Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats. at Large, or to Revised Statutes.			Estimated am't required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.
		Vol. or R. S.	Page.	Sec.			
<i>Salaries, Civil Service Commission—Continued.</i>							
One chief examiner.....	Jan. 16, 1883 Mar. 3, 1891	R. S. 22 26	27 403, '4 915	167 1-3 1	\$3,000 00		
One secretary.....	Same acts.....				2,000 00		
Two clerks of class four.....	do.....				3,600 00		
Two clerks of class three.....	do.....				3,200 00		
Three clerks of class two.....	do.....				4,200 00		
Three clerks of class one.....	do.....				3,600 00		
Three clerks, at \$1,000 each.....	do.....				3,000 00		
Two clerks, at \$900 each.....	do.....				1,800 00		
One messenger.....	do.....				840 00		
One laborer.....	do.....				660 00		
						\$36,400 00	\$36,400 00
NOTE.—The Civil Service Commission submits increases as follows, with the following explanations:							
Additional to the three commissioners, \$1,500 each....					\$4,500		
Additional to chief examiner.....					500		
Additional to secretary.....					500		
One clerk of class four.....					1,800		
One clerk of class three.....					1,600		
One assistant messenger.....					720		
					9,620		
To enable the commission to pay to secretaries of postal and custom boards of examiners, and to examiners not employed in the offices for which they act.....							
Traveling expenses of the Commission.....					6,000		
					1,250		
Total increase.....					16,870		
The last increase (five clerks) in the clerical force of the Commission was provided for in the act making appropriation for the fiscal year ending June 30, 1890. Since that time the classified service has been extended to embrace five additional post-offices and the Indian Service, and the rules now provide for competitive examinations for promotion. These additions have very largely increased the work of the Commission and will render the present clerical force inadequate for its proper performance.							
<i>Traveling Expenses, Civil Service Commission—</i>							
Necessary traveling expenses, including those of examiners acting under the direction of the Commission, and for expenses of examinations and investigations held elsewhere than at Washington.....	March 3, 1891	26	915	1		5,250 00	5,250 00
NOTE.—An increase of \$1,250 is asked for in this appropriation to meet the increased expenses of examinations elsewhere than at Washington, arising from the recent extension of the classified service to embrace the Indian Service, the necessity of renting rooms and furniture and paying for janitor service at points where the public buildings are not adequate to accommodate the increased number of applicants, and on account of the additional travel required by the growth and extension of the service and the proper supervision of the work of the local boards at classified custom-houses and post-offices.							
Total Executive Proper.....						143,850 00	143,850 00
DEPARTMENT OF STATE.

NOTE.—Referring to the salary of "one superintendent," the act of July 11, 1890, fixed the salary for the fiscal year ended June 30, 1891, at \$2,200 per annum, and it was intended by the Committee on Appropriations of the last Congress that the salary in the act of March 3, 1891, for the fiscal year to terminate June 30, 1892, should remain the same; but through a clerical error it was fixed at \$2,000 per annum.

						16,660 00	14,860 00
<p>NOTE.—The increase in the clerical force of the office by the addition of one clerk is necessary in order to enable the office to keep up with the work required of it. With the present force some of this work is unavoidably neglected. It is, moreover, especially desirable that a fourth-class clerkship be authorized, there being none of this grade in the Judge-Advocate-General's office, and the duties of some of the clerks in this office requiring a knowledge of law and a degree of proficiency which should at least place them on the same footing with the clerks of other offices in which fourth-class clerkships exist.—G. Norman Lieber, Acting Judge-Advocate-General.</p>

One laborer.....	do.....				660 00		
						44,860 00	44,860 00
<p>NOTE.—This office has had four clerks which were transferred from the Surgeon-General's Office by the Secretary of War, in 1886. On August 20, 1889, the Secretary of War directed the return of these clerks to the Surgeon-General's Office, in order to expedite the settlement of pension applications, and authorized an estimate to be made for a sufficient clerical force to supply the needs of the Ordnance Office to meet the largely increased work of the office due to the large appropriations for gun construction, and the labor required under the act of February 12, 1887, for arming and equipping the militia; and five of the grade of class two are desired to permit the promotion of clerks of class one who have been many years in the service, and are capable, efficient, and valuable clerks.—D. W. Flagler, Brigadier-General, Chief of Ordnance.</p>							
OFFICE OF CHIEF OF ENGINEERS.

OFFICE OF PUBLICATION OF RECORDS OF THE REBELLION.							
<i>Salaries, Office of Publication of Records of the Rebellion—</i>		R. S.	27	167-9			
One collector of Confederate records.....	Aug. 5, 1882	22	240	1	\$2,000 00		
	Mar. 3, 1891	26	932	1			
Four clerks of class four.....	Same acts.....				7,200 00		
Three clerks of class three.....	do.....				4,800 00		
Four clerks of class two (two submitted).....	do.....				5,600 00		
Three clerks of class one.....	do.....				3,600 00		
Three copyists, at \$900 each.....	do.....				2,700 00		
Two pressmen and compositors, at \$1,200 each.....	do.....				2,400 00		
One compositor.....	do.....				1,000 00		
Two copyholders, at \$900 each.....	do.....				1,800 00		
Four assistant messengers, at \$720 each (two submitted).....	do.....				2,880 00		
Two watchmen, at \$720 each.....	do.....				1,440 00		
Three laborers, at \$600 each (two submitted).....	do.....				1,800 00		
						\$37,220 00	\$31,780 00
<p>NOTE.—In order to carry on the publication at the rate prescribed in the acts of March 2, 1889, and August 30, 1890, the services of two additional clerks of class two will be necessary. Two assistant messengers and two laborers are also needed to assist in addressing and mailing the volumes of the publication to beneficiaries.—Geo. B. Davis, Major and Judge-Advocate, U. S. Army.</p>							
MISCELLANEOUS.							
<i>Stationery, War Department—</i>							
Stationery for the War Department and its bureaus.....	Mar. 3, 1891	26	933	1	64,000 00		35,000 00
<p>NOTE.—The estimates for the Secretary's Office (including the Record and Pension Division) and of the chiefs of bureaus are as follows:</p>							
Secretary of War.....					\$45,000		
Adjutant-General.....					3,000		
Inspector-General.....					1,000		
Acting Judge-Advocate-General.....					400		
Quartermaster-General.....					4,000		
Commissary-General.....					700		
Surgeon-General.....					3,000		
Chief of Ordnance.....					2,500		
Paymaster-General.....					800		
Chief of Engineers.....					1,500		
Officer in charge of Rebellion Records.....					1,500		
Chief Signal Officer.....					600		
Total.....					64,000		
<p>The increased amount required for the use of the office of the Secretary of War over the amount (\$27,000) estimated for the fiscal year 1892 is necessary in order that there may be no interruption in the Record and Pension Division, in the work of reproducing and preserving the records of the volunteer armies by the index record card system, by means of which the record of every soldier is made readily accessible, while the rapidly-decaying original records are preserved from further mutilation. There are now employed upon this work over 500 clerks, who are rapidly pushing the work to completion. With a less sum than that asked for it will be impossible to keep this large force constantly employed, and the completion of the work will be correspondingly delayed.</p>							
<i>Contingent Expenses, War Department—</i>							
Contingent expenses of the War Department and its bureaus; purchase of professional and scientific books, blank-books, pamphlets, newspapers, maps, furniture, and repairs to same, carpets, matting, oil-cloth, file-cases, towels, ice, brooms, soap, sponges, fuel, gas and heating apparatus for and repairs to the buildings (outside of the State, War, and Navy Department building) occupied by the Adjutant-General's Office, the Surgeon-General's Office, and the Record and Pension Division of the War Department, freight and express charges, and other absolutely necessary expenses.....	Mar. 3, 1891	26	932	1	65,000 00		55,000 00
<p>NOTE.—The estimates for the Secretary's Office (including the Record and Pension Division) and of the chiefs of bureaus are as follows:</p>							
Secretary of War.....					\$29,000		
Adjutant-General.....					6,000		
Inspector-General.....					1,000		
Acting Judge-Advocate-General.....					1,500		
Quartermaster-General.....					8,500		
Commissary-General.....					3,000		
Surgeon-General.....					5,500		
Chief of Ordnance.....					2,500		
Paymaster-General.....					1,500		
Chief of Engineers.....					3,500		
Officer in charge of Rebellion Records.....					2,500		
Chief Signal Officer.....					500		
Total.....					65,000		

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats. at Large, or to Revised Statutes.			Estimated am't required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats. at Large, or to Revised Statutes.			Estimated amt required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.
		Vol. or R. S.	Page.	Sec.			
<i>Salaries, Office of Superintendent of State, War, and Navy Department Building—Continued.</i>							
One chief engineer	Mar. 3, 1883	R. S.	27	167-9	\$1,200 00		
	Mar. 3, 1891	22	553	1			
		26	933	1			
Eight assistant engineers, at \$1,000 each.....	Same acts.....				8,000 00		
One captain of watch.....	do.....				1,200 00		
Two lieutenants of watch, at \$840 each.....	do.....				1,680 00		
Fifty-eight watchmen, at \$720 each.....	do.....				41,760 00		
One carpenter.....	do.....				1,000 00		
One plumber.....	do.....				900 00		
One machinist.....	do.....				900 00		
One painter.....	do.....				900 00		
Four skilled laborers, at \$720 each.....	do.....				2,880 00		
Twenty-eight firemen, at \$720 each (an increase of four submitted, to run dynamos on electric lights).....	do.....				20,160 00		
Ten elevator conductors, at \$720 each.....	do.....				7,200 00		
Twenty laborers, at \$660 each.....	do.....				13,200 00		
Eighty char-women, at \$240 each.....	do.....				19,200 00		
						\$121,380 00	\$118,560 00
<i>Fuel, Lights, etc., State, War, and Navy Department Building—</i>							
Fuel, lights, repairs, and miscellaneous items.....	Appropriated..	26	934	1		39,620 00	42,500 00
<p>NOTE.—An electric-light plant has been placed in the building, and the four firemen necessary to operate it have been paid from appropriation for lights. The increase of four firemen submitted is to cover these men, and pay them out of the appropriation for salaries, the estimate for fuel, lights, etc., being decreased by that amount, making the total appropriation the same as last year.—(Thom. Williamson, Superintendent of State, War, and Navy Department Building.)</p> <p>NOTE.—The estimate of the Secretary of War for "Printing and Binding," under section 3661, p. 720, of the Revised Statutes, will be found under the head of "Miscellaneous," post.</p>							
Total War Department.....						2,247,178 00	2,183,830 00
NAVY DEPARTMENT.							
OFFICE OF THE SECRETARY.							
<i>Salaries, Office of Secretary of the Navy—</i>							
Secretary.....	Mar. 3, 1891	R. S.	70	415	\$8,000 00		
	July 11, 1890	26	934	1			
	Mar. 3, 1891	26	254	1			
Assistant Secretary.....	Mar. 3, 1891	26	934	1	4,500 00		
Chief clerk.....	Mar. 3, 1891	R. S.	70	416	2,500 00		
	July 11, 1890	26	934	1			
	Mar. 3, 1891	26	254	1			
Clerk to the Secretary.....	Mar. 3, 1891	26	934	1	2,250 00		
Disbursing clerk.....	Mar. 3, 1891	R. S.	70	416	2,250 00		
	Mar. 3, 1891	26	934	1			
	Mar. 3, 1891	26	934	1			
Two clerks of class four.....	Aug. 5, 1882	R. S.	27	167-9	3,600 00		
	Mar. 3, 1891	22	243-5	1			
	Mar. 3, 1891	26	934	1			
One clerk of class four, in charge of files and records.....	Same acts.....				1,800 00		
Two clerks of class three.....	do.....				3,200 00		
One stenographer.....	do.....				1,600 00		
One stenographer.....	do.....				1,400 00		
One clerk of class two.....	do.....				1,400 00		
Four clerks of class one.....	do.....				4,800 00		
One clerk.....	do.....				1,000 00		
One telegraph operator.....	do.....				1,000 00		
One carpenter.....	do.....				900 00		
Two messengers, at \$840 each.....	do.....				1,680 00		
Three assistant messengers, at \$720 each.....	do.....				2,160 00		
Two messenger boys, at \$420 each.....	do.....				840 00		
One messenger boy.....	do.....				360 00		
One laborer.....	do.....				660 00		
One clerk of class two for inspection board.....	do.....				1,400 00		
One laborer for inspection board.....	do.....				660 00		
One clerk of class one for examining and retiring board.....	do.....				1,200 00		
						\$49,160 00	\$49,160 00
BUREAU OF NAVIGATION.							
<i>Salaries, Bureau of Navigation—</i>							
One chief clerk.....	Mar. 3, 1891	R. S.	70	416	1,800 00		
	Mar. 3, 1891	26	934	1			
	Mar. 3, 1891	26	934	1			
Four clerks of class four.....	Mar. 3, 1891	R. S.	27	167	7,200 00		
	Mar. 3, 1891	26	934	1			
	Mar. 3, 1891	26	934	1			
Three clerks of class three.....	Same acts.....				4,800 00		

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats. at Large, or to Revised Statutes.			Estimated amt required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.
		Vol. or R. S.	Page.	Sec.			
<i>Salaries, Bureau of Navigation—Continued.</i>							
Three clerks of class two.....	Mar. 3, 1891	R. S. 26	27 934	167 1	\$4,200 00		
Four clerks of class one.....	Same acts.....				4,800 00		
One clerk.....	do.....				1,000 00		
One copyist (see note).....	do.....				900 00		
One copyist.....	do.....				720 00		
One assistant messenger.....	do.....				720 00		
Three laborers, at \$660 each.....	do.....				1,980 00		
						\$28,120 00	\$27,220 00
NOTE.—This copyist was allowed to the bureau by the appropriation act, approved July 11, 1890, for the fiscal year ending June 30, 1891, and was also authorized by both Houses of Congress at the last session, but the words "one copyist" were accidentally omitted when the bill was engrossed. It will be seen that the total amount allowed by the appropriation act for the year ending June 30, 1892, includes the \$900 for this copyist (see 26 Stats., p. 934).							
<i>Salaries, Office of Naval Intelligence—</i>							
One clerk of class two.....	Submitted.....					1,400 00	
<i>Salaries, Office of Naval Records of the Rebellion—</i>							
Two clerks of class four.....	July 7, 1884	R. S. 23	27 185	167-9 1	3,600 00		
	Mar. 3, 1891	26	934	1			
One clerk of class three.....	Same acts.....				1,600 00		
Two clerks of class two.....	do.....				2,800 00		
Two clerks of class one.....	do.....				2,400 00		
One clerk.....	do.....				1,000 00		
Two copyists, at \$900 each.....	do.....				1,800 00		
Four copyists, at \$720 each.....	do.....				2,880 00		
Necessary traveling expenses for collection of records.....	do.....				600 00		
						16,680 00	16,680 00
Additional estimate:							
For beginning the publication of the official records of the War of the Rebellion, both of the Union and of the Confederate Navies.....	Submitted.....					1,500 00	
<i>Salaries, Library of the Navy Department—</i>							
One clerk.....	Mar. 3, 1891	R. S. 26	27 934	167 1	1,000 00		
One assistant messenger.....	Same acts.....				720 00		
One laborer.....	do.....				660 00		
						2,380 00	2,380 00
<i>Library, Navy Department—</i>							
For professional books and periodicals for the Library.....	Appropriated..	26	936	1		1,000 00	1,000 00
BUREAU OF EQUIPMENT.							
<i>Salaries, Bureau of Equipment—</i>							
One chief clerk.....	Mar. 3, 1891	R. S. 26	27 935	167 1	1,800 00		
One clerk of class two.....	Same acts.....				1,400 00		
One clerk of class one.....	do.....				1,200 00		
Two copyists, at \$900 each.....	do.....				1,800 00		
One assistant messenger.....	do.....				720 00		
One laborer.....	do.....				660 00		
						7,580 00	7,580 00
OFFICE OF JUDGE-ADVOCATE-GENERAL.							
<i>Salaries, Office of Judge-Advocate-General—</i>							
Chief clerk (in lieu of one clerk of class four).....	June 8, 1881	R. S. 21	27 164	167 1	1,800 00		
	Mar. 3, 1891	26	934	1			
One clerk of class four.....	Same acts.....				1,800 00		
One clerk of class three.....	do.....				1,600 00		
One clerk of class three.....	Submitted.....				1,600 00

