the number of representatives for each state (181 in all) to take effect after March 3, 1813.

FOURTH CENSUS.

The act of March 7, 1822 (3 Stats., 651), on the ratio of 1 member for 40,000 persons, fixed the number of representatives for each state (in all 213) to take effect after March 3, 1823.

FIFTH CENSUS.

The act of May 22, 1832 (4 Stats., 516), on the ratio of 1 representative for 47,700 persons, fixed the number of representatives for each state (240 in all) to take effect after March 3, 1833.

SIXTH CENSUS.

The act of June 25, 1842 (5 Stats., 491), on the ratio of 1 representative for 70,680 persons, fixed the number of representatives for each state (223 in all) to take effect after March 3, 1843, and the act allowed an additional representative to each such state as had a population of a fraction greater than a moiety of said ratio. This act also required that the representatives be elected in districts composed of contiguous territory.

SEVENTH CENSUS.

The Secretary of the Interior, under the provisions of the act of May 23, 1850, made the apportionment of representatives for each state, the act having limited the number of representatives to 233 after March 3, 1853, the date said apportionment took effect. That act, sections 25 and 26, prescribed the mode of ascertaining the ratio of population.

EIGHTH CENSUS.

Under the provisions of the act of May 23, 1850, the Secretary of the Interior made the apportionment. The act of March 4, 1862 (12 Stats., 353), fixed the number of representatives at 241 after March 3, 1863, the date said apportionment took effect.

NINTH CENSUS.

The act of February 2, 1872 (17 Stats., 28), fixed the membership of the House after March 3, 1873, at 283 members, and apportioned them among the states.

TENTH CENSUS.

The act of February 25, 1882 (22 Stats., 5), fixed the membership of the House after March 3, 1883, at 325 members, and apportioned them among the states. This act provided for members from new states, and for elections at large for states cut down in number of representatives, or at large for members a state may have gained by the apportionment.

ELEVENTH CENSUS.

The act of February 7, 1891, fixed the apportionment upon a basis of 356 members, who were apportioned by Congress.

APPORTIONMENTS.

The following tables bring together the facts regarding all the apportionments in a very complete and concise form:

NUMBER OF REPRESENTATIVES AS APPORTIONED ON THE ENUMERATION OF THE SEVERAL CENSUSES, COMPOSING THE MEMBERSHIP OF THE NATIONAL HOUSE OF REPRESENTATIVES AT THE CLOSE OF THE SESSION OF CONGRESS PRIOR TO THE OPERATION OF EACH APPORTIONMENT.

APPORTIONMENT UPON THE ENUMERATION OF THE SEVERAL CENSUSES.			MEMBERSHIP AT CLOSE OF SESSION BEFORE NEW ACT TAKES EFFECT.			Assigned after apportionment.

d North and South Dakota combined. Apportioning the population of Dakota territory in 1880, North Dakota (36,909 in 1880) increased 145,810, or 395.05 per cent, and South Dakota (98,268 in 1880) increased 230,540, or 234.60 per cent.

e Dakota territory.

STATISTICS OF POPULATION.

TABLE 3.—DENSITY OF POPULATION OF STATES AND TERRITORIES AT EACH CENSUS: 1790 TO 1890.

[The figures of this table have been obtained by dividing the population by the total land area (square miles). In computing density the areas of Alaska and Indian territory are not considered.]

a Taken from Finney in 1884.

b Taken from Lyon prior to 1870.

c Part taken to form Finney and part given to Hodgeman in 1884.

d Name changed from McGhee prior to 1870.

e Kiowa organized from parts of Comanche and Edwards in 1886.

f Name changed from Hunter prior to 1870.

g Organized from Arapahoe and Sequoyah and parts of Buffalo, Foote, Grant, and Kearny in 1884; parts taken to form Garfield, Grant, Gray, Haskell, and Kearny in 1887.

h Part taken to form Finney and parts given to Ford and Hodgeman in 1884.

i Part of Foote annexed in 1884; part taken to form Gray in 1887.

