					\$129,160 00	\$118,005 93	
NOTE.—The appropriation act of August 15, 1876, provides for only six watchmen, twelve laborers, one assistant engineer, and four firemen, reducing the number applied for in 1875 by five laborers, two firemen, three watchmen, and one assistant engineer. An increase of this number of employés is absolutely necessary for the protection and proper care of the public property. The present estimate is made for nine watchmen, seventeen laborers, two assistant engineers, and six firemen, and the number of charwomen allowed in 1876 is reduced from twenty to ten.

NOTE.—This estimate for \$10,000 is based upon actual necessities, which embrace the purchase of furniture, books, pamphlets, newspapers, carpets, oil-cloth, car-tickets, soap, towels, brooms, &c., and the expenses of carriage-hire, telegrams, &c., for the office. By close economy, the amount (\$12,000) appropriated for 1876 was barely sufficient to meet such necessities, and the amount appropriated for 1877, namely, \$8,000, reduced to \$7,000 by section 4 of the act of July 24, 1876, setting aside \$1,000 of the amount for expenses of the Army Commission, will be insufficient to satisfactorily accomplish the objects intended to be accomplished under this head of appropriation, and an additional amount will probably be asked for the current year.

Rent of office, blank books, stationery, fuel, office furniture, &c.....	Appropriated.....	19	160	1	8,000 00		6,000 00
<p>NOTE.—The appropriation of \$6,000 for contingent expenses of this office is entirely inadequate; the items of rent, fuel, and gas amount to about \$4,700 annually. In reference to the clerks "submitted" in this estimate, attention is invited to the following remarks made in letter of May 15, 1876, from the Secretary of War to the Senate, when the force of this bureau embraced one clerk of class four and one of class three, in addition to the number above estimated for: "If I were asked to recommend any increase as well as reduction of estimates, I might even suggest an increase of force in the Surgeon General's office, to avoid the delay which arises in the investigations necessary to the adjudication of pensions. These delays work great hardship to many honest claimants. There are at present from ten to fifteen thousand cases waiting to be acted on, and the docket of arrears is increasing at the rate of three to four hundred per month."</p>

<i>Contingent Expenses, War-Department Building—</i> Labor, fuel, light, and miscellaneous items .....	Appropriated.	19	161	1		8,000 00	6,000 00
NOTE.—This estimate (for \$8,000) is based upon actual necessities, which, in addition to labor, fuel, and light, embrace current ordinary repairs of the old War-Department building and its grounds, and purchase and repair of such modern apparatus as conduces to economy of labor and safety of public property pertaining to the office. By close economy the amount (\$8,000) appropriated for 1876, was barely sufficient to meet such necessities, and the amount appropriated for 1877 will be insufficient to satisfactorily accomplish the objects intended to be accomplished under this head of appropriation.

Fuel for warming the building and the Ordnance museum, and for operation of ventilating fan in summer; repair of warming and ventilating apparatus; pay of steam engineer and fireman; purchase of matting and oil-cloth for halls; and general repairs of the building, and miscellaneous items.....	Appropriated.	19	161	1		8,000 00	6,000 00
NOTE.—The appropriation of \$8,000 for the last, and for other fiscal years, was found insufficient, with close economy, to supply the proper wants of the building; some of which, such as fuel for operating the ventilating fan in summer, matting and oil-cloth for the halls, whitewashing, &c., were unsupplied, and it is therefore respectfully represented that the appropriation of \$6,000 for the current fiscal year will involve not only dispensing with these supplies, but with other more material essentials to the proper preservation and general good condition of the building.

Fuel, books, stationery, messenger-hire, and other incidental expenses.....	Appropriated.	R. S. 19	393 121	2227 1		2,000 00	1,000 00
NOTE.—The \$18,000 is estimated for compensation of clerk-hire, consisting of four regular clerks and draughtsman, calling for \$6,000, and twelve \$1,000 clerks to bring up the arrears in office-work of many years' standing, viz: to prepare duplicate patent plats of confirmed private-land claims, of which there are about 6,000 entitled to patents, and which cannot be patented until such plats are made. Also, to transcribe field notes of surveys of about 780 townships, for a long while in arrears, and requiring one month of time to copy the notes of six townships by one clerk. Very limited appropriations for office-work in former years caused so extensive arrears.

NOTE.—The \$8,600 is estimated for clerk-hire, to enable the surveyor general to employ seven of them to attend properly to the current office-work, as well as to the bringing up of the work remaining in arrears on account of heretofore restricted appropriations for the purpose. There are 23 townships, the field-notes of which must be transcribed, 128 to be recorded, 24 descriptive lists for the registers and for record, and 47 township plats constructed.

<b>Contingent Expenses, Office of Surveyor General of Dakota—</b>							
Rent of office of surveyor general, fuel, books, stationery, and other incidental expenses	Appropriated.	R. S. 19	393 121	2227 1	\$2,400 00	\$1,500 00	
NOTE.—The sum of \$7,500 is estimated for compensation of six employes in the surveyor-general's office, consisting of a chief clerk, three draughtsmen, and two transcribing clerks, actually necessary to keep pace with the field-work and avoid any arrears in the office-work. The \$2,400 submitted for incidental expenses of the office is reported by the surveyor general as absolutely needed to maintain the office and pay of messenger; the reduced appropriation for the same objects for the present fiscal year is inadequate to cover the necessary expenses.

NOTE.—The \$7,200 is estimated for the compensation of five clerks and draughtsmen in the surveyor-general's office, to attend to the office work consequent on surveys of public lands and mineral surveys, which latter are sensibly increasing in Colorado, and involve considerable labor in the preparation of the requisite work; and although no arrears are reported by the surveyor general, yet the fact that the appropriation for the current year has been reduced to one-half the amount estimated, the present estimate will be actually needed for the service.

NOTE.—The \$7,800 is submitted for compensation of chief clerk and translator of Spanish language in the adjudication of private land claims in New Mexico, \$2,000 per annum; two draughtsmen, at \$1,500 each, and two clerks, at \$1,400 each; this force is deemed necessary in view of the diminished appropriation for the like service of the current fiscal year, and also of the arrears existing in the preparation of diagrams of private land claims for the registers, showing the surveyed limits of the same. The \$4,500 estimated for incidental expenses are to cover a fire-proof safe and renewal of furniture dilapidated by wear and tear of twenty years' use thereof, &c.

Rent of office for surveyor general, fuel, books, stationery, and other incidental expenses	Appropriated.	R. S. 19	393 121	2227 1	7,000 00	3,000 00	
NOTE.—The \$20,000 estimated for the clerk-hire in the office of the surveyor general of California is to enable him to successfully cope with a very diversified office-work called for by numerous acts of Congress. The maximum allowance by the organic law of \$11,000 per annum having been found inadequate for several years past, appropriations were made of larger sums for the service, but not sufficient for bringing up the great arrears in the preparation of descriptive notes for the local land officers as required by law. The \$7,000 submitted for incidental expenses of the office is necessary to meet the pay of messenger, \$900 per annum, rent of the office, \$3,000, and other expenses which, in consequence of the reduced appropriation for the present fiscal year, will demand entire supply of stationery, &c., for the year.

NOTE.—The \$4,000 estimated for the compensation of clerks in the surveyor-general's office covers scarcely the pay of three clerks for the whole fiscal year, the third clerk receiving \$700 for a part of the year. The \$2,500 submitted for incidental expenses of the office, goes in payment of a messenger, \$600, and rent of the surveyor-general's office, leaving the balance for stationery and other incidental expenses.							
OFFICE OF THE SURVEYOR GENERAL OF NEVADA.							
<i>Salaries, Office of Surveyor General of Nevada—</i>							
Surveyor general	Aug. 15, 1876	R. S. 19	391 165	2210 1	\$3,000 00

NOTE.—The \$7,800 is estimated for clerk-hire in the office of the surveyor general of Nevada, to cover the compensation of three clerks and two draughtsmen, the least possible office-force to attend to the service of the pressing public concerns necessitated by the surveys of the agricultural, mineral, and other surveys; the extensive mineral land surveys demanding considerable labor in order to expedite the returns of numerous surveyors. The \$4,000 here submitted for incidental expenses of the office of surveyor general are called for to meet the payment of \$1,200 for the rent of the office, compensation of messenger, \$700, and sundry other expenses actually needed for the efficient discharge of duties devolved on the surveyor general of Nevada.

Fuel, books, stationery, and other incidental expenses	Appropriated.	R. S. 19	393 122	2227 1	2,500 00	1,500 00	
NOTE.—The \$7,200 is submitted for the compensation of five clerks in the surveyor-general's office, at usual moderate rates per annum, actually needed to attend to the current official business, and to bring up the accumulated arrears in office-work since 1862, especially in regard to the swamp-land business, and the transcription of donation-claim field-notes of survey.

Rent of office for surveyor general, fuel, books, stationery, and other incidental expenses	Appropriated.	R. S. 19	393 122	2227 1	2,000 00	1,500 00	
NOTE.—The \$7,200 are submitted for the compensation of five clerks in the office of surveyor general of Washington Territory, required for the purpose, not only to expedite the current office-work, but to bring up considerable arrears in the transcription of the field-notes of former surveys of the public lands and donation claims, and recording the same as required by law, the accumulation of this kind of work having taken place during former years in consequence of insufficient means provided for that purpose. As the original field-notes are in a very dilapidated state, further delay in transcribing them in proper books will cause great loss, and embarrass not only the public interests but those of individual owners of lands.

