

FINANCE—AND ESTIMATE OF APPROPRIATIONS FOR 1841.

LETTER

FROM

THE SECRETARY OF THE TREASURY,

TRANSMITTING

*His annual report on the state of the finances; also an estimate of appropriations for the year 1841.*

DECEMBER 10, 1840.

Referred to the Committee of Ways and Means.

TREASURY DEPARTMENT,

December 7, 1840.

The undersigned respectfully submits to Congress the following report on the finances.

He has great pleasure in announcing that during the present year the expenditures have been still further reduced; and, though the revenue has not proved so large as usual, all the public engagements have been met with promptitude.

I. The receipts and means for 1840, exclusive of trusts and the Post Office, have been as follows:

The available balance in the Treasury on the 1st of January, 1840, is computed to have been - - - - - \$2,246,749 00

The data on which this conclusion rests, connected with the actual receipts and expenditures in 1839, and with the unavailable condition of a portion of the public funds, may be seen in the statements annexed, (A and B.)

During the first three quarters of the present year the net receipts from customs were - - - - -	\$10,689,884 78
During the same period the receipts from lands were - - - - -	2,630,217 25
Miscellaneous receipts for the same time	77,660 98
Estimated receipts for the fourth quarter from all these sources - - - - -	3,800,000 00

These make the aggregate of ordinary receipts for the year 17,197,763 01

Add the estimated receipts of principal and interest in 1840, out of what was due from former deposit banks, but not available on the 1st of January last - - - - - \$850,000 00

Add also the estimated receipts from the fourth bond of the United States Bank	\$2,500,000 00
Do. from the issue of Treasury notes, instead of others redeemed	5,440,000 00
Aggregate from these additional sources	8,790,000 00
This will make the total means in 1840, as ascertained and estimated	<u>\$28,234,512 01</u>

It is proper to remark, that about \$700,000 of the sums computed to be received within the year, from the banks above described, have not yet been ascertained to be paid; and if, contrary to expectation, there should be a failure to pay any part of them until next year; it will make a difference to that extent in the preceding results.

II. The expenditures for 1840, exclusive of trusts and the Post Office, have been as follows:

For the first three quarters: civil, diplomatic, and miscellaneous	\$4,118,248 64
For the same time, military	8,750,784 52
For the same time, naval	4,620,316 35
See particulars of them in statement annexed, (C.)	
Estimates by this department (though higher by the others) for all expenses during the fourth quarter	5,000,000 00
These make the aggregate of current expenses for the whole year	22,489,349 51
Add for funded debt and interest for that of the cities of the District of Columbia during the year, ascertained and estimated	100,000 00
Redemption of Treasury notes, including principal and interest, ascertained during the first three quarters	3,629,306 61
Estimate of notes that will be redeemed in the fourth quarter	425,000 00
This will make the aggregate of payments or expenditures of all kinds	26,643,656 12
Leaving an available balance of money in the Treasury on the 31st December, 1840, computed to be	1,590,855 89
	<u>\$28,234,512 01</u>

The funds on hand, considered not available for public purposes, at the commencement as well as close of the present year, are described particularly in the statement annexed, (B.)

Previous to the close of the year, should Congress pass any new appropriations which may be immediately expended, an additional charge to that extent will thus be imposed on 1840; and if amounting to any considerable sum, it might prudently be accompanied by some provision of new means sufficient for its payment.

### III. The condition of the public debt next demands consideration.

An exhibit of the particulars of it, whether funded or unfunded, and of the payments made within the year on account of both, is annexed, (D and E.)

Probably none of the former kind of debt exists which is due, except what has been forgotten, or the evidence of it mislaid; as all ever claimed, whether incurred in the Revolution, or since, has been promptly discharged. It is fortunate that no new debt of a permanent character has been recently created by the General Government; and the undersigned, for reasons formerly explained, which need not be here repeated, has uniformly considered it sound policy never to incur one in time of peace. But it will be recollected that Congress, by an act passed in May, 1836, engaged, under special conditions, to make payment of a debt due from the cities of the District of Columbia to certain individuals abroad.

The principal amounted to \$1,500,000; and was to be paid in yearly instalments of \$60,000 each, beginning the 1st of January, 1841. But the interest was payable quarterly, and, during the last four years, has been regularly discharged by the Treasury.

Within the present year, notice has been received from the agent of the creditors that payment of the first and subsequent instalments of the principal is desired to be made, when due; with punctuality. To insure a compliance with that wish, it will be necessary, besides meeting the interest quarterly, to advance \$60,000 of the principal at the commencement of the ensuing year; and the residue must be paid, in like amounts, annually hereafter, till the whole is discharged.

The canal stocks, assigned to secure these payments, can, by the terms of the agreement, be sold to aid in reimbursing them. But, in the first instance, the money is to be taken from the Treasury, under existing laws, which appropriate sufficient to discharge all outstanding debts; and a sale, if able to be made afterwards, must probably be at a great sacrifice. Congress may therefore, in its wisdom, think further legislation on the subject expedient.

This is all the funded debt not due, and likewise all of it not paid, except, as before explained, the inconsiderable portions never yet demanded.

In respect to the unfunded debt: such small parts as were created previous to 1837, and still remain unsatisfied, must, it is presumed, be in that condition from some accident, which has prevented a request to be made for payment.

Nor has any of it, which was incurred since, fallen due, without being discharged whenever claimed.

The whole balance of the four emissions of Treasury notes made since October, 1837, which was outstanding on the 1st instant, amounted only to \$4,433,823. This is but \$1,675,488 more than at the close of 1839, notwithstanding the great decline in our revenue since, and the unexpectedly large expenditures of old appropriations connected with the Florida war, and the further adjustment of claims in behalf of Indians.

Had these events not happened, less even than that amount of notes would have been issued, and the Treasury might, with ease, have redeemed within the year all that were outstanding.

It could have done the same, also, with most of them, had Congress, at the last session, passed the declaratory act concerning the tariff, modified the system of drawbacks to correspond with the existing duties, and adopted the propositions made for graduating the price of the public lands, as well as forming new land districts.

It must be gratifying to learn, however, that though incommoded by the failure of those measures, and the unexpected circumstances before enumerated, the department has been enabled, by other means under its control, to redeem every note presented, and to pay, with punctuality, all debts that have fallen due.

The credit of the General Government has thus been preserved so high, that, instead of sacrificing its securities at large discounts, as in this and foreign nations some have been compelled to do with public stocks, the Treasury notes have continued at par during the year, though never bearing an interest higher than  $5\frac{3}{4}$  per cent., and subject even to the stoppage of that after sixty days' notice.

