WASHINGTON:  
GEORGE W. BOWMAN, PRINTER.  
1860.

TENNESSEE STATE LIBRARY

**JOINT RESOLUTION** relative to the Printing and Distribution of the Annual Estimates.

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That it shall be the duty of the Secretary of the Treasury to cause the estimates of appropriations, which he is by law required to prepare and submit to Congress, to be printed, and copies of the same to be delivered to the Clerk of the House of Representatives in time for distribution at the commencement of each session; and that the Clerk distribute the said estimates in the manner in which documents printed by Congress are directed to be distributed.

Approved, January 7, 1846.

# ESTIMATES OF APPROPRIATIONS.

TREASURY DEPARTMENT,  
November 21, 1860.

SIR: Agreeably to the joint resolution of Congress of January 7, 1846, I have the honor to transmit, for the information of the House of Representatives, printed estimates of the appropriations proposed to be made for the fiscal year ending June 30, 1862, as follows, viz:

Civil list, foreign intercourse, and miscellaneous, including expenses of collecting the revenue from sales of public lands, and expenses of courts.....	\$10,462,511 25	
To supply deficiencies in the revenues of the General Post Office.....	5,312,175 63	
Pensions.....	1,082,000 00	
Indian department.....	2,077,695 38	
Army proper, &c., including miscellaneous objects.....	13,710,759 02	
Military Academy.....	184,337 00	
Fortifications, ordnance, &c.....	2,195,845 00	
Naval establishment.....	11,513,904 01	
	\$46,539,227 29	
To the estimates are added statements showing—		
1. The appropriations estimated for the service of the fiscal year ending June 30, 1862, made by former acts of Congress, of a specific and indefinite character, as follows, viz:		
Miscellaneous, including expenses of collecting revenue from customs.....	5,220,914 14	
Compensation to the General Post Office for mail services	700,000 00	
Arming and equipping the militia .....	200,000 00	
Civilization of Indians .....	10,000 00	
Interest on the public debt.....	3,495,472 06	
	9,626,386 20	
2. The estimated balances of existing appropriations which will be unexpended on June 30, 1861, part of which are required for the payment of the liabilities of the present fiscal year, but which will not be drawn from the treasury until after June 30, 1861, and the balance applied to the service of the fiscal year ending June 30, 1862, viz:		
Civil list, foreign intercourse, and miscellaneous.....	5,840,439 42	
Interior Department, (pensions and Indian).....	1,068,787 33	
War Department .....	2,652,000 00	
Navy Department .....	2,636,885 87	
	12,198,112 62	
	68,363,726 11	

It appears, by the statement of the estimated balances of existing appropriations which will be unexpended on June 30, 1861, the sum of \$444,699 13 may be carried to the surplus fund.

Accompanying the estimates there are sundry papers furnished by the several departments containing explanations in regard to them.

It appears from the above statement that the annual and permanent appropriations required for the service of the fiscal year ending

June 30, 1862, exclusive of the interest on the public debt, amount to \$52,670,141 43.

I am, very respectfully, your obedient servant,

ESTIMATES OF APPROPRIATIONS.

## POST OFFICE DEPARTMENT.

POST OFFICE DEPARTMENT,  
October 13, 1860.

The estimates herewith submitted for the contingent expenses of this department for the next fiscal year are an increase over the appropriation for the current year. This additional appropriation asked for (based on estimates made by practical men) will be necessary to meet the cost of whitening the ceilings and repainting the walls of the halls throughout the old building, and the large room occupied by the book-keepers in the Auditor's office; also for painting the stair railing, window frames, and the iron railing around the building. A portion of this work is absolutely necessary for the preservation of the building, and all of it I regard as important, especially in view of the completion and occupancy of the new building, which it is expected will not be delayed beyond the close of the next ensuing summer.

The apparatus for heating and ventilating the building is about to go into operation, and the yearly consumption of coal has been estimated, by an experienced engineer, at 600 tons; so that this item alone will require an appropriation of at least \$3,000—a very large increase over any former appropriation.

There is, in addition to the foregoing, a great necessity, as I conceive, for the erection of a sufficient number of lightning-rods for the security of the occupants and protection of the building. This was fully demonstrated during the past summer, one of the chimneys having been struck and totally demolished. The erection of these rods, it is estimated, would cost, for the most approved kind, (copper, with platina points, coated with asphaltum varnish,) about \$800. This amount is embraced in the foregoing estimates.

Respectfully submitted,

J. HOLT,  
Postmaster General.

## THE MINT.

MINT OF THE UNITED STATES,  
*Philadelphia, October 29, 1860.*

SIR: I transmit, to-day, to the Register of the Treasury, the estimates of the appropriations required for the support of the Mint and its branches, and the assay office, for the fiscal year ending June 30, 1862; and, in accordance with the usual custom, I herewith enclose for your information a copy of these estimates, and also of my correspondence with the branch mints and the assay office; which exhibit the grounds upon which these estimates are founded.

It will be seen that the sums asked for to support the branch mints at San Francisco and New Orleans, and for the assay office at New York, are in excess of the amount appropriated for the current fiscal year; but the actual expenditures at San Francisco and New York are estimated at the same rate. This difference in the appropriations asked for arises from the fact that at these institutions the estimated surplus remaining unexpended at the close of the current fiscal year is less than it was at the close of the last fiscal year. This difference at San Francisco is estimated at nearly \$48,000, and at New York at \$12,000. These additional sums are therefore asked to be appropriated for the next fiscal year.

At the branch mint in New Orleans the estimate for wages and incidental expenses is \$3,818 55 less than the current year; but there is required at that institution two new coining presses—one for the silver dollar and the double eagle, and one for the smaller coins; also, the boilers, which have been long in use, require to be replaced by new ones. The estimated cost of these presses and new boilers is \$13,500. Taking into view the reduction on the item of wages and incidentals, it will be seen that the appropriations required are \$9,681,35 in excess of the current year.

I have the honor to be, with great respect, your faithful servant,  
JAMES ROSS SNOWDEN,  
*Director of the Mint.*

Hon. HOWELL COBB,  
*Secretary of the Treasury, Washington City.*

UNITED STATES BRANCH MINT,  
*New Orleans, October 9, 1860.*

SIR: Herewith please find inclosed our estimate of the appropriations necessary for this branch, for the fiscal year ending June 30, 1862.

You will also find herewith the copy of a letter addressed to me by the coiner, showing the necessity of appropriating \$20,000 for new machinery; which amount is included in our estimate.

Very respectfully,

WM. A. ELMORE,  
*Superintendent.*

Hon. J. ROSS SNOWDEN,  
*Director Mint, Philadelphia.*

UNITED STATES BRANCH MINT,  
New Orleans, October 1, 1860.

SIR: In the estimates of expenditures for the fiscal year ending June, 1862, I have put down twenty thousand dollars for new machinery.

I beg leave, most respectfully, to invite your attention, and that of the director of the mint, to the necessity of procuring a new set of boilers, the present ones having been in use for more than nine years, and having been patched more than once; also to the fact that we have no suitable press for coining dollars and double eagles, and need a small press for dimes and half dimes.

Very respectfully,

B. F. TAYLOR,  
Coiner.

W. A. ELMORE, Esq.,  
Superintendent Branch Mint, New Orleans.

*Estimated means and expenditures for the fourth quarter of 1860, and the first and second quarters of 1861.*

MEANS.

Available balance in hands of treasurer, October 1, 1860..	\$1,268 72
Undrawn and available appropriations.....	74,670 38
Estimated legal deductions.....	2,500 00
	78,439 10

PROBABLE EXPENSES.

1. Salaries of officers and clerks.....	13,725 00
2. Wages of workmen .....	24,085 00
3. Wastage on gold for the year 1860.....	900 00
4. Incidental and contingent expenses, including wages of doorkeeper, porter, messenger, five watchmen, water, gas, ice, stationery, repairs, &c.....	26,250 00
	64,960 00
Difference, being excess of means over expenses.....	13,479 10

The item of salaries corresponds to amount of appropriation undrawn; the balance of \$13,479 10 is therefore available for wages of

workmen and incidental and contingent expenses, each for the amount of its unexpended appropriation.

The coinage for the next fiscal year will probably range from two millions to two millions and a half; and the expenditures will be about one hundred and nine thousand four hundred and eighty dollars, as exhibited in the following estimate :

1. Salaries of officers and clerks.....	\$18,300 00
2. Wages of workmen .....	33,780 00
3. Wastage on gold for the year 1861.....	1,800 00
4. New machinery, viz :	
Silver dollar press*.....	\$10,000 00
Dime press† .....	5,000 00
Set of boilers.....	5,000 00
	20,000 00
5. Incidental and contingent expenses, including wages of doorkeeper, &c., as above .....	35,600 00
	109,480 00
Making total expenses, for the fiscal year ending June 30, 1860.....	109,480 00
From this amount must be deducted :	
1. Estimated amount of legal deductions	\$3,000 00
2. Excess of means over expenses of this fiscal year.....	13,479 10
	16,479 10
The net amount required will therefore be :	
For the half year ending December 31, 1861, including wastage on gold for the whole year 1861.....	48,300 45
And for the half year ending June 30, 1862.....	44,700 45
	93,000 90
Making total amount to be asked for.....	93,000 90

UNITED STATES BRANCH MINT, NEW ORLEANS,  
*Treasurer's Office, October 8, 1860.*

UNITED STATES ASSAY OFFICE,  
*New York, October 15, 1860.*

SIR: I transmit enclosed my estimates of the expenses of this office and of the appropriations required to meet them, for the fiscal year ending June 30, 1862.

In my estimates for the current year, the appropriation asked for "wages of workmen" was \$12,000 less than the estimated expenditure, owing to the existence of an unexpended balance of former appropriations. As no such balance is anticipated at the end of the current year, the estimates now submitted will necessarily show an apparent increase of \$12,000 over those of the year preceding.

Very respectfully, your obedient servant,

S. J. BUTTERWORTH,

The amount required to be appropriated to meet existing salaries for the fiscal year ending June 30, 1862, (schedule B,) is..... \$24,900

\* This item stricken out.

2. Wages of workmen :  
 The expenses under this head are estimated (\$3,000 per month) at..... \$36,000  
 No unexpended balance is anticipated at the close of the current year.  
 There will be required for the fiscal year ending June 30, 1862, (schedule B,) an appropriation of..... 36,000
3. Incidental and contingent expenses :  
 These expenses are estimated at..... 40,000  
 The balance of former appropriations with other available means will be sufficient. No appropriation will therefore be required.

## UNITED STATES COAST SURVEY.

COAST SURVEY STATION, NEAR FITCHBURG, MASS.,  
*October 15, 1860.*

SIR: I have the honor to present for your examination the estimates for the work of the Coast Survey for the fiscal year 1861-62, and, if approved, would respectfully request that you will insert them in your estimates of appropriations. The several items of the yearly appropriations are identical with those which met your approval last year and that of Congress.

The loss of the steamer Walker requires an item to replace her. As the government policy forbids our resort to the usual modes of security against marine losses, preferring to act as its own insurer, we have no other resource than the public treasury when such losses occur. We have been fortunate in avoiding such losses, and in the only notable case, that of the steamer Jefferson, lost on the coast of Patagonia, Congress promptly replaced the vessel.

In conformity with the policy of the Treasury Department, I have not asked the increase which is required to bring these estimates to their footing of 1857-58, when I estimated the time of completion of the work. This restoration only is needed to make good those estimates of time.

The appropriation asked for the Florida line is for its completion. I was not sure, and so stated in my letter of last year, how this would turn out; but I am now confident that this appropriation will complete the work. It has been a saving of four times the amount appropriated by avoiding a main triangulation around the coast of the peninsula.

I have been able still to keep the usual number of parties on the western coast, and have therefore restricted the item for that part of the survey to its usual limit.

If the item for the publication of records could be doubled, it would be of great advantage. The work is constantly called for at home and abroad, and the present appropriation merely enables us to keep pace with the preparation of the new work for publication.

The survey has again been in progress in every sea-board State and territory of the United States, in either work in the field, afloat, or in the office, and the estimates provide for the onward progress upon the same plan.

The Atlantic triangulation is, as the map sent herewith shows, continuous along the coast of twelve States from Passamaquoddy to the boundary of North and South Carolina, a stretch of more than twelve hundred miles, measured in the most general way. With an interval of some fifty-four miles which is diminished every year by the party at work there, the triangulation is again continuous over the coast of South Carolina, to Cumberland Sound on the coast of Georgia, two hundred and eighty miles. Then there is an interval of twenty-seven

miles which this season will fill up, to the St. John's river, Florida, and the triangles are again continuous to Matanzas inlet, south of St. Augustine. Two parties are working from Matanzas inlet south and from Indian river inlet north, to fill up that interval, to which a third will next season be added, proceeding north from Cape Florida. Another season, or two at most, will fill up the whole space from Cape Florida to Cape Sable, and along the keys from Key Biscayne to Key West and the Marquesas. Charlotte harbor is triangulated and the work extends from Anclote Key to Cedar Keys, ninety miles; from Ocilla river by St. Mark's and Apalachicola to Cape San Blas, ninety-five miles; over St. Andrew's bay; includes East bay, Maria de Galvez, Escambia, and Pensacola bays; touches the entrance of Perdido bay; extends from Mobile bay one hundred and fifty miles to Lake Pontchartrain and over Chandeleur and part of Isle-au-Breton sound to the Delta of the Mississippi, the greater part of which it now includes; over Isle Dernière and Caillou bay; over Atchafalaya and Côte Blanche bays; and from East bay (Galveston) two hundred and fifteen miles passing over Matagorda and Aransas and Corpus Christi bays and their dependencies, to within one hundred and fifteen miles of the Rio Grande.

The progress on the western coast has not been less satisfactory, taking the newness of the survey there into consideration. It has included all the harbors of California and Oregon, and many of those of Washington Territory, especially those of Washington Sound, Puget's Sound and Admiralty inlet, the straits of Haro and Rosario and part of the Gulf of Georgia in the northwest.

Having given in my letter of last year a statement of the progress of the astronomical and magnetic work, I need not repeat it here. The longitude problem has been steadily kept in view, and the occurrence of the total solar eclipse, the path of which crossed from the north-western part of the United States through Washington Territory and the British Possessions, leaving the continent on the coast of Labrador, has been made available for the correction of longitudes and of the lunar tables, by parties sent out for the purpose in connection with those of other departments of the government, and in correspondence with the great astronomical expeditions of Europe.

The number of geographical determinations published by the Coast Survey, exclusive of those made within the past year, is seven thousand one hundred and seventy-eight; the magnetic variations given are upwards of two hundred; the tidal constants for harbors and coast one hundred and ten; and the maps and charts of harbors, bays, inlets, sounds, shoals, &c., drawn, engraved, and published, three hundred, exclusive of progress sketches and diagrams.

Photography has been successfully introduced as a regular part of the office routine in reducing the field maps for engraving, and the whole subject has been systematized in a way to produce a decided gain in time and expenditure. Electrotyping has for some years formed a regular part of the office routine, so that few engraved plates are printed without previous electrotyping. The application to the issue of preliminary charts, by which no portion of engraving is ever lost, and yet each year's field-work is brought out soon after it comes to the

office, has been very successful. These and other matters relating to the progress of the work will be given in more detail in my annual report.