Estimated am't required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.
		Vol. or R. S.	Page.	Sec.			
<i>Salaries, Hydrographic Office—Continued.</i>							
Draughtsmen, engravers, assistants, nautical experts, computers, custodian of archives, copyists, copper-plate printers, apprentices, laborers and helpers in the Hydrographic Office.....	{ Aug. 5, 1882 Mar. 3, 1891	R. S. 22 26	27 245 934	167 1 1	} \$40,000 00		
						\$45,440 00	\$45,440 00
<i>Contingent and Miscellaneous Expenses, Hydrographic Office—</i>							
Purchase of copper plates, steel plates, chart paper; electrotyping copper plates, cleaning copper plates; tools, instruments, and materials for drawing, engraving, and printing; materials for and mounting charts; data for charts and sailing directions; reduction of charts by photography; photo-lithographing charts for immediate use; transfer of photo-lithographic and other charts to copper; care and repairs to printing presses, furniture, instruments, and tools; extra drawing and engraving; translating from foreign languages; expert marine, meteorological, and other work in the preparation of the pilot chart and supplements, and the printing and mailing of the same; and purchase of, compiling, and arranging data for charts and sailing directions, and other nautical publications; works and periodicals relating to hydrography, marine meteorology, navigation, and surveying.....	{ Aug. 5, 1882 Mar. 3, 1891	22 26	245 934, 5	1 1	}	31,000 00	30,000 00
Rent of building for printing presses, draughtsmen, and engravers, storage of copper plates and materials used in the construction and printing of charts; repairs and heating of the same; and for gas, water, and telephone rates.....	Same acts.....					1,500 00	1,500 00
Contingent expenses of branch offices at Boston, New York, Philadelphia, Baltimore, Norfolk, Savannah, New Orleans, San Francisco, Portland, Oreg., Portland, Me., Chicago, Ill., and Port Townsend, Wash., including furniture, fuel, lights, rent and care of offices, car-fare and ferriage in visiting merchant vessels, freight, express, telegrams, and other necessary expenses incurred in collecting the latest information for the pilot chart, and for other purposes for which the offices were established.....	do.....					17,800 00	12,000 00
Rent for the New York office.....	do.....					1,000 00	1,000 00
NAUTICAL ALMANAC OFFICE.							
<i>Salaries, Nautical Almanac Office—</i>							
Salaries of assistants in preparing for publication the American Ephemeris and Nautical Almanac, viz:							
Three assistants, at \$1,600 each.....	{ Aug. 5, 1882 Mar. 3, 1891	22 26	245 935	1 1	} 4,800 00		
Two assistants, at \$1,400 each.....	Same acts.....				2,800 00		
Three assistants, at \$1,200 each.....	do.....				3,600 00		
One copyist and typewriter.....	do.....				900 00		
One assistant messenger.....	do.....				720 00		
One laborer.....	do.....				660 00		
Pay of computers on piece-work in preparing for publication the American Ephemeris and Nautical Almanac, and in improving the tables of the planets.....	do.....				9,900 00		
						25,380 00	25,380 00
<i>Miscellaneous Expenses, Hydrographic Office—</i>							
Rent and fuel for Nautical Almanac Office.....	Appropriated..	26	935	1		1,000 00	1,000 00
NAVAL OBSERVATORY.							
<i>Salaries, Naval Observatory—</i>							
One assistant astronomer.....	{ Aug. 5, 1882 Mar. 3, 1891	R. S. 22 26	27 245 935	167 1 1	} 2,000 00		
Two assistant astronomers, at \$1,800 each.....	Same acts.....				3,600 00		
One clerk of class four.....	do.....				1,800 00		
One photographer (increase of \$600 submitted).....	do.....				1,800 00		
NOTE.—The increase of \$600 is submitted to enable the Observatory to obtain the services of a person not only skilled in the chemistry of photography, but having some knowledge of its modern application to astronomy. The recent civil service examination to fill the position at a salary of \$1,200 failed to attract any person thus qualified.							
One electrician.....	do.....					1,500 00	
One instrument-maker.....	do.....					1,500 00	

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.			References to Stats. at Large, or to Revised Statutes.			Estimated amt required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.
	Vol. or R. S.	Page.	Sec.	Vol. or R. S.	Page.	Sec.			
<i>Salaries, Naval Observatory—Continued.</i>									
Five computers, at \$1,200 each.....	Aug. 5, 1882	22	245	R. S.	27	167	\$6,000 00		
	Mar. 3, 1891	26	935		1	1			
One assistant librarian.....	Same acts.....						1,200 00		
One copyist.....	do.....						900 00		
One carpenter.....	do.....						1,000 00		
One engineer.....	do.....						1,000 00		
Two firemen, at \$720 each.....	do.....						1,440 00		
Six watchmen, at \$720 each.....	do.....						4,320 00		
One skilled laborer.....	do.....						720 00		
One skilled laborer (foreman and captain of the watch, increase of \$200 submitted).....	do.....						1,200 00		
Eleven laborers, at \$660 each.....	do.....						7,260 00		
The following additional estimates are submitted:									
One elevator conductor.....	Submitted.....						720 00		
Two char-women, at \$240 each.....	do.....						480 00		
							\$38,440 00	\$36,440 00	
<p>NOTE.—<i>Skilled laborer (foreman and captain of the watch).</i>—The extensive and unimproved grounds of the New Naval Observatory, the care of stores, supervision of laborers and watchmen, the making of reports, calculations, and estimates, require that a person of marked ability should discharge these duties with commensurate pay.</p> <p><i>One elevator conductor.</i>—To run the elevator in the New Naval Observatory.</p> <p><i>Two char-women.</i>—The buildings, New Naval Observatory, require the services of two char-women to keep them clean and in order.</p>									
<i>Contingent and Miscellaneous Expenses, Naval Observatory—</i>									
Miscellaneous computations.....	Aug. 5, 1882	22	245	R. S.	27	167	1,200 00		
	Mar. 3, 1891	26	935		1	1			
Books, periodicals, engravings, photographs, fixtures, and supplies for the library, and binding for the same (increase of \$1,000 submitted).....	Same acts.....						2,000 00		
<p>NOTE.—The Observatory library is the most complete and valuable in the literature of astronomy and mathematics in this country, and is especially rich in the serial publications of the old scientific bodies of Europe and in scientific journals reaching back through the greater part of this century; but there are important gaps in some of these series, most of them books rare and difficult to obtain, and it is highly important to secure them before they become more rare and costly. Heretofore the binding has been done out of the general printing and binding fund of the Navy Department; but the amount required from this fund is not always available to supply the needs of the Observatory; the binding for its library has in consequence fallen two or three years in arrears. Unbound books and periodicals are being seriously injured by abrasion and dust, and books that are needed constantly for reference have been held for months at the bindery by the suspension of work upon requisitions. It is most urgently requested that the amount estimated may be allowed in order that the library may endeavor to complete its imperfect sets of transactions, journals, etc., and have the means to bind its many unbound volumes.</p>									
Apparatus and instruments, and repairs of the same.....	do.....						2,500 00		
Repairs of buildings, fixtures and fences; furniture, fuel, gas, chemicals, stationery, freight (including transmission of public documents through the Smithsonian exchange), foreign postage, expressage, plants, fertilizers, and all contingent expenses.....	do.....						4,550 00		
Fuel, oil, grease, tools, pipe, wire, and other materials needed for the maintenance and repair of boilers, engines, heating apparatus, electric lighting and power plant, and water supply system; purchase and maintenance of teams; material for boxing nautical instruments for transportation; paints, telegraph and telephone service, and incidental labor.....	Submitted.....						8,000 00		
							18,250 00	9,250 00	
<p>NOTE.—It is requested that the foregoing items (incidental to the occupation of the New Observatory, and on account of which the increase is asked) be incorporated, with those of the first paragraph, into one item of the "Contingent and Miscellaneous Expenses." The reasons for the increase are as follows: The New Observatory grounds comprise 70 acres of unimproved ground. The buildings, boilers, engines, pumps, heating and electric lighting plant, special water supply system, etc., have to be maintained. The principal items enumerated under the submitted increase are an entirely new expense to the Observatory, and all the old items will be fully needed in the larger establishment, especially as unforeseen contingencies must naturally arise in connection with installing the exceedingly complicated instrumental equipment of this large modern astronomical observatory and keeping in order the extensive grounds.</p>									
BUREAU OF STEAM-ENGINEERING.									
<i>Salaries, Bureau of Steam-Engineering—</i>									
Chief clerk.....			R. S.	27	167-9	1,800 00

One assistant messenger.....	do.....				720 00		
One laborer.....	do.....				660 00		
						\$10,980 00	\$10,980 00
<p>NOTE.—The Department recommends that the salaries of the chief clerks of the bureaus and office of the Judge-Advocate-General be increased \$200 in each, in order to conform to the scale of salaries of chief clerks of bureaus generally prevailing in the other Executive Departments. In view, however, of the important duties devolving upon the chief clerks of the Bureaus of Construction and Provisions and Clothing, the Department recommends that the salaries in the case of these two offices be increased \$700 each. In compliance with the act approved July 11, 1890 (section 2), the Department states that the reports from the various bureaus and offices show that there are no clerks below a fair standard of efficiency.</p>							
<i>Contingent Expenses, Navy Department—</i>

Estimated amt required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.
		Vol. or R. S.	Page.	Sec.			
<i>Salaries, Patent Office—Continued.</i>							
Two law clerks, at \$2,000 each.....	July 7, 1884 Mar. 3, 1891	23 26	187 939	1 1	\$4,000 00		
Three examiners in chief, at \$3,000 each.....	Mar. 3, 1891	R. S. 26	80 939	476,7 1		9,000 00	
Examiner of interferences.....	Mar. 3, 1891	R. S. 29	75 939	440 1	2,500 00		
Thirty-two principal examiners, at \$2,500 each.....	Same acts.....				80,000 00		
Thirty-four first assistant examiners, at \$1,800 each.....	do.....				61,200 00		
One first assistant examiner (additional).....	Submitted.....				2,100 00		
Thirty-eight second assistant examiners, at \$1,600 each.....	Mar. 3, 1891	R. S. 26	75 939	440 1	60,800 00		
Two second assistant examiners (additional), at \$1,800 each.....	Submitted.....				3,600 00		
Forty-three third assistant examiners, at \$1,400 each.....	Mar. 3, 1891	R. S. 26	75 939	440 1	60,200 00		
Two third assistant examiners (additional), at \$1,500 each.....	Submitted.....				3,000 00		
Fifty-two fourth assistant examiners, at \$1,200 each.....	Aug. 5, 1882 Mar. 3, 1891	22 26	248 939	1 1	62,400 00		
Three fourth assistant examiners (additional), at \$1,200 each.....	Submitted.....				3,600 00		
NOTE.—The present force of examiners is inadequate for the prompt consideration of matters coming before them. The increase in the number of applications for patents necessitates an increase in the examining corps, in order to insure a prompt dispatch of business coming before it. The inventors pay into the Treasury more than sufficient to provide the needed force and facilities, and they expect a speedy determination of their applications for patents. Without an increase in the force vexatious delays must ensue.							
One financial clerk.....	Mar. 3, 1875 June 19, 1878 Mar. 3, 1891	18 20 26	365 200 939	1 1 1	2,000 00		
One librarian.....	Mar. 3, 1891	R. S. 26	75 939	440 1		2,000 00	
Increase, one assistant librarian.....	Submitted.....				1,800 00		
Three chiefs of divisions, at \$2,000 each.....	Mar. 3, 1882 Mar. 3, 1891	21 26	408 939	1 1	6,000 00		
NOTE.—The chiefs of divisions have charge of particular classes of work which require great skill in their proper execution, and the responsibility resting upon them is not exceeded by chiefs of divisions in other branches of the service where \$2,500 and \$6,000 are paid for similar duties.							
Three assistant chiefs of divisions, at \$1,800 each.....	Aug. 5, 1882 Mar. 3, 1891	22 26	248 939	1 1	5,400 00		
One application clerk.....	Submitted.....				2,000 00		
Five clerks of class four (one of whom shall act as application clerk).....	Mar. 3, 1891	R. S. 26	27 939	167 1	9,000 00		
Increase of one clerk of class four.....	Submitted.....				1,800 00		
One machinist.....	Mar. 3, 1891	R. S. 26	75 939	440 1	1,600 00		
Six clerks of class three (one of whom shall be translator of languages).....	Mar. 3, 1891	R. S. 26	27 939	167 1	9,600 00		
Increase of four clerks of class three.....	Submitted.....				6,400 00		
Fourteen clerks of class two.....	Mar. 3, 1891	R. S. 26	27 939	167 1	19,600 00		
Increase of four clerks of class two.....	Submitted.....				5,600 00		
Fifty clerks of class one.....	Mar. 3, 1891	R. S. 26	27 939	167 1	60,000 00		
Increase of twenty-five clerks of class one.....	Submitted.....				30,000 00		
One skilled laborer.....	Mar. 3, 1891	R. S. 26	75 939	440 1	1,200 00		
Three skilled draughtsmen, at \$1,200 each.....	Same acts.....				3,600 00		
Four draughtsmen, at \$1,000 each.....	Mar. 3, 1881 Mar. 3, 1891	21 26	408 939	1 1	4,000 00		
Twenty-five permanent clerks, at \$1,000 each.....	June 19, 1879 Mar. 3, 1891	20 26	199 939	1 1	25,000 00		
Increase of ten permanent clerks, at \$1,000 each.....	Submitted.....				10,000 00		
One messenger and property clerk.....	Mar. 3, 1891	R. S. 26	75 939	440 1	1,000 00		
Five model attendants, at \$1,000 each.....	Same acts.....				5,000 00		
Ten model attendants, at \$800 each.....	do.....				8,000 00		
Sixty copyists, at \$900 each (five of whom may be copyists of drawings).....	Mar. 3, 1891	R. S. 26	75 939	440 167-9 1	54,000 00		
Increase of seventy-six copyists, at \$720 each.....	Submitted.....				54,720 00		
NOTE.—The clerical force of this office since 1884 has been increased to the extent of five additional clerks, but during the same period the examining force has been increased very materially. I have, therefore, submitted estimates for an increase in the clerical force, which is imperatively demanded in order to properly dispatch the business coming before the office.							

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats. at Large, or to Revised Statutes.			Estimated am't required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.
		Vol. or R. S.	Page.	Sec.			
<i>Salaries, Patent Office—Continued.</i>							
Three messengers, at \$840 each.....	Mar. 3, 1891	R. S. 26	27 939	167 9 1	\$2,520 00		
Twenty assistant messengers, at \$720 each.....	Same acts.....				14,400 00

<i>Photolithographing, Patent Office—</i>							
Photolithographing or otherwise producing copies of drawings of the weekly issue of patents, for producing copies of designs, trademarks, and pending applications, and for the reproduction of exhausted copies of drawings and specifications; said photolithographing or otherwise producing plates and copies referred to in this and the preceding paragraph to be done under the supervision of the Commissioner of Patents, and in the city of Washington, if it can there be done at reasonable rates, and the Commissioner of Patents, under the direction of the Secretary of the Interior, shall be authorized to make contracts therefor.....	Mar. 3, 1891	26	939	1		100,000 00	100,000 00
<i>Public Use of Inventions and Defending Suits, Patent Office—</i>							
Investigating the question of the public use or sale of inventions for two years or more prior to filing applications for patents, and for expenses attending defense of suits instituted against the Commissioner of Patents..	Mar. 3, 1891	26	940	1	750 00		
Increase.....	Submitted.....				250 00		
						1,000 00	750 00
<i>International Protection of Industrial Property, Patent Office—</i>							
The share of the United States in the expense of conducting the International Bureau at Berne, Switzerland.....	Mar. 3, 1891	26	940	1		800 00	800 00
BUREAU OF EDUCATION.							
<i>Salaries, Bureau of Education—</i>							
Commissioner of Education.....	Mar. 3, 1891	R. S. 26	85 940	517 1	3,000 00		
Chief clerk.....	Mar. 3, 1891	R. S. 26	75 940	440 1	1,800 00		
Statistician.....	Same acts.....				1,800 00		
Collector and compiler of statistics.....	Aug. 5, 1882	22	249	1			
	Mar. 3, 1891	26	940	1			
Specialist in foreign educational systems.....	July 11, 1890	26	260	1			
	Mar. 3, 1891	26	940	1			
Specialist in education as a preventive of pauperism and crime.....	Submitted.....				1,800 00		
NOTE.—A great service which the Bureau of Education might render at this time is such an investigation and exposition of educational theories and methods as would aid in securing a closer adaptation of the common schools to the prevention of pauperism and crime, increasing evils by reason of the immense growth of cities. This inquiry would be the work of a specialist of ability and scholarship.							
Two clerks of class four.....	Mar. 3, 1891	R. S. 26	27 940	167 1	3,600 00		
Three clerks of class three (in lieu of two clerks of class three and one translator).....	Mar. 3, 1891	R. S. 26	27 940	167 1	4,800 00		
NOTE.—It is recommended that a clerk of class three be provided in lieu of a translator, for the reason that the specialists and workers of the bureau make most of their studies of foreign materials from the originals, and that there are always several clerks in the force to whom the mere translation of documents can be assigned as may be desired.							
One additional clerk of class three.....	Submitted.....				1,600 00		
NOTE.—An additional clerk of class three is greatly needed. The nature of the work in this office requires men of ability and attainments, but the present scale of salaries not only prevents the employment of enough such men, but makes it sometimes impossible to retain the services of those trained in the bureau.							