	Appropriated.	19	122	1			
NOTE.—The \$6,300 estimated for clerk-hire is to cover the pay of five clerks actually needed for the transaction of the ordinary business of the office, and which amount is allowed by law. The \$3,000 submitted for incidental expenses is to cover binding of the original field-notes of surveys of past years, pay of messenger, and rent of the office, &c.

	Appropriated.	19	122	1			
NOTE.—The \$7,500 is estimated for the pay of five clerks in the surveyor-general's office. To transact the official business consequent on the survey of agricultural and mineral lands in Montana, especially the latter surveys, being on an increase, will demand constant work in the examination of complicated claims, protraction of numerous plats, recording the same, transcribing field-notes, and other duties devolving on the clerks, too numerous to state. The \$4,000 is submitted for binding the original field-notes of surveys, backing with cloth township-plats, additional furniture, pay of messenger, and rent of office. All these are much needed, and will absorb the amount.

	Appropriated.	19	122	1			
NOTE.—The \$7,100 is submitted for the compensation of five clerks in the office of surveyor general of Utah, indispensably needed, to attend to extensive surveys of mineral claims, preparation of map of Salt Lake City, maps and field-notes of the twenty-six mining districts, and to transact the usual regular business in the office, which will have been delayed on account of small appropriation made for the service during the present fiscal year.

	Appropriated.	19	122	1			
NOTE.—The \$6,300 is submitted for compensation of four clerks in the office of surveyor general of Wyoming Territory, required to transact the official business devolving on it and to bring up the arrears consisting of the preparation of descriptive lists of corner boundaries of public lands, quality of soil and timber of 118 townships, requiring 236 lists for the local land offices, and for the record in surveyor-general's office.

	Appropriated.	19	122	1			
NOTE.—The \$5,500 is estimated for clerk-hire in the office of surveyor general of Arizona Territory. This amount is actually required to pay three clerks in his office, including one versed in the English and Spanish languages, to assist in the duties of examining and reporting upon titles to private land claims, the duty devolved on the surveyor general by the proviso to the appropriation act of July 15, 1870, (Statutes, vol. 16, page 304.) The surveyor general reports the living in Arizona as being 25 per cent. higher than in any other surveying district.

<i>Ordnance, Ordnance Stores, and Supplies—Continued.</i>							
Purchase and manufacture of ordnance stores to fill requisitions of troops .....	Appropriated.	19	100	1	\$150,000 00		
Infantry, cavalry, and artillery equipments, consisting of clothing-bags, haversacks, canteens, great-coat straps, horse equipments for cavalry, &c .....	do .....				222,500 00		
Purchase of a site for powder depot and mills, and commencing the erection of suitable buildings .....	Submitted .....				100,000 00	\$712,500 00	\$330,000 00
<i>Manufacture of Arms at National Armories—</i>							
Manufacture of the new model breech-loading musket and carbine, adopted for the military service on recommendation of the board of officers convened under act of Congress approved June 6, 1872 .....	Appropriated.	19	100	1	500,000 00	500,000 00	100,000 00
NOTE.—This will manufacture about thirty thousand arms for reserve supply towards the armament of the nation.							
<i>Armament of Fortifications—</i>							
Conversion and manufacture of heavy ordnance .....	Appropriated.	19	59	1	500,000 00		
NOTE.—The object of this estimate is to continue the conversion of smooth-bore 10-inch guns into rifles of eight inches calibre. The necessity for this appropriation was made apparent in the President's special message to Congress of January 20, 1875. Our experiments prove that this is the most economical and sure method of providing efficient guns of medium power, which are indispensably necessary for our fortifications.							
Projectiles for heavy ordnance .....	do .....				200,000 00		
NOTE.—This estimate is made to enable the Department to provide a supply of projectiles for the guns.							
Carriages for heavy guns .....	do .....				200,000 00		
NOTE.—This is to provide new carriages, and to improve by alteration those now at our forts. The constant improvement in gun-carriages is rendered necessary by the change in character and increase in power of our guns, the position where placed, and the quantity of work required of them; and the cost of our iron gun-carriage, with its fixtures and implements, is about equal to the cost of the gun that is to be mounted upon it.							
Proving ground and proving cannon, carriages, projectiles, fuzes, gunpowder, and other ordnance materials and stores .....	do .....				50,000 00	950,000 00	165,000 00
MILITARY ACADEMY.							
<i>Current and Ordinary Expenses, Military Academy—</i>							
Repairs and improvements, timber, planks, boards, joists, wall-strips, lath, shingles, slate, tin, sheet lead, nails, screws, locks, butts, hinges, glass, paints, oils, turpentine, varnish, stone, brick, flags, lime, cement, plaster, hair, sewer and drain-pipe, blasting-powder, fuze, iron, steel, tools, mantels, and other such material, and for pay of citizen mechanics, and labor employed upon repairs and improvements that cannot be done by enlisted men .....	Appropriated.	19	124	1	22,500 00		
NOTE.—The total of \$22,500, granted for some years past, except by the last act of appropriation, has been no more than sufficient for the objects named.							
Fuel and apparatus, namely: Coal, wood, stoves, grates, furnaces, ranges, fire-brick, repairs of steam heating apparatus, &c .....	do .....				14,000 00		
Gas-pipes, fixtures, lamp-posts, gas-lamps, gasometers and retorts, and annual repairs .....	do .....				600 00

Compensation to draughtsman, in addition to pay and extra-duty pay as soldier	do.				100 00		
Continuing preparation of text-books for special instruction of cadets	do.				500 00		
NOTE.—It is suggested that the items of \$500 for models, &c., and \$500 for preparation of text-books, be made indefinite as to fiscal year. It is often impossible to make definite contracts, either as to amount of purchase and time of delivery of models, particularly as to those obtained abroad, and also difficult to fix time and cost for the publication of text-books, the preparation of which cannot properly be hurried.							
Department of chemistry, mineralogy, and geology:							
Chemicals, chemical apparatus, glass and porcelain-ware, paper, wire, sheet-metal, ores, and photographic materials	do.				500 00		
Rough specimens, fossils, files, lamps, alcohol, blow-pipes, pencils and steel and agate mortars; for practical instruction in mineralogy and geology, and for gradual increase of cabinet	do.				650 00		
Repairs and additions to electric, galvanic, magnetic, electro-magnetic, magneto-electric, pneumatic, and thermic apparatus	do.				750 00		
Receiling, repairing, and painting of section-rooms	do.				200 00

LIGHT-HOUSES, BEACONS, AND FOG-SIGNALS.							
<i>Cape Elizabeth Light-station, Maine—</i>							
Establishing a duplicate fog-signal at Cape Elizabeth, entrance to Portland harbor, Maine .....	Submitted .....					\$5,000 00	
NOTE.—This is a very important station, and a duplicate signal should be provided for operation in case of accident to the one now in use.							
<i>Isle of Shoals Light-station, New Hampshire—</i>							
Erecting a new dwelling for keepers at Isle of Shoals, off Portsmouth harbor, New Hampshire .....	Submitted .....					4,000 00	
NOTE.—The present dwelling is very old, and scarcely habitable. The Light-house Board recommended an appropriation last year, and it is still more urgently required now.							
<i>Day-beacons, Maine, New Hampshire, and Massachusetts—</i>							
Establishing and replacing day-beacons on the coasts of Maine, New Hampshire, and Massachusetts.....	Appropriated.	17	520	1	.....	10,000 00	
NOTE.—There is a large number of iron beacons or spindles on these coasts, and every year some are carried away or injured by the ice. They take the place of buoys, and are more permanent and efficient.							
<i>“The Whale” Day-beacon, Rhode Island—</i>							
Erecting a day-beacon on the reef known as “The Whale,” western entrance to Narragansett bay, Rhode Island....	Submitted .....					10,000 00	
NOTE.—This reef is a dangerous obstruction to navigation, and the Light-house Board recommended to Congress, in its reports for 1872 and 1873, that it be marked. A bill (S. 492) for the erection of this beacon, is now before Congress.							
<i>Muscle-Bed Shoals Light-station, Rhode Island—</i>							
Rebuilding light-house at Muscle-Bed shoals, Rhode Island .....	Submitted .....					6,000 00	
NOTE.—Station seriously damaged by ice, the stone pier being displaced some four feet. The rebuilding is a necessity, if it is intended to maintain the light and fog-signal.							
<i>Conimicut Light-station, Rhode Island—</i>							
Rebuilding light-station at Conimicut, Rhode Island.....	Submitted .....				30,000 00		
NOTE.—The keeper's dwelling and landing-pier at this station totally destroyed by ice. The keepers are now forced to reside at a distance, which renders necessary the employment of an additional keeper. The tower in which the light is exhibited will be in danger until a pier of greater dimensions and stability is erected.							
Reimbursing H. W. Arnold, keeper of Conimicut light-station, for losses sustained by him at the time of the destruction of the keeper's dwelling by ice.....	do.....				319 00	30,319 00	
NOTE.—This keeper lost all his furniture, and narrowly escaped with his life.							
<i>Watch Hill Light-station, Rhode Island—</i>							
Protecting the site of the light-house at Watch Hill, Rhode Island .....	Submitted .....					3,500 00	
NOTE.—The sea-wall on the east side of the light-house shows signs of giving way, and it is necessary to protect it before greater injury is done.							
<i>Rondout Pier Light-station, New York—</i>							
Establishing light to mark pier at Rondout, Hudson river, New York .....	Submitted .....					3,200 00	
NOTE.—During the construction of this pier, a light has been maintained by the Engineer department of the Army. Its maintenance should now devolve on the Light-house Establishment.