I have revised my estimates of completion of the work, and have ascertained that notwithstanding some severe losses this year, we have kept up to the mark which I had set, and so I have nothing to change in the statements of time made in my report of last year. I will not therefore repeat here what I then said, but proceed at once to give the detailed estimates. The report of this year will give all the details of progress in every section of the coast.

The estimates include as usual in the separate items for Atlantic and Gulf coast, Florida reefs, and Western Coast, the pay of the civilians employed in the work. They suppose the same facilities drawn from the War and Navy Departments as in past years, and connect the rate and localities of progress with the amounts asked. The table with which these estimates close, shows that the items are precisely the same in amount as those asked and appropriated last year.

#### ESTIMATES FOR THE FISCAL YEAR 1861-62.

The annual estimates are precisely the same in amount as those of last year, and are stated in the usual way, the work to be executed being stated, with the amount needed for its accomplishment. This scale of estimate contemplates the completion of the field work on the Atlantic and Gulf coast, in eight to ten years from the present year. By restoring it to the grade of 1857-58, a year in time may be saved. I have conformed to the expressed policy of the Treasury Department in keeping the items at the reduced standard of last year.

The loss of the steamer Walker, by collision at sea, requires an appropriation to replace her. As the government acts as its own insurer, this is an indispensable item of estimate. The loss of a considerable part of the records of last season's work, and the loss of time from having no steamer to take the Walker's place in the Gulf of Mexico, will be sensibly felt in our progress; and I would respectfully urge that another steamer be supplied at the earliest practicable period, so as to enable us to work up again, as soon as possible, to the former efficiency.

The estimates suppose the same aid from the War and Navy Departments as heretofore. Should any part of this be withheld, the proportionate progress of the survey must be diminished, and its completion postponed accordingly.

The several items now presented are the same in amount as have thrice met the approval of Congress, and once by the Congress which will pass upon these.

The item for the line across the Florida peninsula will complete that work. Twenty-seven miles were executed last season in an air line, and forty-three remain to be completed, to reach Cedar Keys. (See the accompanying sketch.) Allowing the usual progress this season, the next year, with the amount asked, will complete this triangulation. The saving, over that which would have been required for a main

triangulation around the peninsula, cannot be estimated at less than four times the cost of this work across.

## ESTIMATES IN DETAIL.

For general expenses of all the sections,\* namely, rent, fuel, materials for drawing, engraving, and printing, and ruling forms, binding, transportation of instruments, maps, and charts, for miscellaneous office expenses, and for the purchase of new instruments, books, maps, and charts..... \$19,000

SECTION I. *Coast of Maine, New Hampshire, Massachusetts, and Rhode Island. Field Work.*—To continue the primary triangulation in this section, and to make the astronomical and magnetic observations connected with it; to extend the secondary triangulation from *Isle au Haut* and the mouth of the *Penobscot*, along the coast eastward towards *Englishman's bay*, and to continue that of *Passamaquoddy bay*; to commence the topography of *Goldsborough harbor*, of *Frenchman's bay*, and that of *Penobscot bay*; to continue that between the *Kennebec* and *Sheepscot rivers*, and that of the coast east of the *Kennebec*; to extend eastward that of *Casco bay*, and complete that of *Cape Cod bay*; to continue the in and off-shore hydrography of the coast of *Maine*, including *Muscongus bay*, *Penobscot bay*, and the ledges off the coast; to continue the tidal and magnetic observations at *Eastport*, and to make tidal observations in connection with the hydrography. *Office Work.*—To make the computations required by the field work; to complete the drawing of coast maps and charts No. 7, *Muscongus bay to Portland*, and No. 11, *Plymouth to Hyannis*; to complete the engraving of coast map and chart No. 9, *Kennebunkport to Cape Ann*; charts of the *Sheepscot* and *Kennebec* rivers, and the sketches of the section; to continue the engraving of preliminary sea-coast chart No. 3, *Small Point to Cape Cod*, coast map and chart No. 10, *Ipswich to Green Harbor*, the chart of *Portland harbor*, and the engraving of No. 11, the drawing and engraving of off-shore chart No. II, *Cape Ann to Gay Head*, and that of coast map and chart No. 8, *Sequin island to Kennebunkport*; to continue the drawing and commence the engraving of preliminary sea-coast chart No. 2, *Isle au Haut to Cape Elizabeth*, and drawings for charts of the *Damariscotta entrance* and *Jeffreys' bank*, will require.....

\* Viz: of all included in this item—inclusive of Sections I to IX, and exclusive of Section VI.

SECTION II. *Coast of Connecticut, New York, New Jersey, Pennsylvania, and part of Delaware. Field Work.*—

To commence the triangulation of the rivers of *Connecticut*; to continue the topography of the shores of the *Hudson*; to continue the hydrography of the *Hudson river*, and, if practicable, to commence that of the rivers of *Connecticut*; to execute miscellaneous work of revision in the section, and continue the tidal observations. *Office Work.*—To make the requisite computations; to complete the drawing of coast map and chart No. 21, *New York bay and harbor*, (new edition,) and engrave soundings on the lower sheet of *Hudson river*; to draw and engrave hydrographic sketches of the vicinity of *Sandy Hook shoals* and *Barnegat*, and others, to show progress; and to continue the engraving of chart No. 21, will require.....

\$14,000

SECTION III. *Coast of part of Delaware, and that of Maryland and part of Virginia. Field work.*—To continue

the astronomical and magnetic observations required in the section; to examine and preserve the more important triangulation stations; to continue the triangulation of the *Potomac river* in connection with its topography; to continue the topography of the *James river*, and that of the outer coast of *Virginia* if practicable, and to complete that of the lower part of *Chesapeake bay*; to continue the off-shore hydrography of the section, the hydrography of the *Potomac river*, and the tidal observations. *Office Work.*—To make the reductions and computations required; to complete the drawing and continue the engraving of the upper sheet of the *Patuxent river*; to complete the drawing and commence the engraving of the lower sheet of the *Potomac river*; to complete the engraving of chart No. 32, *Chesapeake bay*, between *Magothy and Hudson rivers*; to continue the engraving of charts Nos. 35 and 36, *Chesapeake bay*, between the entrance and *Pocomoke sound*; to continue the drawing and commence the engraving of off-shore chart No. IV, *Cape May to Currituck*; to continue the engraving of coast map and chart No. 29, between *Green Run inlet and Little Machipongo*, and commence that of the chart of *James River entrance*; to commence the drawing of coast map and chart No. 30 bis, between *Great Machipongo and Cape Henry*, and to draw and engrave the sketches of the section, will require.....

25,000

SECTION IV. *Coast of part of Virginia and part of North Carolina. Field Work.*—To continue the primary triangulation of *Pamlico sound*, and the secondary in connexion with it; to make the necessary magnetic

observations; to complete the topography of the outer coast of *North Carolina*, south of *Hatteras*, to a junction with the *Core sound* work; to continue the in and off-shore hydrography between *Cape Lookout and Cape Fear*; to continue observations of the tides and currents, and of the *Gulf Stream*. *Office Work*.—To make computations from the field data; to complete the drawing of coast maps and charts Nos. 46 and 47, *Cape Lookout to Barren inlet*, and to draw and engrave sketches of progress in explorations of the *Gulf Stream*; to continue the drawing of off-shore chart No. VI, from *Ocracoke to Charleston harbor*, of coast map and chart No. 37, *Cape Henry to Currituck*, and that of No. 42, *Pamlico Sound*; to continue the engraving of preliminary sea-coast chart No. 11, *Cape Hatteras to Cape Lookout*; to commence the drawing of coast maps and charts Nos. 38 and 39, from *Currituck to Hatteras light-house*, and No. 44, from *Hatteras light to Ocracoke inlet*; to commence the engraving of coast map and chart No. 46, *Cape Lookout to Bogue inlet*, and to engrave the sketches of the section, will require.....

\$23,000

SECTION V. *Coast of part of North Carolina, and that of South Carolina and Georgia. Field Work*.—To continue the coast triangulation from the boundary of *North and South Carolina*, southward and westward towards *Winyah bay*; to extend the primary triangulation south of *Port Royal sound*, towards the *Savannah river*, and make the secondary triangulation of the intervening rivers; to complete the secondary triangulation of the coast of *Georgia*, and to measure, if practicable and requisite, supplementary bases in the section; to continue the topography of *Port Royal sound*, and of the islands and interior passages between it and *St. Helena sound*; to continue that of the shores of *Wassaw sound* and of its rivers, and to join with the work on the passages from *Savannah river*; to execute the hydrography of *Wassaw sound* and its dependencies, connecting with *Tybee entrance* and *Savannah river*, and, if practicable, to begin that of *St. Andrew's sound*; to connect the hydrography of *Doboy entrance* with the in-shore work between *Sapelo and St. Simon's*; to run the off-shore lines required off the coast of *North and South Carolina and Georgia*; to continue the tidal observations at *Charleston and St. Mary's river entrance*, and to make, if practicable, tidal and current and *Gulf Stream* observations. *Office Work*.—To continue the computations from field records; to complete the drawing and engraving of lines of deep-sea soundings run in this section; to continue the drawing and engraving of a chart of *Broad and Beaufort rivers*,

South Carolina, and the engraving of the chart of *Ossabaw sound*; to continue the drawing of off-shore chart No. VII, from *Winyah bay to St. John's river*; coast map and chart No. 54, from *Fripp's inlet to Ossabaw sound*; Nos. 56 and 57, from *St. Catharine's sound to St. Mary's river*; preliminary sea-coast chart No. 15, from *Savannah river to St. John's river*; and commence the engraving of the chart of *St. Catharine's sound, Georgia*; to commence the drawing of charts of *Wassaw and Doboy sounds*; to commence the engraving of coast map and chart No. 53, between *Stono inlet and Fripp's inlet*, and to engrave the sketches of progress, will require.....

These are the regular items of annual expenditure. The loss of the steamer Walker requires, to restore the efficiency of the hydrography,

the following, which forms no part of the annual expenditure of the survey:

To provide for a steam vessel, in place of the steamer  
Walker, lost by collision at sea..... \$45,000

This last item can only be considered as replacing part of the capital of the survey, for which the government has been the insurer.

## LIGHT-HOUSE ESTABLISHMENT.

TREASURY DEPARTMENT, OFFICE L. H. BOARD,  
*Washington City, October 20, 1860.*

SIR: The Light-house Board has the honor to submit for your examination and consideration the accompanying estimates of funds which will be required for the support and maintenance of the light-house establishment for the fiscal year ending 30th of June, 1862, in addition to the estimated balances under the respective heads of appropriation which will be available for the service of the said fiscal year, at the close of the present fiscal year ending on the 30th of June, 1861.

These estimates are exhibited in tabular form, from No. 1 to No. 5, inclusive, with explanatory tables in detail, marked A, B, C, D, E, F, G, H, I, K, L, M, N, and O.

It will be observed that the estimate for supplies (see the item in table No. 3 and explanatory table A) is greater this year than last by the sum of \$18,472 80. This is caused by the increased supply of oil found to be necessary by actual experience and by careful experiment and by the increased price of the article.

The estimate for repairs of light-houses (see the item in table No. 3 and explanatory table B) is less this year than last by the sum of \$13,326 14.

The estimate for salaries of light-house keepers (see the item in table No. 3 and explanatory table C) is greater this year than last by the sum of \$24,280 36. This is accounted for by the fact that there was a balance of \$22,035 36 under this head last year, which was added to the appropriation asked for, causing the expenditure of that year to amount to \$210,948 33, which is \$2,244 97 less than is asked for this year. This increase is due to the erection of new light-houses—Minot's Ledge and others.

The estimate for salaries of keepers of light-vessels (see the item in table No. 3 and explanatory table D) is less this year than last by the sum of \$3,450. Caused by the diminution in the number of light vessels afloat.

The estimate for seamen's wages, &c., &c., (see the item in table No. 3 and explanatory table E,) which includes all expenses of light-vessels, other than salaries of keepers, is less this year than last by the sum of \$1,738 70.

The estimate for buoy service (see the item in table No. 3 and explanatory table F) is greater this year than last by the sum of \$5,350, or five per cent. increase on the amount asked for last year. This increased amount is demanded by the increased buoyage of the coasts and harbors, authorized by acts of Congress.

The estimate for expenses of visiting and inspecting lights (see the item in table No. 3 and explanatory table G) is greater this year than last by the sum of \$585 19. This is caused by the fact that last year there was a balance of \$585 19, which was added to the appropriation asked for, and which made the expenditure of that year \$2,000; which is the sum asked for this year.

The estimate for commissions to superintendents (see the item in table No. 3 and explanatory table H) is greater this year than last by the sum of \$361 39, which is caused by the fact that last year there was a balance of \$361 39, which was added to the appropriation asked for, and which made the expenditure of that year \$7,000; which is the sum asked for this year.

In addition to the regular estimate for commissions, the sum of \$12,782 27 has been asked for, to pay commissions to certain superintendents, who though not entitled to commissions for disbursements within their districts (their salaries amounting to more than \$2,500) have yet been declared by a recent decision of the Supreme Court of the United States, (see Howard's Reports, December term, 1858, *Converse vs. the United States*,) to be entitled to commissions for disbursements, for objects outside of their districts.

These are all the estimates for the Atlantic, Gulf, and Lake coasts.

Of the estimates for the Pacific coast, it will be observed, that the estimate for supplies (see item in table No. 5 and explanatory table I) is greater this year than last by the sum of \$5,603 36, which is caused by the fact that last year there was a balance of \$5,603 36, which was added to the appropriation asked for, and which made the expenditure for that year \$17,270; which is the sum asked for this year.

There was nothing asked for for repairs for this coast last year, as there was a balance of \$7,500; which was expended. This year the sum of \$10,000 is asked for, which is an increase over the expenditure of last year of \$2,500; and which is believed to be required by the present condition of the light-houses on that coast.

The estimate for buoy service this year is greater than last by the sum of \$7,000, which arises from the fact that there was a balance of \$7,000 last year, which was added to the appropriation asked for, and which made the expenditure for that year \$10,000, which is the same amount asked for this year.

The estimate for salaries of keepers on this coast is greater this year than last by the sum of \$21,800. This is caused by the fact that last year there was a balance of \$17,000, which was added to the sum asked for, and which made the expenditure for that year \$21,000, which is \$4,800 less than is asked for this year. The increase is due to the new light-houses in course of construction and to be constructed on that coast under existing acts of Congress, and for which keepers will have to be appointed.

The subjoined tabular statement of the comparative amounts of estimates of this year (1861-62) and last (1860-61) has been prepared, to show concisely that, although at first glance there appears to be a largely increased amount asked for for 1861-62 over that asked for 1860-61, yet, when the balances on hand on the 30th June, 1860, are taken into view, it will be perceived that the excess for 1861-62 is very slight, and even this excess is more than accounted for by the increased price of oil which it will be necessary to pay, at least 10 cents per gallon.