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	Reference to Stats. at Large, or to Revised Statutes.			Estimated am't required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.
		Vol. or R. S.	Page.	Sec.			
<i>Salaries, Bureau of Education—Continued.</i>							
Five clerks of class two.....	Mar. 3, 1891	R. S. 26	27 940	167 1	\$7,000 00		
Six clerks of class one.....	Same acts.....						
Two clerks, at \$1,000 each.....	Aug. 5, 1882	22	249	1	2,000 00		
Ten copyists (in lieu of seven copyists, at \$900, two at \$800, and one at \$720; increase of \$380 submitted)....	Mar. 3, 1891	R. S. 26	27 940	167-9 1			
NOTE.—The inequalities in the salaries of copyists should be removed, both as serving to create ill feeling and as placing the bureau at a disadvantage as compared with other offices. This is shown in the fact that bright young men obtained through the civil service examinations secure transfers to other offices for the sake of the higher pay, just as they become useful here.							
One skilled laborer.....	Same acts.....				840 00		
One assistant messenger.....	do.....				720 00		
Two laborers.....	do.....				1,320 00		
Four laborers, at \$480 (in lieu of two at \$480, one at \$400, one at \$360; increase of \$200 submitted).....	do.....				1,920 00		
						\$52,600 00	\$48,620 00
NOTE.—The lowest wages of a laborer recognized in the other offices of the Department are \$480 a year. It is respectfully submitted that there is no reason for a discrimination against this bureau in this particular, and it is recommended that the inequality be removed.							
<i>Library, Bureau of Education—</i>							
Books for a library, current educational periodicals, newspapers and other current publications, and completing valuable sets of books and periodicals.....	Mar. 3, 1891	26	940	1		1,000 00	1,000 00
<i>Collecting Statistics, Bureau of Education—</i>							
Collecting statistics for special reports and circulars of information.....	Mar. 3, 1891	26	940	1		3,000 00	3,000 00
<i>Distributing Documents, Bureau of Education—</i>							
Purchase, distribution, and exchange of educational documents, and for the collection, exchange, and cataloguing of educational apparatus and appliances, textbooks, and educational reference books, articles of school furniture, and models of school buildings, illustrative of foreign and domestic systems and methods of education, and for repairing the same.....	Mar. 3, 1891	26	940	1		2,000 00	2,000 00
<i>Special Printing, Bureau of Education—</i>							
To continue the publication of the series of State Educational Histories, to be available as the work can be done at the Government Printing Office.....	Submitted.....					20,000 00	
NOTE.—Of this series nine numbers have already been issued. These have attracted wide and favorable notice, and have greatly strengthened the bureau in the estimation of the higher institutions of learning and the literary public. Four numbers, those on Indiana, Ohio, Michigan, and Massachusetts, will soon be issued from the press. There are now on hand awaiting publication the completed manuscripts on the educational history of Connecticut, Delaware, Iowa, Louisiana, Maryland, Mississippi, Missouri, Nebraska, Rhode Island, and West Virginia. The histories of Illinois, Pennsylvania, and New York are approaching completion, and work upon nearly all the other States is well advanced. It seems impossible longer to publish these valuable documents from the general printing fund of the Department of the Interior, and a special appropriation is therefore asked.

Four messengers, at \$480 each.....	do.....				1,920 00		
						35,540 00	35,540 00
Total Department of the Interior Proper.....						4,970,024 00	4,796,574 00
PUBLIC LANDS.							
<i>Salaries, Offices of Surveyors-General—</i>							
Office of surveyor-general of Arizona:		R. S.	389	2210			
Surveyor-general.....	Mar. 3, 1891	R. S. 26	391 941	2226 1	\$3,000 00		
Clerks in his office.....	Same acts.....				4,500 00		
						\$7,500 00	\$5,500 00
NOTE.—The estimate of \$4,500 for clerk-hire is submitted as necessary for the prompt and proper transaction of official business.							
Office of surveyor-general of California:		R. S.	389	2210			
Surveyor-general.....	Mar. 3, 1891	R. S. 26	391 941	2226 1	3,000 00		
Clerks in his office.....	Same acts.....				25,800 00		
						28,800 00	16,500 00
NOTE.—The estimate of \$25,800 for clerk-hire is submitted for the reason that that amount is deemed necessary for the regular office work, and to bring up arrears and restore defaced records. This estimate includes \$2,000 for a swamp-land clerk reported by the surveyor-general as necessary to clear up a large accumulation of swamp-land cases. This also includes \$1,800 for a keeper of Spanish archives. It is important and necessary that a competent translator of these archives should be continually in their immediate charge for the purpose of continuing the compilation and indexing of the valuable papers and documents, and for the purpose of attendance upon and explaining the same to parties desiring official knowledge of papers of record in the Archive Department. The large sums of accumulated special deposits heretofore found sufficient to tide over any deficiency in the appropriation for clerk-hire are now virtually exhausted, and on that account the appropriation asked for is necessary.							

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats. at Large, or to Revised Statutes.			Estimated am't required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.

<i>Salaries, Offices of Surveyors-General—Continued.</i>							
Office of surveyor-general of Colorado:		R. S.	389	2210	} \$3,000 00		
Surveyor-general.....		R. S.	391	2226			
	Mar. 3, 1891	26	941	1			
Clerks in his office.....	Same acts.....				11,900 00	\$14,900 00	\$9,500 00
NOTE.—The sum of \$11,900 is deemed necessary for the employment of a force of clerks sufficient for the examination and platting of surveys, copying township plats, and transcribing field notes. This work has heretofore been largely paid for out of receipts for office work on mining claims. The receipts for work in the mineral division are yearly falling off, while in the land division of the office the work is increasing; hence, an increased appropriation for clerk-hire is necessary.

Clerks in his office.....	Same acts.....				2,000 00	4,000 00	3,600 00
NOTE.—The estimate of \$2,000 for clerk-hire is submitted as necessary for the current work of the office.							
Office of surveyor-general of Idaho:		R. S.	389	2210	} 3,000 00		
Surveyor-general.....		R. S.	391	2226			
	Mar. 3, 1891	26	942	1			
Clerks in his office.....	Same acts.....				6,500 00	9,500 00	5,500 00
NOTE.—The estimate of \$6,500 for clerk-hire is submitted as absolutely necessary for the service on account of largely increased apportionment for surveys and a consequent increase of office work. The last appropriation for the purpose was inadequate for the work to be done in connection with the \$30,000 apportioned for surveys during the fiscal year ending June 30, 1892, and it will be impossible to do the work of the office for the fiscal year with the force which can be employed under the appropriation for clerk-hire for said fiscal year.							
Office of surveyor-general of Louisiana:		R. S.	388	2208	} 2,000 00		
Surveyor-general.....		R. S.	391	2226			
	Mar. 3, 1891	26	942	1			
Clerks in his office.....	Same acts.....				10,000 00	12,000 00	6,800 00
NOTE.—The estimate of \$10,000 is submitted as necessary for the transaction of current business; continuing and completing the exhibit of private land claims; preparation of patent plats in duplicate for confirmed private land claims; reprotraction of worn and defaced township plats; examinations and researches to prepare confirmed private land claims for survey and location; recording field notes for preservation, and indexing records.							
Office of surveyor-general of Minnesota:		R. S.	388	2208	} 2,000 00		
Surveyor-general.....		R. S.	391	2226			
	Mar. 3, 1891	26	942	1			
Clerks in his office.....	Same acts.....				4,400 00	6,400 00	4,800 00
NOTE.—The estimate of \$4,400 for clerk-hire is submitted as necessary for the service. For several years past the appropriation has been insufficient, so that the chief clerk has been required to do all the draughting of the public land surveys, but the large amount of surveys on Indian reservations now being made will require so much of his time in the examination of field notes and superintending other work connected with said surveys that the employment of a first-class draughtsman is necessary, and the appropriation should be increased accordingly.							
Office of surveyor-general of Montana:		R. S.	389	2210	} 3,000 00		
Surveyor-general.....		R. S.	391	2226			
	Mar. 3, 1891	26	942	1			
Clerks in his office.....	Same acts.....				14,000 00	17,000 00	12,500 00
NOTE.—The estimate of \$14,000 for clerk-hire is submitted as necessary for the prompt transaction of current business, and to prevent an accumulation of work consequent upon largely increased apportionments for the survey of public lands in this district.							
Office of surveyor-general of Nevada:		R. S.	389	2210	} 3,000 00		
Surveyor-general.....		R. S.	391	2226			
	Mar. 3, 1891	26	942	1			
Clerks in his office.....	Same acts.....				4,000 00	7,000 00	4,300 00
NOTE.—The estimate of \$4,000 for clerk-hire is submitted as necessary for the prompt and proper performance of current official work.							
Office of surveyor-general of New Mexico:		R. S.	389	2210	} 3,000 00		
Surveyor-general.....		R. S.	391	2226			
	Mar. 3, 1891	26	942	1			

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats. at Large, or to Revised Statutes.			Estimated am't required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.
		Vol. or R. S.	Page.	Sec.			
<i>Salaries, Offices of Surveyors-General—Continued.</i>							
Office of Surveyor-General of New Mexico—Continued.		R. S.	389	2210	\$17,000 00	\$20,000 00	\$5,500 00
Clerks in his office		R. S.	391	2226			
	Mar. 3, 1891	26	942	1			
<p>NOTE.—The estimate of \$17,000 for clerk-hire is submitted as necessary for the proper transaction of the current official work pertaining to the survey of public lands, and to insure prompt attention to the demands of the court of private land claims established by the act of March 3, 1891, and the inquiries of claimants and other interested parties. The work which must be done in this office to carry out the provisions of section 10 of said act of March 3, 1891, will necessitate a large increase in the clerical force (now and for several years past barely adequate to keep pace with the current work), and the provisions in section 16 of the same act for the survey of holdings of twenty years' duration, as separate legal subdivisions, will also multiply the work of the office. This estimate includes the sum of \$2,000 to enable the Surveyor-General to preserve and record the Spanish documents filed as evidence of title. Many of the papers are much worn and defaced by long use, and repeated handling will soon render them illegible.</p>							
Office of surveyor-general of North Dakota:		R. S.	391	2226	2,000 00	12,000 00	7,000 00
Surveyor-general	Apr. 10, 1890	26	53	1			
Clerks in his office	Mar. 3, 1891	26	942	1			
	Same acts.....				10,000 00		
<p>NOTE.—The sum of \$10,000 for clerk-hire is submitted as necessary for the current work of the office and for the preparation of plats and field notes of surveys made under the appropriation for the fiscal year ending June 30, 1891, as well as those made under the appropriation for the fiscal year ending June 30, 1892, as the appropriation of \$5,000 for clerks in this office for the year ending June 30, 1892, is inadequate for the amount of work to be done, and there will be a large amount of unfinished work by the time the appropriation for the year ending June 30, 1893, becomes available.</p>							
Office of surveyor-general of Oregon:		R. S.	388	2209	2,500 00	7,600 00	5,000 00
Surveyor-general		R. S.	391	2226			
Clerks in his office	Mar. 3, 1891	26	942	1			
	Same acts.....				5,100 00		
<p>NOTE.—The sum of \$5,100 for clerk-hire is submitted as necessary for the completion of the office work in connection with a portion of the surveys now under contract and which will not be returned in time to have such work performed during the current fiscal year, and for office work upon such surveys as may be returned during the year for which this estimate is made. The increased apportionments to Oregon under the large appropriations for surveys render an increase in the clerical force in the Surveyor-General's office absolutely necessary.</p>							
Office of surveyor-general of South Dakota:		R. S.	391	2226	2,000 00	17,000 00	9,500 00
Surveyor-general	Apr. 10, 1890	26	53	1			
Clerks in his office	Mar. 3, 1891	26	942	1			
	Same acts.....				15,000 00		
<p>NOTE.—The estimate of \$15,000 for clerk-hire is submitted as absolutely necessary for the proper transaction of the current business of the office and for bringing up the large arrears of work, and in this connection I deem it proper to quote the following remarks from the letter of the Surveyor-General submitting his estimate for 1893:</p> <p>"Item for salaries.—Owing to inadequate appropriations for clerical service heretofore made, the work of this office is at present in arrears, as follows, viz:</p> <p>"Proper filing and indexing of circulars, papers relating to Indian and military reservations, and miscellaneous papers. Proper filing and indexing of letters to this office which have accumulated from the date of its establishment to the present time, present indexing being incomplete and inconvenient. Proper indexing for convenient reference of all letters outward. Proper annotation of documents surrendered to the surveyor-general of North Dakota. Proper indexing of field notes of surveys executed during the last two seasons. Preparation of new contract and index diagrams, the one prepared over eleven years ago having become unserviceable. Platting and transcribing field notes of a portion of the surveys of the ceded Sioux Indian lands last season, amounting to \$30,000. Platting and transcribing field notes of surveys under appropriation 1890-'91, amounting to \$40,000. Platting and transcribing field notes of a portion of the surveys under appropriation 1889-'90, amounting to \$500. Making a total of over \$70,000 of surveys, the platting and transcribing of which has yet to be done, and no funds for the purpose. On this item of arrearage, I beg to remark as follows: Out of \$113,000 of surveys placed under my direction for the fiscal year now closing, \$63,000 have passed through the office on the annual appropriation of \$7,500 for clerk-hire. How? By letting everything else fall behind; by largely increasing the office hours, and by deputies platting and transcribing their notes at their own expense to the extent of \$23,000. So that the practical lesson of this year's work is that \$35,000 of surveys is all that can be properly worked up on \$7,500 of clerk-hire. I invite attention to this showing. As the appropriation for clerk-hire for the year 1891-'92 will hardly be more than sufficient for the needs of that year, I respectfully urge allowance by Congress of the full amount of my estimate for clerk-hire to bring up the large arrears now standing, which are operating to seriously cripple the proper conduct of the office."</p>							

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats. at Large, or to Revised Statutes.			Estimated am't required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.