j Organized from parts of Finney and Hodgeman in 1887.

k Name changed from Davis in 1889.

l Part taken to form Finney and part given to Hamilton in 1884; reorganized from parts of the same in 1887.

m Organized from parts of Finney, Ford, and Hodgeman in 1887.

n Stanton and parts of Grant and Kearny annexed in 1884; parts taken to form Grant, Kearny, and Stanton in 1887.

o Organized from part of Finney in 1887.

p Parts of Buffalo and Foote annexed in 1884; parts taken to form Garfield and Gray in 1887.

q Name changed from Godfrey prior to 1870; taken to form Chautauqua and Elk in 1875.

r Logan, formerly St. John, organized from part of Wallace in 1881.

s Part given to Greenwood and part taken to form Lyon prior to 1870.

t Name changed from Lykins prior to 1870.

u Name changed from Kansas in 1886.

v Name changed from Dorn prior to 1870.

w Name changed to Billings in 1873; changed back to Norton in 1874.

x Given to Chase prior to 1870.

y Given to Hamilton in 1884 and reorganized from part of the same in 1887.

TABLE 4.—POPULATION OF STATES AND TERRITORIES BY COUNTIES, AT EACH CENSUS: 1790 TO 1890—Continued.

a Part taken to form Clay in 1862 and remainder given to Wilkin in 1868.
 b Given to Pine.
 c Hubbard organized from part of Cass in 1883.
 d Name changed from Pembina in 1878.
 e Given to Swift and other counties in 1870.
 f No records by which to account for its disappearance.
 g Given to Anoka in 1870.

h Given to Kandiyohi in 1870.
 i Norman organized from part of Polk in 1881.
 j Taken to form Bigstone, Chippewa, Pope, and Stevens.
 k No returns.
 l Name changed from Toombs to Andy Johnson and from Andy Johnson to Wilkin in 1868.

TABLE 4.—POPULATION OF STATES AND TERRITORIES BY COUNTIES, AT EACH CENSUS: 1790 TO 1890—Continued.

MISSISSIPPI.

[Organized as a territory April 7, 1798. Admitted as a state December 10, 1817.]

- a Formed from unorganized territory in 1887.
- b Parts of Cheyenne taken to form Banner, Deuel, Kimball, and Scotts Bluff in 1888.
- c Organized from unorganized territory in 1885.
- d Organized from part of Dawes in 1886.
- e Unorganized territory in 1890; formerly part of Dakota; given to Nebraska since 1880; organized as Boyd, March 20, 1891.
- f Organized from unorganized territory in 1883; parts taken to form Keyapaha and Rock in 1884 and 1888, respectively.
- g Given to Saunders in 1862.
- h Organized from unorganized territory in 1883.
- i Organized from part of Sioux in 1885; part taken to form Boxbutte in 1886.
- j No records by which to account for its disappearance.
- k Garfield organized from part of Wheeler in 1884.
- l Never had a legal existence.

- m Organized from unorganized territory in 1889.
- n Given to Jefferson in 1866.
- o Perkins organized from part of Keith in 1887.
- p Organized from part of Brown in 1884.
- q Name changed from L'Eau qui Court in 1873.
- r Madison and Platte reported together and credited to Platte in 1860.
- s Population returned as for Pawnee Indian reservation in 1870.
- t Organized from part of Brown in 1888.
- u Organized from part of Sioux in 1885.
- v Parts taken to form Dawes and Sheridan in 1885.
- w Organized from unorganized territory in 1887.
- x Name changed from Blackbird in 1889.
- y Taken to form Brown, Cherry, and Loup in 1883, Blaine and Logan in 1885, Arthur, Grant, McPherson, and Thomas in 1887, and Hooker in 1889.

NEVADA.

[Organized as a territory March 2, 1861. Admitted as a state October 31, 1864.]