*Atlantic, Gulf, and Lake Coasts.*

	Estimates 1861-62.	Estimates 1860-61.	Expenditures 1860-61.

Deduct amount of extra commissions to superintendents for disbursement outside of districts.....	12,782 27		
Amount of regular estimates for 1861-62.....	786,309 83		
Amount of expenditures 1860-61.....	778,755 47		

Leaving an increase for 1861-62 of..... 7,554 36

But which is more than accounted for by the increased price of oil, viz: 10 cents per gallon on 80,000 gallons, \$8,000.

Indeed, when it is considered that a large item embraced in the estimates for 1861-62, viz: that for commissions to superintendents for disbursements for objects beyond the limits of their respective districts, as per decision of the Supreme Court above referred to, is in fact to meet an expense belonging not to this year, but to last year, and which amount (\$12,782 27) should in justice be deducted from 1861-62 and added as an item of the expenses of 1860-61, it is plain that the aggregate amount for 1861-62 is less than that of 1860-61.

The foregoing explanations will enable you to perceive that the board proposes, as heretofore, to administer the affairs of the Light-house Establishment for the coming year (1861-62) with a due regard to economy, and that it has confined its estimates within the smallest limits consistent with efficiency.

A list of the light-houses and light-vessels of the United States, showing number of keepers and assistant keepers, and the amount of salary allowed to each, is appended, marked P.

GENERAL LAND OFFICE,  
*October 10, 1860.*

SIR: I have the honor to submit estimates of appropriations required for this branch of the public service, for the fiscal year ending June 30, 1862, viz:

1. Estimate of salaries in this office. In the estimate under this head, we have included the number of clerks provided by the act of 1853, with the *three* principal clerks authorized by act of July 4, 1836, for one of which no appropriation was asked at the last session.

2. Estimates of contingent expenses, \$44,000, for this office, on the basis authorized and appropriated per act of June 23, 1860, which reduced our submitted estimate in the sum of \$10,000.

3. Estimate of appropriations for collecting revenue from the sales of public lands, upon the estimate of \$2,000,000 receipts.

4. Estimate of the probable amounts of the two, three, and five per cent. to certain States, and for refunding, &c., on same basis of receipts.

The surveying estimates will be accompanied with a separate communication.

With great respect, your obedient servant,

JOS. S. WILSON,  
*Commissioner.*

Hon. JACOB THOMPSON,

### EXPLANATIONS.

13. The organic act provided no compensation for a translator. Special appropriations of \$2,000 per annum have been made for that purpose from year to year, except June 23, 1860, when \$1,467 06 was appropriated, owing to an unexpended balance of \$532 94 then on hand of previous year.

20. The compensation fixed by law to the clerks in the several surveying districts having proved insufficient, special estimates have been for upwards of thirty years past submitted, and appropriations made; the present estimate is apportioned as follows: \$4,000 to Washington Territory, \$5,000 to Oregon, \$5,000 to California, \$4,000 to New Mexico, \$3,000 to Kansas and Nebraska, \$3,000 to Minnesota, \$1,000 to Florida; making in all \$25,000; to be adjusted, however, hereafter, according to the public exigencies.

22, 24, and 25. The organic acts of the respective surveying districts provide \$1,000. The amount having proved insufficient, special estimates have been submitted from year to year, and appropriations made accordingly. The estimate for New Mexico for the year ending June 30, 1862, is \$3,000, of which \$1,200 is for rent of office, and \$600 for pay of messenger, leaving for other expenses \$1,200. This sum has to be increased by \$1,500, owing to deficiencies during the fiscal year ending June 30, 1860, of \$1,119 15, and an expected deficiency for the year ending June 30, 1862, of \$380 85.

26. Kansas and Nebraska district, by act of July 22, 1854, is authorized to have the same as Wisconsin and Iowa surveying district for the incidental expenses, which have been at the rate of \$3,000 per annum.

28. The surveyors generals' offices for Illinois, and Missouri, and Louisiana, under the provisions of the acts for the discontinuance of surveyors generals' offices, June 12, 1840, 5 Statutes, page 384, and January 22, 1853, 10 Statutes, page 152, will, it is expected, be closed during the ensuing year; and in that event the unfinished business connected with these districts will devolve on the Commissioner of the General Land Office, who is ex-officio surveyor general upon the discontinuance of a surveying district, and the estimate now submitted, it is expected, will be required for unfinished work.

*Estimates of appropriations required for surveying the public lands for the fiscal year ending June 30, 1862.*

Object of appropriations.	Estimates of appropriations required for the service of the fiscal year ending June 30, 1862.	Estimates of the balances of appropriations unexpended on June 30, 1861, which, may be applied to the service of the next fiscal year.	Appropriations for the service of the fiscal year ending June 30, 1861.
1. For surveying the public lands, exclusive of California, Oregon, Washington, New Mexico, Kansas, Nebraska, and Utah. This estimate includes incidental expenses, island surveys, in the interior, and all other special and difficult surveys demanding augmented rates, to be apportioned and applied to the several districts, according to the exigencies of the public service, including the expenses of selecting swamp lands, the compensation and expenses of surveyor to locate private land claims in Louisiana, in addition to the unexpended balances of former appropriations for the same object, which will be absorbed by work under contract.....	\$50,000 00	.....	\$50,000 00
2. For surveying the public lands and private land claims in California, to be disbursed at the rates prescribed by law for the different kinds of work. (See note No. 2).....	30,000 00	.....	20,000 00
3. For surveying the public lands and private land claims in New Mexico, to be disbursed at the rates prescribed by law.....	15,000 00	.....	10,000 00
4. For surveying the public lands in Kansas and Nebraska; also, outlines of Indian reservations. (See note 4).....	20,000 00	.....	20,000 00
5. For the salary of the clerk for the special service, in the General Land Office, to attend to the unfinished surveys in the States where the offices of the surveyors-general have been closed...	2,000 00	.....	2,000 00
6. For surveying the public lands in Oregon, to be disbursed at the rates now authorized by law.....	20,000 00	.....	15,000 00
7. For surveying the public lands in Washington Territory, at the rates now authorized by law.....	20,000 00	.....	15,000 00
	157,000 00	.....	.....

## EXPLANATIONS OF THE FOREGOING ESTIMATES.

1. This amount of \$50,000 is to be appropriated as follows: To the State of Minnesota, \$16,000; to Wisconsin, \$16,000; to Minnesota Territory, \$10,000; and to Florida, \$8,000. The first item includes \$3,000, and the second and third together \$3,000, and the last \$1,000, for rents of offices of the respective surveyors-general, and incidental expenses, to be adjusted, however, hereafter according to the public exigencies.
2. This amount of \$30,000 is to be chiefly applied to the survey of confirmed private claims.
3. This amount of \$15,000 is to be chiefly applied to the survey of confirmed private claims and survey of public lands.
4. This amount of \$20,000 is deemed requisite in order to keep pace with the progressive settlements along the Pacific routes and other localities demanding the extension of the lines of public surveys.
5. This amount of \$2,000 is for the salary of one clerk to attend to the unfinished surveys in the field in those States where offices of surveyors-general have been closed, the superintendence of which devolved on the Commissioner of the General Land Office. (See Statutes at Large, volume 11, page 321.)
- 6 and 7. The sums of \$20,000 each are deemed necessary for the survey of the public lands in the respective districts, and particularly in the country east of the Cascades, where there are numerous settlers demanding an extension of the surveys, and where in these district regions every facility and encouragement should be given to permanent settlers.

For lighting the Capitol and President's House, the public grounds around them and around the executive offices, and Pennsylvania avenue, Bridge and High streets, in Georgetown, Four-and-a-half, Seventh, and Twelfth streets across the Mall; Little & Brown, Statutes at Large, first session Thirty-sixth Congress, page 107.....		42,000 00	42,000 00
[The estimate for the current year was \$47,000. It was reduced in the appropriation \$5,000, and this estimate is made to conform to the appropriations of the last session, as it will not affect the expenditure one way or the other. The expenditure will be governed entirely by the wants of the light, whether greater or less than the appropriation. An estimate for this object cannot be made with positive certainty, as the consumption of gas depends upon so many contingencies that cannot be foreseen; such as dark days and nights, the number of night sessions, the occupation of the committee rooms at night, &c.]

GOVERNMENT HOSPITAL FOR THE INSANE,  
*October 10, 1860.*

SIR: I have the honor respectfully to submit, herewith, estimates for the support of the public patients in this institution, for the year ending June 30, 1862, and for sundry improvements deemed necessary to the completeness, preservation, and greatest usefulness of this establishment.

We have already had in the house, at one time, as high as one hundred and fifty-eight patients belonging to the army, navy, and revenue service, and of indigent insane belonging to the District; and it is much more probable that the average number to be supported by the government during the next fiscal year will exceed, than fall short of the number upon which I have based an estimate of the sum necessary to support the hospital during the period in question.

I propose to offer some further explanations of the estimates here submitted, in my annual report upon the progress and condition of this work.

I am, sir, very respectfully, your obedient servant,

C. H. NICHOLS,  
*Superintendent.*

HON. JACOB THOMPSON,  
*Secretary of the Interior.*

*Estimates for the fiscal year ending June 30, 1862.*

For support, clothing, and medical and moral treatment of the insane of the army and navy and of the revenue service, and of the District of Columbia, including \$500 for books and incidental expenses.....	\$35,500 00
For repairs and painting of four western or first erected sections of the hospital edifice, including additions to the furniture and gas fixtures of those wards; repairs and painting of farmer's and gardener's houses, and outbuildings and fences; ice-house, including preserving cellar; extension of stable for storage of hay and other fodder, and shelter of farm wagons and carts, and inclosing two sides of farmyard with brick wall; improvement of grounds, including pavement surrounding all the buildings; grading and planting trees; paving gutters and placing seats in the pleasure-grounds of the patients; forcing and green-house, including heating apparatus; fitting up two bowling alleys—one in basement of each wing.....	8,000 00
For extending the stone and brick wall already forming a part of the exterior boundary of a portion of the hospital grounds, with the view of eventually inclosing the whole tract in the same way.....	10,000 00
For building a bridge of stone abutments and brick arch over " <i>Stick-foot branch</i> ," and grading the road from the hospital gate towards the city, a distance of 160 rods: <i>Provided</i> , that before any expenditure for this purpose is made, the levy court of the District authorize, without cost to the Government, a change in the position of the road, so that the ascent of the hill shall be gradual and in a nearly straight line; and, also, that the said levy court, by resolution recorded in their proceedings and certified by their clerk, shall agree to accept the road and bridge when so improved, as a county road under their jurisdiction, and keep it in good repair at the expense of the county.....	4,000 00

SMITHSONIAN INSTITUTION,  
Washington, October 23, 1860.

SIR: I have the honor to submit the following remarks, and estimates:

The act of Congress making appropriations for the legislative, executive, and judicial expenses of government, for the year ending 30th of June, 1858, made the following provision:

"For the construction and erection of suitable cases to receive the collections of the United States exploring expeditions and others in geology and mineralogy, belonging to the United States now in the Patent Office and elsewhere in Washington, fifteen thousand dollars."

In accordance with this act, suitable cases were erected in the Smithsonian hall for the reception of the specimens *at that time* in the Patent Office. These specimens have been suitably arranged, most of them newly labelled, and placed in a better condition for exhibition to the public, and for preservation than ever before.

This appropriation, however, was only made to provide cases for specimens *then* in Washington, (1858,) the immediate object being to restore the room occupied by them to the use of the Patent Office.

Since that time, many new expeditions have been sent out by government, the collections of which have been received by the Smithsonian Institution, under the act of Congress of August 10, 1846.

For the arrangement in suitable cases, of these collections which are exceedingly valuable and interesting, no provision has yet been made by Congress. Among the expeditions whose collections have been received since the first appropriation before referred to are the following:

- Lieutenant Warren, exploration of the Platte.
- Lieutenant Ives, exploration of the Colorado.
- Lieutenant Beale, exploration of Wagon road.
- Captain Macomb, exploration of Rocky Mountains.
- Captain Simpson, exploration of Utah.
- Lieutenant Mullan, exploration of Wagon road.
- Captain Pope, exploration of Llano Estacado.
- Captain Reynolds, exploration of Upper Missouri.
- Colonel Magraw, exploration of Wagon road.
- Captain Page, exploration Paraguay.
- A. Campbell, Esq., survey of Northwest Boundary.
- Lieutenants Craven and Michler, survey of Atrato Ship Canal.
- Dr. John Evans, survey of Oregon and Washington.

The collections deposited in the Institution contain a large number of duplicates, which, in accordance with the act of 1846, may be distributed to colleges and other institutions of learning, but in order that they may be of value in the way of education it is necessary that they should first be classified and labelled.

This work has been commenced by the Institution, but it is found to

involve considerable expense which ought not to be defrayed out of the Smithsonian fund.

I therefore respectfully submit the following estimates for appropriations for the next fiscal year :

For the construction of suitable cases to receive the collections of the exploring and surveying expeditions of government, and for the expense of classifying, labelling, and distributing duplicate specimens.....	\$10,000
For the preservation of the collections of the exploring and surveying expeditions of the government.....	4,000

I have the honor to be, very respectfully, your obedient servant,

JOSEPH HENRY,  
*Secretary.*

Hon. J. THOMPSON,  
*Secretary of the Interior.*

Additional matter, having reference to these estimates, having been received since the above was written, from the superintendent of Indian affairs for Oregon and Washington, the same is submitted in copies of letters from him of September 12 and 24, 1860, with accompanying papers, marked I and J, herewith.

A copy of the superintendent's letter of August 26, 1860, relative to the importance and necessity of appropriation for the removal and subsistence of Indians in Oregon and Washington, not parties to any ratified treaty, is also submitted, marked C.

Also, copies of his letter of May 28, 1860, marked D, inclosing copy of letter from John Owen, Indian sub-agent, with reference to the inadequacy of the rates of pension appropriated for the various employes under the treaties ratified.

No appropriation having been made by Congress for fulfilling of those treaties (Oregon and Washington) for the fiscal year ending June 30, 1861, estimates are now submitted for the second installments due for that year.

No appropriations were made for these stipulations for the year ending June 30, 1861, except \$1,000 for pay of head chiefs, which was \$500 less than required by treaty. Estimates are now submitted for the second installments due for that year.

OFFICE SUPERINTENDENT INDIAN AFFAIRS,  
*Portland, Oregon, September, 3, 1859.*

SIR: I have the honor to transmit herewith my estimates of appropriations required for this superintendency during the fiscal year ending June 30, 1861.

Accompanying the estimates is an elaborate appendix, which, it is thought, gives all the facts and explanations necessary to enable Congress to base intelligent action thereon.

It is assumed in the estimates herewith, for carrying into effect the treaties ratified by the Senate in March and April last, that appropriations thereunder, for the first year, have been made or will be made in compliance with my estimates therefor. Upon the efficiency of the Indian service here and a faithful compliance with treaty stipulations depend the peace of the country. The estimates being based upon the actual wants of the service and the lowest cash prices of this country, the amounts cannot be cut down without serious injury to the service. If future Indian wars are sought to be avoided, you cannot too strongly represent to Congress the necessity of a faithful compliance with treaty stipulations, and the maintenance of an efficient Indian service in this superintendency.