<i>Salaries, Offices of Surveyors-General—Continued.</i>							
Office of surveyor-general of Utah:		R. S.	389	2210	} \$3,000 00		
Surveyor-general.....	R. S.	391	2226			
	Mar. 3, 1891	26	942	1			
Clerks in his office.....	Same acts.....				9,000 00	\$12,000 00	\$5,500 00
NOTE.—Of the sum of \$9,000 estimated for clerk-hire \$4,000 is for the regular office work, and \$5,000 to enable the Surveyor-General to prepare connected maps of the several mining districts.							
Office of surveyor-general of Washington:		R. S.	388	2209	} 2,500 00		
Surveyor-general.....	R. S.	391	2226			
	Mar. 3, 1891	26	943	1			
Clerks in his office.....	Same acts.....				9,500 00	12,000 00	10,000 00
NOTE.—The estimate of \$9,500 for clerk-hire is submitted as necessary for the proper transaction of office work in connection with the public land surveys, for the current work of the office, and for bringing up arrears of office work.							
Office of surveyor-general of Wyoming:		R. S.	389	2210	} 3,000 00		
Surveyor-general.....	R. S.	391	2226			
	Mar. 3, 1891	26	943	1			
Clerks in his office.....	Same acts.....				10,000 00	13,000 00	6,500 00
NOTE.—The estimate of \$10,000 for clerk-hire is submitted as necessary for the proper transaction of office work in connection with the surveys returned during the year ending June 30, 1893, and upon surveys contracted for during the current fiscal year, but which will not be returned before the close of the year. The Surveyor-General states (June 22, 1891), that deputies are at work upon surveys aggregating \$25,000, under appropriation for year ending June 30, 1891, and that the appropriation for office work for the current fiscal year is insufficient to make the plats and transcripts of these surveys without allowing anything for office work upon surveys under the appropriation for the current year.							
GENERAL NOTE.—In the foregoing estimates I have deemed proper to submit the amounts required for <i>Salaries of Surveyors-General</i> at the rates of compensation named in sections 2208, 2209, and 2210, Revised Statutes of the United States. The office of Surveyor-General is one of great responsibility, the duties are often onerous and perplexing, and I think they should receive the full compensation allowed by law. I earnestly recommend that the appropriations be made in accordance with the estimates.— <i>Thomas H. Carter, Commissioner.</i>

Total salaries, Department of Agriculture.....						256,800 00	256,800 00
MISCELLANEOUS.							
<i>Collecting Agricultural Statistics—</i>							
Division of statistics:							
Collecting domestic and foreign agricultural statistics, expenses of local investigations and compilations, and necessary traveling expenses; statistical publications furnishing data for permanent comparative records; compiling, writing, and illustrating statistical matter for monthly, annual, and special reports, and the necessary expenses of the same, including paper and envelopes, postal-cards, and postage-stamps.....							
Appropriated..						\$100,000 00	
Provided, That fifteen thousand dollars of this sum, or so much thereof as may be necessary, may be expended for the preparation and printing of maps and charts, illustrating the progress of rural production and crop distribution of the United States, and for special investigation of the agricultural statistics of the States and Territories of the Rocky Mountain region, with traveling and other necessary expenses connected therewith.							
Appropriated..						2,500 00	
						\$102,500 00	\$102,500 00
<i>Botanical Investigations and Experiments—</i>							
Division of botany:							
Purchasing specimens, paper, and all necessary materials for the herbarium, and for labor in preparing the same; and for investigations and experiments with grasses and forage plants, and of other economic and medicinal plants, including the establishment and maintenance of experimental grass stations, and including cost of reports and illustrations thereof, and for traveling and other necessary expenses connected therewith, and for employing local botanists in the field for exploration and collection of plants in little known districts.....							
Appropriated..						35,000 00	40,000 00
<i>Investigating the History and Habits of Insects—</i>							
Division of entomology:							
Promotion of economic entomology; investigating the history and habits of insects injurious and beneficial to agriculture, arboriculture, and horticulture; experiments in ascertaining the best means of destroying them; publishing reports thereon, and for illustrations, chemicals, and other expenses in the practical work of the division of entomology.....							
Appropriated..						27,800 00	27,800 00
Provided, That two thousand five hundred dollars, or so much thereof as may be necessary, may be expended for an investigation into the natural history of and remedies for the cotton-ball worm; for compensation of additional temporary agents of the division of entomology; for traveling expenses, chemicals, insecticide apparatus, and other necessary expenses in this investigation.							
<i>Biological Investigations—</i>							
Division of ornithology and mammalogy and biological survey:							
For investigating and mapping the geographic distribution and migrations of animals and plants, and for the pro-

		Vol. or R. S.	Page.	Sec.			
<i>Report on Forestry—</i>							
Division of forestry :							
To enable the Secretary of Agriculture to experiment and continue an investigation and report upon the subject of forestry, and for experiments in the production of rainfall, and for traveling and other necessary expenses in the investigation, and the collection and distribution of valuable economic forest-tree seeds and plants..	Appropriated..	26	1048	1	\$20,000 00	\$15,000 00
<i>Illustrations and Engravings—</i>							
Division of illustrations :							
Tools, instruments, paper, ink, paints, pencils, and other necessary materials, printing proofs, and necessary traveling expenses	Appropriated..	26	1048	1	2,000 00	2,000 00
<i>Purchase and Distribution of Valuable Seeds—</i>							
Division of seeds :							
Purchase, propagation, and distribution, as required by law, of seeds, bulbs, trees, shrubs, vines, cuttings, and plants, and expense of labor, transportation, paper, twine, gum, printing, postal cards, and all necessary material and repairs for putting up and distributing the same, and to be distributed in localities adapted to their culture, \$100,000. An equal proportion of two-thirds of all seeds, trees, shrubs, vines, cuttings, and plants, shall, upon their request, be supplied to Senators, Representatives, and Delegates in Congress for distribution among their constituents ; and the person receiving such seeds shall be requested to inform the Department of results of the experiments therewith.....	Appropriated..	26	1048	1	\$100,000 00		
<i>Provided</i> , That all seeds, plants, and cuttings herein allotted to Senators, Representatives, and Delegates to Congress for distribution remaining uncalled for at the end of the fiscal year shall be distributed by the Secretary of Agriculture: <i>And provided also</i> , That the Secretary shall report, as provided in this act, the place, quantity, and price, of seeds purchased, and the date of purchase. But nothing in this paragraph shall be construed to prevent the Secretary of Agriculture from sending flower, garden, and other seeds to those who apply for the same. And the amount herein appropriated shall not be diverted or used for any other purpose but for the purchase, propagation, and distribution of improved and valuable seeds, bulbs, trees, shrubs, vines, cuttings, and plants: <i>Provided, however</i> , That the Secretary shall not distribute to any Senator, Representative, or Delegate seeds entirely unfit for the climate and locality he represents, but shall distribute the same so that each member may have seeds of equal value, as near as may be, and the best adapted to the locality he represents.							
Printing seed-pockets, labels, postal-cards, circulars, and so forth, labor, paper, ink, type, and other necessary material for printing, and for purchasing and repairing printing presses, \$5,400do.....				5,400 00		
						105,400 00	105,400 00
<i>Materials, Document and Folding-Room—</i>							
Paper, gum, twine, and other necessary materials.....	Appropriated..	26	1049	1	2,000 00	2,000 00
<i>Experimental Gardens and Grounds—</i>							
Labor in experimental gardens and grounds, the care of conservatories, plant and fruit propagating and seed-testing houses, and the keep of the reservation, lawns, trees, roadways, and walks, \$18,500 ; blacksmithing, the purchase of tools, wagons, carts, harness, horses, lawn-mowers, heating-apparatus, and machinery, and the necessary labor and material for repairing the same ; the purchase of new and rare kinds of seeds, plants, and bulbs for propagating purposes ; expense of material and labor in labeling and packing plants for distribution and transportation ; and for necessary traveling expenses ; the purchase of necessary pots, tubs, watering-cans, and hose ; the purchase of material for the destruction of insects, and other necessary items for the cultivation and improvement of the grounds and arboretum ; the purchase of material for making and repairing roads and walks ; the purchase of glass, paints, lumber, tin for roofing and spouting, and hardware, and for carpenters, painters, and all other mechanics, and the necessary material for keeping the conservatories and other structures in good repair, \$10,000.....	Appropriated..	26	1049	1	28,500 00	28,500 00

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats. at Large, or to Revised Statutes. Seven messengers (or laborers), at \$600 each.....	Same acts.....				4, 200 00		
Six messengers (or laborers), at \$450 each.....	do.....				2, 700 00		
Five messengers (or laborers), at \$300 each.....	do.....				1, 500 00		
Four char-women, at \$240 each.....	do.....				960 00		
Temporary employment of messengers and laborers as may be necessary in the office of the Chief of the Weather Bureau.....	do.....				800 00		
						\$176, 330 00	\$182, 330 00
NOTE.—As required by section 2 of legislative, executive, and judicial appropriation act, approved July 11, 1890, I would report that there are five employes in the Weather Bureau who are considered to be below a fair standard of efficiency, viz, one clerk of class 3; one messenger, at \$720; two laborers, at \$600; and one laborer, at \$450.							
<i>Fuel, Lights, and Repairs, Weather Bureau—</i>							
Fuel, lights, repairs, labor, and other expenses for the care and preservation of the public buildings and grounds on the corner of 24th and M streets, northwest, in the city of Washington.....	Oct. 1, 1890 Mar. 3, 1891	26 26	654 1051	9 1	9, 700 00		10, 775 00
<i>Contingent Expenses, Weather Bureau—</i>							
Contingent expenses for stationery, furniture and repairs to the same; subsistence, purchase, and care of public animals and wagons; repairs of harness, paper, twine, advertising, dry goods, mats, oils, paints, glass, lumber, hardware, ice, postage, washing towels, express charges, and such other miscellaneous supplies and expenses not otherwise provided for and necessary for the practical and efficient work of the Weather Bureau in the city of Washington.....	Oct. 1, 1890 Mar. 3, 1891	26 26	654 1052	9 1	13, 700 00		13, 783 00
<i>General Expenses, Weather Bureau—</i>							
Expenses of the Weather Bureau, under the direction of the Secretary of Agriculture, for the benefit of agriculture, commerce, navigation, and other interests, as provided by law, namely: Salaries of (20) local forecast officials, observers, assistant observers, operators, repairmen, and other necessary civilian employes outside of the city of Washington..	Oct. 1, 1890 Mar. 3, 1891	26 26	654 1052	9 1	323, 900 00		
And the Secretary is hereby authorized to make such changes in the personnel, and their rates of pay, as he may consider in the interests of the service. All other expenses, itemized as follows: Maps, bulletins, and stationery for stations, and the maintenance of a printing office in the District of Columbia (including the hire of printers, lithographers, and other necessary working force), for printing of the necessary circulars, weather maps, bulletins, monthly weather reviews, and other meteorological data for distribution and display in the interests of agriculture, commerce, and navigation; for transportation and legal traveling allowances of employes when traveling on business connected with the bureau, including transportation of materials and funds; for meteorological and other instruments and shelters therefor; for telegraphing or telephoning reports, messages, or other information; for rents and other incidental expenses of offices maintained as stations of observation; for the maintenance and repair of seacoast telegraph lines; for river observations and reports necessary for flood forecasts; for storm, cold wave, flood, frost, and other signals (including the purchase of flags for the same); for cotton region observations and reports; for special observations and pay of observers of West India stations during the hurricane season; for supplies for State Weather Service stations, and for investigations on the relations of climate to organic life.....	Same acts.....				348, 965 50		
						672, 865 50	672, 865 50
NOTE.—The estimate of the Secretary of Agriculture for "Printing and binding," under section 2, act of May 8, 1872 (Revised Statutes, 720, section 3861), will be found under the title of "Miscellaneous," <i>post</i> .							
Total Weather Bureau.....						872, 595 50	879, 753 50

						\$101,220 00	\$101,020 00
<p>NOTE.—The disbursing clerk of this Department is the only disbursing clerk in the city of Washington who receives less than \$2,000 per annum as his compensation. The disbursing clerk of the Department of Labor performs all the duties of a disbursing clerk, financial clerk, and appointment clerk, and has charge of the building occupied by the Department. By Revised Statutes, page 28, section 176, it is contemplated that a disbursing clerk shall be an \$1,800 clerk and have \$200 additional. It is therefore submitted as a fitting and proper thing to pay the disbursing clerk of this Department a salary equal to that paid to the lowest-paid disbursing clerks in other offices.</p>							
<i>Miscellaneous Expenses, Department of Labor—</i>							
For per diem, in lieu of subsistence, of special agents and experts while traveling on duty away from home and outside of the District of Columbia, at a rate not to exceed \$3 per day, and for their transportation, and for employment of experts and temporary assistance, and for traveling expenses of officers and employes..... Additional for expenses of sending recruiting parties to small towns, \$5,000; and for pay of clerk to officer disbursing the appropriation, \$1,200.....						6,200	
						142,244	
<i>Contingencies, Headquarters of Military Departments—</i>							
Contingent expenses at the headquarters of the several military departments, being for the purchase of the necessary articles of office, toilet, and desk furniture, binding, maps, books of reference, police utensils, etc.....	Feb. 24, 1891	26	779	1	3,000 00	3,000 00
INSPECTOR-GENERAL'S DEPARTMENT.							
<i>Contingencies, Inspector-General's Department—</i>							
Contingent expenses of the Inspector-General's Department at the headquarters of the several military departments, being for the necessary articles of office, toilet, and desk furniture, stationery, binding, maps, books of reference, professional literature, and police utensils.....	June 13, 1890 Submitted.....	26	157	1	1,000 00	
NOTE.—The amount appropriated for contingent expenses of this Department for 1891, viz, \$500, was limited to "the binding of reports and orders and purchasing books of reference and maps."—Act of June 13, 1890. While this amount was sufficient for the purpose named, it is not sufficient to meet the actual needs of the offices of the inspectors-general at the headquarters of the eight military departments for the purchase of the additional items included in this estimate, viz, office furniture, stationery, and police utensils, and for which these officers heretofore have had to depend upon the kindness and favor of officers of other departments. It is earnestly recommended that the amount indicated be appropriated as asked.—(J. C. Breckinridge, Inspector-General U. S. Army.)							
OFFICE OF THE CHIEF SIGNAL OFFICER.							
<i>Signal Service of the Army—</i>							
Expenses of the Signal Service of the Army, as follows:

SUBSISTENCE DEPARTMENT.							
<i>Subsistence of the Army—</i>							
Purchase of subsistence supplies: For issue, as rations to troops, civil employes when entitled thereto, contract-surgeons, hospital-matrons, military convicts at posts, prisoners of war (including Indians held by the Army as prisoners, but for whose subsistence appropriation is not otherwise made), estimated for the fiscal year on the basis of ten million one hundred and three thousand five hundred and sixty-five rations; for sales to officers and enlisted men of the Army; for authorized extra issues of candles, and salt and vinegar for public animals; for issues to Indians visiting military posts, and to Indians employed with the Army, without pay, as guides and scouts. For payments: For cooked rations for recruiting parties and recruits; for hot coffee, canned beef, and baked beans for troops traveling, when it is impracticable to cook their rations; for scales, weights, measures, utensils, tools, stationery, blank books and forms, printing, advertising, commercial newspapers, use of telephones, office furniture; for temporary buildings, cellars, and other means of protecting subsistence supplies (when not provided by the Quartermaster's Department); for bake-ovens at posts and in the field, and repairs thereof; for extra pay to enlisted men employed on extra duty in the Subsistence Department for periods of not less than ten days, at rates fixed by law; for compensation of civilians employed in the Subsistence Department, and for other necessary expenses incident to the purchase, care, preservation, issue, sale, and accounting for subsistence supplies for the Army. For the payment of the regulation allowances for commutation in lieu of rations: To enlisted men on furlough, to ordnance-sergeants on duty at un-garrisoned posts, to enlisted men stationed at places where rations in kind can not be economically issued, to enlisted men traveling on detached duty when it is impracticable to carry rations of any kind, to enlisted men selected to contest for places or prizes in department and Army rifle competitions while traveling to and from places of contest; to be expended under the direction of the Secretary of War; in all..... MEDICAL DEPARTMENT.							
<i>Medical and Hospital Department—</i>							
Purchase of medical and hospital supplies, including disinfectants for general post sanitation, expenses of medical-purveying depots, pay of employes, medical care and treatment of officers and enlisted men of the Army and Signal Corps on duty at posts and stations for which no other provision is made; for the proper care and treatment of cases in the Army suffering from contagious or epidemic diseases, and the supply of the Army and Navy General Hospital at Hot Springs, Ark.; advertising and other miscellaneous expenses of the Medical Department, the amount to be expended for pay of civilian employes not to exceed forty-five thousand dollars.....	Feb. 24, 1891	26	777	1		\$175,000 00	\$200,000 00
<i>Army Medical Museum and Library—</i>							
Army Medical Museum, preservation of specimens and the preparation or purchase of new specimens.....	Feb. 24, 1891	26	778	1	\$5,000 00		
Library of the Surgeon-General's office.....do.....				10,000 00		
						15,000 00	15,000 00
ENGINEER DEPARTMENT.							
<i>Engineer Depot at Willet's Point, New York—</i>							
Incidental expenses of the depot, including fuel, lights, chemicals, stationery, hardware, extra-duty pay to soldiers necessarily employed for periods of not less than ten days as artificers on work in addition to and not strictly in the line of their military duties, such as carpenters, blacksmiths, draughtsmen, printers, lithographers, photographers, engine-drivers, teamsters, wheelwrights, masons, machinists, painters, overseers, laborers, repairs of, and for materials to repair public buildings, machinery, and unforeseen expenses.....	Feb. 24, 1891	26	778	1	5,000 00		
Purchase of materials for instruction of engineer troops at Willet's Point in their special duties as sappers, miners for land and submarine mines, and pontoniers, torpedo drill and signaling.....	Same act.....				3,500 00		
Purchase and repairs of instruments to be issued to officers of the Corps of Engineers, and to officers detailed and on duty as acting engineer officers for use on public works and surveys.....do.....				3,000 00		
NOTE.—Increase of \$1,000 submitted for purchase of new instruments to replace a number of worn-out instruments, and for increased repairs required by instruments long in use.—(Thos. Lincoln Casey, Brig. Gen., Chief of Engineers.)							
Library of the United States Engineer School: Purchase and binding of professional works of recent date treating of military and civil engineering and kindred scientific subjects.....do.....				500 00		
Purchase of ponton material required to complete one division of reserve and one division of advance-guard equipage.....	Submitted.....				5,000 00		
						17,000 00	27,000 00
NOTE.—May, 1890, the greater part of the supply of ponton bridge materials at Willet's Point was destroyed by fire. Emergencies may occur even in time of peace when a bridge train is required, as in 1889, when a detachment of the Engineer Battalion was ordered to Johnstown, Pa., for the purpose of building ponton and trestle bridges to replace, temporarily, those swept away by the great flood which devastated that region. Such a train is also required for the purpose of instruction of engineer troops. During the past year part of the necessary materials has been manufactured by enlisted men of the battalion. Other parts are necessary to the completion of a division or unit of both the reserve and advance-guard equipage. For the purchase of ponton material required to complete one division of reserve and one division of advance-guard equipage, an estimate of \$5,000 is submitted.—(Thos. Lincoln Casey, Brig. Gen., Chief of Engineers.)							
ORDNANCE DEPARTMENT.							
<i>Ordnance Service—</i>							
Current expenses of the ordnance service required to defray the current expenses at the arsenals; of receiving stores and issuing arms and other ordnance supplies; of police and office duties; of rents, tolls, fuel, and lights; of stationery and office furniture; of tools and instruments for use; incidental expenses of the ord-