In fine, on a review of the whole subject, our situation respecting a public debt of any kind will be found a most favored one. Regarded as an indication either of the good state of the national credit, or the ample resources of the General Government, or the discreet legislation relative to its fiscal concerns, it will be difficult to discover many eras more prosperous in these respects, whether in the annals of this or any other country.

IV. The exports and imports within the year ending September 30, 1840, exhibit several striking peculiarities. While the foreign commerce of the country constitutes the chief basis of the revenue of the General Government, and is indicative of the extent of our surplus produce, the statistical returns in relation to the subject must excite constant attention among statesmen and political economists as well as merchants.

The exports during the year are computed to have been \$131,571,950, (F.) This amount is quite \$10,543,534 more than in 1839, notwithstanding the reduced price of some of our great staples, and is larger than ever existed before in our history.

Of the whole exports, only \$17,809,333 were of foreign origin. This left those of domestic origin at \$113,762,617, being \$6,845,937 more than in any previous year (G.)

The imports during 1840 were about \$104,805,891: This shows the great falling off from the previous year of \$57,286,241. It furnishes, likewise, the principal explanation of the extraordinary diminution which has occurred in the revenue from customs; a diminution, however, which has been caused, in part, by evasions of the laws, new judicial constructions left uncorrected, and the payment of too large sums for bounties and drawbacks, under an omission in the existing tariff to reduce them in a ratio equal to the reduction going on in the duties.

The difference between our exports and imports has usually been in favor of the latter. Several years ago it ranged that way about seven millions of dollars annually; but, of late, the average has risen to near twenty millions annually; the excess of imports having been, in 1836 even, \$61,316,995, and in 1839 \$41,063,716. But during 1840, the extraordinary occurrence of a reverse in this state of things has taken place. Such

a circumstance as the exports at all exceeding the imports, is believed to have happened previously only six times since the constitution was adopted; and then, never to an extent beyond \$7,916,831 (F.) Now, however, without any inflation, and in some important articles under a contraction of prices, the excess of exports is not only more than ever was known before, but quite threefold greater, being computed to equal \$26,766,059.

This excess having failed to produce the usual corresponding increase of imports, but, on the contrary, having been accompanied by a diminution never previously equalled in amount, except under the influence of the embargo in 1808, the whole matter furnishes another proof of the hazardous fluctuations in the chief source of our present revenue, which Congress has been requested so repeatedly to guard against by some permanent provision.

It is also a strong illustration of the probability of the conjecture expressed in the last annual report, that the country had become alarmingly indebted abroad; in part on ordinary mercantile credit, but chiefly on stocks of corporations and States.

To meet what would soon be due for interest alone, it was then supposed would require twelve or thirteen millions of the exports; and which, in that event, would of course furnish no returns in imports. The same result must follow yearly, till the old stocks are redeemed, unless new ones can, for some time longer, be sold; and the difficulty be thus deferred, though merely at the expense of increasing the whole ultimate indebtedness.

But it is a source of great satisfaction to witness the indications which the unprecedented amount of exports, during the last four years, has given of the continued prosperity of the country.

Notwithstanding some depressions in particular branches of business, or in particular places, the general prosperity has been such as to create a large surplus of products, and to enable us to send abroad immense and increased values of them, however great the complaints have been as to low prices.

These official records are some of the most authentic tests of truth, amidst contradictory conjectures on topics like these. They show that we have been able to spare, in exports of domestic productions during the last four years, quite \$408,894,743 in value; while in no previous term of that length, since the adoption of the constitution, have they exceeded \$359,447,622. Except in the last two series of four years, they have never gone beyond \$239,576,749; or, not two-thirds as high as from 1837 to 1840. (See table for such terms, during twenty years, giving explanatory details, G.) The whole tonnage of the country has also advanced, within the four years past, more than 200,000 tons.

Seldom, indeed, if ever, has the navigating interest, one of the great exponents of our wealth and increased commerce, been so prosperous as within the last twelve months.

It is true that a portion of the increase in exports may be attributable to some alteration in the habits of the community, not connected with additional wealth.

The disposition in families to rely less on their own resources, and obtain more by means of mercantile exchanges abroad as well as at home, has, without doubt, grown more rapidly of late years than formerly, and

tended to augment both the imports and exports beyond what the real increase in the amount of products would indicate. Yet the great excess of exports during the last few years, over those of previous times, cannot all have arisen from these circumstances. Granting, however, that some of it has; the consequences to that extent, and in another view of the subject, are not so well calculated to excite gratification. The increased dependence which the change of habits, in selling and buying so much more of what is consumed, has occasioned between different countries and those engaged in different avocations, as well as the increased credit thus demanded through many new ramifications, and the greater subjection thus produced of almost every pursuit to the evils attendant on fluctuations in prices, on bank expansions, and revulsions in commerce; have probably exercised an influence on the events of the last four years not inconsiderable nor salutary. Combined with other causes, they must certainly have tended to effect a wide and unfavorable alteration in public manners; and may, in time, inflict an injury on the morals and character of the nation, which will more than counterbalance all the gains in wealth.

V. The estimates of the receipts and expenditures for 1841 next demand attention.

The actual receipts and expenditures in that year can, of course, be so regulated by Congress, through new legislation, as to reach nearly any amount it may deem proper. But the undersigned can neither increase nor diminish them; though a duty is devolved on him, in respect to the subject, while at the head of the Treasury, which he now proceeds to perform—of presenting some opinion concerning the amounts to which, under the existing laws, and the calls of the different departments, they are likely to attain.

He will further suggest any general changes which appear to him expedient, as well as any new means deemed necessary to meet all the burdens, which, it is apprehended, may be imposed.

The estimates for the ordinary receipts and expenditures in the ensuing year differ some millions from what will be actually received and expended in the present one.

It is calculated, however, that the difference will be what is always most desirable,—some increase of the receipts, and a further diminution of the expenditures.

The estimates for the latter, in the present year, were made less than those of 1839; and the results have corresponded. Indeed, it is a cause of much gratification that the expectations heretofore cherished, of materially reducing the public burdens, have been verified to so great an extent. Thus, the expenses of 1838 fell below those of 1837; while the expenses of 1839, notwithstanding the continuance of the Florida war, were nearly eight millions below those of 1838; and it is expected that the expenses of 1840 will be from two to three millions still lower, or quite ten millions less than those of 1838.

They would have been nearly twelve millions less, had not that war continued, and unusually large payments been made to Indians, under old appropriations.

It is believed that the ordinary expenses of 1841 ought to fall some millions below those in 1840; as the pensions have diminished by deaths,

fewer Indians remain to be removed, several expensive public buildings have been mostly finished, and hostilities with the Seminoles must be nearer to a close.

More details concerning the estimates for the next year will be proper, and will illustrate the correctness of some of the preceding results.