Very respectfully,

EDWARD R. GEARY,

*Superintendent Indian Affairs.*

Hon. A. B. GREENWOOD,

*Commissioner Indian Affairs, Washington City.*

## B.

*Estimate of appropriations for general objects not provided for by treaty stipulations or existing laws, but necessary for the Indian service in the Oregon and Washington superintendency during the fiscal year ending June 30, 1861.*

Necessary provisions and clothing (not provided for by treaty) for 8,500 Indians in Oregon, east of the Cascade mount- ains.....	20,000
Pay of necessary employés not provided for by treaty.....	10,000
	<hr/>
	100,000
	<hr/> <hr/>

## C.

In view of the recent descent of the Snake Indians upon Warm Spring reservation, (see report thereof from this office, dated August 19, 1859,) to prevent difficulties growing out of the same, and to enable the superintendent to take means to guard against similar outbreaks, this sum should be placed in his hands..... \$5,000

## D.

Office, traveling, and contingent expenses of five Indian agents, at \$3,000 each .....	\$15,000
Office, traveling, and contingent expenses of the superintendent of Indian affairs, (not including clerk hire,) \$6,000, one half chargeable to Washington Territory,	3,000
Transportation of annuities, goods, and presents .....	5,000
	<hr/>
	23,000
	<hr/> <hr/>

## E.

Necessary provisions and clothing (not provided for by treaty) for 9,712 Indians on Puget's Sound and west of the Cascade Mountains, in Washington Territory .....	\$30,000

Pay of necessary employés, not provided for by treaty .....	10,000
	<hr/>
	50,000
	<hr/> <hr/>

## F.

For the purpose of adjusting difficulties and preventing outbreaks among the various tribes east of the Cascade Mountains, and to enable the superintendent to take proper steps for the protection of friendly Indians upon reservations, on Puget's Sound, from the marauding bands of northern Indians infesting the Gulf of Georgia and northern waters of the Sound, this sum should be placed in his hands..... \$5,000

## G.

The location of the office of the superintendent of Indian affairs at Portland, will enable the superintendent to purchase the great bulk of the supplies required by various agents and sub-agents, and to make disbursements in payment of a majority of the employés on the several reservations. This will effect a great curtailment of expenses, as it will save much in the item of traveling expenses incurred by agents, and will obviate the necessity of employing clerks at the

several agencies, a practice heretofore much indulged in, but now sought to be entirely abandoned. To carry out these objects, and to effect promptness and efficiency in all matters appertaining to the official correspondence, reports, and accounts, the following clerical force will be required in the office of the superintendent of Indian affairs, viz :

One secretary to superintendent, at a salary of.....	\$1,800
One clerk to superintendent, at a salary of.....	1,600
Temporary and occasional clerk-hire, when necessary.....	800
	<hr/>
	4,200
	<hr/> <hr/>

---

H.

Oregon is allowed by law three full agents and four sub-agents. As it is of great importance that a full agent be stationed permanently in the Snake country, to prevent the predatory forays of those Indians upon emigrants, white settlers, east of the Cascade Mountains, and the friendly Indians upon reservations, I would recommend that one of the sub-agents for Oregon be dispensed with, and an additional full agent allowed.

OFFICE SUPERINTENDENT INDIAN AFFAIRS,  
*Portland, Oregon, August 26, 1860.*

SIR: Referring to that portion of your letter of the 19th July last advising that no appropriation had been made by Congress for "defraying the expenses of the removal, subsistence," &c., I have to say that the failure to make such appropriation will seriously embarrass the operations of the service in this superintendency during the entire year. The amount of my estimate under that heading for Oregon and Washington, based upon data which I conceive is entitled to serious consideration, was \$150,000, and this sum was greatly below the aggregate of the estimates for that purpose made by the several agents.

I will call your attention to the following paragraph in your letter of the 3d September, 1859: "The secretary further approves your views relative to the proposed removal of the Indians now at the Umpqua agency to Yaquina bay, on the coast reservation, and directs that you will take the earliest measures to that end," &c. When this letter was received the season was too far advanced to effect the removal with convenience, safety, and economy, and the undertaking was necessarily deferred to the present season. And I have now to state that, in obedience to the foregoing direction, and in anticipation of an adequate appropriation from which these expenses could be paid, the removal referred to was commenced early in July, and is now nearly completed, farms being opened at the new homes of those Indians, fences made, ground broken, buildings erected, &c. Besides this, in compliance with the requisitions of Sub-Agent Sykes, in charge of this important movement, the necessary supplies for the clothing and subsistence of those Indians, (none of which are provided under any treaty stipulations,) as well as the subsistence of his employés, during the coming winter, have been shipped to Yaquina bay, and other expenses connected with the undertaking have been incurred, for the payment of which no adequate appropriation has been made.

The reason stated by you for the failure of Congress to make appropriation is that it was "considered that ample provision had been made under the several treaties for those purposes." It is a serious mistake to suppose that all the Indians of this superintendency are parties to treaties and are provided for in the appropriations for fulfillment of treaty stipulations. The inclosed statement will exhibit the fact that there are no less than 16,314 Indians in this superintendency who are not parties to any treaty, and of course are not beneficiaries under treaty stipulations with the United States. On the Coast reservation of Oregon alone there are 2,099 Indians who are not parties to any treaty, (treaties were made, but never have been ratified,) and the treatment of these Indians must be placed upon an equality with the other Indians on the same reservation, or serious dissatisfaction will be the result. It is obviously the imperative duty of this office to care for these Indians, in order to maintain peace and prevent outbreaks, and to do so, funds are necessary.

The necessary operations in the Snake country in order to prevent

the forays of those Indians upon the Warm Spring and Umatilla reservations, referred to in previous communications will also be attended with considerable expense.

I will, therefore, respectfully but earnestly urge that early steps on the part of the department may be taken to secure the passage of a deficiency appropriation for the purposes above indicated in the full sum of my estimate above referred to.

Very respectfully, your obedient servant,

OFFICE SUPERINTENDENT INDIAN AFFAIRS,  
Portland, Oregon, May 28, 1860.

SIR: I inclose for your consideration a copy of a letter this day received from Major Owen, in charge of the Flathead nation, relating to the salary necessary to secure suitable persons for mechanics, farmers, &c., as stipulated for in the treaty with the confederated bands of that nation in the treaty of the 16th of July, 1855, and the supply of subsistence for employés. For the forming of a correct judgment on these points, I have only the data afforded me by the agent. The salary he proposes to be paid mechanics, viz: \$1,200 per annum, is but little above that paid for competent and reliable men in the settlements rendering similar services. That asked for the principal farmers, viz: \$1,000 per annum, also appears equitable and fair. Ordinary laborers who may from time to time be employed, and whose position involves much less responsibility, will, I believe, be readily obtained at the rate of \$60 per month. As to subsistence of employés, my judgment is that in view of the remoteness of the Flathead agency from all the commercial centers, it is proper that the employés should receive subsistence in conformity with the ration of the amount; and to encourage persons with families to enter the service, I would further recommend that an additional ration be allowed each married employé having his wife on the reservation. I submit these views, together with the letter of Major Owen, to your consideration, and respectfully ask, at the earliest practicable moment, instructions in the premises. My remarks in regard to the furnishing of subsistence to employés are applicable to all the reservations east of the Cas-

cade mountains. I would therefore request that your instructions in this regard may have a general reference to them all.

Very respectfully, your obedient servant,

EDWARD R. GEARY,  
*Superintendent Indian Affairs.*

OFFICE SUPERINTENDENT INDIAN AFFAIRS,  
*Portland, Oregon, May 28, 1860.*

DEAR SIR: I will call your special attention to the fact of my not being able to employ good mechanics or farmers at the rates per annum as anticipated by the department. I will state for your information that the quartermaster's department at Walla-Walla and other points pay for wagon-masters from \$125 to \$150 per month, and allow them two rations. Lieutenant John Mullen, United States Army, in charge of constructing wagon road from Walla-Walla to Benton, pays his wagon-masters \$125 per month. With these precedents established in the country, it will be very difficult for me to procure reliable men for less. I think, however, that I will be able to procure good mechanics for \$100 per month, and the two principal farmers at \$1,000 per annum, each, with rations furnished. In fact, it is useless to think of hiring men to work so far in the interior, where everything they require is exorbitantly high, unless they are fed or an equivalent allowed by paying higher wages, which, in the end, must amount to the same thing.

Respectfully, your obedient servant,

JOHN OWEN,  
*Indian Sub-Agent, in charge of Flathead Nation, W. T.*

PONCAS AGENCY, *June 27, 1860.*

SIR: I respectfully request that the amount of \$250 may be remitted to me, for the services of the reserve authorized; and that \$40 may be remitted, to defray necessary expense in the transportation of the funds. The agent was obliged to leave the boat, to inspect and purchase stock required for the agency; and, to insure the safety of the funds, a watchman was engaged.

I am, very respectfully, your obedient servant,

J. SHAW GREGORY,

OFFICE SUPERINTENDENT INDIAN AFFAIRS,  
Portland, Oregon, September 12, 1860.

SIR: Owing to the great amount of labor devolving upon this office in the inauguration of the newly-ratified treaties in this superintendency, and the very late day at which this office was advised of the extent of the appropriation for the current year, it has been found impracticable to submit estimates in detail of appropriations for fulfilling treaty stipulations with the various Indian tribes in this superintendency, for the years 1861 and 1862, in season to reach Washington city by the time prescribed in the regulations. The inclosed statement, however, of the rates of compensation, &c., as, also, the lists of the treaties with Indian tribes in this superintendency requiring appropriations for 1861 and 1862, and the letter of Agent Dennison, dated September 12, together with the provisions of the treaties themselves, it is thought, will afford the department sufficient data upon which to base a judicious and proper estimate of appropriations required for carrying said treaties into efficient and successful operation.

Trusting that my inability to forward estimates in detail, as heretofore, will not prejudice the interests of the service, or entail much, if any, additional labor upon the department, and that the usual estimates of the Secretary of the Interior, so far as regards this superintendency, will be predicated upon the inclosed papers,

I am, sir, very respectfully, your obedient servant,

EDWARD R. GEARY, *Sup't Indian Affairs.*

Hon. A. B. GREENWOOD,

*Commissioner Indian Affairs, Washington, D. C.*

For the transportation of annuities and tools, materials, and fixtures for the shops and mills, and all other necessary supplies for the Flathead nation of Indians, as provided for in the fifth article of their treaty.....	10,000
For transportation of annuities and tools, materials, and fixtures for the shops and mills, and all other necessary supplies for the Yakima nation of Indians, as provided for in the fifth article of their treaty.....	800

I certify that the above rates of compensation to employés in the Indian service, accord with the actual compensation now allowed efficient employés in the superintendency, and that persons of good character and efficiency cannot be procured to perform the services which are required on the several reservations at lower wages.

I further certify that, owing to the remoteness and isolated position of the reservations, the furnishing of subsistence to the employés by and at the expense of the government is actually and indispensably necessary.

I do also certify that the above estimates of the expenses of furnishing and keeping in repair certain buildings, and of transportation, are based upon the usual and current prices of this country, and upon my actual knowledge of the wants and operations of the Indian service in this superintendency.

I also certify that any curtailment of the rates of pay, or the amounts

as above specified, will seriously embarrass the service, and greatly impair its efficiency and success.

PORTLAND, *September 12, 1860.*

SIR: Having consulted several experienced millwrights as to the cost of building a saw and flour mill upon the Warm Spring Indian reservation under the treaty of 25th of June, 1855, I have become satisfied that the amount appropriated by Congress for that purpose is entirely too small, and that even the cheapest kind of mills cannot be built for the amount (nine thousand dollars.) I desire you will at the earliest moment call the attention of the Commissioner of Indian Affairs to this matter, and recommend an additional appropriation of three thousand dollars (\$3,000) for the purpose of completing or furnishing for use the flour mill upon said reservation. This amount, in my judgment, will be absolutely necessary to complete a flouring mill upon said reservation, as provided in said treaty.

Very respectfully, your obedient servant,

A. P. DENNISON,  
*Indian Agent.*

Hon. EDWARD R. GEARY,  
*Superintendent Indian Affairs, Portland, Oregon.*

H.

GENERAL LAND OFFICE,

*September 11, 1860.*

SIR: In your letter of the 29th ult. you referred to the resolution passed June 27, 1860, by the United States Senate, to pay thirty cents an acre to the Med-a-wa-kan-ton and Wah-pa-koo-tah, and Sisse-ton and Wah-pa-ton bands of the Dacotah or Sioux Indians, for their lands in that part of their reserves north of the Minnesota river; and you then requested the information as to "the exact number of acres

within the area of that part of Sioux reserve on the north side of said river, as shown by the official plats" in this office.

We, then, on the 31st ult. replied "that the boundaries of the reserve alluded to have never been marked out, the lines of the public surveys have not, as yet, been extended along the whole extent of the Minnesota river, and consequently there is no data from which the number of acres of land can be computed with the accuracy required."

By letter of the 4th instant you request me to "cause such action to be taken as may be necessary to the completion of the surveys, in order that we may be enabled to furnish the Indian Bureau with the exact area of said reserves." To this, under date of the 6th instant, we replied that "there exist no means at the disposal of this office to ascertain the area of the reserve alluded to. Should, however, the necessary funds be under your control for the survey of that part of the reserve, including the meandering of the northern shore of the Minnesota river and of the Tohay-tam-bay river, and you desire that the survey of the out-boundaries of the reserves be made under the superintendence of the surveyor general of Minnesota, this office, upon being so requested, would make no objection to its being done under the officer's direction."