McIntosh (r)	3,248					Unorganized territory (ii)	511				
						Unorganized territory				jj1,192	

a Total population for Dakota territory in 1880, 135,177; 1870, 14,181; 1860, 4,837. The population of the remaining counties in 1880 and 1870 is given under South Dakota; no county organization in 1860.

b Formed from part of Howard in 1883; no returns.
 c Organized from parts of De Smet and Ramsey in 1883.
 d Bowman formed from part of Billings in 1883.
 e Walette taken to form Buford and Flannery in 1883.
 f Towner organized from parts of Cavalier and Rolette in 1883.
 g Church formed from parts of McHenry and Sheridan in 1887.
 h Name changed from French in 1875; taken to form Benson and Pierce in 1883 and 1887, respectively.
 i Dickey organized from part of Lamoure in 1881.
 j Formed from part of Howard in 1883.
 k Organized from part of Foster in 1885.
 l Parts taken to form Griggs in 1881, Nelson in 1883, and Eddy in 1885.
 m Formed from part of Stevens in 1885.
 n Parts taken to form Walsh in 1881 and Nelson in 1883.
 o Organized from parts of Foster and Traill in 1881; part taken to form Steele in 1883.
 p Hettinger formed from part of Stark in 1883.
 q Taken to form Alred, Dunn, McKenzie, and Wallace in 1883.

r McIntosh organized from part of Logan in 1883.
 s Organized from part of Stevens in 1883.
 t Oliver formed from part of Mercer in 1885.
 u Organized from parts of Foster, Grand Forks, and Ramsey in 1883.
 v Part taken to form Walsh in 1881.
 w Organized from part of De Smet in 1887.
 x Parts taken to form Benson and Nelson in 1883.
 y Part taken to form Sargent in 1883.
 z Part taken to form Ward in 1885.
 aa Part of Sisseton and Wahpeton Indian reservation annexed since 1880.
 bb Organized from parts of Ransom county and Sisseton and Wahpeton Indian reservation in 1883.
 cc Organized from parts of Griggs and Traill in 1883.
 dd Parts taken to form McLean in 1883 and Garfield and Ward in 1885.
 ee Parts taken to form Griggs in 1881 and Steele in 1883.
 ff Organized from parts of Grand Forks and Pembina in 1881.
 gg Organized from parts of Renville and Stevens in 1885.
 hh Name changed from Gingras in 1881.
 ii Formerly part of Boreman, Dakota territory.
 jj Of the population of the unorganized territory in Dakota in 1870 (2,091), 1,192 is estimated to have been within the present limits of North Dakota.

TABLE 4.—POPULATION OF STATES AND TERRITORIES BY COUNTIES, AT EACH CENSUS: 1790 TO 1890—Continued.

Curry	1,709	1,208	504	393	Sherman (i)	1,792
Douglas	11,864	9,506	6,066	3,203	Tillamook	2,932	970	408	95
Gilliam (d)	3,600	Umatilla (j)	13,381	9,607	2,916
Grant (e)	5,080	4,303	2,251	Union (l)	12,044	6,650	2,552
Harney (e)	2,559	Wallowa (l)	3,661
Jackson (f)	11,455	8,154	4,778	3,736	Wasco (m)	9,183	11,120	2,509	1,689
Josephine (f)	4,878	2,485	1,204	1,623	Washington	11,972	7,082	4,261	2,801	2,652
Klamath (g)	2,444	Yamhill	10,692	7,945	5,012	3,245	1,512

a Malheur organized from part of Baker in 1887.

b Now in the state of Washington.

c Organized from part of Wasco in 1882.

d Organized from parts of Umatilla and Wasco in 1885.

e Harney organized from part of Grant in 1889.

f Part of Jackson annexed to Josephine since 1880.

g Klamath organized from part of Lake in 1882.

h Organized from part of Umatilla in 1885.

i Organized from part of Wasco in 1889.

j Parts taken to form Gilliam and Morrow in 1885.

k Given to Douglas in 1862.

l Wallowa organized from part of Union in 1887.

m Parts taken to form Crook in 1882, Gilliam in 1885, and Sherman in 1889.

PENNSYLVANIA.

[One of the original 13 states.]