It may be stated, from the best data in possession of this department, that the receipts, under the existing laws, will probably be as follows:

From customs	-	-	-	-	-	\$19,000,000
From lands	-	-	-	-	-	3,500,000
From miscellaneous	-	-	-	-	-	80,000
Add the expected balance in the Treasury, available on the 1st of January next	-	-	-	-	-	1,580,855

The aggregate of ordinary means for the next year would then be	-	-	-	-	-	24,160,855
---	---	---	---	---	---	------------

There will be nothing more, either of principal or interest, due from banks, which is likely to be made available, except about	-	-	-	-	-	220,000
---	---	---	---	---	---	---------

A power will exist, under the act of 31st March, 1840, to issue Treasury notes till a year from its passage expires, but not to make the whole emission outstanding at any one time exceed five millions of dollars.

This will furnish additional means, equal to the computed amount which can be issued at the close of the present year, being about	-	-	-	-	-	342,618
--	---	---	---	---	---	---------

Hence, there may be added, from these several sources, so much as to make the whole means for the next year	-	-	-	-	-	24,723,473
---	---	---	---	---	---	------------

On the other hand, the expenditures for 1841, for ordinary purposes, if Congress make no reduction in the appropriations requested by the different departments, are estimated at	-	-	-	-	-	19,250,000
---	---	---	---	---	---	------------

This would leave a balance in the Treasury, at the close of the year, equal to	-	-	-	-	-	5,473,473
--	---	---	---	---	---	-----------

But certain payments must also be made on account of the funded and unfunded debt, unless Congress authorize contracts to be formed for extending the time of their payment. Thus, there will be required—

On account of the funded debt, chiefly for the cities of this District	-	-	-	-	-	\$149,200
--	---	---	---	---	---	-----------

For the redemption of Treasury notes, if all the others be issued which can be under the present law; as then the amount returned within A. D. 1841 will probably not exceed	-	-	-	-	-	4,500,000
--	---	---	---	---	---	-----------

4,649,200

Estimated balance in the Treasury at the close of the next year, after all payments whatever	-	-	-	-	-	\$824,273
--	---	---	---	---	---	-----------

Thus it will be seen that if the whole of these charges, both ordinary and extraordinary, should be required to be extinguished in 1841, the estimated means will be sufficient for that purpose, but may not, besides, leave so large a balance in the Treasury as is convenient and useful. The best mode of obviating any difficulty which might arise from that circumstance will soon be considered by itself.

For some further general view of the grounds of the estimate of the expenditures for 1841, it will be necessary to advert a few moments to the new and old appropriations from which those expenditures are to be made.

The new ones, proposed by the different departments for the service of 1841, amount to \$16,621,520 28.

Viz: Civil, diplomatic, and miscellaneous	-	-	\$3,450,740	13
Military	-	-	7,725,440	94
Naval	-	-	5,445,339	21

Besides these, certain permanent appropriations under existing laws will become chargeable on the Treasury during the next year, in sums as follows:

*For ordinary purposes.*

Military	-	-	-	-	\$864,000
----------	---	---	---	---	-----------

*For other purposes.*

Public debt, including interest and first instalment for the					
District of Columbia	-	-	-	-	149,200
Redeeming Treasury notes	-	-	-	-	4,500,000

These would make the new charges, for ordinary purposes, under both new and permanent appropriations, amount to \$17,485,520 28. But, including the public debt and the redemption of Treasury notes, these charges would be \$22,134,720 28. See all the particulars of the annual estimates for these appropriations annexed, (H.)

It will be perceived, therefore, that the aggregate of actual expenditures during 1841 has been computed to be \$1,764,480 higher than the estimated amount of new and permanent appropriations. This is done not only because some small oversights have doubtless occurred in the latter, and unavoidable omissions, as will be seen by the notes, but some new private bills, granting money, may be passed by Congress, and a greater proportion of the outstanding appropriations at the end of 1840 (though reduced as much as three or four millions less than at the end of 1839) may be expended in 1841, than will be left unexpended of the new charges imposed. These last two items are usually computed to equal each other. The departments calculate that \$6,661,123 of the old appropriations will be required to complete the purposes originally contemplated by them.

They propose to apply about \$3,749,904 of them to the service of the ensuing year, without reappropriation; and the residue, amounting to \$138,878, it is expected will go to the surplus fund. They estimate the whole of them at the close of the year to be \$10,549,905.

VI. A few more explanations of other grounds for the estimates of receipts and expenditures for the next year may be useful.

It will be noticed that the estimates for both are founded principally on the existing laws. Should Congress, therefore, alter the tariff, so as to increase or reduce the duties, the expected amount of receipts must of course be varied in that proportion.

So it must be if Congress makes any essential change in respect to the public lands, and either passes a graduation bill, and creates new land districts in which surveys are ready for large sales, as this would increase the immediate receipts; or if, on the other hand, it should distribute the proceeds of the sales among the States, as that would diminish the revenue applicable to the purposes of the General Government, and render a resort to new taxation, an increased tariff, or a loan, indispensable, to the extent of the distribution.

The estimates of the receipts from customs have been lessened somewhat, because the importation of certain articles paying a duty will, in 1841, be partially postponed to 1842, in consequence of the great reduction in the tariff on them which will take place in the latter year under the existing laws.

So have they been on account of the greater proportionate bounties and drawbacks which are now returned on several articles, and some beneficial operation anticipated from the Independent Treasury in checking speculation.

On the contrary, the revulsions in business which have occurred since the middle of 1839, and deeply affected the revenue of some other countries as well as our own, and the protracted suspension of specie payments by many of the banks, which has continued over a large part of the United States since October in that year, will probably terminate soon, by the salutary reaction of great commercial principles; and that event must be accompanied by a considerable increase of imports and duties. The amount of the latter, therefore, has been estimated higher than the actual receipts in the present year, but not so high as they were in 1839 by about two millions, nor so high as many anticipate they will be. But if the banks do not speedily resume, it is to be feared that the estimate will prove larger, instead of smaller, than events will verify.

The revenue from lands must continue to be lower under the present laws than might otherwise be expected, because that portion of the vast sales in 1835 and 1836 which were made to speculators, must for some years longer come into the market in competition with the Government; and the emigration to Texas, as well as the continuance of the suspension of specie payments by the banks over much of the west and southwest, is likely to operate injuriously somewhat longer, though probably with a force much diminished.

In respect to the estimates for expenditures, it need only be observed here, that any considerable addition made by Congress to the new appropriations called for, would require a provision of further means to meet them, corresponding in amount; and any diminution in those appropriations would also reduce, in a similar manner, the amount of means otherwise necessary.