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats. at Large, or to Revised Statutes.			Estimated amt required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.
		Vol. or R. S.	Page.	Sec.			
<i>Ordnance Service—Continued.</i> nance service and those attending practical trials and tests of ordnance, small arms, and other ordnance supplies, including payment for mechanical labor in the office of the Chief of Ordnance.....	Feb. 24, 1891	26	778	1	\$100,000 00	\$80,000 00	
<p>NOTE.—The sum of \$80,000, which has been appropriated since 1888, is wholly inadequate to meet the actual indispensably necessary expenses under this head; \$200,000 was the amount appropriated for this purpose from 1868 to 1874. From 1874 to 1886 the amount varied from \$125,000 to \$100,000. The necessary expenses for labor alone, in connection with the receipt and issue of ordnance and ordnance stores and for the police and care of arsenals, not manufacturing, amounts to nearly \$100,000. The amount asked for is considered necessary, but only what is absolutely necessary for the public service will be expended.</p>							
<i>Ordnance, Ordnance Stores and Supplies—</i> Manufacture of metallic ammunition for small-arms and ammunition for reloading cartridges, and tools for the same, including the cost of targets and material for target practice and marksmen's medals and insignia for all arms of the service	Feb. 24, 1891	26	778	1	\$150,000 00		
<p>NOTE.—The quantity of rifle ammunition on hand is less than it was last year, the reserve supply at our arsenals being only 6,212,671 cartridges on July 1, 1891. A supply should be kept on hand for the hostile uses of the Army. Rifle and carbine ammunition costs to manufacture \$18.50 per thousand, and revolver \$10 per thousand. Existing orders from the War Department authorize the expenditure for target practice of cartridges or reloading material to the amount of \$4 per man per annum, and about \$1.93 per man per annum for gallery practice. Soldiers should be made good marksmen, but this can not be done without a liberal supply of ammunition for target practice. The amount asked for is reasonable if the soldier is to be provided with cartridges sufficient for his proper instruction. To enable the Ordnance Department to carry out these orders, the reserve supply has been well-nigh exhausted. Unless the appropriation asked for is granted, the supply for target-practice will have to be reduced, greatly to the detriment of the efficiency of the Army.</p>							
Repairing and preserving ordnance and ordnance stores in the hands of troops and for issue at the arsenals and depots.....	Same act.....				10,000 00		
<p>NOTE.—This appropriation will be applicable to the repairs, painting, and general preservation of guns, gun-carriages, projectiles, and general ordnance stores at forts and other military posts, and this money is absolutely necessary for the purpose.</p>							
Purchase and manufacture of ordnance stores to fill requisitions of troops.....	do.....				125,000 00		
<p>NOTE.—The \$100,000 appropriated the past few years has not been sufficient to meet the actual needs of the troops in the field, and to furnish the material necessary for the instruction of troops and preservation of the ordnance, etc., at military stations.</p>							
Infantry, cavalry, and artillery equipments, including horse equipments for cavalry and artillery.....	do.....				215,000 00		
<p>NOTE.—The amount asked for is required to meet the wants of the service. This appropriation will also be applicable to the procurement of artillery harness for the new breech-loading steel field-guns. The current appropriations under this head are not as large as were made twenty years ago, at a time when fully 30 per cent. of the supplies issued was made from materials on hand from the civil war. All these materials have been used up, and the material for all stores now made has to be purchased from the appropriations annually made for the procurement of these stores. It follows therefore that the appropriations for these objects should be fully 30 per cent. more now than twenty years ago. The public interests require at least \$150,000 under this head.</p>							
Overhauling, cleaning, and preserving new ordnance stores on hand at the arsenals.....	do.....				5,000 00		
Replacing the ordnance and ordnance stores taken from Army supplies and issued to the militia of the District of Columbia, from July 30, 1888, to June 30, 1891, under the provisions of the joint resolution, approved July 23, 1888, and the act approved March 1, 1889.....	Submitted.....				43,793 21	360,000 00	
<p>NOTE.—Attention is invited to the fact that the property issued as provided for in the act quoted must be taken from the supplies for the Army—that is, from the appropriations for these supplies—and also the fact that these appropriations are now insufficient for the needs of the Army, and that the rigid economy in the expenditure and preservation of these supplies which is enforced in the Army can not probably be extended to these issues. These additional issues made under the act of March 1, 1889, have amounted since that date to \$43,793.21, a large percentage of the already insufficient appropriation for the Army, and there is no provision of law to meet this expenditure. In my judgment, it would be wise to have a permanent appropriation of a fixed amount for each year to provide for these issues to the District militia, or a specific appropriation for each year.</p>							

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats. at Large, or to Revised Statutes.			Estimated amt't required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.
		Vol. or R. S.	Page.	Sec.			
<i>Morning and Evening Gun—</i>							
Firing the morning and evening gun at military posts, prescribed by General Orders No. 70, Headquarters of the Army, dated July 23, 1867.....	Feb. 24, 1891	26	779	1	\$30,600 00	\$20,600 00
NOTE.—It will require about 1,700 barrels of powder, which, at 18 cents per pound, amounts to the sum asked for.							
<i>Targets for Artillery Practice—</i>							
Targets for artillery practice and implements for mechanical maneuvers	Feb. 24, 1891	26	779	1	10,000 00	5,000 00
NOTE.—At our forts we are obliged to make floating targets and anchor them in the roadsteads for artillery practice firing, which is necessary for the instruction of the troops. The Secretary of War decided (Circular No. 1, A. G. O., 1886) that these targets and the material and labor for their construction shall be furnished by the Ordnance Department.							
<i>Manufacture of Arms—</i>							
Manufacture of arms at the national armories.....	Feb. 24, 1891	26	779	1	400,000 00	400,000 00
Provided, That if the Secretary of War shall, upon the report of the Small Arms Board, now in session, adopt a new rifle, or system for rifles for the military service, or for trial with a view to such adoption, then this appropriation shall be available for the procurement of such arms: <i>Provided further</i> , That purchases may be made in open market, in the manner common among business men, when the aggregate of the purchase does not exceed two hundred dollars.							
NOTE.—Besides supplying the Regular Army, the militia, the various colleges and the other branches constituting the Military Establishment, the War Department has now to supply arms, ammunition, etc., to the Marine Corps and to the several Executive Departments for use in protecting public money and property, under the act of March 3, 1879 (20 Stats., 412).							
A change in the caliber and character of our system of small arms, and of the powder and ammunition therefor, is necessary to keep pace with, or in advance of, improvements by other nations. Work and experiments now in progress indicate success. It is of the highest importance that the supply of the Army and the country with the new arm, if adopted, should progress as rapidly as possible.—(D. W. Flagler, Brigadier-General, Chief of Ordnance.)

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats. at Large, or to Revised Statutes.			Estimated am't required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ended June 30, 1892.																				
		Vol. or R. S.	Page.	Sec.																							
<i>Pay of the Military Academy—Continued.</i>																											
<i>Pay of field musicians:</i>																											
One sergeant.....	May 1, 1888 Mar. 2, 1891	25	108	1	\$204 00	\$251, 730 08	\$231, 436 09																				
Fourteen privates.....					2,184 00																						
Additional pay for length of service.....					288 00																						
Retained pay on discharge.....					288 00																						
Clothing on discharge.....					281 08																						
<p>NOTE.—The difference between the amount of this estimate and the amount appropriated for the current fiscal year is accounted for as follows:</p> <table border="0" style="width: 100%;"> <tr> <td>Amount of estimate.....</td> <td style="text-align: right;">\$251, 730 08</td> </tr> <tr> <td>Amount appropriated.....</td> <td style="text-align: right;">231, 436 09</td> </tr> <tr> <td></td> <td style="text-align: right; border-top: 1px solid black;">20, 293 99</td> </tr> <tr> <td>Estimated for 346 cadets, at \$540 each.....</td> <td style="text-align: right;">\$186, 840 00</td> </tr> <tr> <td>Appropriated for current year.....</td> <td style="text-align: right;">166, 080 00</td> </tr> <tr> <td></td> <td style="text-align: right; border-top: 1px solid black;">20, 760 00</td> </tr> <tr> <td>Add for one professor promoted to colonel.....</td> <td style="text-align: right;">252 77</td> </tr> <tr> <td></td> <td style="text-align: right; border-top: 1px solid black;">21, 012 77</td> </tr> <tr> <td>Deduct on account of decreased estimate for additional pay to professors and officers, and officers on increased rank for length of service.....</td> <td style="text-align: right;">718 78</td> </tr> <tr> <td></td> <td style="text-align: right; border-top: 1px solid black;">20, 293 99</td> </tr> </table>								Amount of estimate.....	\$251, 730 08	Amount appropriated.....	231, 436 09		20, 293 99	Estimated for 346 cadets, at \$540 each.....	\$186, 840 00	Appropriated for current year.....	166, 080 00		20, 760 00	Add for one professor promoted to colonel.....	252 77		21, 012 77	Deduct on account of decreased estimate for additional pay to professors and officers, and officers on increased rank for length of service.....	718 78		20, 293 99
Amount of estimate.....	\$251, 730 08																										
Amount appropriated.....	231, 436 09																										
	20, 293 99																										
Estimated for 346 cadets, at \$540 each.....	\$186, 840 00																										
Appropriated for current year.....	166, 080 00																										
	20, 760 00																										
Add for one professor promoted to colonel.....	252 77																										
	21, 012 77																										
Deduct on account of decreased estimate for additional pay to professors and officers, and officers on increased rank for length of service.....	718 78																										
	20, 293 99																										
<i>Current and Ordinary Expenses—</i>																											
Repairs and improvements, namely: Timber, planks, boards, joists, wall-strips, laths, shingles, slate, tin, sheet-lead, zinc, nails, screws, locks, hinges, glass, paints, turpentine, oils, varnish, brushes, stone, brick, flag, lime, cement, plaster, hair, sewer and drain pipe, blasting-powder, fuse, iron, steel, tools, machinery, mantels, and other similar materials, renewing roofs, and for pay of overseer and master-builder and citizen mechanics, and labor employed upon repairs and improvements that can not be done by enlisted men.....	Mar. 2, 1891	26	816	1	16, 000 00																						
<p>NOTE.—The present fiscal year's appropriation for repairs and improvements, \$15,000, is not deemed sufficient for the needs of the post, it being \$2,500 less than the sum appropriated for the year preceding. The increasing necessity for overhauling many of the old buildings here warrants me in the belief that the increase asked for should be granted.—(Capt. W. H. Miller, A. Q. M., U. S. A.)</p>																											
Fuel and apparatus, namely: Coal, wood, charcoal, stoves, grates, heaters, furnaces, ranges and fixtures, fire-bricks, clay, sand, repairs of steam-heating apparatus, grates, stoves, heaters, ranges, furnaces, and mica.....	do.....	26	817	1	15, 000 00																						
Gas-pipes, fixtures, lamp-posts, gasometers and retorts, and annual repairs of the same.....	do.....				1, 500 00																						
<p>NOTE.—The \$900 which has been the annual appropriation for some years is found to be totally inadequate for the purchase and repair of gas-pipes, fixtures, lamp-posts, gasometers, and retorts. It is thought, however, that with the amount asked for the wants of the institution can be met.—(Capt. W. H. Miller, A. Q. M., U. S. A.)</p>																											
Fuel for cadets' mess-hall, shops, and laundry.....	do.....				3, 000 00																						
Postage and telegrams.....	do.....				250 00																						
Stationery, namely: Blank-books, paper, envelopes, quills, steel-pens, rubbers, erasers, pencils, mucilage, wax, wafers, folders, fasteners, rules, files, ink, ink-stands, type-writing supplies, pen-holders, tape, desk-knives, blotting-pads, and rubber bands.....	do.....				800 00																						
Transportation of materials, discharged cadets, and ferris-ages.....	do.....				1, 750 00																						
Printing and binding, type, materials for office, including repairs to motor, diplomas for graduates, annual registers, blanks, and monthly reports to parents of cadets.....	do.....				1, 000 00																						
One printing press, with steam and other attachments.....	Submitted.....				1, 500 00																						
<p>NOTE.—The amount of work which the small printing office under the direction of the adjutant is called upon to perform has grown enormously since the office was established, while the facilities for doing this work have been increased in much smaller proportion. The principal press in the office, which the new one is designed to replace, has been in constant use for about fifteen years, was a second-hand machine when purchased, and is probably twenty years old. This press is simply worn-out beyond repair, frequently and unexpectedly breaks down, and does not do satisfactory work. A cylinder press will greatly increase the capacity of the office, and will expedite the work sufficiently to enable it to meet all present demands. As it is now the office can not do all the work which the needs of Academy require of it.—(Second Lieut. J. M. Carson, 5th Cavalry, Adjutant U. S. Military Academy.)</p>																											