<i>Staten Island Depot, New York—</i> Repairs and additions to wharf, ground, and buildings at the light-house depot, Staten Island, New York..... NOTE.—An appropriation has been urged for several years by the Light-house Board.	Submitted .....				5,000 00		
<i>New London Depot, Connecticut—</i> Repairs and improvements at the New London light-house depot, Connecticut..... NOTE.—The passage (right of way) to the United States property should be walled and paved. This depot is constantly increasing in importance.	Submitted .....				3,000 00		
<i>Tucker's Beach Light-station, New Jersey—</i> Rebuilding dwelling at Tucker's Beach light-station, New Jersey..... NOTE.—Present dwelling, built in 1848, is dilapidated, and beyond economical repair. Only two rooms and an attic for two keepers with families.	Submitted .....				5,000 00		
<i>Absecom Light-station, New Jersey—</i> Protecting site to light-house at Absecom, New Jersey.... NOTE.—The sea has recently encroached alarmingly on the site. By constructing a series of short brush jetties, to be filled with sand by the action of the sea, the Light-house Board believe the abrasion can be arrested, and the rebuilding of a tower on a new site avoided.	Submitted .....				10,000 00		
<i>Cape Henlopen Light-station, Delaware—</i> For a new lantern for Cape Henlopen light-station, Delaware..... NOTE.—Present lantern, of old style, intercepts a large quantity of light. An important station, and should have an improved lantern of modern construction.	Submitted .....				8,000 00		
<i>Egg Island Light-station, New Jersey—</i> Purchasing additional land and moving the light-house at Egg Island, New Jersey..... NOTE.—Site is washing away. An ordinary high tide comes within a few feet of the building.	Submitted .....				5,000 00		
<i>Depot for the Fourth District—</i> Purchasing a site and establishing a light-house and buoy-depot at Cohansy, New Jersey.....	Submitted .....				1,000 00		
<i>Brant Island Shoal Light-station, North Carolina—</i> Re-establishing Brant Island Shoal light-station, destroyed by fire May 24, 1876.....	Submitted .....				10,000 00		
<i>Lazaretto Depot, Maryland—</i> Repairs to light-house depot and wharf at Lazaretto Point, Maryland.....	Submitted .....				1,000 00		
<i>Tybee Beacon-light, Georgia—</i> Rebuilding the frame beacon erected near main light at Tybee Island, Georgia..... NOTE.—An old frame structure. Posts rotten. Cheaper to rebuild than to repair further.	Submitted .....				4,000 00		
<i>Cockspur Island Light-station, Georgia—</i> Rebuilding dwelling at Cockspur Island, Savannah river, Georgia..... NOTE.—To accommodate the keepers of both Cockspur Island and Oyster-Beds lights.	Submitted .....				5,000 00		
<i>Cape Canaveral Light-station, Florida—</i> Building a dwelling and repairing the station at Cape Canaveral, Florida..... NOTE.—There has never been a suitable dwelling for the keepers at this station. It was supposed, when the tower was built, that the assistants could occupy rooms in it; but, as it is of iron, the excessive heat renders this impracticable. The assistants have been living in wooden sheds fitted up by themselves. The station is difficult of access, which enhances cost of building.	Submitted .....				9,000 00

<i>American Shoal Light-station, Florida—</i> Commencing the construction of a light-house at or near American shoal, Florida reefs, Florida.....	Submitted .....				\$75,000 00		
NOTE.—To illuminate unlighted space between Sombrero and Sand Key lights. The gulf currents are here strong and variable, and the absence of a light causes many wrecks. Estimate of completed work, \$200,000. Recommended in last three annual reports of Light-house Board.							
<i>Reimbursement of Keepers of Dog Island and St. Mark's Light-stations, Florida—</i> Reimbursing keepers of Dog Island and St. Mark's light-stations, Florida, for private property destroyed by a hurricane.....	Submitted .....				970 65		
NOTE.—The light-house tower and dwelling at Dog Island were destroyed during the hurricane of the 18th and 19th of September, 1873. During the same hurricane the site of the St. Mark's light-station was completely flooded, the water standing on a level over six feet in depth, every sea breaking over the roof of the dwelling. The keepers at these stations lost all their private property. A precedent for granting the relief asked for is found in the case of the Timbalier light-house, where provision was made by Congress for reimbursing the keepers for the loss of their private property destroyed with the light-house. (See 15 Stat., 113.)							
<i>Cape San Blas Light-station, Florida—</i> Protecting the site of Cape San Blas light-station, Florida.....	Submitted .....				5,000 00		
NOTE.—Base of tower nearly at the level of the sea, and but 150 feet distant. The shore is of shifting sand, and, as in a violent hurricane, the tower may be undermined, it is not considered prudent to leave it unprotected.							
<i>Trinity Shoal Light-station, Louisiana—</i> For a light-ship to mark Trinity shoal, off the southern coast of Louisiana.....	Submitted .....				\$50,000 00		
NOTE.—A dangerous shoal, directly in the track of commerce. Coast low and seldom visible. An attempt was made to establish a light-house, which failed, as the vessel carrying iron-work foundered near the site. From recent investigation, it is doubtful whether a permanent structure can be established at a reasonable cost.							
Reimbursing employes for the loss of their private property destroyed at Trinity shoal, Louisiana.....	Submitted .....				2,000 00		
NOTE.—On the 17th of November, 1873, during a terrific storm, the platform erected for the construction of a light-house at Trinity shoal, Louisiana, was destroyed, and all the property thereon, public and private, was lost. At the same time the light-house tender Guthrie, having on board a large amount of material for the work at Trinity shoal, was lost. The working party at the platform, and the crew of the Guthrie, numbering in all seventeen persons, some of whom were mechanics, lost all their private property.						52,000 00	
<i>Depot for the Eighth District—</i> It is recommended that the appropriation of \$15,000, made by the act of June 23, 1874, for rebuilding a light-house and buoy-depot at Southwest Pass, Louisiana, be made available for establishing a depot at such point in the Eighth Light-house District as the Light-house Board may select. It cannot be established at Southwest Pass on account of the shoaling of the bar at the entrance to the bayou upon which it was proposed to locate it.							
<i>Brazos Island Light-station, Texas—</i> Reimbursing Francis Hamilton, keeper of the Brazos Island light, Texas, for personal loss sustained in the discharge of his duty when the light-house was destroyed by a hurricane.....	Submitted .....				207 00		
NOTE.—In September, 1874, this station was completely swept away, the keeper's wife killed, and his furniture destroyed. Hamilton has received the thanks of the board for his excellent services.							
<i>Dunkirk Light-station, New York—</i> Rebuilding Dunkirk beacon, Lake Erie, New York.....	Submitted .....				5,000 00		
NOTE.—This beacon is old and the wood-work much decayed.							
<i>Port Austin Light-station, Michigan—</i> Continuing the construction of a light-house on the reef } near Port Austin, Michigan..... }	Appropriated. 17 522 1 } Appropriated. 19 113 1 }				75,000 00		
NOTE.—By act of July 31, 1876, the Light-house Board is authorized to build this light-house on an outlying reef, at an estimated cost not to exceed \$85,000. By act of March 3, 1873, \$10,000 was appropriated.							
<i>Père Marquette Light-station, Michigan—</i> Erecting a dwelling at Père Marquette light-station, Michigan.....	Submitted .....				3,000 00		
NOTE.—There has never been a proper dwelling at this station. Former appropriation carried to surplus fund. No residence can be had within half a mile, and that on the opposite side of the river.

<i>Grosse Pointe Light-station, Illinois—</i> Protecting the site at Grosse Pointe light, near Chicago, Illinois NOTE.—The shore front of the site is rapidly washing away.	Submitted				\$5,000 00		
<i>Milwaukee Pier Light-station, Wisconsin—</i> Establishing a steam fog-signal at Milwaukee, Wisconsin. NOTE.—A first-class signal is required at this important port.	Submitted				5,000 00		
<i>Green Island Light-station, Wisconsin—</i> Purchasing additional land at Green Island light-station, Wisconsin NOTE.—This is required for a landing. Structures now on the ground are worth more than the amount asked.	Submitted				200 00		
<i>Pierhead Lights on the Lakes—</i> Erection of pierhead lights on the northern and north-western lakes NOTE.—The appropriation for last year was far below the requirements of this service. The lights are erected at the ends of piers in course of construction, and, when the pier is extended, are moved. There is therefore a constant demand on this appropriation.	Appropriated	19	113	1	25,000 00	\$5,000 00