VII. It is proper to advert next to the best mode of avoiding any inequality between the anticipated receipts and expenditures, either in 1841 or 1842.

It has already been shown that the whole amount of receipts in 1841 will probably be sufficient to discharge all ordinary expenditures, and those parts of the outstanding debt, funded or unfunded, which may become due. But the preservation of a suitable balance in the Treasury may require more than what will probably be left after satisfying other purposes. The raising of any sum for that object in 1841 could, however, be obviated by authorizing a contract to be made, under proper restrictions, extending the period of payment for a portion of the temporary liabilities falling due in that year. Yet, in the opinion of the undersigned, the best mode of providing for this case would be, without either an extension of this kind, or a loan, or a further issue of Treasury notes, or a change in the tariff; but merely by lessening the appropriations for the service of 1841 below the estimates, or by passing such declaratory clauses as to the present tariff, and such acts as to the public lands, as have heretofore been urged on the consideration of Congress.

The arguments in favor of some further diminution in our expenditures, and the general items in which the reduction is considered most compatible with the public interests, were so fully exhibited in the last two annual reports as to render a repetition of them unnecessary.

It was then believed that the laws could be altered so as to admit of safely curtailing the appropriations at once, to such an extent that the expenditures need not exceed, in the aggregate, seventeen or eighteen millions yearly. After more of the pensions terminate, and the removal of the Indians is completed, they could be beneficially contracted to even less than that amount. Such a reduction as is first adverted to seems, therefore, proper to be adopted now, since it could be effected without the probability of injury to any useful national establishment, would promote public frugality, and supersede the necessity either of higher tariffs, direct taxes, or permanent debts.

If that be not done, the secondary measures before suggested, such as a declaratory act to enforce the present tariff, a suitable modification of the drawbacks and bounties, and the passage of bills graduating the price of public lands, as well as creating some new districts for the sale of them, would be likely, if taking effect early, to yield a suitable supply in the course of the year.

It will be observed, however, that though, under either of these arrangements, enough might be obtained within the whole of 1841 for the objects contemplated, yet not a due or sufficient proportion in the first quarter; because by that time all the measures are not likely to go into full operation, nor much of the anticipated increase to happen in the actual receipts of duties under existing laws. Unusually heavy expenses will also fall on that quarter in the next year. In addition to a full portion of most of the current expenses, and the whole pension payments for the first half of the year, and one-third of a million, or more, for all the annual fishing bounties, there will be imposed on it most of the charges for the whole year connected with the session of Congress and private bills, as well as large payments for taking the census, and for the first instalment of the debt of this District; several of them as early even as the first day of January.

From these circumstances, and the considerations that all which is due from the banks may not be then paid, and that the balance in the Treasury, under the policy adopted by Congress of late years, will of necessity be small, while the fluctuations and inequalities are very great between

the receipts and expenditures in different portions of the year, to which we are constantly exposed from causes that have on former occasions been explained at length, it must be obvious that entire safety requires a conditional power to be seasonably conferred on the Executive to obtain at any time within 1841 such subsidiary means as may be needed for a few months, and as may be sufficient to enable the Treasury punctually to discharge, during that year, all the liabilities imposed by Congress.

There is another contingency under the existing laws, as to duties, which requires attention, with a view to be properly prepared for it; though legislation concerning the subject is not necessary so early as in the other case, because the event on which it depends cannot actually happen till the year 1842.

Thus the progressive reduction of the present tariff, which has been going on since 1833, will, after December, 1841, take effect to a much larger extent than heretofore. Nearly two millions and a half of dollars will then be deducted at once.

On the 1st of July afterwards, at least two millions and a half more of duties will be removed; making an aggregate, in six months, of quite five millions. If the imports then should not differ much from those in 1838, this would leave an income from them, not probably exceeding ten or eleven millions of dollars yearly. It will therefore be necessary to make corresponding reductions in the expenditures of 1842, or seasonably provide otherwise, in some permanent manner, to supply any wants likely to happen from this cause.

Should Congress conclude that such reduction in the expenditures cannot properly be made, and that the imports for 1842 will not increase beyond those in 1838, the amount of the deficiency would, in those events, probably differ but little from five millions. Such a deficiency would, under these circumstances, be likely to become permanent, and may be considered the first of that character which will occur under the tariff act of 1833.

The idea that such a deficiency in time of peace ought to be supplied by issues of Treasury notes, or by a loan, has never been entertained by the undersigned. Nor can it be countenanced by any sound principles either of finance or political economy. The inquiry then recurs, what other mode would be more eligible? When we possessed an extraordinary surplus, it was considered prudent by Congress to make deposits with the States, with a view to be returned in an exigency, rather than to invest a portion of it safely and productively, so as to be realized in such an event. It would therefore be consistent with that arrangement to recall, in 1842, such part of the surplus as may be then needed.

That course, however, appears not very likely to be adopted, since the former power given to this department to recall these deposits has been taken away by Congress.

Another practicable mode would be, to resort to direct taxes. But this is so unsuited to the general habits, and so uncongenial to the opinions of most of our population, that its adoption is not to be anticipated. Some other permanent resource must then be looked to. The choice will probably rest between the large reduction of expenditures, with the other accompanying measures before specified, and some extensive modification of the present tariff. Explanations have heretofore been given by the undersigned in favor of the former course. And it would probably prove

sufficient to meet the emergency, if the reduction be pushed vigorously and especially if the imports after 1841 shall exceed those in 1838, which is regarded as probable.

But Congress may not coincide with him in opinion on these points, and, for covering the contingency, may consider the adoption of some permanent change in the tariff as preferable, and as not too early at the present session, to give full notice of its character, before going into operation, in order that the different interests most affected by it shall have time to become gradually adjusted to its provisions.

In that event, it might be supposed that the undersigned had avoided due responsibility, and a timely discharge of duty, if he were not prepared to offer some views concerning the details, as well as general principles, which he deems applicable to such a change. He has therefore examined the subject, and is ready to present the results at any moment either House of Congress shall express a wish to that effect. But he refrains from submitting them without a special request, because some doubt exists, under circumstances which can be properly appreciated, as to the delicacy of his discussing a measure at this time, which the Legislature may not consider it necessary to act on till a new Congress assembles.

VIII. The mode of keeping the public money recently established by Congress, has thus far answered the expectations of this department.

The numerous labors, perplexities, and delays of putting a new system into operation, have been mostly overcome, and no losses whatever are known to have occurred under it.

Some of the provisions in the law are deemed objectionable in their details, and are respectfully recommended to Congress for revision. But they are not supposed to affect in the slightest degree any principle involved in the measure.

Thus, the ordinary clerks authorized are numerous enough, yet a principal one is needed at New York city, with such compensation as is usual at a place of so large and important business.