Referring now to your personal call in the matter this morning, I have to say that as all that part of the reserve north of the Minnesota river has become public land in virtue of the Senate resolution as aforesaid, under treaty, there is no practical utility on the part of this office in dealing with those lands, to trace the northern line of the reserves. That, however, is a service which, if the true area is necessary, might well address itself for action to the Indian Bureau, but not to this office. Further: as the Indian Office has had the survey of the southern half of that part of the Sioux reserves south of the Minnesota river executed, that office has the data upon which to calculate the area of that part, and the result would be applicable to the northern part, and thus the call on this office might be subserved by the Indian Office, from the data on its own files. However, as it was understood that you desired us to calculate the area approximately from the conjectural limits of the northern line of the reserves, to follow the sinuosities of the Minnesota river, we have done so, and the following approximate estimate is herewith submitted as the result, and is designated on diagram H:

The Sisseton and Wah-pa-ton reserve treaty, July 23, 1851.....	569,600 acres.
The Med-a-wa-kan-ton and Wa-pa-koo-tah, August 5, 1851.....	320,000 "
Amounting in the aggregate to.....	<u>889,600</u> "

I am, very respectfully, your obedient servant,

JOS. S. WILSON,  
*Commissioner Land Office.*

CHARLES E. MIX, Esq.,  
*Acting Commissioner Indian Affairs.*

OFFICE SUPERINTENDENT INDIAN AFFAIRS,  
*Portland, Oregon, September 28, 1860.*

*Estimate of funds required in the Puget's Sound district, Washington Territory, during the fiscal year ending June 30, 1862, under the following heads of appropriations :*

For general incidental expenses, including traveling and office expenses and transportation of annuity goods, &c. :	
For the purchase of rations for the Indians, subject to the treaties of Point Elliott, Point-no-Point, Neah Bay, and Olympia ; say eleven thousand souls for three days, (see sections 36 and 61 of Revised Regulations, No. 3,) when collected together, to receive annuity goods:	
33,000 pounds of beef, at 12½ cents.....	\$4,125 00
33,000 pounds of flour, at 3 cents.....	990 00
For transporting the above rations to the different reservations, when the payments will be made, 33 tons, at \$6 per ton.....	198 00
For purchase of rations for the Chehalis, Chenook, and Cowlitz Indians, (700 souls,) not treated with, but whom it is supposed government will put upon an equal footing with those tribes that are provided for by existing treaties, while gathered together to receive presents, given in lieu of annuity, three days' rations :	
2,100 pounds beef, at 12½ cents.....	262 50
2,100 pounds flour, at 3 cents .....	63 00

For transporting the above part of the way by land, thence in canoes.....	\$34 00
For hire of vessel to transport annuity goods to Quinault and Cape Flattery, on the Pacific ocean; going from Puget's Sound and returning; say thirty days, including lay days, at \$15 per day .....	450 00
For transporting annuity goods to the Tutalep and Skokomish reservation.....	200 00
For office expenses, including postage, lights, hauling and sawing wood, &c.....	100 00
For traveling expenses of agents and employés .....	8,000 00
[Including expenses of expressing, which will be considerable, as the only way of reaching the central reservation is by water; and it being situated some forty miles from any fort route, an express-boat must necessarily be kept constantly employed running from the post office to the subordinate and central reservations; and the actual traveling expenses of the superintending agent will necessarily be great, as in this district are to be established eight reservations, provided for by law; and the spot where the Chehalis, Chenook, and Cowlitz tribes are located, will be equivalent to another reserve. Here, then, we may say are nine points between which the agent must constantly be moving; the traveling must necessarily be almost entirely performed in small boats with hired crews, or on horseback, which is the most expensive manner of traveling.]	
The contingencies that cannot be seen.....	577 50
	<hr/>
Total required for general incidental expenses.....	15,000 00
	<hr/> <hr/>
For defraying the expenses of removal and subsistence of Indians in Washington Territory, to the reservations therein, aiding them in procuring their own subsistence, purchase of provisions and presents, and compensation to laborers and necessary employés:	
For compensation for one clerk.....	\$1,500 00
For compensation for two hands, not provided for by treaty, to be employed from time to time at the saw-mill at the central reservation, and in logging said mill.....	1,500 00
For purchase of provisions and presents for the aged and destitute Indians subject to the treaty of Point Elliott...	2,500 00
Aiding the Indians subject to said treaty in procuring their own subsistence, by providing such as are needy with seed potatoes and other kinds of seeds.....	400 00
For purchase of provisions and presents for aged and destitute Indians subject to the treaty of Point-no-Point....	1,250 00
Aiding them in procuring their own subsistence by providing them with seeds, &c.....	200 00

For purchase of provisions and presents for the aged and destitute subject to the treaty of Neah Bay.....	\$750 00
Aiding them in procuring their own subsistence by providing them with seeds, and also salt, to be used in instructing them in the process of curing fish after the fashion of the whites.....	225 00
For purchase of provisions and presents for aged and destitute Indians subject to the treaty of Olympia.....	625 00
Aiding them in procuring their own subsistence by providing them with seeds, salts, &c.....	175 00
For purchase of provisions and presents for the aged and destitute of the Cowlitz, Chenook, and Chehalis tribes, (not treated with).....	700 00
Aiding them in procuring their subsistence by providing seeds, &c.....	175 00
For defraying the expenses of <i>placing</i> the Chehalis, Chenook, and Cowlitz tribes upon the same footing with those tribes that are subject to existing treaties :	
Amount to be expended in beneficial objects under the direction of the President.....	3,000 00
Compensation for one carpenter, one farmer, one blacksmith, and physician.....	4,000 00
For supporting and agricultural school, &c.....	500 00
Total required for the removal and subsistence, &c....	<u>17,500 00</u>
For adjusting difficulties and preventing outbreaks.....	<u>\$5,000 00</u>

This will admit of no specifications; a greater amount may be required, or a less might answer, owing entirely to circumstances. It is designed to be used for expresses, traveling to and from scenes where outrages have been committed, making presents to Indians who have been injured by the whites, &c.

W. B. GOSNELL,  
*Indian Sub-Agent.*

PORTLAND, OREGON, *September 3, 1860.*

SIR: Your letter of instruction dated 29th ultimo is received. In  
 conformity thereto I have to submit the following estimate in detail  
 for fiscal year ending June 30, 1862.

For the general incidental expenses of the Indian service in Yakima  
 agency, Washington Territory:

First. For the traveling expenses of the agents and employés in the  
 Indian department service.

Under this head is included—

Pay of one expressman, at \$40 per month.....	\$480 00
Subsistence of the same, at \$30 per month.....	360 00
Forage for four horses, at \$60.....	720 00
Ferriage of Columbia and other rivers, at \$25 per month,	300 00
Pay of two Indians traveling with agents, and inter- preter in the field, at \$30 per month each.....	720 00
Subsistence of two Indians as above, at \$30 per month each .....	720 00

The agent and interpreter are not always in the field,  
 but expeditions in the wilderness require many hands,  
 amounting to an average of two men all the year round.

Expenses of maintaining intercourse with office of superintendent in Portland, for purpose of receiving funds, purchasing supplies for agency, to include steamboat fares, hotel bills, and similar expenses, at not less than \$100 per month.....	\$1,200 00
Total estimate under head of traveling expenses.....	<u>4,500 00</u>
Second. For the pay and subsistence of employés attached to the agency, and not paid and subsisted under the Yakima treaty of June 9, 1855:	
Under this head is included—	
Pay of an assistant as clerk in the agent's office, and in charge of such during absence of agent, at \$83 33 per month.....	\$1,000 00
Pay of one quartermaster and commissary, having charge of property, making issues to Indians and employés, at \$75 per month.....	900 00
For pay of two laborers, at \$60 per month.....	1,440 00
For pay of one principal herder, at \$60 per month.....	720 00
For pay of two Indian herders, at \$30 per month.....	720 00
For pay of one cook, at \$60 per month.....	720 00
For subsistence of the eight above enumerated employés, at \$30 per month.....	2,880 00
Total estimates for this head.....	<u>8,380 00</u>
Third. For stationery for use of agency, in agency office, and for quartermaster and commissary offices, including blank-books, blank vouchers, paper, pens, ink, at \$40 per month.....	\$480 00
Fourth. For fuel and for lights for employés of every kind, not less than one thousand dollars per annum will suffice.....	1,000 00
This estimate includes keeping one mule team and driver all the time.	
Total estimates of general incidental expenses of Indian service in Yakima agency.....	<u>\$14,360 00</u>

Much of the foregoing estimates is based upon the fact that many persons have to be hired and subsisted in the Yakima agency over and above those authorized by the treaty of June 9, 1855. The treaty provides for a few employés for special and specific purposes. Neither the general duties of an agency nor the specific objects of the treaty can be met without employing many persons not provided for by treaty. Such employés as are included in the foregoing estimates are necessary to the service and properly belong to the head under which they are included: "For defraying expenses of removal and subsistence of Indians belonging to the Yakima nation to the reservation, purchase of provisions, presents, domestic animals, and agricultural

seeds and tools." The Yakima treaty provides for paying the nation annually ten thousand dollars annually for beneficial objects. This sum is insufficient to accomplish the objects of the treaty, and it will therefore be requisite to provide the necessary funds by estimates under the foregoing head.

There are at least two thousand Indians included in the Yakima treaty that must be removed to the reservations, besides those living there now. They should be removed soon as possible, that they may be withdrawn from the ruinous and destructive effects of drunkenness and licentiousness. I have fully set forth the condition of the Indians in my annual reports.

It will require five dollars for each person removed, and I therefore estimate—

For removal of Indians to the reservation.....	\$10,000 00
For subsistence of Indians on reservation, twenty-five hundred souls, at \$10 per annum each, in addition to what food they may be able to gather and prepare for themselves.....	25,000 00
For purchase of domestic animals, cows, sheep, and hogs, for distribution to Indians, stock purposes.....	2,000 00
For purchase of plows, harness, oxen, and ox yokes and chains, and for other agricultural implements and appliances to assist the Indians in farming.....	2,500 00
In addition to these funds means for transportation will be required, and all the transportation of goods, provisions, tools, and materials of all kinds will not cost less than \$12,000 per annum.....	12,000 00
Total estimates under head of removals, subsistence, and transportation .....	<u>51,500 00</u>

I would recommend that the ten thousand dollars in annuities provided for in the treaty be exclusively applied to building houses and fences, and to plowing and opening farms for the Indians.

I remain, very respectfully, your obedient servant,

R. H. LANSDALE,  
*Indian Agent, Washington Territory.*

EDWARD R. GEARY, Esq.,  
*Superintendent Indian Affairs, Portland, Oregon.*

*Estimates for the fiscal year ending June 30, 1862, for the Nez Percés, Cour d'Alene, and Spokane tribes and bands of Indians embraced in the Nez Percés agency :*

General incidental expenses, including traveling and office expenses, transportation of goods and supplies, express service, &c. :	
Office expenses, including postage, fuel, and lights.....	\$300

For traveling expenses of agent and employés.....	\$2,500
For express service.....	1,500
For the payment of clerk.....	1,000
For the transportation of goods, supplies, agricultural imple- ments, seeds, and other articles necessary to secure the successful inauguration of the policy of the government, from Portland to different points in the Indian country, 60 tons, at the rate of \$2 50 per ton.....	15,000
For agency-house, office, and warehouse... ..	5,000
For council-house.....	2,000
For buildings for employés.....	3,500
These buildings have not been provided for, and in an agency, with about 7,000 Indians occupying an extensive region of country, are indispensable to secure any satisfactory results whatever, in the transaction of business incident to the service.

EDWARD R. GEARY,  
*Superintendent Indian Affairs.*

OFFICE SUPERINTENDENT INDIAN AFFAIRS,  
Portland, Oregon, September 18, 1860.

*Estimate of funds required for the Indian department service, eastern district, Oregon, during the fiscal year ending June 30, 1862, under the heads of the following appropriations, to wit :*

General incidental expenses, including traveling and office expenses, and transportation of presents, &c.

For office expenses, including postage, light, fuel, and rent of warehouse, &c..... \$300

For traveling expenses of agents and employes. This item of expense must necessarily be large, for the reason that the Indians in this district live at very remote points from the agency, to wit: The Klamath Lake tribes and Modocks, three hundred miles; and the Indians who have been treated with are allowed by the treaty to take fish at their usual places upon the Columbia river and its tributaries, in common with citizens. The Sho-sho-nees or Snakes are from fifty to four hundred miles from the agency. These places of taking fish are distant from the agency from thirty to eighty miles, and during the fishing season they are constantly thrown in contact with vicious white persons and half breeds, who furnish them with liquor and steal their horses and women. Therefore they require some good discreet white person with them at the several points where they fish, to protect them and assist in bringing offenders to justice. Recovering stolen horses and bringing to trial those guilty of selling liquor to Indians, forms a large item of expense under this head..... 7,000.

For purchase of pack animals, pack saddles, and rigging for use for service of packers to transport such presents in goods and provisions as may be given to the Klamath, Lake, and other tribes of Indians not treated with, forty pack mules, with pack saddles and rigging complete for use, at \$150 .....	\$6,000
These animals will be constantly required in the service, when not otherwise required, for packing from the Dalles to the Warm Springs reservation, and for general purposes.	
For procuring legal services and other necessary expenses in bringing to trial and punishment persons engaged in selling or giving liquor to Indians, or charged with stealing horses and other property from them, and for recovering stolen property.....	900
For paying for the services of one clerk for this agency.....	1,000
For transportation of such goods as may be purchased for presents to Indians not treated with, from Portland to Dallas, a distance of one hundred and twenty miles, and for hauling and storing the same.....	750
For salary of two interpreters, one for the Klamath Lake and Modock tribes, and one for Sho-sho-nees or Snake tribe....	1,000
For building agency buildings at the Warm Spring reservation, not provided for in treaty, and absolutely necessary...	7,500
	24,450

For defraying the expenses of removal and subsistence of Indians in Oregon, to the reservations therein, aiding them in procuring their own subsistence, purchase of provisions and presents, and compensation to laborers and necessary employés, to wit:

For pay of two laborers, to be employed from time to time, as the service may require.....	\$1,000
For the purchase of provisions and presents for the aged, sick, and destitute Indians of the Klamath Lake and Modock tribes, numbering about 800 souls.....	5,000
For purchase of provisions and presents for such of the Sho-sho-nees or Snake Indians as may become friendly and desire the protection of the government.....	3,000
	9,000

For adjusting difficulties and preventing outbreaks in said district, to wit:

Under this head of appropriation it is impossible to specify the items for which it will be required; it is designed to be used for expenses in traveling to and from places where outrages have been committed, making presents to Indians who have been injured by whites and others, and in adjusting difficulties between different tribes. The Indians upon the Warm Spring reservation are immediately adjoining the country occupied by the Sho-sho-nees or Snake In-

dians, who are hostile to our people and the Indians upon said reservation. They have already made several attacks upon the reservation, and succeeded in killing several Reserve Indians and running off and stealing a large number of horses. A considerable portion of this fund will be *absolutely required to preserve peace* and prevent further trouble.....

\$10,000

Total for adjusting difficulties..... 10,000

For general incidental expenses, &c..... \$24,450  
 For removal and subsistence, &c..... 9,000  
 Adjusting difficulties, &c..... 10,000

All which is respectfully submitted.

*Estimate of funds required for the Indian service at Seletz agency, during the fiscal year ending June 30, 1862, under the following heads of appropriations, to wit:*

General incidental expenses, including traveling and office expenses and transportation of goods, &c., &c.:

For office expenses, including postage, light, fuel, &c., &c... \$300

For traveling expenses of agents and employés, including expenses of expressing, &c..... 700

For transportation of goods, supplies, &c., from Portland to Seletz agency. The cost of transportation from Portland to Yaquina bay, per schooners, is \$40 per ton, this for say forty tons..... 1,600

For defraying the expenses of repairing roads, and building bridges on the reservation, which is absolutely necessary, as the communications between the different farms and points on the reservation is during the winter months, on account of swollen streams and bad roads, often entirely broken off..... 1,500

Total for incidental expenses..... 5,100

For defraying the expenses of the removal and subsistence of Indians in Oregon to the reservation there, in aiding them in procuring their own subsistence, purchase of provisions and presents, and compensation of laborers, necessary employés :

For pay and subsistence of two farmers to the Indians not treated with, but located on the Seletz reservation, at the rate of \$800 per annum .....	\$1,600
The employment of these persons is necessary in order to place the Indians <i>not treated</i> with [who number 1,460] on an equal footing with those provided for by treaty stipulations, for if any distinction should be made between those two classes of Indians, it would create discontent and bad feelings, and might lead to difficulties and troubles.	
For pay and subsistence of one carpenter and joiner .....	1,200
For necessary Indian labor, in cutting logs for saw-mills, &c.,	500
For purchase of provisions, blankets, and materials for clothing, &c., for aged and destitute Indians, subject to no treaty .....	3,000
	<hr/>
Total for removal and subsistence.....	6,300
	<hr/> <hr/>

For adjusting difficulties and preventing outbreaks :

It is impossible to specify the different items for which funds under this head of appropriations will be needed, it is designed to be used for making presents to Indians who may have been injured by whites and others, and in adjusting difficulties between the different tribes and families, also for bringing offenders to justice, &c.....