<i>Rock Island Arsenal, Rock Island, Ill.—</i> Shop I: A wood-working and leather-working shop for the arsenal NOTE.—In order that the work of construction may be carried on economically and well, it is important that this building should be commenced this year. The materials to be obtained from the large excavations for this building are needed for filling up and grading grounds around this and other partially-completed and completed shops. It is mainly important, however, that such an arrangement of the work of construction may be possible as will permit a fair amount of each kind of work: stone, iron, wood-work, and laborers' (excavation) work to be done in each year. A very carefully organized force of workmen of each kind has been perfected, with necessary tools, machines, trucks, derricks, engines, and shop facilities for carrying on work with economy. One kind of work cannot be stopped, and the force and facilities therefor dissipated, and then resumed a year after, without considerable loss, and sometimes not without great loss and trouble. It is also better not to crowd too much of one kind of work into one year. The special facilities which have been procured for carrying on the work of construction with the best economy are adapted to the magnitude of the work. There are certain expenses attending the prosecution of the work which are nearly constant. There is, then, a much greater saving effected by doing in each year the fair amount of each kind of work which has been provided for, and using the facilities to somewhere near their full capacity. The amounts estimated for, for each building, have been carefully estimated to permit a prosecution of the work with as much economy as is possible. As soon as the basement story of this shop is built, the main line of shafting, to connect one row of shops with the water-power, can be put in, and put in operation if necessary. <i>Rock Island Arsenal, Rock Island, Ill.—Continued.</i>							
Shop G: An iron-working and finishing-shop for the arsenal.....	Appropriated.	19	113	1	\$230,000 00		
NOTE.—An appropriation sufficient to make all the excavations for the basements and court-area, and to put in the foundations, footings, and a portion of the basement-story walls for the building was made by Congress for the present fiscal year. The amount estimated for, for the next year, is what could be used with the best advantage and greatest economy, in connection with other work estimated for in carrying on the work of constructing the arsenal. It would leave the building in condition to be finished easily and economically during the next year.							
Shop F: A rolling-mill and forging-shop for the armory.....	do.....				68,000 00		
NOTE.—This building is now in progress. It is expected, with the appropriation asked for, to complete it. The importance of finishing this building and placing the armory in such condition that it may be used is clear. Until it is completed the armory buildings already completed cannot be used.							
One set of subaltern-officers' quarters.....	Submitted.....				22,700 00		
NOTE.—This building would complete the immediate and urgent wants of the post for officers' quarters, and is to take the place of temporary wooden buildings now in use for the same purpose. These temporary buildings were badly built, are much destroyed by rot, and cannot be used without extensive repairs. They are unhealthy, cannot be well warmed, and endanger the arsenal by fire. They are buildings that were originally built for the temporary prison that was located here during the war.							
A stone fire-proof building for offices.....	Submitted.....				78,000 00		
NOTE.—This building is intended as a general office for both the armory and arsenal, and for all the business of the post. It is to be fire-proof throughout, and to contain vaults for the books, records, and funds of the arsenal. No office has ever been built at this arsenal. For the present use, rooms have been temporarily partitioned off in the north end of the west wing of shop B, (one of the finishing-shops for the armory.) This furnishes sufficient office-room, but the partitions are of wood, very temporary, and with only temporary heating arrangements. The office is not comfortable in winter, and there is some danger of fire, endangering the loss of a very costly building, and the records of the arsenal. As the office must be built sometime, there are economical reasons for building it now.							
New machinery and shop-fixtures.....	Appropriated.	18	387	1	27,500 00		
NOTE.—It is proposed to put in the new shops such machinery and shop-fixtures as can be used with considerable economy in saving cost of buildings, and will at the same time form a part of the permanent machinery of the shops for manufacturing purposes hereafter. This estimate is partly for putting main lines of shafting in shop D of the armory, and preparing this shop for manufacturing work. The shop-fixtures would be manufactured in the arsenal shops when other work is slack. This work can be accomplished with the best economy in this way.							
Completing the development of the water-power, opening a new channel, and cleaning out the pool.....	do.....				170,000 00		
NOTE.—Wisdom and policy require that the work should be done without delay. The work can be done more economically by doing all of it in one year, as otherwise coffer-dams would have to be taken out and put in, pumping done, and some other expenses incurred each time the work is renewed.							
General care, preservation, and improvement; building new roads; care and preservation of the water-power; painting and care and preservation of permanent buildings and bridges, and shores of Island; building fences and grading grounds, and repairs and extension of rail-roads.....	do.....				18,750 00		
NOTE.—This work is absolutely necessary in the progress of the work of building the arsenal. The roads are required for immediate use in building operations, and should be so permanently built as to become a permanent part of the arsenal, and this work on roads, grading, and sewers can be done far more economically whilst other excavations and building are going on, as the two kinds of work are dependent.							
Care and preservation of the Rock Island bridge, and expense of maintaining and operating the draw of the same.....	Appropriated.	19	113	1	9,000 00	\$723,950 00	\$136,000 00
NOTE.—This estimate is for care and preservation of the bridges between Davenport, Rock Island, and the island, and the road and causeway on the island connecting the bridges. It includes all ordinary repairs, but is mainly for the expense of operating the draw, for which two sets of hands, consisting of engineer, fireman, and tender are required. This work is difficult, and excellent men must be employed—and guards for maintaining order on the long bridges in their large use by the public. This extensive use also causes considerable wear and necessity for repairs.

<i>Augusta Arsenal, Augusta, Ga.</i> — Repairs of public buildings, fences, grounds, &c .....	Submitted .....					\$2,000 00	
<i>Benicia Arsenal, Benicia, Cal.</i> — One machine and armorers' shop .....	Submitted .....				\$69,568 00		
NOTE.—The carpenter and blacksmith shops are finished. Most of the work commenced in these has to be completed in the machine shop. All the repairs of arms will have to be made in the second story of this building for the present. As this arsenal is the only one on the Pacific coast, it should at least be completed to an extent to enable the Ordnance department to make all necessary repairs.							
Continuing boring the artesian well, or if artesian water is procured, for putting down permanent iron pipe and turbine wheel, to be run by flow of water, to pump up water to reservoir .....	Appropriated.	19	113	1	6,705 00		
NOTE.—This well is 1,093 feet deep; it furnishes, by pumping, a continuous supply of water; but as many wells have done the same, and on being deepened have become flowing wells, it is hoped that this well will furnish the water without pumping if another stream is struck.							
To build a steam-engine room and a boiler-room under one roof .....	Submitted .....				6,235 00		
NOTE.—Required for the new shops.							
To purchase one Harris-Corliss steam-engine, to be obtained in Providence, R. I., and one boiler for same .....	do .....				5,908 00		
NOTE.—Required for the new shops.							
To transfer machinery to blacksmith shop and carpenter shop from storehouse .....	Submitted .....				3,666 00		
NOTE.—These shops are completed, but cannot be used without the machinery, which is at present in the old shop-building, which is needed for a storehouse. It is necessary to keep a large supply of stores on hand at this arsenal, as the States of California, Nevada, and Oregon, and the Territories of Arizona, Washington, and Alaska, covering an area nearly one-third of the territory of the United States, are supplied from it, and a greater portion of this is still occupied by Indians.							
To build a wharf at southwest corner of reserve, where the current comes very near the shore .....	do .....				11,090 00		
NOTE.—The present wharf, although lengthened twenty-five feet three years ago, has filled out, and at low tide mud is visible at foot of outer piles.							
Repairing roads and buildings, sewers and drains .....	Appropriated.	19	113	1	11,687 00		
Grading grounds .....	do .....				10,000 00		
NOTE.—These amounts are required to reduce the surface of the grounds into a more comely shape, as nature has left it in a very rough state, the difference in level in some places between different parts being two hundred and three feet.							
Permanent repairs of post, machinery for shops, and for fences .....	do .....				10,000 00		
<i>Frankford Arsenal, Philadelphia, Pa.</i> — Repairs of embankment walls, &c .....	Submitted .....				5,000 00	134,859 00	\$23,175 00
NOTE.—The entire wall on the creek and river fronts is open stonework, subject to the action of the tides, and requires constant repairs. This is a constant source of expense which would not be called for if the wall were once properly built.							
Repairing fences, public buildings, &c .....	do .....				5,000 00	10,000 00	
NOTE.—The wooden fences on the grounds cannot last more than a year without extensive repairs or entire renewal, many of the posts being now quite rotten. The grounds are in poor condition, and need renewing by fertilizers, &c.							
<i>Indianapolis Arsenal, Indianapolis, Ind.</i> — Building sewer through grounds .....	Submitted .....				2,500 00		
NOTE.—The building of the sewer is an absolute necessity. Sewerage from the Woodruff place enters a small stream crossing the arsenal grounds, near the non-commissioned officers' quarters, and during the summer months the smell is very offensive.							
Repairing buildings and fences, &c .....	do .....				1,000 00	3,500 00	
NOTE.—This expenditure is necessary for keeping in order the public buildings, fences, roads and grounds, and water and gas supply-pipes at the post.							
<i>Kennebec Arsenal, Augusta, Maine</i> — Completing storehouse .....	Submitted .....				2,000 00		
Repairing public buildings, fences, &c .....	do .....				1,000 00	3,000 00

Construction of new stone wall and fence in front of grounds, 600 feet long.....	Submitted .....				9,000 00		
NOTE.—The present fence is of wood, and requires constant repairs; true economy would be best observed in the construction of a permanent iron fence, and the appearance of the arsenal grounds would be greatly improved thereby.							
Repairing and painting public buildings, fences, &c .....	do.....				1,000 00		
NOTE.—In this dry, hot climate all buildings and dressed fencing require frequent repainting to insure their proper preservation. It is not thought a less sum than that asked for will be sufficient to keep the post in proper repair.						10,000 00

Completing and furnishing for use main building and one wing for new hospital for cadets.....	Appropriated.	18	469	1	42,000 00		
NOTE.—This will complete, ready for use, the hospital, consisting of the main building and a wing containing two wards, which will meet all necessities for hospital-room for the present organization of cadets. Another wing could be added, should future necessity require. I would respectfully ask that the appropriation under this head be made available from the date of the passage of the act, which will insure that the hospital shall be ready for use before the winter of 1877-'78.							
Continuing to completion system of sewerage from barracks and quarters.....	Submitted.....				16,000 00		
NOTE.—This system has been completed for that part of the post including and to the south of the cadet-barracks, and for small buildings north of the barracks. It is very important, on sanitary grounds, that the whole system be finished as soon as may be. The amount asked for will be necessary for the construction of that part of the system pertaining to the portion of the post north of cadet-barracks.							
Construction of storage-reservoir for water supply of post, and pipes for service.....	Submitted.....				15,000 00		
NOTE.—Such a reservoir, with water-pipes connecting, is necessary for a sufficient supply of water at all times. The present reservoirs are now empty, and the post without any adequate supply of water. This is liable to recur in any dry season.