.....	Harding (m)	167

a Total population for Dakota territory in 1880, 135,177; 1870, 14,181; 1860, 4,837. The population of the remaining counties in 1880 and 1870 is given under North Dakota; no county organization in 1860.

b Part taken to form Jerauld in 1883.

c No returns.

d Organized from part of Harding and unorganized territory in 1883.

e Formed from unorganized territory in 1883.

f Part of Sisseton and Wahpeton Indian reservation annexed since 1880.

g Fall River organized from part of Custer in 1883.

h Part taken to form Marshall in 1885; part of Sisseton and Wahpeton Indian reservation annexed since 1880.

i Part taken to form Scobey in 1883.

j Name changed from Rusk in 1883; no returns in 1890.

k Formed from part of Harding in 1883.

l Part taken to form Roberts in 1883; part of Sisseton and Wahpeton Indian reservation annexed since 1880.

m Formed from unorganized territory in 1881; parts taken to form Dutte and Ewing in 1883.

a No returns.

b Divided into numerous counties in 1876.

c Formed from part of Presidio in 1887.

d Part taken to form Mills in 1887.

e Cameron, Starr, and Webb reported together and credited to Cameron in 1850.

f Name changed to Davis in 1862; changed back to Cass in 1871.

g Organized from part of Tom Green in 1889.

h Formed from part of Tom Green in 1887.

i Parts taken to form Valverde in 1885 and Schleicher and Sutton in 1887.

j No records by which to account for its disappearance.

k Part taken to form Valverde in 1885.

a Organized from part of Tom Green in 1885.

b Organized from parts of Brown, Comanche, Hamilton, and Lampasas in 1887.

c Not separately returned.

d Parts taken to form Reeves in 1883 and Valverde in 1885.

e Parts taken to form Brewster, Buchel, Foley, and Jeff Davis in 1887.

f Organized from part of Pecos in 1883.

g Formed from part of Crockett in 1887.

h Cameron, Starr, and Webb reported together and credited to Cameron in 1850.

i Name changed from Buchanan in 1892.

j No returns.

k Parts taken to form Midland in 1885, Crane, Ector, Glasscock, Loving, Upton, Ward, and Winkler in 1887, and Coke and Irion in 1889.

l Formed from part of Tom Green in 1887.

m Organized from parts of Crockett, Kinney, and Pecos in 1885.

UTAH.

[Organized as a territory September 9, 1850.]

a West Virginia set off from Virginia December 31, 1862. For the population of the remaining counties in Virginia for 1790 to 1860, inclusive, see West Virginia.

b Includes 48 persons not credited to any county.

c For population previous to 1850, see District of Columbia, of which it then formed a part.

d Amelia and Nottoway reported together and credited to Amelia in 1790.

e Dickenson organized from parts of Buchanan, Russell, and Wise in 1830.

f Petersburg city, formerly in Chesterfield, Dinwiddie, and Prince George, now independent.

TABLE 4.—POPULATION OF STATES AND TERRITORIES BY COUNTIES, AT EACH CENSUS: 1790 TO 1890—Continued.

a Organized from parts of Marinette and Oconto in 1832.

b Organized from parts of Langlade and Oconto in 1835.

c Then in the territory of Michigan.

d Name changed from New in 1830; part taken to form Forest in 1835; part of Lincoln annexed since 1830.

e Part taken to form Oneida in 1835; part given to Langlade since 1830.

f Part taken to form Florence in 1832.

g Parts taken to form Florence in 1832 and Forest in 1835.

h Organized from part of Lincoln in 1835.

i Organized from parts of Ashland and Chippewa in 1833.

j Name changed from Shawanaw in 1864.

k Name changed from Bad Ax in 1862.

l Organized from part of Burnett in 1833.

WYOMING.

[Organized as a territory July 25, 1868. Admitted as a state July 10, 1890.]

MINOR CIVIL DIVISIONS.

TABLE 5.—POPULATION OF STATES AND TERRITORIES BY MINOR CIVIL DIVISIONS:
1880 AND 1890.