On full inquiry, it has been found also that no site could probably be purchased for the erection of an office at St. Louis, which would be more suitable than a lot now owned by the United States; and it may be, under a further examination which is in progress, that no new building could be erected on that site, which would prove more economical and convenient, than one which can be purchased already erected. A suitable change in the appropriation on that subject is therefore respectfully recommended.

A provision is needed likewise in case of vacancies, from any cause whatever, in the offices of receivers general and treasurers. One has formerly been asked in relation to collectors of the customs, in cases of removals and expirations of the terms of office, to prevent an interregnum in the discharge of the duties. This might properly be adopted as to them, and extended to receivers general and the Treasurer of the United States, as well as of the Mint and its branches, in all instances whatever of vacancy or temporary inability of the principal. Perhaps the least objectionable mode to effect the object would be, to direct that the chief clerk of all these officers should, in such cases, and where no other legal provision now exists, be authorized and required to discharge those duties, at the risk and under the responsibility of the principal and his securities, till the vacancy is filled, or the disability removed.

In consequence of some defects in the phraseology of the penal parts of the act, a new clause extending them to all disbursing officers of every character under the General Government would be judicious. A further provision also, respecting the places of deposit, by disbursing officers, of money not in the Treasury, but drawn out and put into their hands for making payments, appears necessary.

The keeping of such money is now regulated by the act of 3d of March, 1809; and if it is intended to bring it within the operation of the late law as to money in the Treasury, it seems proper to do so by an explicit enactment.

The section requiring disbursing officers to sell their drafts for specie alone, though certain proportions of paper are allowed to be received for all public dues, appears not to be in symmetry with those other provisions. The general influence of the present system is believed to have been thus far salutary. The true standard of value has been rendered more familiar, confidence has been increased in its stability, prices have gradually risen, business improved, and exchanges altered greatly for the better.

If something has been or may be lost in convenience, (which is not unlikely,) by the increasing disuse of a paper currency for public payments, much more will probably be gained by the circumstances before enumerated, as well as by the greater security in the use of specie, the more stable value imparted by the present system to property and labor, and the strong check established by it, not only against defalcations, but against bank expansions, excessive speculations, and commercial fluctuations.

Even any inconvenience attending this change in the currency used, if found particularly embarrassing, can be overcome hereafter, and the system still maintained, should Congress feel disposed to adopt the measure which was suggested for that purpose by the undersigned in September, 1837.

Such a measure would often furnish every advantage of a circulating medium, easy of transportation, of the highest possible credit, and at the same time requiring an equal amount of specie to be employed, (though in deposit,) and without subjecting any of the fiscal affairs of the Government to that legal dependence on corporations for their management, which is so objectionable in many respects, as never to have been attempted in the management of any of its other affairs, civil or military.

The topics of the condition of the banks of the Union; the state of the country; the proper places of deposit for the public funds, and other matters immediately connected with them, have engrossed a considerable portion of the annual reports from this department for several years.

But the keeping of the money in the Treasury being now separated from the banks, and the kind of money to be received and paid out fixed by new legal provisions, it is not considered material at this time further to discuss these matters, than to submit the general remarks which will be found at the close of this communication.

IX. Some miscellaneous topics connected with the finances deserve a brief notice.

The various measures heretofore recommended to Congress by the undersigned, and which have not yet been finally acted on, are again respectfully recalled to its attention.

Without recapitulating them, it will be found, on a reference to former reports, that many of the subjects possess much importance in a fiscal view, and every year's experience has strengthened the conviction of the usefulness of early action upon them.

It affords me pleasure to state that, since the last session, the Neapolitan Government, under its treaty of indemnity, has paid promptly another instalment, which this department has been enabled to have remitted home early, and distributed among the claimants.

The situation of the General Land Office, and its operations within the year, will be submitted separately in a few days.

Six old land districts have been recently discontinued, under the act of June 12, 1840. It is believed that some others might economically and usefully be abolished by Congress, though not coming within the provisions of that law. Such is the office at Greensburg, Louisiana. One district in Indiana, including the capital of the State, is thought, from its peculiar position, to require special legislation to exempt it from the operation of the late act.

This occasion is taken, also, to renew the recommendations, before presented by this department to Congress and the appropriate committees, for the discontinuance of certain officers now employed in the collection of duties, whose further services, it has been believed, could be safely dispensed with, in consequence of the reduction in business of late years at the different places where they are stationed. They include some collectors and naval officers, and several surveyors, amounting in all to eighteen, but whose offices cannot be abolished without new legislation.

All the subordinate custom-house officers, which it is competent for this department, without such legislation, to dispense with, and whose situation was in other respects similar, have already been discontinued, including, within two years, more than fifty officers, and, besides those, five vessels and boats, with nearly one hundred men, in the cutter service. In about forty other cases, the compensation of officers and light-house keepers has been reduced.

X. In closing this last annual report of the undersigned, it may be expected that he would advert, for a moment, to the general character of some of our financial operations during the period of his connexion with the Treasury Department.

Though employed in different executive offices nearly ten years, he has been connected with the Treasury only from six to seven of them.

During this term, there has occurred much to evince the great fiscal power, as well as prosperity of the Union. Some reverses have, at times, overtaken the rashness displayed by parts of the community in certain branches of business, and have extended their adverse influences to the revenue dependent on them. But the period and the country, as a whole, have been almost unexampled in prosperous developments.

Thus, in respect to our receipts. Notwithstanding the unusual revulsions in imports on two occasions, so sensibly lessening the revenue; notwithstanding any losses sustained in those crises, by the Government, through officers, banks, or merchants; and notwithstanding the biennial reduction in the duties, which has by law been constantly going on, as well as the remission of several millions to railroad corporations, and under new judicial constructions; yet our condition has been so flourishing,

as to yield a revenue during that time sufficient, after all those deductions, to accomplish the following important results. It has enabled the Treasury to meet the current expenditures of the Government, as well as the extraordinary ones by Indian wars, treaties, and other costly measures, and, without imposing any new taxes, or higher tariff, and without any new funded debt whatever, but extinguishing considerable remains of the old one, and paying the interest on that assumed for this District, to save the unprecedented surplus of more than twenty-eight millions of dollars, and deposite the same with the States for safe-keeping till needed by the General Government.

The only permanent aid in effecting this, beyond the receipts from ordinary sources, has been the debt due from the United States Bank, of about eight millions, and the Treasury notes now outstanding, equal to nearly four and a half millions. But during that period, a sum not far from the first amount has been applied to the discharge of the principal and interest of the old funded debt; so that, towards the payment of all other expenses, only between four and five millions, beyond what was temporary, and what has already been refunded or adjusted, have been received from any extraneous source whatever.