<i>Prison Hospital at the Leavenworth Military Prison—</i>							
Erection of a building at the post of Fort Leavenworth, Kansas, for the use of the post, in place of a stone building required for a hospital for the military prison at Fort Leavenworth, and for fitting up the stone building for a prison hospital	Submitted					12,000 00	
NOTE.—The present hospital accommodations for the prisoners are entirely inadequate and unsuitable, being merely a ward-room on the first floor of one of the prison buildings, adjoining rooms being occupied as workshops, while overhead are two floors of prisoners' cells, so that, in case of infectious disease appearing, there is no possibility of preventing its spread throughout the prison. The building proposed for a hospital is occupied for the use of the garrison, and cannot be vacated without providing another. The arrangement can be effected at no greater cost than would be incurred in the erection of a hospital building alone.

<p><i>Surveying Confirmed Private Land Claims in Arizona—</i>                      Surveying confirmed private land claims in Arizona, at a rate not exceeding \$16 per linear mile.....</p> <p>NOTE.—These four last sums are estimated for the reason that the act of Congress entitled "An act for the survey of grants or claims of land," (U. S. Statutes at Large, vol. 12, page 410,) which required such surveys to be made at the cost of claimants, was repealed February 18, 1871, (U. S. Statutes at Large, vol. 16, page 416, and vol. 18, page 384.) Under the circumstances, no contracts for the survey of private land claims can be entered into by the respective surveyors general unless Congress provides the necessary funds for the service. The segregation of the private land claims from the mass of public lands is called for to secure the best interests of the Government, as well as the welfare of settlers located often on public lands, but claimed by grantees as confirmed private claims. Congress, by the act of July 31, 1876, appropriated \$25,000 for surveying private land claims.</p>	Appropriated.	R. S. 19	392 120	2223 1	\$3,000 00	\$25,000 00	
<p><i>Survey of Boundary between Colorado and Utah—</i>                      Survey of the boundary line between Colorado and Utah, being so much of the 32d meridian of longitude west from Washington Observatory as lies between the 37th and 41st degrees of north latitude, at a rate not exceeding \$70 per linear mile; estimated distance 280 miles....</p> <p>NOTE.—The estimate of \$19,600 is necessary to separate the political jurisdiction, so that the respective inhabitants may know to which particular Territory their rights of citizenship belong. The boundary is needed to close the lines of public surveys upon, projected from different bases and meridians; also to enable the local land officers to know that public lands disposed of by them are within their respective districts, and to afford facilities to settlers on surveyed and unsurveyed public lands to apply to the proper land officers to file declarations to enter lands.</p>	Submitted				19,600 00		
<p><i>Retracing of Boundary between Arkansas and Indian Territory—</i>                      Retracing and conspicuously marking the boundary line between the State of Arkansas and the Indian Territory, at a rate not exceeding \$50 per linear mile; estimated distance 198 miles.....</p> <p>NOTE.—The \$9,900 is estimated for retracing of the boundary line originally surveyed in 1831, and re-established in 1838, by closing the lines of public surveys north of the Arkansas river, and obliterating the evidences of the survey thereof made in 1871, but not conforming to the requirements of the act of Congress of March 3, 1875. Also for retracing that part of the boundary situate south of the river, originally surveyed in 1825, and resurveyed in 1859.</p>	Mar. 3, 1875 Submitted	18	476	1, 2	9,900 00		
<p><i>Survey of Northern Boundary of Wyoming Territory—</i>                      At a rate not exceeding \$70 per linear mile; estimated length 344 miles, being part of the 45th degree of north latitude, included between the 27th and 34th meridians of longitude west from Washington Observatory.....</p> <p>NOTE.—\$24,080 is estimated for the establishment and permanent marking of this boundary, in order to segregate the large River Crow Indian reservation in Montana from the Territory of Wyoming; the south boundary of the reservation being common to the north boundary of Wyoming for a distance of 180 miles. The survey of this boundary is also required to close thereon the lines of public surveys in Montana, and to segregate the jurisdiction of the respective Territories.</p>	Submitted				24,080 00		
<p><i>Completion of Surveys and Unfinished Records—</i>                      Completing surveys in those States where the offices of surveyors general have been closed—act June 12, 1840, 5 Statutes, p. 384, and act of January 22, 1853, 10 Statutes, p. 152—and for preparing the unfinished records of public and private surveys in Arkansas, placed in the General Land Office for that purpose, and to be transferred to the authorities of that State.....</p> <p>NOTE.—This estimate includes the expenses of the survey of the Cherokee reservation in township 7 and 8 north, range 21 west, Arkansas, ceded to the United States by treaty of May 6, 1828. (Statutes at Large, page 312.)</p>	Submitted	R. S.	391	2218, 2219	10,000 00		
<p><i>Boundary Line between the States of Georgia and Florida—</i>                      Adjusting claims between the Watson and Orr and Whitner lines, extending from the confluence of the Flint and Chattahoochee rivers to the source of St. Mary's river.....</p> <p>NOTE.—The \$5,000 is submitted to cover the expenses of a surveyor, to be designated by the surveyor general of Florida, for the purpose of ascertaining the lands sold by the State of Georgia lying south of the Orr and Whitner line, and north of the Watson line, in order that the titles to the same may be adjudicated by the Secretary of the Interior when the possessory rights to the conflicting claims shall have been ascertained, and the requisite surveys of the same are made.</p>	Mar. 13, 1860 Apr. 9, 1872 Submitted	12 17	11 52	1 1	5,000 00

# APPENDIX.

## APPENDIX A.

*Explanation of the estimates for United States Mints and Assay Offices. (See pages 24 to 27.)*

I have the honor to transmit herewith estimates of appropriations for the support of this office and the mints and assay offices of the United States for the next fiscal year, and submit the following explanations in relation to certain increased and new appropriations asked for therein, viz:

### OFFICE OF THE DIRECTOR OF THE MINT.

An increase of \$400 in the salary of the examiner and computer of bullion, and \$200 in that of the assay clerk, is submitted, and the striking out of the second-class clerkship now provided for by law. This arrangement contemplates a reduction of \$400 in the total amount now appropriated for salaries. The salaries of the clerks referred to, as fixed by the last appropriation act, are considerably below the salaries of the principal clerks in other branches of the Treasury, and are not a sufficient compensation, considering the important duties to be discharged.

An increase of \$500 under the head of "contingent expenses" is also submitted.

The necessity for having proper facilities, under the immediate control of this office, for testing the weight and fineness of our coins becomes more apparent every day, for which reason I have included an item of \$1,000 for fitting up an assay laboratory in connection with this office.

The appropriation of \$1,000 asked for under the head of "recoining" is required for the purpose of reimbursing the Treasury of the United States for the difference between the bullion and the nominal value of gold and silver coin in the Treasury abraded below the legal limit for circulation and sent to the mint for recoinage.

For several years past an appropriation has been made for collecting mining statistics, but was omitted at the last session of Congress. I deem it highly important that the collection of such statistics should be continued, in order that we may be able to make an intelligent estimate of the production of the precious metals in the United States, and for this purpose I recommend that an appropriation of \$5,000 be made.

An appropriation of \$2,000 is estimated for, to defray the expenses of an examination by a competent person of the machinery and processes used in the principal mints of Europe, with a view to ascertain whether there are any improvements in either or both which could with advantage be introduced into the mints of the United States.

### SALARIES IN THE MINTS AND ASSAY OFFICES.

I have submitted an increase in the salaries of the superintendent of the United States assay office at New York, the superintendent and chief clerk of the mint at Carson City, and the assistant operative officers and clerks of the mint at Philadelphia. All of these, with the single exception of the superintendent of the United States mint at Carson City, are a restoration to the amounts paid these officers and clerks prior to the passage of the last appropriation act. These persons have been many years in the mint service, and have rendered entire satisfaction in their respective positions.

### WAGES OF WORKMEN AND CONTINGENT EXPENSES.

I have also requested slightly increased appropriations for wages and incidentals in some of the mints, rendered necessary by constantly-increasing business.

All of which are respectfully submitted.

I am, sir, with great respect, your obedient servant,

H. R. LINDERMAN, *Director.*

To the Honorable SECRETARY OF THE TREASURY.

## APPENDIX B.

*Explanation of estimate for the Contingent Expenses, Territory of Idaho. (See page 28.)*

I have the honor to enclose estimate of contingent expenses of the Executive office, Idaho Territory, for the fiscal year ending June 30, 1878.

Having but recently assumed the duties of this office I explain why I ask appropriation in advance of the \$1,000 provided in section 1935, p. 341, Revised Statutes of 1875.

*Item 1*—I find a lease by my predecessor, Hon. D. P. Thompson, of Executive office at \$360 per annum, continuing until June 30, 1877, dated January 1, 1876; E. J. Curtis, lessor. *Items 2, 3, 4, 5*—Proper, necessary. *Item 6*—This service is necessary; it is indispensable, preparatory to, during, and after sessions of the legislative assembly. The Government pays inferior clerks of the two Territorial houses \$5 per day; I can procure a better clerk with less. *Item 7*—This service necessary. *Item 8*—I expect to be placed in occupancy of the Executive office rented by my predecessor about October 1, without, so far as informed, any furniture furnished by the United States.