ALBION CEMENT CO. CEMENT

THE ALBION CEMENT CO. CEMENT IS A PORTLAND CEMENT OF SUPERIOR QUALITY
MADE IN ALABAMA

EXPLANATIONS REGARDING THE MINOR CIVIL DIVISIONS UTILIZED BY THE CENSUS.

The states and territories in the United States are composed of counties (called parishes in Louisiana) and a small number of cities which are either independent of counties or which embrace counties within their limits, as in the case of New York, N. Y., Philadelphia, Pa., San Francisco, Cal., and New Orleans, La. The cities of Baltimore, Md., and St. Louis, Mo., are as independent of the surrounding or adjacent counties as one county is of another, each being wholly independent of the adjacent county of the same name. In the state of Virginia cities have a varying degree of independence of the county. These cities, except Petersburg, have been returned as parts of the counties in which they are geographically situated, their population being also separately shown.

The counties are essentially uniform in their relations to the states, but a great diversity exists in the relations between counties and the "Minor civil divisions" into which they are subdivided.

By the term "Minor civil divisions" is to be understood the principal divisions which were taken to make up the counties in some states, and into which counties in most states have been subdivided for election or magisterial purposes, or for purposes of police or sanitary administration or municipal government. These, as they were found and reported by the census enumerators, are variously named, and are of varied geographic limit, and of as marked political or incorporated powers. They are named beats, or supervisors' districts, in one state, and are known in others as commissioners' precincts, election precincts, justices' precincts, voting precincts, townships, judicial townships, towns, hundreds, militia districts, magisterial districts, civil districts, police jury wards, plantations, locations, grants, purchases, and gores. Besides these there are municipal incorporations known as cities, towns, villages, and boroughs, each of which in certain cases embraces one or more of the above named minor civil divisions or parts thereof, while some are independent of them, and others are contained in and are parts of them for all purposes of government or for sanitary and police purposes.

In the states organized from the public domain and surveyed under the national public land system it has been found convenient to a great extent to take the geographical congressional township, 6 miles square, as a basis of town or township organization.

In the District of Columbia the county and municipal organizations were abandoned in 1874 and the cities of Washington and Georgetown and the county of Washington thereupon ceased to exist. The District is now governed as a unit (by a Board of Commissioners appointed by the President of the United States), except that certain laws passed before the present form of government was established have not been adjusted to present conditions, and they are applicable only in portions of the District more or less distinct at the time of their enactment.

Alaska still remains without county divisions, and Indian territory is anomalous in its status. The censuses of these two territories were separate from that of the general population, and they are not included in the following analysis of population by minor civil divisions.

The conditions of the secondary political organizations within the states are constantly changing as new counties are created or others are organized out of old ones or consolidations take place, especially in those portions of the recently admitted states not yet fully occupied by settlers.

The compact masses of population that receive special authority for organizing as chartered cities, towns, villages, or boroughs, increase in number every year with the growth of communities, requiring special provisions for police and sanitary regulations.

In New England, and in a portion of the country strongly affected by New England migration, the town has many of the powers which in the south pertain to the county. To a great extent the citizens of a chartered municipality within such town continue to participate in town government and are subject to town regulations, while in some states the city is more or less independent of the town, as previously stated.

The usual subdivision of the city is the ward, a geographical division for representative, executive, or magisterial purposes, but without any legislative functions except such as are shared by other wards in the city council or board of aldermen.

A fuller explanation than this of the municipal relations of the civil divisions of the states and territories would be beyond the limits of the present purpose, which is to make clear what units were utilized for census purposes in the several states and territories, and for what units population has been separately returned by the census enumerators, as set forth in the following summary:

ALABAMA.—The county subdivisions are known as election precincts. The municipal incorporations are included in one or more precincts, or are coextensive with them. The city of Mobile forms an exception to this rule.

ARKANSAS.—The primary divisions of the county are known as townships. The municipal incorporations form essential parts of the townships, and the people participate in the township government.