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats. at Large, or to Revised Statutes.			Estimated am't required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ended June 30, 1892.
		Vol. or R. S.	Page.	Sec.			
<i>Current and Ordinary Expenses—Continued.</i>							
Clerk to the disbursing officer and quartermaster.....	Mar. 2, 1891	26	817	1	\$1,500 00		
Clerk to adjutant in charge of cadet-records.....do.....				1,500 00		
Clerk to treasurer.....do.....				1,500 00		
Two clerks to the quartermaster and adjutant, respectively, at \$1,200 each.....do.....				2,400 00		
Department of cavalry, artillery, and infantry tactics, namely:							
Tanbark or other proper cover for riding-hall, to be immediately available, and to be purchased in open market on written order of the superintendent.....do.....				600 00		
Purchase of thirty assorted bits for instruction of cadets..	Submitted.....				120 00		
Purchase of one hundred saddle cloths for use of cadets..	Submitted.....				500 00		
Repairing camp-stools and camp-furniture.....	Mar. 2, 1891	26	817	1	100 00		
Furniture for offices and reception-room for visitors.....do.....				100 00		
Stationery for use of instructor and assistant instructors of tactics.....do.....				150 00		
Plumes for cadet officers of the first class.....do.....				75 00		
Foils, masks, belts, fencing and boxing gloves, fencing-jackets, gaiters, and repairs.....do.....				250 00		
Repairs and improvements of dressing-rooms, walks, and dock at swimming-place.....do.....				220 00		
Books and maps, binding books and mounting maps.....do.....				75 00		
Silk sashes for cadet privates of the first class acting as officers of the day or officers of the guard, and for cadet first sergeants and color-bearer.....do.....				220 00		
Rugs, mats, and cuspidors for halls of cadet barracks.....do.....				150 00		
Pay of one chief policeman in charge of employes in and around cadet barracks.....	Submitted.....				720 00		
Pay of ten barrack policemen, employed exclusively for cadets in scrubbing floors and windows, sweeping and whitewashing cadet barracks, cleaning bath tubs and sinks, and general policing of grounds.....	Submitted.....				4,800 00		
NOTE.—With regard to the items concerning pay for chief policeman and ten assistants, I would state that before steam was used in heating barracks, extra-duty men were employed looking after the furnaces, and they were paid out of cadet funds, as were also the firemen in the boiler-house until 1871, as far as I can learn, when funds were appropriated for their pay. At that time policemen and firemen at the boiler-house were boarded by the cadet mess, receiving \$25 per month in addition. Since then the pay of cadets has been reduced \$5 per month, and it is a considerable tax upon them to have to defray the expense of general cleaning of barracks, etc.—(Lieut.-Col. H. S. Hawkins, 23d Infantry, Commandant of Cadets.)							
Soap used in scrubbing cadet barracks.....	Submitted.....				50 00		
Department of civil and military engineering:							
Models, maps, purchase and repair of instruments, text-books, books of reference, and stationery for the use of instructors, and contingencies.....	Mar. 2, 1891	26	817	1	500 00		
Extra pay of enlisted man employed as draughtsman.....do.....				256 00		
Department of natural and experimental philosophy:							
Additions to apparatus to illustrate the principles of mechanics, acoustics, optics, and astronomy.....	Mar. 2, 1891	26	818	1	1,000 00		
Books of reference, scientific periodicals, text-books, stationery, materials, and repairs.....do.....				400 00		
Pay of mechanic assistant.....do.....				1,000 00		
Repairs to observatory building and clocks.....do.....				450 00		
NOTE.—The amount of this estimate is the same as last year, but the wording of the appropriation is altered somewhat in order to enable the department to obtain the exact supplies needed.—(Capt. W. H. Miller, A. Q. M., U. S. A.)							
Department of instruction in mathematics, namely:							
Repairs, and materials for preservation of models and instruments.....do.....				25 00		
Text-books, books of reference, binding, and stationery for instructors.....do.....				125 00		
Contingencies.....do.....				25 00		
Department of history, geography, and ethics:							
Text-books, books of reference, maps and globes, and stationery for use of instructors, and repairs.....do.....				150 00		
Department of chemistry, mineralogy, and geology:							
Chemicals, chemical apparatus, glass and porcelain ware, paper, wire, sheet-metal, bres, photographic apparatus and material.....do.....				500 00		
Rough specimens, fossils, and for apparatus and material to be used in the practical determinations of mineralogical and geological specimens, pencils, and paper for practical instruction in the same branches, and for the gradual increase and improvement of the cabinet.....do.....				500 00		

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats. at Large, or to Revised Statutes.			Estimated am't required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ended June 30, 1892.
		Vol. or R. S.	Page.	Sec.			
<i>Current and Ordinary Expenses—Continued.</i>							
Department of chemistry, mineralogy, and geology—Cont'd.							
Repairs and additions to electric, magnetic, pneumatic, thermic, and optical apparatus.....	Mar. 2, 1891	26	818	1	\$650 00		
<i>Provided, That any of the above-named sums not expended for the purposes named may be used in fittings of the laboratory of new academic buildings:</i>							
Pay of mechanic employed in chemical and geological section-rooms and in lecture-rooms.....	do.....				1,000 00		
Models, maps, and diagrams, books of reference, text-books, and stationery for the use of instructors.....	do.....				180 00		
Contingencies.....	do.....				100 00		
NOTE.—The purposes for which the amounts are requested are stated in the usual form, the only change of wording being in the proviso permitting the use of unexpended amounts in fitting up the new laboratory; this proviso is very important, and I hope it may meet the Superintendent's approval.—(Prof. S. E. Tillman, U. S. M. A.)							
Department of drawing:							
Periodicals and books on art and technology.....	do.....				100 00		
Drawing material for use of instructors, drawing instruments for use in instruction, paint, turpentine, oil, varnish, glue, plaster of Paris, cardboard, tacks, tumblers, saucers, cloth for screens, towels, and contingencies.....	do.....				250 00		
Binding periodicals.....	do.....				25 00		
Repairs to desks, racks, and tables, shelving and arrangements in new academies and rooms.....	do.....				250 00		
Photographic material, including chemicals, paper, dry plates, and implements.....	do.....				150 00		
Framing cadets' drawings retained for gallery.....	do.....				40 00		
Models in flat and relief for second and third classes.....	do.....				100 00		
Six prismatic compasses for field topography.....	do.....				90 00		
NOTE.—The above are carefully considered with reference to an economical and efficient administration of the department. In the item for repairs a small allowance is made for necessary shelving, framing, inseparable from a change of location into the new building, not including any of the general furniture for lecture-room and main academies.—(Prof. Chas. W. Larned, U. S. M. A.)							
NOTE.—Last year's estimate for this department exceeds the amount called for herein by \$355, but in this estimate, under the item "for repairs to desks, racks, and tables, shelving and arrangements in new academies and rooms," \$250 are asked for, being an excess of \$175 over the present year's appropriation for the repair of desks, models, stretchers, and material. This increase should be allowed in view of the necessity for fitting up temporary rooms for use of the department, pending completion of the new academic building. The wording of the estimate is, in a few other cases, changed somewhat from that of last year in order that the department may obtain the exact supplies needed.—(Capt. W. H. Miller, A. Q. M., U. S. A.)							
Department of modern languages:							
Stationery, text-books, and books of reference for the use of instructors, for repair and rebinding of text-books and books of reference, and for printing examination papers.....	Mar. 2, 1891	26	819	1	200 00		
NOTE.—The amount of this estimate is the same as last year, but its wording is slightly changed in order that the department may obtain the exact supplies needed.—(Capt. W. H. Miller, A. Q. M., U. S. A.)							
Department of law:							
Stationery, text-books, and books for use of instructors, and for repairing and rebinding same, and furniture for office.....	do.....				250 00		
Department of practical military engineering:							
Purchase and repair of instruments; transportation; purchase of tools, implements, and materials, and for extra-duty pay of engineer soldiers, as follows, namely: instruments for use in instructing cadets in making reconnaissances; photographic apparatus and material for field photography; drawing instruments and material for platting reconnaissances; surveying instruments; instruments and material for signaling and field telegraphy; transportation of field parties; tools and material for the preservation, augmentation, and repair of one wooden ponton, and one canvas ponton-bridge train; sapping and mining tools and material; rope; cordage; material for rafts and for spar and trestle bridges; intrenching tools; tools and							

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats. at Large, or to Revised Statutes.			Estimated am't required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.
		Vol. or R. S.	Page.	Sec.			
<i>Current and Ordinary Expenses—Continued.</i>							
Department of practical military engineering—Continued. material for the repair of Fort Clinton and the batteries at the Academy, and extra-duty pay of engineer soldiers at fifty cents per day each, when performing special skilled mechanical labor in the department of practical military engineering for models, books of reference, and stationery.....	Mar. 2, 1891	26	819	1	\$1,200 00		
NOTE.—The wording of this estimate is slightly changed from that of last year, but the amount called for is the same.—(Capt. W. H. Miller, A. Q. M., U. S. A.)							
Department of ordnance and gunnery:							
Purchase and repairs of instruments, models, and apparatus, and purchase of necessary materials; for the purchase of samples of arms and accouterments other than those supplied to the military service; for books of reference, text-books, stationery, and lithographic printing materials.....	do.....				450 00		
Extra pay of one ordnance soldier, as draughtsman and lithographic printer, at fifty cents per day.....	do.....				143 50		
Extra pay of one ordnance soldier, as machinist, at fifty cents per day.....	do.....				143 50		
Purchase of one Maxim automatic rifle-caliber gun, firing Martini Henry ammunition, complete, with spare parts and appendages, light-field carriage and ammunition therefor, including customs dues at 45 per cent. on cost thereof.....	Submitted.....				2,500 00		
NOTE.—The invention of this arm is considered to be the most important step in ordnance in the past decade. Its principles are taught in the present course, but there is no gun available for practical demonstration, as the arm is not supplied by the Ordnance Department and can be procured only in England. This purchase was recommended by the Board of Visitors of 1889.—(Capt. Henry Metcalfe, Ord. Dept., Instructor of Ordnance and Gunnery.)							
Stationery for office of the treasurer, United States Military Academy, namely: Blank-books, paper, envelopes, steel pens, mucilage, typewriting supplies, blotting-pads, rubber bands, and other items of stationery necessary.....	Mar. 2, 1891	26	819	1	50 00		
NOTE.—The amount of this estimate is the same as that called for last year, but in order to obtain the exact supplies needed the wording of the estimate is changed.—(Capt. W. H. Miller, A. Q. M., U. S. A.)							
Extra pay of two enlisted men, employed as clerks in the offices of the adjutant, United States Military Academy, and commandant of cadets, at fifty cents and thirty-five cents per day respectively.....	Mar. 2, 1891	26	820	1	284 25		
NOTE.—The clerical work in the office of the commandant of cadets is of such a nature as to demand the attendance every day of the year, Sundays and holidays included, of the enlisted man employed as clerk. The sum asked for is, therefore, necessary in order that the clerk may be paid in full for his labor.—(Capt. W. H. Miller, A. Q. M., U. S. A.)							
Extra pay of four enlisted men as printers, at headquarters United States Military Academy, at fifty cents each per day.....	do.....				626 00		
NOTE.—Additional appropriation for the extra-duty pay of of enlisted men as printers is asked for to provide for the employment of one more man. This increase of the office force is asked in order to enable the office to do its work promptly and expeditiously. The three printers for whom appropriations have been annually made can not possibly do all the work which the growth of the Academy entails upon the printing office.—(Second Lieut. J. M. Carson, 5th Cavalry, Adjutant, U. S. M. A.)							
Extra pay of one enlisted man, employed as watchman, at thirty-five cents per day.....	do.....				159 60		
Extra pay of one enlisted man as trumpeter, at the cadet-barracks, at thirty-five cents per day.....	do.....				127 75		
Extra pay of one enlisted man, employed in the philosophical department, Observatory, as mechanic, at fifty cents per day.....	do.....				156 50		
Extra pay of one enlisted man, employed in the chemical department, at fifty cents per day.....	do.....				156 50		
Extra pay of two enlisted men (cavalrymen), when performing special skilled mechanical labor, at fifty cents each per day.....	do.....				313 00		
Provided, That the extra pay provided for by the seven preceding paragraphs shall not be paid to any enlisted man who receives extra-duty pay under existing laws or Army regulations.							

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats. at Large, or to Revised Statutes.			Estimated amt required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.
		Vol. or R. S.	Page.	Sec.			
<i>Current and Ordinary Expenses—Continued.</i>							
Extra pay of one enlisted man, employed as saddler, at fifty cents per day.....	Submitted.....				\$156 50		
NOTE.—As two complete sets of artillery equipments for the light battery, in addition to the horse equipments used by the cavalry detachment and the U. S. corps of cadets, are to be kept in repair, favorable action on this estimate is respectfully recommended.—(Capt. L. A. Craig, 6th Cavalry.)							
Expenses of the Board of Visitors, including mileage.....	Mar. 2, 1891	26	820	1	3,000 00	\$73,613 10	\$63,176 60
<i>Miscellaneous Items and Incidental Expenses—</i>							
Gas-coal, oil, candles, lanterns, matches, chimneys, and wicking for lighting the Academy, chapel, library, cadet-barracks, mess-hall, shops, hospital, offices, stables and riding-hall, sidewalks, camp, and wharves.....	Mar. 2, 1891	26	820	1	5,000 00		
NOTE.—The increase (\$1,500) in this estimate arises from the fact that last year's appropriation for the purchase of gas-coal was totally inadequate for the wants of the post. This year, among other buildings, five new sets officers' quarters, a new gymnasium, and a hospital for enlisted men will be completed, necessitating a large increase in the consumption of gas-making coal. In order that these buildings may be well lighted, and with a view of meeting the increasing demands for more illuminating gas, this estimate is respectfully submitted.—(Capt. W. H. Miller, A. Q. M., U. S. A.)							
Water-pipe, plumbing, and repairs.....	do.....				2,000 00		
Cleaning public buildings (not quarters).....	do.....				600 00		
Brooms, brushes, pails, tubs, soap, and cloths.....	do.....				200 00		
Chalk, crayons, sponges, slate, rubbers, and card for recitation-rooms.....	do.....				300 00		
Compensation of chapel organist.....	do.....				200 00		
Compensation of librarian.....	do.....				120 00		
Pay of engineer of heating and ventilating apparatus for the academic building, the cadet-barracks, and office building, cadet hospital, chapel, and philosophical building, including the library.....	do.....				1,500 00		
Pay of assistant engineer of same.....	do.....				1,000 00		
Pay of five firemen.....	do.....				3,600 00		
NOTE.—The increase (\$600) in this estimate is respectfully recommended for the reason that the sum appropriated last year for the pay of these firemen is not deemed a sufficient remuneration for their services. Since 1871 the capacity of the steam-heating plant has been nearly doubled, at which time five firemen and one man for wheeling coal were employed. No increase in firemen has been made since then, and the extra man for wheeling coal has not been employed for several years. In view of the great increase in the amount of labor imposed upon these men in recent years, with a decrease in help and no extra compensation except the small amount (\$300) allowed in the act making appropriations for the support of the Academy during the current fiscal year, this estimate is respectfully submitted.—(Capt. W. H. Miller, A. Q. M., U. S. A.)							
Pay of librarian's assistant.....	do.....				1,000 00		
Pay of one landscape gardener in charge of cemetery and general care of public grounds.....	do.....				600 00		
NOTE.—The increase of \$100 in the pay of the gardener over last year's appropriation is necessary in order to obtain a competent man for the place.—(Capt. W. H. Miller, A. Q. M., U. S. A.)							
Pay of one superintendent of gas works.....	Submitted.....				1,500 00		
NOTE.—There has been no provision in any of the appropriation bills of previous years for the pay of the superintendent of the gas works, although he has been constantly employed for many years. His pay has come out of the proceeds of gas sold to officers and other persons, which constitutes a fund known as the "gas fund." The draught on this fund for absolutely necessary repairs and additions to apparatus renders it necessary that his pay should be provided for otherwise. It is recommended that he be put upon the same footing as the chief engineer and master mechanic.—(Capt. W. H. Miller, A. Q. M., U. S. A.)							
Pay of one civilian plumber.....	do.....				900 00		
NOTE.—In view of the fact that the entire system of plumbing at the post is in progress of being renewed, and will be completed next year if the appropriation asked for for this purpose (\$18,000) be granted, there will be great necessity to have, for the purpose of keeping it in repair, a force of competent plumbers. Heretofore this repair work has been done by the labor of enlisted men, who are far from being suitable mechanics for the work. As the sanitary condition of the post depends in great measure on the condition of the plumbing, this item is urged for favorable consideration. In addition to this work this employé will be used for repairs to water mains, inlet pipes, and connections.—(Capt. W. H. Miller, A. Q. M., U. S. A.)							