I have estimated the foregoing supplies and service at reasonable prices, and deem the same necessary to the public service.

I propose to perform my new duties efficiently and creditably, but will find it very difficult to do so without better conveniences and aids than I find here. Herein I disclaim both the wish and the right to refer further back than the beginning of my own administration.

Very respectfully, your obedient servant,

M. BRAYMAN,  
*Governor of Idaho.*

To the Honorable SECRETARY OF THE TREASURY.

## APPENDIX C.

*Explanation of the estimates for the Government Hospital for the Insane. (See pages 52 and 142.)*

## CURRENT EXPENSES.

At the beginning of the current fiscal year there were under treatment in the hospital 744 patients, 34 of whom were paying the average cost of their support, leaving 710 who were supported by the Government. Under existing laws it is not at all likely that the average number to be supported during the coming year will be less than 710. It will probably be greater; but as it ought not to be until the hospital is enlarged, 710 patients is made the first basis of this estimate.

The estimated cost of the board and treatment of the free or Government patients during the current year is \$4 33½ per week, which is believed to be as low a rate as the inmates of the institution can be properly taken care of, and the amount required for the support of an average of 710 patients for the year, at that rate, will be \$160,426. If the requirement of the last appropriation act, that "one-half the expense of the indigent persons who may be hereafter admitted from the District of Columbia shall be paid from the Treasury of said District," shall be continued, it is estimated that one-half of the current cost of supporting the indigent insane of the District, admitted after July 1, 1876, will, in the year 1877-78, be \$5,843, which, deducted from \$160,426, the whole estimated amount necessary to support the free patients during the next year, leaves \$154,583 to be appropriated by Congress.

## BUILDINGS AND GROUNDS.

The present building and apparatus for providing meats, bread, washing, and baking, were designed for an institution accommodating 350 patients, and the officers and employes requisite for that number, and have since been but slightly enlarged and improved, while the number of patients, officers, and employes to be provided for has more than doubled. The proposed enlargements and improvements are necessary to the convenience and efficiency of these fundamental branches of the hospital service, and it is estimated that they can be executed for the limited sum that is asked for those purposes.

It is necessary to annually expend at least the sum of this estimate in painting and general repairs on account of ordinary wear, in repairing and replacing the furniture, bedding and fittings, and conveniences of the wards and kitchens, and in providing such new agencies for the better medical and moral treatment of the patients as are approved by experience.

The Government Hospital for the Insane has proper accommodations for only 563 patients. At this time, (September 30, 1876,) there are 755 under treatment, or 192 in excess of its proper capacity, and there is a steady demand for increased accommodations. The excessive overcrowding of the institution gives rise to much preventable irritability, turbulence, and discomfort of the patients, and greatly increases the liability to outbreaks of serious violence and endemic disease. Such a brief statement of the situation of the hospital is thought to demonstrate the imperative necessity of its enlargement in some manner. The board of visitors and superintendent have given much attention to this important question, and have no hesitation in strongly recommending the plan of enlargement contemplated by this estimate.

Of the 755 patients now under treatment, 581 are men and 174 are women, and as the number of men is so large and so much in excess of the number of women, the former are disposed to monopolize the use of the entire grounds surrounding the present buildings. This situation renders it necessary to contract the exercise grounds of the women to the smallest practicable compass, and to place many irritating restrictions upon the personal liberty of both sexes which would be wholly unnecessary if each sex occupied a separate building surrounded by its own ample grounds. It is therefore proposed to place the department for women on the farm of 175 acres, lying on the east side of the public road, where there is an excellent site for the purpose, and relinquish to the exclusive use of the men the present buildings, surrounded by 185 acres of land, whose water front of 3,000 feet offers facilities for boating, fishing, and bathing. Provisions for the treatment of the insane of each sex in buildings and grounds entirely separate from those occupied by the other sex have been made in the cities of Philadelphia and New York, and in the State of Michigan, and the conductors of those institutions bear the strongest testimony to the unqualified advantages of such separation.

I am, very respectfully,

C. H. NICHOLS, *Superintendent.*

To the Honorable SECRETARY OF THE INTERIOR.

## APPENDIX D.

*Explanation of the estimates for Columbia Institution for the Deaf and Dumb. (See pages 52 and 142.)*

I have the honor to transmit herewith estimates of the appropriations required for the service of this Institution for the fiscal year ending June 30, 1878.

The estimate for current expenses is greater by three thousand dollars than the amount appropriated for the present year, this increase being intended to provide for the enlarged number of pupils we shall, humanly speaking, be certain to have when our buildings are completed, as they will probably be in October, 1877.

The second estimate provides for the completion of our buildings in accordance with plans and estimates presented to Congress ten years ago, in our ninth annual report. It will be proper to refer, in this connection, to our seventeenth annual report, pages 14 and 15, in which a statement was submitted showing what had been appropriated by Congress to carry out those plans.

The estimate now submitted, which is intended to carry the buildings to their completion, and fit up the section under process of construction for occupancy, added to all previous appropriations for buildings and grounds, will make an aggregate of six hundred and two thousand one hundred and sixty-nine dollars and ninety-five cents, less by nearly eighty thousand dollars than the amount estimated in 1866.

The third estimate is the same that was submitted to Congress last year for the same object, and which was not made. This estimate is designed to provide for several very important improvements, which will be recited in detail in our forthcoming annual report.

I have the honor to be, sir, very respectfully, your obedient servant,

E. M. GALLAUDET, *President.*

To the Honorable SECRETARY OF THE INTERIOR.

## APPENDIX I.

Explanation of estimates for Coast-Survey Service. (See pages 156 and 157.)

UNITED STATES COAST-SURVEY OFFICE,  
Washington, October 17, 1876.

SIR: I have the honor to submit herewith estimates for continuing the work of the coast survey, geodetic survey, and standard weights and measures of the United States, for the year which will end June 30, 1878.

The accompanying papers are—

1. Estimates in detail for the work of the coast survey and the geodetic survey during the next fiscal year, preceded by a brief statement of progress made in the course of the fiscal year which ended June 30, 1876.
2. Estimates for a new vessel required for the use of the coast survey, to supply the places of old vessels condemned and sold, and of which the proceeds have been covered into the Treasury.
3. Estimates for continuing the construction of standard weights and measures.
4. Estimates of deficiencies required to obtain the most economical and effective results in the coast survey during the present fiscal year.

The aggregate of estimates for the next fiscal year is nearly the same as that submitted in 1875 for the present fiscal year, but is greater than the amount appropriated. This larger sum is much needed to bring the work up to the condition it would have reached if the usual amount had been appropriated for this fiscal year.

## GENERAL STATEMENT OF PROGRESS IN THE COAST SURVEY FOR THE YEAR ENDING JUNE 30, 1876.

Field operations in the course of the fiscal year ending June 30, 1876, have included: Deep-sea soundings between the coast of Maine and George's bank; development of a rock near Jeffrey's ledge; survey of islands between Isle au Haut and Mt. Desert, and of the western shore of Blue Hill bay; soundings in Isle au Haut bay; topography of Northern bay near Castine, including the head of Bagaduce river, and of the Penobscot river above Bucksport; tidal observations at North Haven, Penobscot bay, Maine; revision of sailing directions for Coast Pilot, and views for charts between Eastport and Penobscot entrance; observations for determining the coefficient of refraction, near Camden, Maine; triangulation in New Hampshire; soundings near Fletcher's Neck, off old Orchard beach, and at Saco River entrance; tidal observations at Boston, Massachusetts; determination of positions of life-saving stations along the New England coast; soundings near Duxbury Pier light and Manomet point, Massachusetts; research relative to deposits in Plymouth harbor; hydrography of the eastern approach to Nantucket sound, and near Monomoy point, Massachusetts; also of the southern part of Handkerchief shoal, Vineyard sound, Massachusetts; topography of Taunton river, between Mt. Hope