CALIFORNIA.—The counties are divided into what are known as judicial townships. San Bernardino and San Diego counties are returned by precincts. The municipal incorporations are included in one or more townships or precincts, or are coextensive with them. San Francisco city and San Francisco county are coextensive.

COLORADO.—The counties are divided into election precincts. The cities, towns, and incorporated villages form essential parts of the precincts, or comprise one or more of them.

CONNECTICUT.—The county division is the town. Cities usually form parts of the towns in which they are located. Hartford city and Hartford town are coextensive. Another class of municipal incorporations, known as boroughs, are also comprised in the towns in which they are located.

DELAWARE.—The divisions of the counties are known as hundreds. Incorporated cities and towns form constituent parts of the hundreds in which they are located.

DISTRICT OF COLUMBIA.—The county and municipal organizations were abandoned in 1874, and the cities of Washington and Georgetown and the county of Washington thereupon ceased to exist, except in the operation of certain laws not yet harmonized with present conditions.

FLORIDA.—The county subdivisions are known as election precincts. The municipal incorporations are included in the precincts, or each comprises one or more precincts.

GEORGIA.—The county subdivisions are known as militia districts. The municipal incorporations are comprised in the militia districts, or each embraces one or more districts.

IDAHO.—The counties are divided into precincts. The cities, towns, and chartered villages form essential parts of the precincts.

ILLINOIS.—There are 87 counties divided into townships, and 15 counties (mainly in the southern part) divided into precincts. Municipal incorporations, whether cities, towns, or villages, are included within these townships and precincts. The people in the municipalities in townships participate in the township government.

INDIANA.—County subdivisions are known as townships. The municipal incorporations are embraced in the townships, and the people of the municipalities participate in township government.

IOWA.—The counties are subdivided into townships. Incorporated cities, towns, and villages form constituent parts of the townships in which they are located. A number of cities and towns are coextensive with the townships and the governments are coexistent.

KANSAS.—The county subdivisions are townships. Cities of the first and second classes, that is, those having a population of more than 2,000, are independent of the townships and form principal divisions of the counties. The people in cities of the third class, which correspond to incorporated villages in most states, participate in the government of the townships in which they are located.

KENTUCKY.—Counties are divided into magisterial districts and voting precincts. Municipal incorporations, with few exceptions, are included in the districts or precincts, or comprise one or more of them.

LOUISIANA.—The subdivisions of the parish are known as police jury wards. The municipal incorporations are included in these wards and form parts of them, except in the case of Orleans parish, which is coextensive with the city of New Orleans.

MAINE.—The usual divisions of the county are known as towns; besides these there are cities, which are, in effect, merely towns under a slightly different form of government, and plantations, gores, and townships. The last three classes are, as a rule, sparsely settled; the form of government granted to plantations is very simple and gives to the organization but little power. Gores and townships are, as a rule, unincorporated, and are simply tracts of land laid off by the state authorities.

MARYLAND.—The divisions of the county are known as election districts. The whole territory of the county, regardless of municipal organizations, is divided into these subdivisions, incorporated cities and villages being included in election districts, or each comprising one or more election districts. The city of Baltimore is independent of Baltimore county, and may be regarded as forming a county by itself.

MASSACHUSETTS.—The several divisions of the county are towns and cities, the cities differing from the towns only in the character of their government.

MICHIGAN.—The divisions of the county are townships. Cities are independent of the townships, while the people in incorporated villages participate in the township government.

MINNESOTA.—The divisions of the county are townships, although they are frequently known as towns. Cities, and villages, with few exceptions, and the boroughs are independent of the townships and form principal divisions of the counties. Municipalities are chartered by special act.

MISSISSIPPI.—The county subdivisions are known as beats, or supervisors' districts. The municipal incorporations are comprised within one or more beats, or are coextensive with them. Many of the larger beats are divided into two or more election precincts.

MISSOURI.—The divisions of the county are known as townships. The municipal incorporations are included within the townships. In 1876 the city of St. Louis was taken out of the county of the same name; it now maintains municipal organization independent of the county.