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats. at Large, or to Revised Statutes.			Estimated am't required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ended June 30, 1892.
		Vol. or R. S.	Page.	Sec.			
<i>Miscellaneous Items and Incidental Expenses—Continued.</i>							
Increase and expense of library, namely:							
Periodicals, stationery, binding books, and for scientific, historical, biographical, and general literature; to be purchased in open market on the written order of the Superintendent.....	Mar. 2, 1891	26	820	1	\$2,000 00		
Additional tables, chairs, furniture and contingent repairs of library rooms, and for repairing books	do.....				200 00		
NOTE.—It is recommended that the increase (\$100) in this estimate be allowed, as the amount asked for will be needed to meet next year's expenses incidental to the purchases and repairs noted above.—(Capt. W. H. Miller, A. Q. M., U. S. A.)							
Furniture for cadet-hospital, and repairs of the same.....	do.....				100 00		
Additions and improvements to organ in cadet-chapel.....	Submitted.....				900 00		
NOTE.—As stated last year by Capt. Chas. W. Williams, A. Q. M., U. S. A., "with this amount it is intended to purchase an automatic water motor for blowing the organ, and to remedy certain defects now existing in the instrument with a view of rendering its general effect exceedingly full and majestic." I respectfully recommend favorable action on this estimate, as the working by hand of the bellows of this organ is laborious and objectionable.—(Capt. W. H. Miller, A. Q. M., U. S. A.)							
Contingencies for Superintendent of the Academy.....	Mar. 2, 1891	26	820,'1	1	1,000 00		
Renewing furniture in section-rooms, and repairing the same	do.....				500 00		
Repairs, upholstering, and carpeting the Academy chapel.....	do.....				150 00		
Contingent funds to be expended under the direction of the Academic Board: For instruments, books, repairs to apparatus, and other incidental expenses not otherwise provided for.	do.....				1,000 00		
Provided, That all technical and scientific supplies for the departments of instruction of the Military Academy shall be purchased by contract or otherwise, as the Secretary of War may deem best.							
Purchase and repair of instruments for band, and purchase of music; to be purchased in open market on the order of the Superintendent, and to be immediately available.....	do.....				250 00		
NOTE.—The increase (\$150) over last year's estimate is necessary in order that the band, in addition to having their instruments repaired and replaced from time to time as they become worn-out, may be furnished with the latest and best instrumental music.—(Capt. W. H. Miller, A. Q. M., U. S. A.)							
NOTE.—The estimate for buildings and grounds, Military Academy, will be found under the title "Public Works," post.

<i>Repairs and Improvements, Naval Academy—</i>							
Necessary repairs of public buildings, pavements, wharves, and walls enclosing the grounds of the Naval Academy, improvements, repairs, furniture and fixtures.....	Mar. 2, 1891	26	811	1	21,000 00		21,000 00

a. Increase of pay asked because his present rate of pay is not believed to be commensurate with the duties of his office, which are arduous and important.
 b. Increase asked in order that his pay may be made equal to that of a quarter-gunner in general service. His present pay was that given to such quarter-gunner before the last increase.
 c. An increase of pay for all bandmen is asked, because it is believed that good men can earn more elsewhere than the present rate, and as much as is asked for.
 d. e. If continued at the present rate of pay it is feared that the best will go, leaving only indifferent musicians.
 f. The amount of bookbinding done at the Academy justifies the establishment of the new position, which would tend to economy.
 g. The position of electrician, at \$800 per annum, is recommended because of the amount of work necessary to keep electrical apparatus in proper working condition. The nature of the work requires a skilled mechanic.

NOTE.—List of " * * the number of persons employed outside of the District of Columbia, as superintendents, clerks, watchmen, and otherwise, and paid from appropriations for the construction of public buildings * * * " in accordance with the sundry civil act, approved March 3, 1887 (24 Stat, p. 512), will be found in Appendix "Q." A statement of the expenditure of the appropriation for repairs and preservation of public buildings, in accordance with the sundry civil act approved July 11, 1890, will be found in Appendix "R."							
Total Public Buildings under Treasury Department.....						2,498,729 95	1,063,400 00
LIGHT-HOUSES, BEACONS, AND FOG-SIGNALS.							
<i>Estimates for Special Appropriations.</i>							
<i>Indispensable.</i>							
In the list of items classified as indispensable there are only included items which are urgently required for the protection, care, and efficiency of existing aids to navigation, or for carrying out the expressed will of Congress, and for which partial appropriation may have been made.							
<i>Buffalo Breakwater Fog-Signal, Lake Erie, New York—</i> Establishing a fog-signal at Buffalo Breakwater, north end Lake Erie, New York.....	Submitted.....					\$4,300 00	
NOTE.—The bell used as a fog-signal at this light-station is ineffective, and should, in the interests of commerce, be replaced by a steam fog-signal.							
<i>Cape Meares Light-Station, Tillamook Bay, Oregon—</i> Making a wagon road from Cape Meares Light-Station to the Tillamook River, at an expense not to exceed \$5,000: <i>Provided</i> , That it can be paid for from the appropriation for constructing a light-house at Cape Meares, Oregon, approved March 3, 1887, which payment is hereby authorized.							
NOTE.—The Commissioner of Customs, in answer to an inquiry made by the Light-House Board, decided that the cost of this road could not be paid from the unexpended balance of this appropriation without additional legislative authority. A wagon road from this station to some established line of communication is now an urgent necessity.							

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.			References to Stats. at Large, or to Revised Statutes.			Estimated am't required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.
	Vol. or R. S.	Page.	Sec.						
<p><i>Cape Mendocino Light-Station, California—</i> Construction of a roadway from Cape Mendocino Light-Station to the county road</p> <p>NOTE.—It is proposed to build a practicable wagon-road from the light-station to the county road, half a mile away. Some 1,200 feet of the distance is across private land. It is estimated that to buy a right of way across this strip, pay the legal expenses of acquiring title, and to build the road, will cost the above-named amount.</p>	Submitted.....						\$1,000 00		
<p><i>Cedar Point Light-Station, Maryland—</i> Establishing a light and fog-signal on or near Cedar Point, mouth of Patuxent River, Chesapeake Bay.....</p> <p>NOTE.—The harbor at the mouth of the Patuxent River is the best on the western side of the bay. The light is needed to guide into this harbor, and also for the general navigation of the bay.</p>	Submitted.....						25,000 00		
<p><i>Depot for the Thirteenth Light-House District—</i> Authorizing the expenditure of the appropriation of \$15,000 made by act approved March 3, 1891, for removing the depot, in its repair and extension.....</p> <p>NOTE.—It was proposed to remove the depot from Tongue Point to Astoria. Since the estimate was made the price of land has increased to such extent that the sum appropriated will not purchase the site. The expenditure of the amount appropriated in the repair of the buildings and wharf and the extension of the site will make the depot much more useful.</p>	Mar. 3, 1891 Submitted.....	26	955	1					
<p><i>Eleven-Foot Shoal Light-Station, Lake Michigan, Michigan—</i> That the appropriation of \$60,000 heretofore made in the act approved August 30, 1890, for establishing a light-station on or near Eleven-Foot Shoal, off Point Peninsula, Michigan, be applied, under the direction of the Light-House Board, for the construction or purchase and equipment of one or more light-ships for service on the Great Lakes, and that said appropriation be immediately available for such ships.</p> <p>NOTE.—The amount appropriated being insufficient to build the light-station, the funds appropriated have not been used. It is now proposed to use this sum to provide one or more light-ships for use in this vicinity, as was done in the case of Simmons Reef last year.</p>									
<p><i>Escanaba Fog-Signal, Michigan—</i> Establishing a fog-bell at Escanaba Light-Station, on or near Sand Point, Lake Michigan, Michigan.....</p> <p>NOTE.—A fog-bell, struck by machinery, at this station would be a valuable aid to navigation.</p>	Submitted.....						1,100 00		
<p><i>Frankfort Pierhead Fog-Bell, Michigan—</i> Establishing a fog-bell, operated by machinery, at the light-station on the pierhead at Frankfort, Lake Michigan, Michigan.....</p> <p>NOTE.—A fog-bell is needed as an adjunct to the light in thick weather, when the light can not be seen.</p>	Submitted.....						1,000 00		
<p><i>Grassy Point Range-Lights, Ohio—</i> Establishing a range-light station at Grassy Point for the Straight Channel, Maumee Bay, Ohio.....</p> <p>NOTE.—The Government is cutting this channel, which when completed will be 8 miles long. These range lights will be needed to make it navigable at night.</p>	Submitted.....						8,000 00		
<p><i>Key West Light-Station, Florida—</i> Increasing the height of the tower of the Key West Light-Station, Florida.....</p> <p>NOTE.—Tall trees obstruct the view of the light from the northwest. It is necessary to raise the tower about 20 feet, in order to let the light be seen.</p>	Submitted.....						4,500 00		
<p><i>Nantucket New South Shoal Light-Ship, Massachusetts—</i> Constructing, equipping, and outfitting complete for service a first-class steam light-vessel with a steam fog-signal; and the Light-House Board is authorized to employ temporarily at Washington three draughtsmen, to be paid at current rates, to prepare the plans for the light-house vessels for which appropriation may be made during the Fifty-second Congress; such draughtsmen to be paid from the appropriation for building said vessels; such employment to cease and determine on or before the date when the plans for such vessels being finished, proposals for building said vessels are invited by advertisement.....</p> <p>NOTE.—This station is the most distant, exposed, and isolated in the service. The vessel now there was built in 1855 and is not only old and obsolete in build and fittings, but is without a steam fog-signal. The vessel on this post should be a model ship.</p>	Submitted.....						70,000 00		

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats. at Large, or to Revised Statutes.			Estimated am't required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.
		Vol. or R. S.	Page.	Sec.			
<i>Oil-Houses for Light-Stations—</i> Establishing isolated oil-houses for the storage of mineral oil.....	Oct. 2, 1888 Aug. 30, 1890 Mar. 3, 1891	25 26 26	509 375 956	1 1 1	\$15,000 00	\$15,000 00
NOTE.—The introduction of mineral oil into general use in the Light-House Service greatly increases the danger from fire and necessitates greater storage capacity. As there are no proper means at present of storing the large quantities for annual supply, it is proposed to erect small buildings entirely separated from any others, thus avoiding the danger from fire as far as possible.							
<i>Oswego Fog-Signal, New York—</i> Establishing a steam fog-signal at Oswego Light-Station, Lake Ontario, New York.....	Submitted.....						
NOTE.—There is a bell at this station. Captains report failure to hear it when within half a mile. This uncertainty of a bell as a fog-signal is generally admitted. The substitution of a steam fog-signal for the bell is called for by commercial interests.							
<i>Patrol Steamer for St. Mary's River, Michigan—</i> Hiring a patrol steamer for use on St. Mary's River, Michigan.....	Mar. 3, 1891	26	954	1	4,000 00	4,000 00
NOTE.—An appropriation was made of this same amount for this same purpose by the last Congress. The patrol steamer is replacing the buoys which mark the channel lines in the river, immediately after their displacement by rafts and the like, and doing the work promptly and effectually. It is deemed necessary to continue this work.							
<i>Pere Marquette Fog-Signal, Michigan—</i> Establishing a steam fog-signal at or near Pere Marquette Light-Station, Ludington, Lake Michigan, Michigan.....	Submitted.....				5,500 00		
NOTE.—The extension of the pier on which the light stands is progressing rapidly and will soon be finished. A steam fog-signal has long been needed, and its establishment is now practicable.							
<i>Point-No-Point Light-Station, Maryland—</i> Establishing a light-station on or near the shoal off Point-No-Point, Chesapeake Bay, Maryland.....	Submitted.....				35,000 00		
NOTE.—A deviation from their sailing course might carry vessels of heavy draught on to dangerous shoals. A light on this shoal is needed.							
<i>St. Mary's River Upper Range-Lights, Michigan—</i> Moving the range-lights on or near Round Island, St. Mary's River, Michigan.....	Submitted.....				2,000 00		
NOTE.—The conditions in the vicinity of Round Island and Point Iroquois are unsatisfactory. It is proposed to remedy the evils by abandoning the present upper range, and moving the buildings to a new line, and shifting the lower St. Mary's range somewhat to the southward.							
<i>Staten Island Light-House Depot, New York—</i> Continuing the construction of the sea-wall at the general light-house depot at Tompkinsville, Staten Island.....	Mar. 3, 1891	26	954	1	40,000 00	25,000 00
NOTE.—This sea-wall is necessary for the protection of the wharves and vessels of the Light-House Establishment.							
<i>Superior Bay Lights, Wisconsin—</i> Establishing post-lights from the entrance to Connor's Point, in Superior Bay, Lake Superior, Wisconsin.....	Submitted.....				1,200 00		
NOTE.—It is claimed that 900 vessels will pass in and out of this port this year. This channel can not be navigated with safety at night without these lights.							
<i>Tender for the Ninth Light-House District—</i> Constructing, equipping, and outfitting complete for service, a new steam tender for use in the Ninth Light-House District; and the Light-House Board is authorized to employ temporarily at Washington three draughtsmen, to be paid at current rates, to prepare the plans for the light-house vessels for which appropriation may be made during the Fifty-second Congress; such draughtsmen to be paid from the appropriation for building said vessels; such employment to cease and determine on or before the date when the plans for such vessels being finished, proposals for building said vessels are invited by advertisement.....	Submitted.....				95,000 00		
NOTE.—The <i>Dahlia</i> , which was built in 1873, is nearly worn out. A larger and faster vessel is needed, one strong enough to keep at work in the young ice while merchant vessels are running and which shall embody all the improvements made of late in lake vessels. As her headquarters will be at Chicago, and as she will be much visited during the Columbian Exposition, she should be a model light-house steam-tender.							

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats. at Large, or to Revised Statutes.			Estimated am't required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.
		Vol. or R. S.	Page.	Sec.			
<p><i>Yaquina Bay Lights, Oregon—</i> Establishing inexpensive lights at or near Yaquina Bay, Oregon.....</p> <p>NOTE.—The growing commerce of this region makes night passage in and out of the bay necessary. The lights are required for the safety of the vessels going in and out at night.</p> <p><i>Estimates for Special Appropriations.</i> <i>Necessary.</i></p> <p>In the list classified as necessary are included, first, those items which have already been approved by acts of Congress, but for which no appropriations have been made; second, those items which, in the opinion of the Board, are urgently necessary for the safe and convenient navigation of the waters of the various localities.</p>	Submitted.....				\$300 00	\$317, 200 00	\$44, 000 00
<p><i>Big Oyster Beds Light-Station, New Jersey—</i> Establishing a light and fog-signal at or near Big Oyster Beds Shoal, mouth of Maurice River, Delaware Bay.....</p> <p>NOTE.—It would be greatly to the interest of the small fishing-craft navigating this river to establish a light at or near the southern edge of the shoal above mentioned.</p>	Submitted.....				25, 000 00		
<p><i>Butler's Flats Light-Station, Massachusetts—</i> Establishing a light and fog-signal on or near Butler's Flats, entrance to the lower harbor of New Bedford, to take the place of Clark's Point and Fairhaven Bridge lights.....</p> <p>NOTE.—The entrance to the lower harbor of New Bedford, at Butler's Flats, where vessels alter course, is narrow, and in fog and at night is obscure, difficult, and hard to find. If a light and fog-signal were placed on Butler's Flats vessels inward-bound could run straight for it into the narrow entrance, and outward-bound could run directly for it through the lower reach of channel. Vessels making the port in rough weather would be guided to good anchorage. The lights at Clark's Point and Fairhaven Bridge would no longer be needed, and could be discontinued.</p>	Submitted.....				45, 000 00		
<p><i>Cape Flattery Light and Fog-Signal Station, Washington—</i> Re-establishing the fog-signal at Cape Flattery Light-Station upon a new site.....</p> <p>NOTE.—It is found that the fog-signal at this important station will be much more effective as an aid to mariners, if removed to West Island. The change would make it necessary to build new structures for accommodation of the signal and a new dwelling for the keeper.</p>	Submitted.....				17, 000 00		
<p><i>Cheboygan River Front Range Light-Station, Michigan—</i> Authorizing the purchase of additional land for the Cheboygan River Front Range Light-Station, Straits of Mackinac, Michigan.....</p> <p>NOTE.—The light-house lot is narrow, and its entire front is occupied by the light-house buildings. The cellar is often inundated, and there is no drainage, or means of any, except over private land to the river. It is proposed to purchase an adjoining lot at the side of the light-house lot, which runs down to the river.</p>	Submitted.....				1, 750 00		
<p><i>Deadman's Island, San Pedro Harbor Light-Station, California—</i> Establishing a light and fog-signal station at or near Deadman's Island, to mark the entrance to San Pedro Harbor.....</p> <p>NOTE.—This is the sea-port for Los Angeles, and large quantities of coal, lumber, and general freight are brought here.</p>	Submitted.....				5, 000 00		
<p><i>Doboy Sound Range-Lights, Georgia—</i> Establishing additional range-lights to guide vessels from the present Sapelo Island Range to a safe anchorage.....</p> <p>NOTE.—The two present ranges guide vessels to the intersection of the Wolf Island and Sapelo Ranges, and leaves them there without guidance in a dangerous position if they anchor, and with the Knuckles and the Chimney Spit Shoal on either side if they proceed.</p>	Submitted.....				1, 500 00		
<p><i>Detroit River Light-Vessels—</i> The construction or purchase, equipment and maintenance of three small light-vessels for use in the Detroit River, Michigan.....</p> <p>NOTE.—There are now three floating lights maintained in the Detroit River by private parties. They should be brought under the control of the Government.</p>	Submitted.....				8, 600 00		