bay and Weir village, Massachusetts; tidal observations at Providence, Rhode Island; determination of light-house positions between Hyannis and Greenport, New York; triangulation of Connecticut river up to Hartford; topography adjacent to New Haven harbor; development of Cumberland shoal, east end of Long Island, and of the passage between Gull and Plum islands; triangulation near the boundary between New York and Massachusetts; revision of sailing directions, and views of harbors and landings in Long Island sound and the Hudson river; shore-line survey of New York harbor from the Narrows to Astoria, and from Castle point to Bull's ferry; physical researches and observations; including current observations in Hudson and East rivers and New York harbor; and development of Shrewsbury rocks, coast of New Jersey; tidal observations in New York harbor; latitude and azimuth determinations at Beacon Hill, New Jersey, and connection of primary-station point with triangulation of New York harbor; hydrography of Fire Island inlet, New York; triangulation of south coast of Long Island between Babylon and Far Rockaway, and topography east and west of the former; also at the eastern end of Great South bay; tidal observations at Sandy Hook; topography of Barnegat bay and vicinity of Tom's river; reconnaissance for triangulation in northern New Jersey, and in the Lehigh valley, Pennsylvania; hydrography of the Delaware river, and development of a ledge between Marcus Hook and Chester, Pennsylvania; location of range light on the New Jersey side of same river above Liston's Tree, and topography of sites for others on the west side of the river near the last-named point; reconnaissance for triangulation in southeast part of Pennsylvania; hydrography of Norfolk harbor and adjacent waters; tidal observations at Fortress Monroe, Virginia; topography of portion of Smith's island on the boundary between Maryland and Virginia; lines of level between Washington and Annapolis; magnetic observations at Washington; triangulation of James river, Virginia, from City Point to Richmond; and in the same State, southward along the Blue Ridge, including determinations of latitude and azimuth; reconnaissance for triangulation along the Blue Ridge south and west of Lynchburg, Virginia, and in West Virginia; hydrography of Pamlico sound, North Carolina, along the western side north to Stumpy point; survey of the Alligator river from previous limits south to Blunt's canal; latitude, azimuth, and magnetic observations at Sand island in the northern part of Pamlico sound; hydrography of Core sound, North Carolina, and of Winyah bay and Georgetown bar, including the mouths of the Pedee, Waccamaw, and Sampit rivers; soundings near Edisto island and at the north end of Hunting island, South Carolina; triangulation near the boundary between South Carolina and Georgia; hydrography of Fernandina bar, Florida; reconnaissance of St. John's river, Florida, from Jacksonville to Lake Monroe, and triangulation and shore-line survey from Jacksonville to Mandarin point; survey of Indian river, Florida, southward to near Cape Cañaveral; hydrography of Key Biscayne bay, and sailing lines for channels across Florida reef; triangulation of Sarasota bay, Florida, and topography of Hillsboro' bay; hydrography of coast near Sarasota bay, and of Hillsboro' bay; detailed survey of Gulf coast of Florida from Suwanee river to Bowley's point; hydrography of Appalachee bay east and west of the approaches to St. Mark's harbor, and soundings in St. Joseph's bay; hydrography of the northern coast of the Gulf of Mexico between St. Andrew's bay and Mobile bay; triangulation near the boundary between northern Georgia and Alabama, and reconnaissance in the latter State to continue triangulation west of the Atlanta base-line; triangulation in southeastern Kentucky; deep-sea soundings in eastern part and across the Gulf of Mexico, with observations on currents, and for temperature and density; special survey of Cubitt's gap and Southwest pass, (Mississippi delta,) with current and tidal observations; triangulation and topography of same localities; reconnaissance for survey of Barataria bay, Louisiana; tidal observations at New Orleans; survey of Mississippi river from Oakland to Reserve Plantation, and special examination of Bonnet Carre crevasse; triangulation in Wisconsin between Prairie du Chien and Madison; soundings completed in Copano bay, St. Charles bay, Aransas pass, and Corpus Christi pass, Texas; reconnaissance for triangulation of Laguna Madre, Texas; tidal observations completed at St. Thomas, West India islands; reconnaissance for primary triangulation between San Diego and San Pedro, California; survey of the vicinity of Santa Monica and of the adjacent coast of California; soundings in the vicinity of Santa Rosa and San Miguel islands; inshore hydrography near Point Dume, and survey of Santa Monica bay; triangulation of the western part of Catalina island; latitude and azimuth determined near Point Conception, California; triangulation across the Santa Barbara channel to Santa Cruz island; triangulation and topography of coast between Point Sur and Monterey bay; tidal observations at Fort point, California; current observations in San Francisco bay; hydrography of Mare Island strait and Karquines strait, California; reconnaissance and main triangulation across the Sacramento valley, including the selection of the Yole base-line; triangulation and topography of coast between Bodega Head and Fort Ross, California; erection of a permanent signal on Mt. Shasta, California; topography and triangulation of the coast of Oregon above and below the Nehalem river, and continuation of hydrography of the Columbia river; tidal observations at Astoria, Oregon; hydrography of Admiralty inlet, Washington Territory, from Duwamish bay to Port Madison; tidal observations at Port Townshend, Washington Territory, and at Honolulu, Sandwich islands.

In the office the work has been kept up to the field-work of the preceding season; the computations of the current, geodetic, trigonometrical, and tidal observations having been duly made, including the preparation of records and results for publication; tide-tables for the principal seaports of the United States for the year 1877 have been published; the drawing of seventy-seven charts has been in progress, and of this number twenty-nine have been completed. Twelve new copper-plate charts have been begun; one hundred and two have received additions by engraving, and twenty-three have been finished; an aggregate of twelve thousand copies of charts has been issued in the course of the year, and a distribution made of upwards of one thousand copies of the annual reports for previous years.

The preparation for publication of the second volume of the Atlantic Coast Pilot (extending from Boston harbor to New York entrance, and including the Hudson river) has been continued, and will soon be completed.

The estimates for continuing the survey of the Atlantic and Gulf Coasts of the United States are intended to provide for the following progress:

*Field Work.*—To continue the topography of the western shore and islands of Passamaquoddy bay and its estuaries; of the coast eastward of Penobscot bay towards Narraguagus bay, and of the shores of the Penobscot near Bangor; for the determination of heights at some of the principal trigonometrical points between Boston and the St. Croix, and of coefficients of refraction; to complete the hydrography of Penobscot bay and river, and continue soundings in the coast approaches eastward of Penobscot bay; to continue a topographical and hydrographic survey of Portsmouth harbor; to make such additional triangulation as may be requisite for that and other surveys on the eastern coast, and determine the position of new light-houses between Eastport, Me., and New York; to continue soundings along the coast of Maine, and other off-shore hydrography between Cape Cod and Manan, and make special examination for the sailing-lines for charts; to

continue the observations of sea and tidal currents in the Gulf of Maine; to continue tidal observations, and to make such astronomical and magnetic observations as may be required; to continue such topographical and hydrographic resurveys of the coast between Cape Cod and New York as may be found necessary; to continue the survey of the Connecticut river from its mouth to Hartford; to make such examination as may be required in New York harbor, and such surveys in its vicinity as may be found necessary, including a topographical and hydrographic survey of the south coast of Long Island; to make at this port observations on tides and currents; to extend the plane-table survey of the Hudson river above Haverstraw; to continue the triangulation between the Hudson river and Lake Champlain; to make the requisite astronomical observations; to continue the topographical and hydrographic surveys of the coast of New Jersey, and of Delaware bay and river; to connect the Atlantic triangulation with that of Chesapeake bay near the boundary line between Maryland and Virginia; to complete the detailed survey of James river, Virginia, including the hydrography, and continue the plane-table survey of the Potomac river; to continue southward the main triangulation along the Blue Ridge parallel with the coast, including astronomical and magnetic observations; to continue the supplementary hydrography between Cape Henlopen, Delaware, and Cape Henry, Virginia, and in Chesapeake bay, and also the tidal observations; to measure a base-line of verification, and to determine azimuth for the coast triangulation south of Cape Lookout; to make the astronomical and magnetic observations requisite; to continue the off-shore hydrography between Cape Henry and Cape Fear; to continue the hydrography of Pamlico sound and its rivers, and that of Bogue sound, and sound the entrance to Cape Fear river; to extend northward the primary triangulation along the eastern and southern slopes of the Alleghanies in North Carolina and Alabama; to continue the topographical and hydrographic survey of rivers near the coast of South Carolina and Georgia; to determine azimuth for the triangulations of the coast of South Carolina and Georgia; to continue the detailed survey of the sea-islands and water passages between Charleston and Savannah, and to make tidal observations; to continue the off-shore hydrography between Cape Fear, North Carolina, and the St. John's river, Florida; to continue southward from Cape Cañaveral the triangulation, topography, and hydrography of the eastern coast of Florida, including Indian river; to continue the triangulation, topography, and hydrography of the St. John's river; to make the requisite astronomical observations; to continue hydrography off the eastern coast of Florida, from Mosquito inlet to the southward; to continue soundings and observations for sea temperatures in such parts of the gulf stream as may be deemed advisable, between the west end of Cuba and Nova Scotia, and dredging along the coast, within the same limits, in conjunction with the United States commission on fish and fisheries; to continue the astronomical and magnetic observations requisite between Cape Florida and Pensacola; to complete the triangulation, topography, and hydrography of the western coast of Florida between Cedar Keys and Tampa bay; to continue the same classes of work to the southward of Charlotte harbor, and to complete the coast between Appalachee bay and Pensacola; to run lines of soundings and make observations of sea temperatures in the Gulf of Mexico, and develop the hydrography of the gulf coast included in field operations; to connect the trigonometrical survey of the Mississippi river near New Orleans with that of Lake Borgne and Lake Pontchartrain, and continue the trigonometrical, topographical, and hydrographic survey of Lakes Pontchartrain and Maurepas, and of the Mississippi river above New Orleans to the head of ship navigation; to determine geographical positions, and make the astronomical and magnetic observations requisite; to extend the triangulation, topography, and hydrography of Louisiana westward of the Mississippi delta, and continue the hydrography of the Gulf of Mexico between the mouth of the Mississippi and Galveston, Texas; to continue the triangulation, topography, and hydrography of the coast of Texas westward between Sabine Pass and Galveston, and southward between Corpus Christi and the Rio Grande; to measure a base-line of verification, and make the astronomical and magnetic observations requisite between Sabine Pass and the Rio Grande; to continue the hydrography of the approaches to the coast of Texas; to continue the determination of the positions of new light-houses and life-saving stations along the coast between New York and the Rio Grande; to continue the field-work for the description and verification of the work for the Coast Pilot; to continue the organized system of magnetic observations required for a complete magnetic survey, and to run lines of levels connecting points in the main and geodetic triangulations with the sea-level.