MONTANA.—The counties are divided into townships. Under the law, townships may be divided into election precincts. Cities, towns, and incorporated villages are included in the townships and precincts, or are each coextensive with one or more of them.

NEBRASKA.—The county subdivisions are townships or election precincts. Most of the cities and all the towns and incorporated villages are comprised within one or more townships or election precincts, or are coextensive with them. Precincts may be formed in this state with municipal functions, embracing as many as four sparsely populated congressional townships.

NEVADA.—The counties are divided into election precincts. Cities and incorporated villages are included within the election precincts, or each may include one or more precincts.

NEW HAMPSHIRE.—The usual divisions of the county are known as towns; besides these there are cities which are, in effect, merely towns under a slightly different form of government, and locations, grants, purchases, and townships. The last four classes are, as a rule, unorganized, and are simply tracts of land laid off by the state authorities.

NEW JERSEY.—Townships are the divisions of the county. Cities are, as a rule, independent of the townships. Minor municipal organizations, known as towns and boroughs, are incorporated under the state laws, and, with few exceptions, form constituent parts of townships.

NEW YORK.—The divisions of the county are known as towns. Cities and villages are incorporated, the former being independent of the towns from which they were taken, while the latter remain in the towns and form component parts of them. New York city and New York county are coextensive.

NORTH CAROLINA.—The divisions of the county are known as townships. Municipal incorporations are included within the townships and form parts of them.

NORTH DAKOTA.—In North Dakota the census returns have been largely made by townships, which are the congressional townships, or townships organized from congressional townships. Some counties have not been returned by subdivisions.

OHIO.—The counties are divided into townships. Municipal incorporations, with the exception of a few cities, are included in the townships, and the people of the municipalities participate in township government.

OREGON.—The counties are divided into election precincts. The cities, towns, and incorporated villages are comprised within the election precincts, or each may comprise one or more election precincts.

PENNSYLVANIA.—The county divisions are known as townships, cities, and boroughs. The boroughs are incorporated towns or villages. Villages, before incorporation, are included in the townships. Philadelphia city and Philadelphia county are coextensive.

RHODE ISLAND.—The several divisions of the counties are towns and cities, the cities differing from the towns only in the character of their government.

SOUTH CAROLINA.—The divisions of the county are known as townships. The municipal incorporations, with the exception of Charleston, which is independent, form essential parts of the townships in which they are located.

SOUTH DAKOTA.—In South Dakota the census returns have been largely made by townships, which are the congressional townships, or townships organized from congressional townships. Some counties have not been returned by subdivisions.

TENNESSEE.—The counties are divided into civil districts. The municipal incorporations each comprise one or more civil districts or parts of civil districts.

TEXAS.—The counties are divided into, first, four commissioners' precincts; second, into a certain number of justices' precincts; and third, into a certain, and generally much larger, number of election precincts. The population of counties has been returned by justices' precincts, except for Bandera county, which is given by commissioners' precincts. The municipal incorporations form parts of the commissioners' precincts or justices' precincts, or are coextensive with the justices' precincts.

VERMONT.—The ordinary civil divisions of the county are towns and cities. There are also several unorganized subdivisions known as gores. Under the laws of this state villages are incorporated, forming constituent parts of the towns in which they are located.

VIRGINIA.—The usual subdivisions of the counties are called magisterial districts, a division which corresponds very nearly to a township of the middle states. Cities (with some exceptions), towns, and villages form essential parts of magisterial districts. Some cities maintain municipal organization independent of counties, but Petersburg is the only one officially reported to this office.

WASHINGTON.—The counties are divided into precincts, and municipalities form component parts of these precincts, or each municipality may comprise one or more precincts.

WEST VIRGINIA.—The counties are divided into magisterial districts, as in Virginia. Cities, towns, and villages form component parts of magisterial districts.

WISCONSIN.—The divisions of the county are towns. Most of the cities and several of the incorporated villages are independent of the towns and form principal divisions of the counties. In most of the villages, however, and several of the cities, the people still participate in the government of the towns in which they are located.