It follows, therefore, that the current revenue, notwithstanding all reductions, has been adequate to defray both the ordinary and extraordinary demands, and, after taking from what is deposited with the States, sufficient to extinguish every kind of indebtedness created on account of the General Government during the same period; to leave on hand the large balance of nearly twenty-four millions.

It is true that the available sums in the Treasury at the commencement and close of the period in question will probably prove different in amount; but if made equal, a surplus would still be left, which is likely to exceed seventeen or eighteen millions of dollars.

Beside this recorded evidence of the prosperity of the country and the fiscal ability of the General Government in those years, it is gratifying, amidst many misapprehensions concerning the subject, to reflect on another circumstance connected with our financial operations, which has also become matter of history. It is this: Though destitute of the aid of a United States Bank as a fiscal agent during that period, and baffled by various unremedied imperfections in the laws connected with the finances, as well as embarrassed by two suspensions of specie payments by many of the State banks—one still continuing; yet the Treasury has been able to make its vast collections, transfers, and payments; with promptitude, and, in most cases, with specie or its equivalent.

Some correct judgment can be formed of the extent and difficulty of these operations, when it is recollected that the whole sums which have thus been collected, without deducting fractions, added to those sums which have been paid over chiefly by another class of officers, have exceeded the extraordinary aggregate of \$360,000,000, and been dispersed over a territory of nearly two million square miles in extent. It is, moreover, ascertained that the whole losses within the same time by defaults, large and small, and in all kinds of offices, will, probably, not equal half of one per cent. on that amount; and however official delinquencies may, in some cases, have inevitably been aggravated by the unprecedented speculations of the times, and by great revulsions and failures among banks and individuals, those losses will not be one-fourth

so large, in proportion to the amounts collected and paid, as in some previous terms, when the system under a United States Bank was in full operation.

A few words may be proper as to the expenditures during the same period. Though they were of necessity augmented by some of the circumstances before mentioned, two Indian treaties only, out of a large number, having already involved us in the expense of nearly twenty three millions of dollars; yet the aggregate of all has been much reduced since the influences of those causes and the impulses of an overflowing Treasury have diminished. The expenditures have fallen yearly since 1837, till they are now only twenty-two and a half millions, independent of any debt and trusts, and are supposed to be in progress to a still lower amount.

The undersigned has earnestly urged a more rapid reduction. He has considered it the great safeguard against a too splendid central government, which would constantly threaten to overshadow all State independence, and attract the ambition of most of the friends of State rights from humbler paths of frugality and principle into the dazzling vortex of higher patronage, honors, and emoluments. While the stimulants to excesses shall continue to lessen, nothing will be necessary to insure the further success of an economical policy, but perseverance in retrenchments, wherever they are practicable without injury to the public interests. The removals of Indians being mostly finished, and the chief causes of frontier wars extinguished, unless new objects of expenditure be selected, or a great enlargement given to some already existing, the whole amount must, of necessity, contract hereafter very rapidly. The same result will be further promoted by the deaths of pensioners, increasing through advanced age, and the completion of many public works, as well as by persisting in a firm policy to avoid the wasteful expense of unnecessary foreign collisions, and to refrain from those lavish expenditures for certain domestic objects, over which the jurisdiction of the General Government is often questionable, and which always open the widest door to extravagance, favoritism, and corruption.

One of the greatest evils to the public service, as well as to the security of private business, during a part of the above period, has consisted in the fluctuations to which both have been subjected.

With only a single year intervening, and without any material change in the tariff, or any whatever in the price of the public lands, we have seen the revenue from ordinary sources suddenly vary from nearly fifty millions annually to eighteen; and, on two occasions since, vibrate to the extraordinary extent of nearly eight and eleven millions yearly.

The transactions of individuals upon which our revenue depends, must, of course, have undergone an unusual change at the same time.

The imports fell within two years, in the case first referred to, from near one hundred and ninety millions to one hundred and fourteen; and in the single year just past, fell almost sixty millions. Such inflations and contractions must be destructive of all confidence in calculations for the future, while the causes of them shall continue to operate unremedied.

What were those causes?

They will be found to have been chiefly connected with the abuses of banking. On the occasion first referred to; they were the superabund-

ance of a fictitious medium of circulation, with the attendant overtrading and speculations in 1836, and the consequent suspensions of specie payments in 1837, as well as the disasters and scarcity of any medium till the latter part of A. D. 1838. Then another expansion commenced, extending into 1839, and accompanied by another increase in imports of nearly fifty millions; which ended again in the contractions by banks, suspensions, and commercial reverses, which have suddenly reduced the imports of 1840 more than one-third, and in many places augmented seriously the embarrassments before existing from similar vacillations in the paper currency.

How far some imprudences abroad, at the same time, similar to these, though in a country enjoying any advantages which can result from a National Bank, may have augmented the evils here, by means of the intimate moneyed relations between us, need not now be discussed, though probably their influence was large and unfavorable.

The causes first named were, likewise, in full operation here in 1816 and 1817, and were succeeded by many of the same deplorable consequences in 1819 and 1820. One followed the other, as inevitably as the ebb of the tide succeeds its flood.

The great principles of trade can never be long violated with impunity. And any fictitious or unnatural excess of credit soon ends in revulsions, as the essence of legitimate commerce consists in an exchange of values for each other, or of values for what truly represents values, and can be readily converted into them.

All business otherwise becomes a mere game of hazard; speculation must enter into every affair of life; riches and poverty will be dependent on the merest bubbles; prices will change oftener than the wind; regularity in receipts and expenditures be impossible; estimates for the future, whether in public or private matters, become mere conjectures; tariffs require yearly alteration to meet the fluctuations of business; and the community be kept under the constant excitement and depression of the hot and cold fits of a violent fever.

The first remedy sought in 1816, by the establishment of a National Bank, was supposed, during a few ensuing years, to have aggravated those evils; and the next remedy, adopted in 1824 by a high tariff, did not prevent the low prices and bankruptcies of 1825, which covered the country with wrecks and ruin.

Undoubtedly, the best relief on such occasions is to be found in removing the cause of the disease. So far as regards the General Government, this was attempted in 1837, and since, by gradually withdrawing from the use of banks and their paper in its fiscal operations, so as neither to stimulate nor contract their issues by other influences than ordinary business; and by urging on those, who might find their employment sometimes useful, a closer regard in doing it, to the safe and sober influences of the universal laws of trade, as well as an inflexible adherence to the constitutional standard of value.

While the General Government shall continue to pursue such a course, it will mitigate and check the evils which others produce, and which they alone, under the limitations in the constitution, are able entirely to remove. At all events, it will faithfully perform a momentous duty, and exhibit a useful example for imitation.