*Estimates of funds required for the Indian service at Umatilla agency, Oregon, embracing the Walla-Walla, Cayuse, and Umatilla tribes of Indians, during the fiscal year ending June 30, 1862, under the following heads of appropriations, to wit:*

General incidental expenses, including traveling and office expenses and transportation of goods, &c.:

For office expenses, including postage, light, fuel, &c., &c....	\$250
For traveling expenses of agent and employes, including expenses of expressing, which will be considerable, as the nearest post office, that at Walla-Walla, Washington Territory, is forty-five miles from the Umatilla agency, and all communications to and from the superintendent of Indian affairs, and others, must be forwarded by express messengers. The actual traveling expenses of the agent will also, for the first two years, be large, as the collecting on the reservation of the Indians, will keep him traveling a considerable portion of his time .....	5,000
For procuring legal services and other necessary expenses in bringing to trial and punishment persons engaged in selling or giving liquor to the Indians, or charged with stealing horses and other property from them, and for recovering stolen property .....	1,000
For compensation of one clerk for this agency .....	1,000
For transportation of goods, supplies, &c., for the Umatilla agency, from Portland to the Dalles, a distance of one hundred and twenty miles by the way of the Columbia river, at the rate of \$20 per ton for say seventy-five tons, and for hauling and storing the same .....	1,750
For transportation of said goods and supplies from the Dalles to the Umatilla agency. It is believed that the best and most economical mode of transporting these goods would be to use a mule train. The present rates of transportation between the two points is \$75 per ton. I have therefore estimated for the purchase of a train of pack animals, which at times, when there is no packing to be done from the Dalles, would be employed about the reservation for general purposes.	
For thirty pack mules, pack saddles and riggings complete, at \$150 each.....	4,500
For pay and subsistence of one pack master to have charge of said train, at \$75 per month, and four packers, at the rate of \$60 each per month, who could when not out with the train be employed on the reservation for general purposes .....	3,780
If the roads should be so improved as to make it possible for teams to run between the Dalles and the agency the above sums might be advantageously applied for the purchase of wagons and teams.	

For building agency building not provided for, and absolutely necessary, as there is no house, or building of any kind which could be used for that purpose*.....	\$1,500 00
Total for incidental expenses .....	18,780 00

For defraying the expenses of removal and subsistence of Indians in Oregon to the reservations therein, aiding them in procuring their own subsistence, purchase of provisions and presents, and compensation to laborers and necessary employés :

For pay and subsistence of four laborers, to be employed from time to time, as the service may require.....	\$2,000 00
For defraying the expenses of the removal of such Indians to the reservation as have no means of transportation of their own, &c.....	1,500 00
Total for removal and subsistence .....	3,500 00

For adjusting difficulties and preventing outbreaks :

It is impossible to specify the different items for which funds under this head of appropriations will be required. A greater amount may be required, and a less sum might answer, owing entirely to circumstances. It is designed to be used for making presents to Indians who may have been injured by whites and others, and in adjusting difficulties between the different tribes and families. The newly-discovered gold mines in the north draw a great many whites to this country, and it is feared that, as their roads run close along the boundaries of the reservation, they will come more or less in contact with the Indians ; in which case, this fund is absolutely required to preserve peace and prevent trouble.....

JOHN F. MILLER,  
*Indian Agent.*

J.

OFFICE SUPERINTENDENT INDIAN AFFAIRS,  
*Portland, Oregon, September 24, 1860.*

SIR: Referring to my letter of the 12th instant, transmitting certain papers as a basis of estimates for appropriations for fulfilling treaty stipulations in this superintendency for the years 1861 and 1862, I have to say that I have just been notified by Sub-Agent Abbott that the appropriation applicable to the current year for erecting a saw-mill and a flouring mill on the Umatilla reservation; per fourth article of the treaty of 29th June, 1855, with the Walla-Walla, Cayuse, and Umatilla tribes, is entirely inadequate, and that the additional sum of \$3,000 is required to complete said mill. I have therefore to ask that said sum be embraced in your estimate for the year 1861.

Very respectfully, your obedient servant,

EDWARD R. GEARY,  
*Superintendent Indian Affairs.*

Hon. A. B. GREENWOOD,  
*Commissioner Indian Affairs,*  
*Washington, D. C.*

The difference of \$63,364 in the present estimate over that of the last fiscal year arises from the increase of the ration of sugar and coffee, authorized by the act of June 21, 1860.

NOTE.—In addition to subsisting the regular troops, employés, and Indians, at the estimated price of the ration, (26 cents,) the following expenses are included: preserving provisions, erecting and repairing bake ovens. Besides, there are large losses from wastage and deterioration of provisions at all the southern and western posts, in all the old States, and at all the posts in California, Utah, New Mexico, and Oregon.

OFFICE COM. GEN. OF SUBSISTENCE,  
Washington, October 20, 1860.

QUARTERMASTER GENERAL'S OFFICE,  
*Washington, D. C., November 2, 1860.*

SIR: I have the honor to submit herewith the estimates required from this office for the fiscal year ending June 30, 1862. They are—

That for the ordinary expenses of the Quartermaster's department, marked A.

That for the clothing, camp and garrison equipage of the army, including the expenses of the arsenal at Philadelphia, in which those supplies are prepared, marked B.

That for contingencies of the army, marked C.

These estimates have been prepared with great care, on the supposition that the appropriation for the present year will be sufficient. It seems to me due to my predecessor to say, however, that the Indian hostilities in California and New Mexico, and the measures necessary to control the hostile Comanches and Kioways, render that almost impossible, by producing considerable expenses which could not have been foreseen when the estimates for this year were made.

I remain, sir, very respectfully, your obedient servant,

J. E. JOHNSTON,  
*Quartermaster General.*

Hon. JOHN B. FLOYD,  
*Secretary of War, Washington, D. C.*

The 10th section of an act to increase the present military establishment, approved July 5, 1838.—(Laws of the United States, Little & Brown's edition, vol. 5, page 257.)

The act for the organization of a company of sappers, miners, and pontoniers, approved May 15, 1846.—(Laws of the United States, Little & Brown's edition, vol. 9, page 12.)

The act for raising a regiment of mounted riflemen, approved May 19, 1846.—(Laws of the United States, Little & Brown's edition, vol. 9, page 13.)

The act making additions in the pay department of the army, approved June 17, 1846.—(Laws of the United States, Little & Brown's edition, vol. 9, page 18.)

The 6th, 8th, and 11th sections of an act supplemental to an act providing for the prosecution of the war with Mexico, approved June 18, 1846.—(Laws of the United States, Little & Brown's edition, vol. 9, page 18.)

The 3d, 4th, 8th, and 10th sections of the act to raise, for a limited time, an additional military force, and for other purposes, approved February 11, 1847.—(Laws of the United States, Little & Brown's edition, vol. 9, pages 124, 126.)

The 2d, 12th, 16th, 17th, and 18th sections of the act making provision for an additional number of general officers, and for other purposes, approved March 3, 1847.—(Laws of the United States, Little & Brown's edition, vol. 9, pages 184, 186.)

The 1st and 2d sections of an act to increase the rank and file of the Army, and to encourage enlistments, approved June 17, 1850.—(Laws of the United States, Little & Brown's edition, vol. 9, page 438.)

The act to increase the commissariat of the United States Army, approved September 26, 1850.—(Laws of the United States, Little & Brown's edition, vol. 9, page 469.)

The 6th section of an act of Congress, approved August 4, 1854, entitled "An act to increase the pay of the rank and file of the Army, and to encourage enlistments."—(Laws of the United States, Little & Brown's edition, vol. 9, page 576.)

The 8th section of an act approved March 3, 1855, entitled "An act making appropriations for the support of the Army."—(Laws of the United States, Little & Brown's edition, vol. 9, page 639.)

An act providing for a necessary increase and better organization of the medical and hospital department of the Army, approved August 16, 1856.—(Pamphlet Laws, 1st session, 34th Congress, page 51.)

And the regulations of the War Department, in accordance with the above recited acts and sections of acts of Congress.

*Estimates for the Quartermaster's department for the year 1861-62.*

1. REGULAR SUPPLIES.

Heads of appropriations.	Estimates of appropriations required for the service of the fiscal year ending June 30, 1862.	Estimates of the balances of appropriations unexpended on June 30, 1861, which may be applied to the service of the next fiscal year.	Appropriations for the service of the fiscal year ending June 30, 1861.										
<p>For the regular supplies of the Quartermaster's department, consisting of fuel for the officers, enlisted men, guard, hospital, storehouses, and offices; of forage in kind for the horses, mules, and oxen of the Quartermaster's department at the several posts and stations, and with the armies in the field; for the horses of the two regiments of dragoons, two regiments of cavalry, the regiment of mounted riflemen, the companies of light artillery, and such companies of infantry as may be mounted, and for the authorized number of officers' horses when serving in the field and at the outposts, including bedding for the animals; of straw for soldiers' bedding; and of stationery, including blank-books for the Quartermaster's department, certificates for discharged soldiers, blank forms for the Pay and Quartermaster's department, and for printing of division and department orders and reports:</p> <table data-bbox="112 576 1032 671"> <tr> <td>Fuel.....</td> <td>\$190,000 00</td> </tr> <tr> <td>Forage.....</td> <td>1,490,000 00</td> </tr> <tr> <td>Straw.....</td> <td>5,000 00</td> </tr> <tr> <td>Stationery.....</td> <td>16,000 00</td> </tr> <tr> <td>Carried forward.....</td> <td>\$1,701,000 00</td> </tr> </table>	Fuel.....	\$190,000 00	Forage.....	1,490,000 00	Straw.....	5,000 00	Stationery.....	16,000 00	Carried forward.....	\$1,701,000 00	<p>\$1,701,000 00</p>		<p>\$1,580,000 00</p>
Fuel.....	\$190,000 00												
Forage.....	1,490,000 00												
Straw.....	5,000 00												
Stationery.....	16,000 00												
Carried forward.....	\$1,701,000 00												

REMARKS.—The excess (\$90,000) of this estimate for forage over that of last year is due to greatly increased prices of grain. The cost of grain where it is to be used is given. In the last, that where it was purchased. The increase (\$30,000) in the estimate for fuel is produced by removals of troops to points where they cannot supply themselves, and where, of course, prices are very high.

15,000 00 ..... 15,000 00

[REMARKS.—This estimate is made by order of the Secretary of War, upon a memorial to him by officers of the army.]

Total..... 5,137,227 62

5,014,351 54

REMARKS.—The first item under the head of barracks and quarters is to meet the expenditures that must necessarily be made for the rent of barracks and quarters, storehouses, offices, hospitals, and sites of posts, and the commutation allowed officers in lieu of quarters, and for arrearages of rent and fuel.

The second item is for the repairs that are necessary and will be required to be made at the established posts in the different military departments, including the hutting of troops, or the construction of temporary buildings at new posts.

The third item is for the construction of additional buildings at posts already established, or their erection at posts to be established during the fiscal year. The proviso to the appropriation, made by Congress at its last session, requires that "no permanent barracks or quarters shall hereafter be constructed unless detailed estimates shall have been previously submitted to Congress, and shall have been approved by a special appropriation for the same." It is somewhat difficult to determine what is meant by the word permanent, as here applied to public buildings, in the connection in which it is here used; but it has been decided to call all buildings permanent except huts, which are erected by the soldiers themselves, and the estimate is made accordingly.

Cooking stoves and post clocks have been decided by the War Department to be proper objects of supply to the troops, and by its order an estimate is made for their purchase; and as heating stoves are required, for the purchase of heating stoves also.

This estimate falls short of that of the last year \$111,654 98 and exceeds the appropriation for the same year \$122,876 08; but, excluding from both the items for building and repairs, it is \$101,000 less than the last appropriation.

Respectfully submitted,

J. E. JOHNSTON, *Quartermaster General.*

QUARTERMASTER GENERAL'S OFFICE, Washington, D. C., November 2, 1860.

## FORT ARBUCKLE, C. N.

FORT ARBUCKLE, C. N.,  
June 12, 1860.

SIR: In obedience to Paragraph 983 General Regulations, I have the honor to make the following report of the condition of the buildings at this post. \* \* \*

The building used as a quartermaster's store room, and which was originally built for a hospital, will not admit of repairs. The roof, floor, sills, and greater portion of the logs on the north side, are very rotten, and can scarcely be propped up. A new building is required in its place, to give proper shelter and security to the public property; or stone walls might be substituted for the log walls, and the roof repaired. \* \*

One guard-house, two rooms, is an old log-house, worthless; a new one should be erected. I herewith inclose estimate and plan.

J. E. POWELL,  
First Lieut. First Infantry.

*Special estimate for building material, hire of mechanics, laborers for the erection of a building to be used as a quartermaster's office, and store room for quartermaster's property.*

## CAMP VERDE, TEXAS.

OFFICE OF THE ASSISTANT QUARTERMASTER,  
*Camp Verde, Texas, July 2, 1860.*

GENERAL: In compliance with Paragraph 983 Army Regulations, I have the honor to make the following report, relative to the public buildings at this post. \* \* \* \* \*

The two other buildings occupied by company "A" are of pickets, and are respectively 58 feet long by 16 feet wide, and 29 feet long by 15½ feet wide. These buildings cannot well be repaired so as to make good quarters of them, as the pickets of which they are constructed are rotting where they enter the ground, in many places; besides, the walls of the buildings are altogether too low. The commissary and quartermaster's storehouses, guard room, prison room, and carpenter's shop are all in one building, 119 feet long by 16 feet wide, constructed of pickets. These buildings are sufficiently large for the present requirements of the post, but they are in very bad repair; the pickets are rotting off, and the roofs leak in many places. \* \* \*

## FORT MASON, TEXAS.

OFFICE OF THE ACTING ASSISTANT QUARTERMASTER,  
*Fort Mason, Texas, September 2, 1860.*

GENERAL: In accordance with the requirements of Paragraph 983, General Regulations of the Army, I have the honor to submit the following report: \* \* \* \* \*

The stables are perfectly useless as such. They are built of post oak, heavily framed, the sides being composed of pickets, kept in place by thin battens. The sills rest upon the ground, and as these buildings are located at the foot of the hill on which the post is situated, all the water that falls on the side above them runs into them, in addition to that from the roof. Various means have been tried to remedy this defect, but without success. In consequence to this constant exposure to water, the sills of these buildings are rapidly decaying. The pickets are constantly falling out, the roofs are utterly worthless, water pouring through them in rainy weather as through a seive; and, during such weather, there is generally more water inside of them than outside, rendering it impossible to keep horses in them at the very time it is most necessary. But few repairs have been put upon them, only such as the limited means at our disposal would permit.