WYOMING.—The counties are divided into precincts, and municipalities form component parts of these precincts, or each municipality may comprise one or more precincts.

THE TERRITORIES.—The counties in the territories of Arizona, New Mexico, Oklahoma, and Utah are divided into election precincts. Municipal incorporations are comprised in these precincts, or each comprises one or more precincts.

In the annexed table giving the population of states and territories by minor civil divisions, the principal divisions of the county, that is, townships, towns, election precincts, and others, are set out to the marginal line, while secondary subdivisions, that is, those which form parts of the principal divisions, are indented one space. In some instances where the principal divisions were not separately returned by the enumerators and secondary subdivisions only are shown, such secondary subdivisions are also set out to the marginal line.

TABLE 5.—POPULATION OF STATES AND TERRITORIES BY MINOR CIVIL DIVISIONS: 1880 AND 1890.

[The spelling of the names of counties and civil divisions is in accordance with the decisions of the United States board on geographic names.]

ALABAMA.

MINOR CIVIL DIVISIONS.	1890	1880	MINOR CIVIL DIVISIONS.	1890	1880
AUTAUGA COUNTY (a)	13,330	13,108	BLOUNT COUNTY—Continued.

New England town		201	No. 349. (z), including Eastman town		4,298	1,387
No. 1038. Rising Fawn, including Rising Fawn town		1,278	1,128	Eastman town		1,682
Rising Fawn town		927	827	No. 364. Mitchell		815	508
No. 1088. Egypt		265	249	No. 384. Eddins		975	730
No. 1129. Upper		290	405	No. 1254. (z), including Chauncey village		1,861	774
No. 1214. Mountain		91	130	Chauncey village		633
No. 1222. Coal, including Coal town		1,496	937	No. 1438. Clark (aa)		157
Coal town		360	DOOLY COUNTY		18,146	12,420
DAWSON COUNTY		5,612	5,837	No. 516 (bb)		2,702	1,968
No. 320. Sanford		519	523	No. 535 (cc), including Vienna town		2,930	2,241
No. 330. Amicolola		445	399	Vienna town		536
No. 916. Shoal Creek		333	378	No. 585 (dd), including Unadilla village (e)		2,456	1,922
No. 931. Savannah (c)		364	412	No. 633 (ee)		945	1,177
No. 979. Gilmer Cutoff		433	402				

a Organized since 1880.

b Not separately returned in 1880.

c Returned as No. 829 in 1880.

d Part taken to form No. 1361 since 1880.

e Not separately returned.

f Part taken to form No. 1342 since 1880.

g Part taken to form No. 1392 since 1880.

h Part taken to form No. 1325 since 1880.

i Parts taken to form Nos. 1387 and 1431 since 1880.

j Organized from part of No. 914 since 1880.

k Organized from parts of Nos. 635 and 1188 since 1880.

l Organized from parts of Nos. 513, 621, 720, and 1005 since 1880; part taken to form No. 1392.

m Organized from part of No. 1046 since 1880; part taken to form No. 1431.

n Organized from parts of Nos. 694 and 1361 since 1880.

o Organized from parts of Nos. 1046 and 1387 since 1880.

p Parts taken to form Nos. 1327 and 1379 since 1880.

q Part taken to form No. 1349 since 1880.

r Part taken to form No. 1398 since 1880.

s Part taken to form No. 1327 since 1880.

t Part taken to form No. 1416 since 1880.

u Organized from parts of Nos. 531 and 572 since 1880.

v Organized from part of No. 536 since 1880.

w Organized from part of No. 531 since 1880.

x Organized from parts of Nos. 563, 637, and 683 since 1880.

y Organized from part of No. 686 since 1880.

z Part taken to form No. 1438 in 1889.

aa Organized from parts of Nos. 349 and 1254 in 1889.

bb Formerly county district No. 3.

cc Formerly county district No. 7.

dd Formerly county district No. 2.

ee Formerly county district No. 9.

MINOR CIVIL DIVISIONS.