In a period of peace and comparative exemption from public debt, as well as from serious difficulty in financial operations, it would hardly seem proper to attempt more by assumptions of doubtful powers, and by forced constructions in favor of measures by no means certain, if adopted, not to aggravate rather than diminish existing evils, and not to produce others of a character still more dangerous. Much less can it be considered respectful either to State rights or the people, and certainly not competent, in the opinion of the undersigned, to exercise such powers by creating moneyed corporations among them, which many of their number have repeatedly denounced as unconstitutional, and the authority to establish which was originally refused rather than confided to the General Government by the people and the States that formed it. But some other powers expressly conferred can, without question, be exercised further than has yet been done by Congress, and in such a manner as to produce very beneficial consequences upon the currency. Still, it is hoped they will never be pushed so as to trespass on ground really doubtful under the constitution, and prevent the States from continuing to exercise all the legitimate authority they now possess as to banks and debts, however much it may be regretted that public opinion has not yet run with more strength against the abuses of both, and led to their prompt correction. It is not proposed at this time to go into the consideration of farther details on these points. But the danger to be guarded against now, seems to be rather of an opposite character from that of overaction by the General Government in the exercise of its express powers. On the contrary, apprehensions exist that it may not continue firm in the support of all which has already been accomplished in connexion with the currency. If it should not, and should thus not aid to correct in any degree the rashness of many to force something like a formidable steam-power into all kinds of business, without due guards to prevent constant and fatal explosions, myriads of individuals, as well as some corporations and States, are likely to be overwhelmed in still wider ruin, and will ere long probably look to no escape except the application of the sponge of a general bankrupt law to all private liabilities, and the unconstitutional assumption of the public ones by the General Government, so as to tax oppressively those portions of the community who have any thing left to pay for the losses and follies of the rest.

A remedy which has been adverted to by some, and which consists in the creation of more credit, to cure the mischief of an existing excess of credit, or the formation of larger banks with like power of abuses, in order to correct smaller ones, must usually aggravate the evil; and therefore, where it is free from constitutional objections, may, in point of expediency alone, well be discountenanced.

A plan of free banking, adopted by the States, properly guarded and secured by provisions similar to those recommended by the undersigned as long ago as 1836, with such others as reflection and experience may sanction, appears far preferable. But, independent of that, no changes in the present system, as to banks, seem worthy of strenuous exertions, except those whose direct object shall be to make safer, to restrict, control, and regulate better the institutions that already exist, rather than to incorporate more. Above all, should public efforts be directed to strengthen the certainty of prompt specie payments as to all notes out, and of a nearer approach to uniformity in the amount of issues in similar states of trade,

and of specie on hand, instead of multiplying them for speculation or cupidity, and thus keeping up a succession of expansions and contractions, which will only inflame the existing disorders, and render the continuance of great fluctuations in all public as well as private affairs unavoidable, endless, and ruinous.

With much respect,

**LEVI WOODBURY,**  
*Secretary of the Treasury.*

To the **SPEAKER of the House of**  
*Representatives of the United States.*

*[Faint, illegible text, likely bleed-through from the reverse side of the page.]*

## SCHEDULE OF DOCUMENTS

ANNEXED TO THE ANNUAL REPORT ON THE FINANCES.

- A. Receipts and expenditures in the year 1839.
- B. Funds in the Treasury, (January 1st, 1840,) whether available or unavailable.
- C. Expenditures in detail during the first three quarters of the year 1840.
- D. Payments on account of the funded debt in 1840, and an exhibit of the remains of it.
- E. A statement of the issue and redemption of Treasury notes in 1840.
- F. Amount of exports and imports in each year since 1789, with a detail of the excesses of the former in seven separate years.
- G. A comparative statement of the exports and imports in every four years during the last twenty, distinguishing the amounts of the former, which were of domestic origin.
- H. Annual estimates of expenditures for 1841.

## A.

*Receipts and expenditures of the United States for the year 1839.*

Balance in the Treasury on the 1st of January, 1839 - \$36,891,196 94

## RECEIPTS.

Customs - - -	\$23,137,924 81
Lands - - -	7,076,447 35
Miscellaneous items -	247,509 10
	<u>\$30,461,881 26</u>
Treasury notes -	3,857,276 21
Trust funds - -	1,020,868 35
	<u>4,878,144 56</u>

35,340,025 82

Deduct unavailable funds carried to the credit of the late Treasurer, and to the debit of sundry banks, per act of 3d March, 1837

1,458,782 93

33,881,242 8970,772,439 83

## EXPENDITURES.

Civil, miscellaneous, and foreign intercourse -	\$4,918,187 58
Military - - -	14,266,860 34
Naval - - -	6,225,002 75
	<u>\$25,410,050 67</u>

Public debt, including interest on Holland debt 93,251 17

Treasury notes redeemed, including interest - 11,101,111 02

Trust funds - - - 1,010,523 29

12,204,885 4837,614,936 15Balance in the Treasury on 31st December, 1839 - 33,157,503 68

## B.

*Exhibit of funds in the Treasury, January 1, 1840.*

General balance, as appears by the Register's books, excluding Post Office funds and unavailable funds before 1837	-	-	\$33,157,503 68
Of this sum, was deposited with the States, under act of 23d June, 1836, and is not available for public service but by order of Congress	-	-	\$28,101,644 91
Held by Treasury in trust for indemnities, &c.	-	-	496,781 98
Principal due from banks which failed in 1837, and included in cash in Treasury, but not then available as such	-	-	895,993 19
			<hr/>
			29,494,420 08
			<hr/>
Aggregate of outstanding warrants on 1st January, 1840, per Treasurer's account rendered to First Auditor, but not yet settled	-	-	3,663,083 60
			<hr/>
			1,416,334 28
			<hr/>
Effective balance	-	-	2,246,749 32
			<hr/> <hr/>

This includes about \$500,000 deposited in the Mint and its branches, under previous acts of Congress, to facilitate the coinage, and which could be withdrawn in an exigency, though not without some public inconvenience. The available funds at the close of the present year, due from the banks above alluded to, will probably be reduced to about \$150,000 principal.