It is useless to attempt any substantial repairs; it would be waste of time, money, and material. They should be torn down, the materials of which they are built might be used for fire-wood, and if the post is to be occupied by cavalry troops six months longer, new ones should be erected. \* \* \* \* \*

## FORT CLARK, TEXAS.

ACTING ASSISTANT QUARTERMASTER'S OFFICE,  
*Fort Clark, Texas, August 18, 1860.*

SIR: In obedience to Paragraph 983 Army Regulations, I have the honor to submit the following report of the condition, &c., of the public buildings at this post. \* \* \* \* \*

I find no alterations or repairs on file in the office for the last year, and therefore presume that there were none made. The buildings occupied by the companies now as quarters are entirely unfit for such purpose, nor can they without great labor and expense be made so. There will, therefore, be required to garrison this post with five companies at least, twelve sets of officer's quarters, with kitchens and necessary out-buildings. Five new sets of barracks for men, with kitchens, &c. Band quarters, with practice room. \* \* \*

## FORT COBB, C. N.

ASSISTANT QUARTERMASTER'S OFFICE,  
*Fort Cobb, C. N., June 30, 1860.*

SIR: I have the honor, in obedience to Paragraph 983, General Regulations, to report to the Quartermaster General that we are encamped near the site selected for the building of Fort Cobb, as directed in General Orders No. 24, dated "Headquarters of the Army, August 19, 1859;" that all the buildings we have erected, were erected for temporary purposes, for the preservation of the public stores, and for the shelter of the officers and soldiers and public animals.

All these buildings are merely log cabins, or picket houses, as they are called, covered over with paulins and clapboards.

\* \* \* \* \*

The officers all live in log cabins, covered over with clapboards, or with paulins, or in pickets, covered over with a Sibley tent. The soldiers and laundresses of the command live within pickets, covered over with the sibley tents—that is, the Sibley tent is pitched on a

picket body from five to eight feet high, the diameter being the diameter of the tent when pitched on the ground.

HEADQUARTERS, FORT RIDGELEY,  
February 9, 1860.

SIR: The importance of a new hospital was among the first necessities I discovered at this post, on assuming its command in August last. \* \* \*

But the present condition of the hospital is such, and its dilapidated state so rapidly increasing, and beyond the possibility of repair, I have the honor to recommend, as an economy to the government in the preservation of valuable stores, and from motives of humanity, in the comfortable accommodation of the sick, that a temporary hospital shall be erected. The inclosed plan and estimate for a building of this kind have been furnished by the acting assistant quartermaster of the post, and the accompanying letter of its assistant surgeon gives weight to my own statement. \* \* \*

W. W. MORRIS,

*Major Fourth Artillery, commanding post.*

ASSISTANT ADJUTANT GENERAL,

*Department of the West.*

FORT RIDGELEY, MINNESOTA,  
February 8, 1860.

SIR: I have the honor to state to the major commanding, that the building at this post, occupied as a hospital, is wholly unfit for such purpose. Built originally as laundresses' quarters, the main structure, consisting of two small rooms, has been enlarged, by the addition of three sheds, roughly and imperfectly attached. One of these sheds is occupied as a dispensary, another as a kitchen, and the third as a ward and storeroom in the summer season, and as a storeroom only in the winter. All the sick of the command are, therefore, during the greater part of the year, crowded within the narrow limits of the two small wards. Not only are these wards inadequate to accommo-

 date the *average* number of sick, but will, at no distant period, be altogether uninhabitable, in consequence of the decay of the logs, the bad state of the roof, and the falling of the plastering from the ceiling. The three sheds are in even worse condition. The rain and snow, during the storms so frequent at this post, pass into these sheds with little hindrance, to the great damage of the hospital stores, the discomfort of the sick, and the prevention of order and cleanliness. \* \* \* \* \*

NOTE.—The estimates for the medical and hospital department of the army for the fiscal year ending June 30, 1861, amounted to \$115,000; but as an unexpended balance of former appropriations, amounting to \$38,774 50, was reported as applicable to the service of the present year, an appropriation of only \$76,225 50 was asked for and granted by Congress. This made a total of \$115,000 applicable for the service of the current fiscal year, and the same amount will, it is believed, be necessary for the fiscal year ending June 30, 1862.

## EXPLANATION IN DETAIL OF THE FOREGOING ESTIMATE.

*Armament of fortifications.*—The object of this item of the estimate is to procure sea-coast and garrison cannon, and the means of mounting and equipping them for the defense of the Atlantic, Gulf, Lake, and Pacific coasts of the United States, including the repair and preservation of the armament already in place. The amount appropriated will be applicable to the purchase of the cannon mentioned, and materials for sea-coast and garrison carriages, with their implements and equipments, and payment of the mechanics at the arsenals employed in their manufacture.

*Ordnance service.*—The amount of this item is required to defray the expense of receiving, issuing, and keeping in good order the arms, ordnance stores, and other public property in use and in store at the various arsenals and ordnance depots in the United States; and for the purchase of fuel, stationery, forage, and for all other incidental expenses of the ordnance service.

*Ordnance, ordnance stores and supplies.*—The amount of this item of the estimate is to procure siege and field guns, carriages, caissons, and battery wagons, with their implements and harness; side-arms and accouterments for the different kinds of troops composing the army, and to defray the expense of making and repairing the same; and for the purchase of materials for, and repairing ammunition; and for procuring horse equipments for the mounted troops.

*National armories.*—The amount of this item of the estimate will only suffice to carry on the manufacture of the new rifled arms at the national armories during the year on a proper scale of operations.

*Repairs and improvements and new machinery at Springfield Armory.*

1. For general repairs and improvements and preservation of grounds, &c.....	\$2,000

16. For repairing stocking, polishing, machine, and filling shops.....	1,000
	<hr/>
Amount.....	\$59,500
	<hr/> <hr/>

## REMARKS.

1. This amount is required for keeping in good order roads, culverts, walks, fences, trees, &c.

2. Required for the purpose of replacing the present lead pipe (which is of too small capacity, and has become impaired by long use) with four-inch iron pipe, and conducting water from the reservoir to the new stables.

3. Required for rebuilding with brick the wooden portions of the six dwelling-houses assigned for the use of the paymaster, master armorer, and clerks; the present wooden structures being much decayed, very leaky, unsafe as to fire, and not in keeping with the main buildings, which are of brick.

4. Required for filling up and grading sites of old stables and dwelling-houses; for making new road at easterly end of Pearl street; filling up pond-hole at northeasterly corner of armory grounds, and for putting the south bank of the pond, near the water shops, and the south bank of the canal below in proper order to prevent washing away by rains.

5. Required for 254½ rods of paved gutters on East Pearl street to protect the new road, and the government fences; there being a steep grade on the street, and great flow of water when it rains; for laying 4,000 square feet of granite block pavement on the carriage way through the center of the storehouse; this way is now earth, and the dust arising therefrom works into the lumber, and musket stocks stored there, proving very injurious to the cutting tools; and for laying 4,800 square feet of granite block pavement in front of the new arsenal. This building stands upon the principal road through the grounds where there is much passing of vehicles, and loading and unloading of heavy teams. The road is consequently much broken up, and the dust thus raised proves very injurious to the arms stored in the arsenal.

6. Required for laying 17,700 square feet of brick side-walk, and 3,540 lineal feet of curb-stone.

7. Required for foundations, copying stone, gate-posts, and castings for 460 feet of iron fence on East Pearl and Federal streets, and for three iron gates.

8. Required for painting new stables and coal-house at armory grounds and fences there, and at water shops; and for repainting the exterior walls of new arsenal, of which the paint has scaled off badly, and needs to be renewed.

9. The lower part of the staircase to the tower, and the other wooden work in the basement is greatly decayed by dry rot, and must be rebuilt. The belfry must also be raised higher.

10. Required for raising of racks, and diminishing muzzle pins for 184,576 stands of arms, in consequence of reducing length and bore of new musket.

11. Required for putting up 10,370 feet of copper lightning-rods, on new buildings, and for repairs and readjustment of old rods, at 27 cents per foot.

12. Required to complete the drainage of the grounds at the armory and the water shops.

13. Required for the erection of 727 feet of plain and substantial iron-railing upon the two stone bridges at the water shops, and upon the north wall of the pond.

14. The tower is prepared for a clock, and dials set; a clock that can be seen and heard from a distance is very necessary for the regulation of time at the water shops, and to govern the movements of the workmen employed there. An estimate for this purpose was made for the fiscal year ending June 30, 1859; but in consequence of more necessary expenses in finishing the new shops, the clock was not procured.

15. This amount is required for the purchase and fabrication of additional machines necessary to carry on the work at the shops with facility and dispatch.

16. Required for incidental repairs on roofs of workshops, slating, and gutters.

---

*Repairs and improvements and new machinery at Harper's Ferry Armory, Virginia.*

1. For a brick building as an annealing shop, stock-house, proof-house, and grinding mill.....	\$12,128
2. For enlargement and protection of rifle factory canal.....	11,129
3. For enlargement and protection of musket factory canal..	11,963
4. For out-houses for officers quarters.....	2,000
5. For new machinery for rifle and musket factories.....	27,280
Amount.....	<u>64,500</u>

*Remarks.*

1. All the grinding of the components for the rifle has now to be done at the musket factory, and all the stocks have to be first stored in the stock-house there; much of the annealing of parts of arms has to be done in like manner, which involves an extraordinary expense in time and loss of labor in the transportation of all these things to the rifle from the musket factory, a distance of nearly a mile.

The improvements at the rifle factory, resolved on some years ago, likewise render it essential that a building, as estimated for, should be erected at the earliest practicable period. The shops at this place being originally temporary structures for the fabrication of the Hall's

rifle, and erected many years since, the place had either to be abandoned as a factory, or rebuilt for the manufacture of the new model rifle of 1855. This latter alternative was resolved on; in pursuance whereof, several buildings of a permanent kind have been constructed, especially looking to the necessity of filling up and grading the ground on which they stand to such height as to secure them from inundations of the Shenandoah. By the erection of this building, all the objections to this place as a factory may be obviated, the old houses now in the way of filling up be removed, and the cost of the manufacture of the rifle ultimately much diminished.

2. Many of the inducements for this work may be found in the remarks to item one. Originally this canal was made by a joint stock company, to facilitate the navigation from the upper country bordering on the Shenandoah river, and was not designed for the purposes to which the water power derived from it is now devoted. In effecting the improvement here proposed, a stone wall will be necessary to render the water power of the rifle factory sufficient; and also to protect from inundation the land and tenements of the government between this canal and the Shenandoah river. These are occupied by operatives of the armory, and are very valuable.

3. This item of the estimate is in continuance of the plans heretofore proposed, to make the canal sufficient as a water power for government use. By the expenditure of the sum estimated, it will, in connection with the new dam over the Potomac river, so prove; and its future usefulness and secured permanent adaptation to the wants of the armory will be beyond question. It also refers to a very valuable improvement, looking to facilities in the working operations of the armory. The work-shops next the canal are now so close to the bank of the canal as to preclude the use of the south range of shops.

The bank of the canal is wide enough to allow the removal of a portion of it, so that the space thus reclaimed may be conveniently used by carts passing in rear of this range of shops, whereby great inconvenience in the constant transportation of materials and work may be avoided.

4. The funds for the construction of these quarters, derived altogether from the sale of lots at the armory, having been exhausted in the erection of the buildings themselves, no outside conveniences, such as a stable, meat-house, or other necessary buildings, could be erected. This item of the estimate includes the building of a stable for the paymaster, and the removal from the present site of the old stable on his premises, erected thirty years ago, and for like purposes at the other quarters. The erection of these outhouses is rendered the more essential through the fact that these quarters are far removed, except that of the master armorer, from the business part of the town, and the tenants suffer great inconvenience from the want of needful supplies, which cannot be secured in advance in consequence of having no suitable places in which to store them.

5. Upon the adoption of the Minié rifle and musket, the tools and machinery on hand for the old models became useless for the fabrication of the new arms, rendering it essential that new machines, tools, and appliances be provided. This has been effected from time to time

as appropriations were made by Congress ; much, however, needs yet to be done in this respect.

ALLEGHANY ARSENAL, PENNSYLVANIA.

For repairing and painting public buildings, and for repairs and preservation of roads, culverts, fences, &c..... \$4 170

*Remarks.*

To preserve and keep in order the post and public property thereat.

BENICIA ARSENAL, CALIFORNIA.

For continuing the construction of this arsenal..... \$50,000

*Remarks.*

To erect workshops, barracks, quarters, and other public buildings, and to grade the grounds. This is a new arsenal, in process of construction, and is the principal arsenal on the Pacific coast of the United States.

FORT MONROE ARSENAL, VIRGINIA.

1. For the erection of a brick storehouse, and paving around it and the workshops.....	\$10,000
2. For purchasing machinery for new workshops.....	5,000
3. For filling and grading the marsh adjacent to the workshops..	8,000
4. For repairing and paving two timber storehouses with brick.....	800
5. For shot-beds.....	1,000
	<hr/>
	24,800
	<hr/> <hr/>

*Remarks.*

1. This building is required for storing iron, lumber, coal, other material, and finished work. There is no storehouse at this arsenal for such purposes.

2. To make the new shops available for use in fabrication.

3. The ground to be made will be valuable and much needed for arsenal purposes.

4. The floors of these storehouses are of loose sand, and should be paved ; one storehouse requires other repairs.

5. The large number of shot recently received at this arsenal renders it necessary to have additional shot-beds.

## FRANKFORD ARSENAL, PENNSYLVANIA.

1. For extending the eastern boundary wall.....	\$2,500
2. For grading, curbing, paving, and flagging side-walk on Bridge street.....	2,400
3. For repairs and preservation of buildings, inclosures, wharf, roads, and grounds.....	1,200
	<hr/>
	6,100
	<hr/> <hr/>

*Remarks.*

1. The interval in this portion of the boundary wall is supplied by a board paling, now so much decayed as to require renewal. The estimate contemplates the extension of the wall on the plan of the portion already built along the Tacony road.

2. The portion of the side-walk north of the main gate on Bridge street has already been flagged. This appropriation is asked to complete the work along the same street to or near the bridge over Frankford creek.

3. To keep the post and public property in good order.

## LEAVENWORTH ARSENAL, KANSAS TERRITORY.

For barracks, quarters, and workshops.....	\$20,000
--	----------

*Remarks.*

In consequence of the largely increased extent of the operations of the ordnance department at Fort Leavenworth, it has been found necessary to establish an arsenal, and to station ordnance officers and enlisted men at that place. The few and insufficient buildings for the temporary ordnance depot there have been provided from the small fund appropriated to *contingencies* of arsenals, but that will not suffice for those now required by the present and growing importance of the arsenal. Quarters for officers, barracks for enlisted men, and shops for repairs of arms and other military stores are wanted and should be erected.

