INTRODUCTORY REMARKS.

In the previous tables of this report only the population in 1890 of the organized states and territories, or 62,622,250 persons in all, is considered. These general tables, therefore, do not comprehend 325,464 Indians and other persons living in the Indian territory and on Indian reservations and 32,052 persons living in Alaska, these two classes having been specially enumerated under the law and forming the subjects of separate reports. Including these persons the population for the entire country in 1890 was 62,979,766.

The principal facts concerning these two classes of population are briefly summarized in the following tables.

Table 1 gives the total population of the Indian territory and Indian reservations in 1890, which was, as already stated, 325,464, comprising 189,447 Indians and 136,017 other persons, namely, 117,368 whites, 18,636 negroes, and 13 Chinese. In addition to the 189,447 Indians living in the Indian territory and on Indian reservations, there were 58,806 civilized Indians found living in the organized states and territories who were included as a part of the general population of the United States (see Tables 10 and 14, pages 397 and 401). The total Indian population in 1890 was, therefore, 248,253.

Tables 2 to 8, inclusive, give the distribution of the population of Alaska according to sex, general nativity, color, citizenship, and age periods.