## C.

*Statement of expenditures of the United States, exclusive of the trust funds,  
from January 1, to September 30, 1840.*

CIVIL, MISCELLANEOUS, AND FOREIGN INTERCOURSE.		
Legislature		\$958,495 60
Executive Departments		583,339 22
Officers and clerks of the Mint and branches		18,450 00
Surveyors and their clerks		55,977 02
Secretary to sign patents for public lands		1,125 00
Commissioner of Public Buildings, Washington		1,725 00
Governments in the Territories of the United States		106,433 77
Judiciary		344,987 07
		\$2,070,532 68
Payment of sundry annuities		750 00
Mint establishment		52,383 30
Support and maintenance of light-houses		321,288 02
Building light-houses		92,852 94
Survey of public lands		80,714 15
Surveying the coast of the United States		63,147 12
Registers and receivers of land offices		2,658 96
Keepers of the public archives in Florida Territory		750 00
Repayments for land erroneously sold		14,138 80
Marine hospital establishment		93,913 91
Marine hospital at New Orleans		18,020 00
Marine hospital at Mobile		9,744 11
Roads and canals within the State of Indiana		23,709 20
Roads and canals within the State of Ohio		14,352 30
Roads and canals within the State of Michigan		14,107 53
Roads and canals within the State of Arkansas		129 16
Read and levees within the State of Louisiana		55,455 79
Encouragement of learning within the State of Illinois		57,289 37
Public buildings in Washington		288,970 00
Penitentiary in the District of Columbia		8,000 00
Relief of the several corporate cities in the District of Columbia		57,520 34
Building custom-houses		202,325 00
Documentary History of the Revolution		20,000 00
Relief of individuals		22,181 00
Payment for horses, &c.		7,469 28
Relief of certain inhabitants of East Florida		30,397 00
Additional compensation to collectors, &c.		6,961 37
Patent fund		26,513 49
Sixth census		17,000 00
Refunding duties		158,022 81
Miscellaneous		21,281 74
Exploration and survey of the northeastern boundary of the United States		10,010 12
Public buildings in the Territories		48,348 00
		1,851,404 81
Salaries of ministers of the United States		48,750 00
Salaries of secretaries of legation		12,567 98
Salaries of chargés des affaires		45,486 06
Salary of a minister resident to Turkey		3,483 47
Salary of drogoman to Turkey, and contingent expenses of legation		6,043 75
Outfit of a minister to Russia		9,000 00
Outfits of chargés des affaires to Sardinia and Texas		9,000 00
Contingent expenses of missions abroad		18,733 00
Compensation for certain diplomatic services		21,942 48
Contingent expenses of foreign intercourse		15,774 05
Salaries of consuls at London and Paris		4,000 00
Relief and protection of American seamen		38,566 44
Allowance for clerk-hire, &c., American consul at London		2,192 69
Intercourse with Barbary powers		11,656 25
Interpreters, guards, &c., incidental to the consulates in the Turkish dominions		5,000 00

TREASURY DEPARTMENT, *Register's Office, December 2, 1840,*

T. L. SMITH, *Register.*

## H.

TREASURY DEPARTMENT, *December 7, 1840.*

SIR: I have the honor to transmit, for the information of the House of Representatives, an estimate of the appropriations proposed to be made for the service of the year 1841, amounting to - \$16,621,520 28

## VIZ:

Civil list, foreign intercourse, and miscellaneous	-	\$3,450,740 13
Military service, including fortifications, armories, arsenals, ordnance, Indian affairs, revolutionary and other pensions	-	7,725,440 94
Naval service, including the marine corps	-	<u>5,445,339 21</u>
To the estimates are added statements showing—		
1. The appropriations for the service of the year 1841, made by former acts of Congress, including arming and equipping the militia, civilization of Indians, revolutionary claims, revolutionary pensions under the act of June 7, 1832, claims of the State of Virginia, relief of the corporate cities in the District of Columbia, and public debt	\$1,013,200 00	
2. The existing appropriations which will not be required for the year 1840, and which it is proposed to apply in aid of the service of the year 1841, amounting to	-	3,749,904 02
3. The existing appropriations which will be required to complete the service of the year 1840, and former years, but which will be expended in 1841, amounting to	-	6,661,123 52
4. There is also added to the estimates a statement of the several appropriations which will probably be carried to the surplus fund at the close of the present year, either because these sums will not be required for, or will no longer be applicable to them, amounting to	-	138,877 99
5. In a note is separately specified the amount, which it is estimated will be needed in 1841 for the redemption of Treasury notes	-	4,500,000 00

Very respectfully, your most obedient servant,

LEVI WOODBURY,

*Secretary of the Treasury.*

The SPEAKER of the House of Representatives.

Doc. No. 3.

ESTIMATE—Continued.

Appropriations made  
in 1840.

- For payments to the artists engaged in executing four historical paintings for the vacant panels of the rotundo of the Capitol
- For support and maintenance of the penitentiary of the District of Columbia
- For bringing the votes for President and Vice President of the United States to the seat of Government
- To make good a deficiency in the years 1839 and 1840 in the fund for the relief of sick and disabled seamen, as established by the act of 3d May, 1802

*Note.*—See as to marine hospitals, submitted at the last session.

- For balance due the commissioner for ascertaining and marking the southern boundary of Iowa Territory, under the act of 18th June, 1838
- For carrying on the work of the new custom-house building at Boston
- For the discharge of such miscellaneous claims, not otherwise provided for, as shall be omitted in due course of settlement. (Nothing required—balance of appropriation deemed sufficient.)

LIGHT-HOUSE ESTABLISHMENT.

- For supplying light-houses, containing 2,598 lamps, with oil, tubes, glasses, wicks, buff skins, whiting, and cotton cloth, transporting oil, and keeping the apparatus in repair

For repairs, refitting, and improvements of light-houses connected therewith	112,359 46
For salaries of 236 keepers of light-houses (17 of them being charged with two light-houses, and one with three)	94,038 33
For salaries of 30 keepers of floating lights	15,800
For seamen's wages, repairs, and supplies to 30 floating lights	104,440 30
For weighing, mooring, cleansing, repairing, and supplying the loss of beacons, buoys, chains, and sinkers	25,514 92
For expenses of examining and reporting the condition of light-houses annually	4,000
For superintendents' commissions	12,074 94

484,072 81	431,987 26
------------	------------

*Note.*—The number of lamps has been reduced at some of the light-houses in Massachusetts, and Roanoke marshes and Natchez lights discontinued, since last year's estimate was made.

#### PUBLIC BUILDINGS AND GROUNDS IN WASHINGTON.

*Note.*—By the 10th section of the act of 21st July, 1840, it is enacted "That all the estimates of the public buildings and grounds shall hereafter be submitted by the Commissioner of the Public Buildings to the Committee on Public Buildings and Grounds, to be examined and approved by them before they are reported to the House." No estimates for those objects are, therefore, submitted by this department.

#### SURVEYING THE PUBLIC LANDS.

For surveying the public lands, in addition to the unexpended balances of former appropriations, to be apportioned to the several surveying districts, according to the exigencies of the service, including office-rent and fuel for the year 1841	55,000
For retracing certain old surveys in the State of Alabama, at a price not exceeding \$4 a mile	15,000

215,000