## NEW YORK ARSENAL, NEW YORK.

1. For extension of sea-wall.....	\$13,285
2. For the erection of a shop for painting and packing.....	2,100
3. For repairs of buildings and improvement of public grounds.....	550
	<hr/>
	15,935
	<hr/> <hr/>

*Remarks.*

1. The continuation of this extension, heretofore begun, is recommended by the inspector of arsenals, both to abate the nuisance caused by the deposit of filth above the line of low-water, and to recover ground, worth more than the cost of the sea-wall, for use as a cannon and shot yard.

2. There is now no separate shop for these kinds of work, and they have to be done in the store-rooms, at great disadvantage and danger.

3. The walls of some of the public buildings require painting. This item of the estimate is intended to effect this and other repairs, and to improve the public grounds, by grading and planting trees.

## NORTH CAROLINA ARSENAL, NORTH CAROLINA.

1. For blinds, fastenings, and hangings for the windows of the arsenal and barracks.....	\$1,000
2. For heating apparatus for workshops, kitchen to quarters, and general repairs, repainting and preservation of public buildings, fences, and grounds.....	4,000
	<hr/> 5,000 <hr/> <hr/>

*Remarks.*

1. For the protection of the window sash, the interior of the buildings, and of the stores deposited therein.

2. Required to warm the workshops in winter, to make the quarters complete, and to keep the post and public buildings, fences, &c., in good order.

## ST. LOUIS ARSENAL, MISSOURI.

For general repairs of public buildings, fences, and roads, at the arsenal and magazines on the Jefferson Barracks reserve ..... \$1,800

*Remarks.*

To keep the arsenal, magazines, and public grounds in good order.

## TEXAS ARSENAL, TEXAS.

1. For completing the magazine.....	\$5,000
2. For erecting two stone buildings, each 60 x 25 feet, one story high, for workshops, at \$7,000 each.....	14,000
3. For removing the wings of quarters and rebuilding them 18 x 60 feet, one story high.....	5,000
4. For erecting a flag-staff 80 feet high.....	350
	<hr/> 24,350 <hr/> <hr/>

*Remarks.*

1. This sum is required to complete the magazine now under construction, the original estimate having been found insufficient, in consequence of the high prices of building materials and the heavy expense of foundation and main walls.

2. This is a new arsenal in course of construction, and these two buildings are required as shops for carpenters, painters, saddlers, armors, and smiths, requisite for carrying on arsenal operations.

3. The wings of the present quarters (a house purchased with the arsenal site) are built of a concrete of earth and gravel; their foundations are bad; the walls are much cracked, disintegrating, and peeling off. It is necessary to remove and rebuild them more substantially.

4. There is no flag-staff at this post, and one is required to mark its military character.

## WATERTOWN ARSENAL, MASSACHUSETTS.

1. For purchase and erection of cast-iron columns on stone bearings, for the support of floors in timber storehouses.....	\$1,250
2. For paving east timber storehouse.....	1,550
3. For removing rotten joists and supplying new ones, relaying the floor, and moving and replacing machinery in carpenter's shop.....	1,000
4. For painting east and west timber storehouses, stable, and coal-house.....	700
5. For putting windows in place of open blinds in east and west timber storehouses.....	1,700
6. For covering the floor of cellar under stable with hydraulic cement.....	150
7. 400 feet of hose for fire-engine.....	440
8. For rebuilding fence inclosing arsenal grounds, of wood	2,000
9. For repairs of tools and machinery.....	1,000
10. For general repairs and preservation of public buildings and grounds.....	2,000
	<hr/>
	11,790
	<hr/> <hr/>

*Remarks.*

1. The second floors in both these buildings were originally suspended from the main trusses of the roofs. The weight of these floors, and of the stores necessarily placed on them, has already forced the feet of the main rafters, and with them the wall-plates, so as to crack the walls in several places. The proposed columns are deemed essential to the safety of the buildings.

2. This storehouse is full of timber, and every wind that blows carries the dust and sand from the floor into the rough surface and checks of the timber, thereby greatly increasing the cost of dressing it.

3. Many of the joists in this building are entirely rotten, and the floor has broken through and been patched in many places.

4. These are the only buildings at the post that have not been painted, and their proper preservation requires it.

5. Windows, instead of blinds, are necessary to secure complete control over the ingress of air, and thus prevent injury to the timber from condensation of moisture on it.

6. The object of this is to prevent the rats from undermining the walls, they having already caused them to settle and crack.

7. The hose on hand is very old and rotten, and too small for forcing water, in any considerable quantity, to such distances as may be required.

8. The present fence is of wood, and is over twenty years old, and so much decayed as to require to be replaced by a new one.

9. In addition to the ordinary wear of machinery, there are several machines that will require to be removed and set up in other positions, in order to make room in machine shop, which will require additional shafting and pullies.

10. To keep the post in good order.

WATERVLIET ARSENAL, NEW YORK.

1. For a hospital .....	\$3,000
2. For grading and inclosing a piece of ground recently purchased .....	4,000
3. For repairs of buildings and fences .....	1,000
	<hr/>
	8,000
	<hr/> <hr/>

*Remarks.*

1. The rooms now used for a hospital are situated so low as to be liable to inundations from the river, and are therefore very subject to dampness, making the rooms quite unfit for hospital purposes. It is proposed to alter a small building, no longer required for a percussion laboratory, and fit it up for a hospital.

2. A large storehouse has been erected on the piece of ground lately purchased, which is inclosed with a board fence. It is now proposed to extend the stone wall of the arsenal grounds around the west and south sides of the new purchase.

3. The extensive buildings and inclosures of this large establishment require this sum for preservation and repair.

WASHINGTON ARSENAL, DISTRICT OF COLUMBIA.

1. For one brick building, 310 by 50 feet, two stories high, with slate roof, to embrace finishing, smith's, carriage-maker's, carpenter's, and armorer's shops, with back building for steam engine and iron store; 2. For sea-wall, nine feet high by five feet wide at the base, beveling off to three feet six inches on top; 3. For filling in the space from the sea-wall to the present west line of shore,

cutting down the high river banks, and grading the west front of the arsenal on the line above indicated; 4. For the conversion of the "Model Arsenal" into quarters for the commanding officer, and for converting a storehouse into an apartment for the reception of models; 5. For fences and repairs at the United States magazine near the Navy-yard, and general repairs, painting, &c., at the arsenal..... \$24,900

*Remarks.*

1. This building is necessary in consequence of the present dilapidated condition of the workshops at the arsenal, arising from the very insecure foundations on reclaimed land, and owing to which the United States grounds were, in the year 1857, extended by purchase, to erect shops and otherwise promote the necessary operations of the arsenal.

2. This wall is to embrace that portion of the new purchase from P street south to the present penitentiary wharf, on the line of low water, and to be of a height above high tides. It is very important, as affording a quay along its entire length, reclaiming a large area now embraced by high water, and giving to the arsenal along this line a proper and permanent finish.

3. Essential to the proper arrangement of the ground, and in conformity with the graduation of the city of Washington.

4. The present quarters for the officers are limited, and the model arsenal is a three-story building, altogether unsuited to the exhibition of models, but can be easily adapted for quarters. This arrangement is proposed in lieu of the erection of new quarters.

5. To keep the magazine and the post generally in good order.

CONTINGENCIES OF ARSENALS.

For contingencies of arsenals ..... \$20,000

For the repairs and preservation of the arsenals at Chattahoochee, Florida; Augusta, Georgia; Baton Rouge, Louisiana; Dearbornville, Michigan; Augusta, Maine; Little Rock, Arkansas; Mount Vernon, Alabama; and Pikesville, Maryland.

ESTIMATES OF APPROPRIATIONS.

A.—APPENDIX TO ENGINEER DEPARTMENT ESTIMATE FOR THE MILITARY ACADEMY.

*Estimate of funds for the service of the United States Military Academy for the fiscal year ending June 30, 1862, as follows, viz: For repairs and improvements, fuel and apparatus, forage, postage, stationery, transportation, printing, clerks, miscellaneous and incidental expenses, and departments of instruction; also, for additional buildings, &c., &c., required for the improvement of the establishment.*

15	Mess room and kitchen for cadets' hospital.....	1,500 00	.....	.....	1,500 00	
		61,500 00	62,135 00	5,200 00	4,565 00	\$635 00

From the above statement it will be perceived that the estimate for the year ending June 30, 1862, is \$635 less than the amount appropriated for the current year, arising from a diminution of \$5,200, in items numbered 3, 4, 8, and 11, and increased in items numbered 1, 14, and 15. The sum of \$61,500 now asked for, embracing the above reductions and additions, is less by \$1,029 than the average amount appropriated for the preceding seven years.

The item No. 1, current and ordinary expenses, is increased to admit of a part of the academic building being arranged for the chemical, electrical, and mineralogical department. This department of instruction is more in need of improvement than any other connected with the institution. The electrical apparatus is now in a room adjoining the chemical laboratory; the consequence of which is, that the various gases escaping from retorts, &c., during experiments in the latter, materially injure the apparatus in the former. In addition to which, is the necessity of arranging the electrical apparatus in a way suited to use and explain its frequent and advantageous application in the art of war, and other arts and sciences in which it has now become so important an element. The cabinet of minerals, now in a room over the chemical and electrical apparatus, has become so weighty as to endanger the floor of this story—removing it to the ground floor of a part of the same building, to be arranged therefor, will give the apartments needed for electrics. These arrangements contemplate the strengthening of the room in the third story, appropriated to ordnance and gunnery, on which the weight of models and apparatus has become in excess of safe limits.

Item No. 14 is to reset the boilers in the kitchen of the cadets' mess hall, by building a partition wall across the room, against which the boilers will be placed—the smoke flues to be carried up in this wall, and the furnace doors thrown in the apartment thus cut off from the kitchen. This arrangement has become very necessary to secure cleanliness; by it all smoke, ashes, steam and heat of the fires are confined to the furnace room. At present the walls and all parts of the kitchen in which cooking is done for about 250 cadets, are offensive and beyond the power of servants to remedy.

Item No. 15 is to build a dining-room at the cadets' hospital. At present there is none, and both sick and convalescents have to take their diet, food, medicine, and whatever other prescription may be ordered, for fever, catarrh, diarrhoea, or any other disease, in the rooms in which they have to sleep and spend the day; some must study, while others, from sickness, are incapable.

This has long been an evil, which at present may conveniently be remedied without increasing the annual or yearly average expenses of the institution.

Item No. 3 is less than last year, simply from the fact of there being a balance on hand, and not from any reduction in the sum necessary to meet these expenses.

No. 4 is also reduced this year, from there being a balance on hand.

No. 8. No additional sum is asked for the reservoir, as it is now drawing near completion, and the balance on hand considered sufficient for the purpose.

No. 11. The annual expense of repairs to the gas works was supposed to require \$500. Nearly three years' experience justifies a reduction of this item.

All the other items are as heretofore, and particularly explained in the notes to last year's estimate under corresponding numbers.

OFFICE UNITED STATES CAPITOL EXTENSION, &c.,  
*Washington, October 24, 1860.*

SIR: I have the honor to transmit herewith estimates of the amounts necessary to be appropriated for the continuation and completion of the works under my charge during the fiscal year ending June 30, 1862.

1. *Capitol Extension.*—The estimate for the completion of this work, made on November 30, 1859, was \$1,360,180. Of this amount, the sum of \$552,421 74 was appropriated by the act of Congress, approved June 25, 1860, leaving a balance of \$807,758 26 to complete the work. Of this balance the sum of \$500,000 is asked for the next fiscal year. This sum is more than half of the balance, but during the next fiscal year all of the columns and nearly all of the other marble ought to be delivered, in order to insure the completion of the building in three years from the commencement of this fiscal year; and unless the sum asked for be appropriated, this delivery cannot be made.

2. *New Dome.*—There will be enough of this appropriation remaining at the end of this fiscal year to carry the work through the next year. Nothing is asked for therefore.

3. *Post Office Extension.*—The estimate for the completion of this work, made February 16, 1860, was \$122,830 69. Of this amount Congress appropriated \$70,000 by the act approved June 25, 1860, which leaves a balance of \$52,830 69 necessary to complete the work.

The heating apparatus which has been constructed for this building is designed to heat the whole structure, new and old. No appropriation has, however, been made for introducing the hot and cold air into the old building. The sum of \$15,000 will be necessary to make the alterations in the old building, and this sum and that required to complete the new building are asked for. The amount is \$67,830 69.

I am, very respectfully, your obedient servant,

W. B. FRANKLIN,

*Capt. Topographical Engineers in charge.*

BUREAU OF YARDS AND DOCKS,  
October 8, 1860.

SIR: I have the honor to submit herewith one set of the estimates for objects under the cognizance of this bureau for the fiscal year ending June 30, 1862, marked Y. and D., A., and No. 1 to No 7, inclusive, and which have been prepared in compliance with your instructions. These estimates vary but little from those of last year. The one for "Navy-yards" is predicated upon what appears to have been the policy of Congress, in its action the last two years, in regard to appropriations for navy-yards, no provision having been made for *improvements* at any of the yards, and but a very limited amount [\$177,926] appropriated for the preservation and repairs of works at all the yards. Duplicate and triplicate sets of these estimates will be furnished at an early day with my annual report.

I have the honor to be, with great respect, your obedient servant,  
JOS. SMITH.

Hon. ISAAC TOUCEY,  
*Secretary of the Navy.*

HEADQUARTERS MARINE CORPS,  
Paymaster's Office, September 4, 1860.

WM. W. RUSSELL,  
Paymaster United States Marine Corps.

HEADQUARTERS MARINE CORPS,  
Washington, September 10, 1860.

SIR: I inclose to the department Major Slack's detailed estimate for the quartermaster's department of the Marine Corps for the year commencing July 1, 1861, and ending June 30, 1862.

I am, sir, very respectfully, yours,

JNO. HARRIS,  
Colonel Commandant.

Hon. ISAAC TOUCEY,  
Secretary of the Navy.

HEADQUARTERS MARINE CORPS,  
Quartermaster's Office, Washington, September 10, 1860.

SIR: I have the honor to transmit herewith triplicate estimates for the support of the quartermaster's department Marine Corps, for one year, commencing July 1, 1861, and ending June 30, 1862. These estimates, in the aggregate, are \$32,166 less than those submitted last year. This is accounted for by leaving out of the present estimates the sum of \$40,000 asked for in the last, to supply deficiency under the head of clothing. The item of clothing is increased \$7,834 in consequence of estimating for each man the sum of \$40 per annum, instead of \$36. This increase is caused by the advanced price of material from which the clothing of the corps is manufactured, and the increased cost of making, as also estimating for 650 watch-coats, at \$9 each, in place of 700 at \$8 each, as heretofore.

I am, sir, very respectfully, your obedient servant,

W. B. SLACK,  
Quartermaster Marine Corps.

COL. JOHN HARRIS,  
Com'g Marine Corps, Headquarters.