*Office-Work.*—To compute results from field operations made along the Atlantic and Gulf coasts, including astronomical, geodetic, geographical, magnetic, and tidal work; to continue the reproduction of the original topographical maps, and to plot the hydrographic charts; to continue the drawing of the general chart of the coast from Quoddy Head to Cape Cod, and of charts Nos. 1 and 2, showing the coast of Maine, between St. Croix river and Petit Manan light-house; to continue drawing and engraving of chart No. 3, which includes Frenchman's bay, Mt. Desert island, Blue Hill bay, Isle au Haut bay, and their approaches; also local charts of Mt. Desert island, Union river, Eggemoggin Reach, Deer Isle, Head harbor on Isle au Haut, and Penobscot river, from Castine to Bangor; to complete the engraving of the chart of Lake Champlain; to continue the drawing and engraving of charts of Thames river, and of Connecticut river, to the head of navigation; to continue a new chart of Long Island sound; to continue the drawing and engraving of charts No. 22 and No. 23, between Barnegat and Cape May; to make additions to the charts and sketches between New York and Cape Henry; to continue the drawing and engraving of a new chart of Delaware bay and river, and to complete that of James river; to complete the engraving of charts No. 42, No. 43, No. 44, including Pamlico sound, and continue that of No. 45, No. 46, and No. 47, showing parts of the Atlantic coast between Cape Hatteras and Cape Lookout, and to continue the drawing and engraving of charts No. 51 and No. 52, between Cape Fear and Winyah bay; to continue the drawing and engraving of a new chart of Georgetown harbor, South Carolina, and to make additions to the charts between Cape Henry and the St. Mary's river; to continue the drawing and engraving of the general chart of the coast from St. Mary's river to Cape Cañaveral, and of charts No. 59, No. 60, and No. 61, from St. Augustine to Cape Cañaveral, and to make additions to the charts of the coast between St. Mary's river and Cape Florida; to continue the drawing and engraving of chart No. 77, Tampa bay, and of No. 84, No. 85, No. 86, and No. 87, showing the Gulf coast between Cape St. Blas and Mobile entrance; to complete the drawing and engraving of charts No. 92 and No. 93, showing Isle au Breton sound and the passes of the Mississippi, and the general charts showing the sea approaches to the Mississippi river; to continue the drawing and engraving of the general chart of the coast of Louisiana and Texas, from Atchafalaya bay to Galveston; to continue the drawing and engraving of that between Galveston and the Rio Grande, and of chart No. 110, showing Corpus Christi bay; for material for drawing, engraving, map printing, for electrotyping, photographing, for instruments and apparatus. Total for the Atlantic and Gulf coasts, involving work on the coasts of the following States, viz., Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Louisiana, and Texas, will require \$380,000.

The estimates for continuing the survey of the Pacific coast of the United States are intended to provide for the following progress:

*Field-Work*—To make the requisite observations for latitude, longitude, azimuth, and the magnetic elements, at stations along the Pacific coast of the United States; to continue off-shore soundings along the coast of California, Oregon, and Washington Territory, and tidal observations at San Francisco, Port Townshend, and such other localities as may be necessary; to continue the main coast triangulation from Monterey bay to the southward, or from Point Conception to the northward, and from San Pedro towards San Diego, including the islands off that part of the coast; to continue reconnaissance for the main triangulation of the coast from San Pedro to Point Conception, from Russian river to the northward, from Columbia river north to Puget sound, or south up the Willamette valley; to complete the reconnaissance and continue the primary triangulation through the Sacramento and San Joaquin valleys, and measure a base line; to continue the coast triangulation and topography from Newport, Los Angeles county, towards San Diego, and that of the islands off that coast; to continue the tertiary triangulation and topography of the coast north of Point Conception toward Point Sal, or the tertiary triangulation and topography from Point Buchon towards San Simeon; to continue the hydrography between San Diego and Monterey bay; to develop the hydrographic changes in San Francisco bay and its approaches; continue the triangulation and topography of the coast between Bodega bay and Point Arena; complete hydrography between Cape Mendocino and the Klamath river, and continue that between Cape Sebastian and Port Orford, with that north and south of, and in the approaches to the Columbia river; to observe currents along the coast, and take soundings and temperature observations in the California branch of the Kuro Siero current, and execute such other hydrographic work as local demands may require; to continue tidal and current observations at the Golden Gate, and observations on the ocean currents along the coast of California; to continue the triangulation, topography, and hydrography of the Columbia river; to complete the detailed survey between Cape Sebastian and Crescent City, and off-shore hydrography at Crescent City reef; to measure a base-line and continue the triangulation of the Strait of Fuca, and the topography and hydrography of Puget sound and adjacent waters; to continue the reconnaissance of the coasts and islands of Alaska, with observations for tides and currents, and to make the requisite astronomical and magnetic observations; to continue the field-work for the description of the coast and verification of the Coast Pilot of the coasts of California, Oregon, and Washington Territory; to continue the organized system of magnetic observations required for a complete magnetic survey, and to run lines of levels connecting points in the main and geodetic triangulations with the sea-level.

*Office-Work*.—To make the computation from the observations made in the field, including astronomical, geodetic, geographical, magnetic, and tidal observations; to continue the reproduction of the original topographical maps, and to plot the hydrographic charts; to draw and engrave the additions on the general chart of the Pacific coast of the United States; to continue the drawing and engraving of the charts of the coast from San Diego to Point Conception, No. 1 and No. 2; to continue the engraving of a new chart of San Francisco bay and harbor, in three sheets, from resurveys; to continue the drawing and engraving of charts of the coast No. 6 and No. 7, from the Farallones to Cape Mendocino; of No. 8, from Cape Mendocino to St. George's reef; of No. 9, from St. George's reef to Koos bay, and of No. 11, from Cascade Head to Shoalwater bay; to continue the drawing and engraving of the chart of Columbia river and of the local-harbor charts of the coast, with those of Puget and Washington sounds; for material for drawing, engraving, map printing, for electrotyping, photographing, for instruments and apparatus. Total for the Pacific coast, involving work on the coasts of the States of California and Oregon, and those of Washington Territory and Alaska, will require \$230,000.

For extending the triangulation of the coast survey to form a geodetic connection between the system of triangulation along the Atlantic, and Gulf, and Pacific coasts of the United States, and assisting in the State surveys, involving work in New Hampshire, Vermont, Connecticut, New York, Pennsylvania, New Jersey, Virginia, West Virginia, North Carolina, Tennessee, Alabama, Missouri, Illinois, Wisconsin, Kentucky, Kansas, California, Nevada, and Utah Territory, will require \$90,000.

For repairs and maintenance of the complement of vessels used in the coast survey will require \$50,000.

For continuing the publication of the observations made in the progress of the coast survey will require \$10,000.

For general expenses of all the work, rent, fuel, for transportation of instruments, maps, and charts, miscellaneous office expenses, and for the purchase of new instruments, books, maps, and charts, will require \$40,000.

Respectfully submitted,

C. P. PATTERSON,  
*Superintendent United States Coast Survey.*

To the Honorable SECRETARY OF THE TREASURY.

#### APPENDIX J.

*Explanation of the estimate for refunding to States expenses incurred in raising Volunteers. (See page 159)*

TREASURY DEPARTMENT,  
*Third Auditor's Office, Washington, D. C., October 13, 1876.*

SIR: I have the honor to acknowledge receipt of your letter of the 12th instant, asking what amount will probably be required to meet claims settled in this office during the fiscal year ending June 30, 1878, payable from the appropriation "*Refunding to States expenses incurred in raising Volunteers,*" and, in reply, I have to state that the probable amount will be three hundred and fifty thousand dollars, (\$350,000.)

Very respectfully,

A. M. GANGEWER,  
*Acting Auditor.*

Hon. J. D. CAMERON, *Secretary of War.*

## APPENDIX K.

*Explanation of the estimate for Geological Survey of the Territories. (See page 164.)*

CHEYENNE, W. T., August 14, 1876.

SIR: I have the honor to forward the estimates for the continuation of the United States geological and geographical survey of the Territories for the fiscal year ending June 30, 1878.

It is the purpose of the survey to extend its field of labor, the coming year, into the country north of the Union Pacific railroad, embracing such portions of Wyoming and Montana as are not infested by hostile Indians, and are destined soon to become of great practical interest to the country on account of the agricultural and mineral resources. This area, being remote from the base of supplies, will involve a large amount of transportation, and its exploration will be attended with considerable expense. The season will be a long one, and as the expenses in the field far exceed those in the office, the estimates herewith transmitted, which are the same as those of the past five years, will be required to do the work economically and effectively.

As no portion of the appropriation for the present fiscal year was allowed for engraving, the enclosed estimate will not be more than adequate to complete the work in hand.

I trust, therefore, that the Hon. Secretary of the Interior will approve the estimates as given.

Very respectfully, your obedient servant,

F. V. HAYDEN,  
United States Geologist.

Hon. Z. CHANDLER, *Secretary of the Interior.*

## STATEMENT OF THE PROCEEDS OF GOVERNMENT PROPERTY, PUBLISHED IN CONFORMITY TO THE FOLLOWING PROVISIONS OF LAW:

All proceeds of sales of old material, condemned stores, supplies, or other public property of any kind, except the proceeds of the sale or leasing of marine hospitals, or of the sales of revenue-cutters, or of the sales of commissary stores to the officers and enlisted men of the Army, or of the sale of condemned navy clothing, or of the sales of materials, stores, or supplies to any exploring or surveying expedition authorized by law, shall be deposited and covered into the Treasury as miscellaneous receipts on account of "proceeds of Government property," and shall not be withdrawn or applied, except in consequence of a subsequent appropriation made by law. A detailed statement of the proceeds of all sales of old material, condemned stores, supplies, or other public property of any kind, shall be included in the Appendix to the Book of Estimates.—(R. S., pages 718, 727, sections 3618, 3672.)