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats. at Large, or to Revised Statutes.			Estimated am't required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.
		Vol. or R. S.	Page.	Sec.			
<p><i>Doller Point Range-Lights, Virginia—</i> Establishing range-lights between Doller's Point and Hog Island Wharf, James River, Virginia.....</p> <p>NOTE.—Lights are needed on James River, between Doller's Point and Hog Island Wharf, to guide vessels through the narrow and shallow channel known as Goose Hill Slough, between Hog Island and Jamestown Island, and to guide through another difficult channel from Deep-Water Shoals light to Hog Island, where a sharp turn is made to enter Goose Hill Slough. The need is shown by the fact that lights have been maintained for several years at these points by private enterprise.</p>	Submitted.....				\$2,500 00		
<p><i>Eagle Harbor Fog-Signal, Michigan—</i> Establishing a steam fog-signal at Eagle-Harbor Light-Station, Lake Superior, Michigan.....</p> <p>NOTE.—A steam fog-signal at this station would be a valuable aid to navigation.</p>	Submitted.....				5,500 00		
<p><i>Galloo Island Fog-Signal, New York—</i> Establishing a steam fog-signal at Galloo Island Light-Station, Lake Ontario, New York.....</p> <p>NOTE.—Vessels need to locate this light as soon as possible. Fog and thick weather often prevail, especially in the fall. At such times the position of the station can only be made known by a fog-signal.</p>	Submitted.....				5,700 00		
<p><i>Menasha Range-Lights, Michigan—</i> Establishing range-lights on Menasha River, a tributary to Lake Michigan, Michigan.....</p> <p>NOTE.—The re-establishment of the light which was discontinued and the establishment of another small light will guide vessels through the earth-cut and the rock-cut, which are quite intricate.</p>	Submitted.....				500 00		
<p><i>Mobile Ship-Channel Lights, Alabama—</i> Establishing additional lights in the Mobile ship-channel, Alabama.....</p> <p>NOTE.—This channel was cut by the Government at great expense. The lights already established are found to be insufficient for the growing commerce. Five additional light-stations are required to make the channel fairly navigable at night.</p>	Submitted.....				60,000 00		
<p><i>New York Slough Light and Fog-Signal Station, California—</i> Establishing a light and fog-signal station at New York Slough, entrance to the San Joaquin River from Suisun Bay.....</p> <p>NOTE.—This slough constitutes a short and deep passage from Suisun Bay into the San Joaquin River, and is used by the steamers, sailing craft, barges, etc., engaged in the great river traffic of California. Accidents have been frequent and unavoidable at night and in fog. The Board has placed post-lights here as a temporary expedient, but they are insufficient.</p>	Submitted.....				10,000 00		
<p><i>Puget Sound Beacon-Lights, Washington—</i> Establishing beacon-lights and maintaining them for a year in or near Puget Sound and adjacent or tributary waters.....</p> <p>NOTE.—The demand for these lights is increasing with the growing commerce of these waters. Now that night passages are being attempted, beacon-lights are necessary to safety.</p>	Submitted.....				10,000 00		
<p><i>Rockland Lake Light-Station, New York—</i> Establishment of a light-house and fog-signal at or near Oyster Bed Shoal, Hudson River, opposite Rockland Lake Dock.....</p> <p>NOTE.—Steamers lay their course close by Rockland Lake Landing, making near there an important turning-point. By placing a light and fog-signal on the shoal off the landing much greater security will be given, especially as many of the new steamers are propellers of such draught as to make the shoal dangerous. This was authorized by the act of March 2, 1889, but no appropriation was made to do the work.</p>	Mar. 2, 1889	25	889	1	35,000 00		
<p><i>St. Catharine's Sound Light-Station, Georgia—</i> Establishment of a light-station near the entrance to St. Catharine's Sound, Georgia.....</p> <p>NOTE.—An unlighted gap exists here between Tybee and Sapelo lights. A large number of vessels sight land for the first time in this locality. This was authorized by the act of March 2, 1889, but no appropriation was made to do the work.</p>	Mar. 2, 1889	25	1017	1	20,000 00		

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats. at Large, or to Revised Statutes.			Estimated amt required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.
		Vol. or R. S.	Page.	Sec.			
<p><i>St. Simon's Range-Beacon, Georgia—</i> Establishing a small light to make a range at St. Simon's Light-Station.....</p> <p>NOTE.—A small light with the present St. Simon's light as a rear beacon, leads through fairly good water into St. Simon's Sound, and would make it a harbor of refuge for vessels drawing not more than 12 feet of water.</p>	Submitted.....				\$1,000 00		
<p><i>South Fox Island Fog-Signal, Michigan—</i> Establishing a steam fog-signal at South Fox Island Light-Station, Lake Michigan.....</p> <p>NOTE.—The passage between South Fox and North Manitow Islands is much used by vessels. A steam fog-signal here would make the passage available in thick weather.</p>	Submitted.....				5,500 00		
<p><i>Spring Point Ledge Light and Fog-Signal Station, Maine—</i> Establishing a light and fog-signal on Spring Point Ledge, Portland Harbor, Maine.....</p> <p>NOTE.—With a bell and a small light on Spring Point Ledge, vessels could always change their course there in thick weather by day and by night at this dangerous point. More than half a million of passengers were carried by this ledge last year, and it is expected that the number will increase year by year.</p>	Submitted.....				45,000 00		
<p><i>Warwick Fog-Signal, Rhode Island—</i> Establishing a steam fog-signal at Warwick Light-Station, Rhode Island.....</p> <p>NOTE.—A steam fog-signal is much needed at this point.</p>	Submitted.....				5,000 00	\$309,550 00	
<p><i>Estimates for Special Appropriations.</i></p> <p><i>Desirable.</i></p> <p>In the list classified as desirable there are included items which, in the opinion of the Board, are necessary to carry out the general scheme for the lighting of our coasts, and which would be of great service to navigation.</p>							
<p><i>Absecon Buoy Depot, New Jersey—</i> Completion of the purchase of a site and the erection of a buoy depot at Absecon Inlet, New Jersey.....</p> <p>NOTE.—An appropriation of \$1,500 for the purchase of a site and the erection of a buoy depot at Absecon Inlet, New Jersey, was made by act approved on October 2, 1888, but it was found that the amount was insufficient, and a further appropriation is needed.</p>	Submitted.....				2,000 00		
<p><i>Absecon Light-Station, New Jersey—</i> Construction of a keeper's dwelling.....</p> <p>NOTE.—There are three keepers employed at this station. It has but two sets of quarters. Another set of quarters is needed.</p>	Submitted.....				4,000 00		
<p><i>Alligator River Light-Station, North Carolina—</i> Establishing a light and fog-signal station at or near Great Shoal, at the mouth of the Alligator River, Albemarle Sound, North Carolina.....</p> <p>NOTE.—Alligator River furnishes the only harbor for the 30 miles of coast between Croatan and Laurel Point Light-Houses in Albemarle Sound. This light is needed to make that harbor available at night.</p>	Submitted.....				20,000 00		
<p><i>Assateague Light-Station, Virginia—</i> Construction of a keeper's dwelling.....</p> <p>NOTE.—There are three keepers employed at this station. It has but two sets of quarters. Another set of quarters is needed.</p>	Submitted.....				4,000 00		
<p><i>Baltimore Light and Fog-Signal Station, Maryland—</i> Establishing a light and fog-signal station at or near the junction of New Cut-Off Channel and Craighill Channel, Baltimore Harbor, Maryland.....</p> <p>NOTE.—The Government has spent large sums in dredging out these two channels. This light is needed to make them available at night for large vessels. Owing to the push of moving ice at this point, a very strong and consequently expensive foundation for the light is needed.</p>	Submitted.....				60,000 00		
<p><i>Barnegat Light-Station, New Jersey—</i> Construction of a keeper's dwelling.....</p> <p>NOTE.—There are three keepers employed at this station. It has but two sets of quarters. Another set of quarters is needed.</p>	Submitted.....				4,000 00		

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats. at Large, or to Revised Statutes.			Estimated am't required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.
		Vol. or R. S.	Page.	Sec.			
<i>Bayfield Light-Station, Wisconsin—</i> Establishing a light-station at Bayfield, Lake Superior, Wisconsin.....	Submitted.....				\$5,000 00		
NOTE.—This is said to be the best harbor of refuge on that coast. The commerce of the place also is increasing. To make the harbor available at night a light is needed.							
<i>Bay State Shoal and Oak Point Shoal Light-Stations, New York—</i> Establishing temporary floating lights on Bay State Shoal and Oak Point Shoal, Lake Ontario, New York.....	Submitted.....				800 00		
NOTE.—These shoals are well marked with buoys, which serve for crossing by daylight. The need for vessels to cross at night is increasing each year. Two small flats with lantern-lights will make the crossing safe at night.							
<i>Beaufort Harbor Range Lights, North Carolina—</i> Establishing range lights at the entrance to Beaufort Harbor, North Carolina.....	Submitted.....				10,000 00		
NOTE.—This is the only harbor of importance between Chesapeake Bay and Wilmington, a distance of some 200 miles. The channel across the bar is narrow but straight; and if properly marked by range lights, would lead into the safest and easiest harbor to enter at night between Hampton Roads and Savannah.							
<i>Black Ledge Light-Station, Connecticut—</i> Establishing a light and fog-signal at or near Black Ledge, New London Harbor, Long Island Sound, Connecticut.....	Submitted.....				45,000 00		
NOTE.—The numerous outlying shoals and ledges surrounding the entrance to this harbor make the approach to it dangerous in thick weather. The present light-station is so far inside the obstruction that it is partially ineffective. The commerce of the harbor has greatly increased, and a naval station has been established in this harbor since the establishment of the old light.							
<i>Bodega Head Light and Fog-Signal Station, California—</i> Establishing a light and fog-signal at or near Bodega Head, California.....	Submitted.....				30,000 00		
NOTE.—The stretch of coast between Point Reyes Light-Station and Bodega Head has become notorious as the scene of many wrecks, due to foggy weather and uncertain currents. It is believed that the establishment of a powerful fog-signal and a small light will do away with its peculiar danger.							
<i>Boon Island Light-Station, Maine—</i> Construction of a keeper's dwelling.....	Submitted.....				3,400 00		
NOTE.—Three keepers are employed at this station. There are but two sets of quarters. Another set of quarters is needed.							
<i>Cape Elizabeth Light-Station, Maine—</i> Construction of a keeper's dwelling.....	Submitted.....				3,300 00		
NOTE.—Four keepers are employed at this station. There are now but three sets of quarters. Another set of quarters is needed.							
<i>Cape Fear Light-Station, North Carolina—</i> Establishment of a first-order light-station at or near the pitch of Cape Fear, North Carolina.....	Submitted.....				150,000 00		
NOTE.—The present Cape Fear (Bald Head) light, because of its inland location and lack of height, is inadequate as a proper aid to navigation. The interests of commerce require that a first-order light be established, on or near the pitch of Cape Fear, at the earliest date practicable.							
<i>Cape Hatteras Light-Station, North Carolina—</i> New dwelling and oil-house at Cape Hatteras Light-Station.....	Submitted.....				5,000 00		
NOTE.—The Cape Hatteras beacon has been recently re-established, and as an additional keeper is required for it, additional quarters are necessary. A detached oil-house is required for storing the oil that at present endangers the station.							
<i>Cape May Boat-House, New Jersey—</i> To complete the purchase of a site and the erection of a boat-house for light-ships' boats at Cape May, N. J.....	Submitted.....				800 00		
NOTE.—An appropriation of \$750 was made for this purpose by the act approved on October 2, 1888. The cost of the land and the legal expenses of obtaining it about exhausted the appropriation. The further appropriation is needed for the erection of a suitable building.							
<i>Carlton's Island Light-Station, New York—</i> Establishing a light-station at or near Carlton's Island, Lake Ontario, New York.....	Submitted.....				8,600 00		
NOTE.—The channel for large vessels near Carlton's Island, which crosses from the American to the Canadian side, is both dark and obscure. A small light would make it available at night to heavy tonnage.							

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats. at Large, or to Revised Statutes.			Estimated am't required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.
		Vol. or R. S.	Page.	Sec.			
<p><i>Chequamegon Point Light and Fog-Signal Station, Wisconsin—</i> Moving and rebuilding the main La Pointe light and establishing a harbor bell and light at or near Chequamegon Point, Lake Superior, Wisconsin.....</p> <p>NOTE.—By the act of March 2, 1889, the steam fog-signal was authorized and appropriated for. The present light at La Pointe should be nearer to the inner point, that it may be a great help to vessels to clear it. A harbor light and a fog-bell should be placed on the inner point towards Houghton.</p>	Oct. 1, 1888 Mar. 2, 1889 Submitted.....	25 25	499 943	1 1	} \$10,000 00		
<p><i>Clark's Ledge Light-Station, Maine—</i> Establishing a light and fog-signal station on or near Clark's Ledge, entrance to St. Croix River, Maine.....</p> <p>NOTE.—A light and fog-signal are needed here to guide vessels to the entrance to the river clear of the whirlpools off Deer Point and of the eddy above Dog Island, both of which are very powerful. Also needed to keep vessels off ledges above and below Dog Island, submerged at high water.</p>	Submitted.....				30,000 00		
<p><i>Cutter for the Fifteenth Light-House District—</i> Constructing, equipping, and outfitting, complete for service, a steam-cutter for use in the Fifteenth Light-House District; and the Light-House Board is authorized to employ temporarily at Washington three draughtsmen, to be paid at current rates, to prepare the plans for the light-house vessels, for which appropriation may be made during the Fifty-second Congress; such draughtsmen to be paid from the appropriation for building said vessels; such employment to cease and determine on or before the date when, the plans for such vessels being finished, proposals for building said vessels are invited by advertisement.....</p> <p>NOTE.—The tender for the Fifteenth Light-House District is none too large for use on the Mississippi and the Missouri in season of high or ordinary water, but her draught is too much to be used during low water. A small steam cutter can be used in many cases much more economically than the tender <i>Lily</i>, as it can be run with much less fuel and many less men.</p>	Submitted.....				5,000 00		
<p><i>Devils Island Light and Fog-Signal Station, Wisconsin—</i> Constructing a permanent tower.....</p> <p>NOTE.—The light is now shown from a temporary skeleton frame tower. A permanent tower is needed.</p>	Mar. 3, 1891 Submitted.....	26	954	1	} 22,000 00	\$5,500 00	
<p><i>Dog River Bar Light-Station, Alabama—</i> Establishing a permanent light-station to mark the Dog River Bar channel, Mobile Bay.....</p> <p>NOTE.—The present system of lights is inadequate for running vessels up to Mobile during the night.</p>	Submitted.....				20,000 00		
<p><i>Fairport Light and Fog-Signal Station, Ohio—</i> Establishing a steam fog-signal at Fairport Harbor, Lake Erie, Ohio.....</p> <p>NOTE.—The bell used as a fog-signal at this station is inefficient, and should be replaced by a steam fog-signal.</p>	Submitted.....				4,700 00		
<p><i>Forty-Mile Point Light and Fog-Signal Station, Michigan—</i> Establishing a light and steam fog-signal in the vicinity of Hammond's Bay, about half-way between Cheboygan and Presqu'ile Lights, Lake Huron, Michigan.....</p> <p>NOTE.—There is no light on the 50 miles of coast between Cheboygan and Presqu'ile lights. The commerce of the vicinity is of great magnitude and value, and due regard for its safety makes it requisite that a light and steam fog-signal should be placed somewhere about midway between the two named.</p>	Submitted.....				25,000 00		
<p><i>Gas-Buoys—</i> For purchase of gas-buoys.....</p> <p>NOTE.—Gas-buoys are needed to take the place temporarily of light-ships when under repair, to mark wrecks by night, and warn shipping from ledges, shoals, and other hidden dangers.</p>	Mar. 3, 1891	26	956	1	30,000 00	30,000 00	
<p><i>Gladstone Light-Station, Michigan—</i> Establishment of a light-station to guide into Gladstone Harbor, Little Bay de Noquette.....</p> <p>NOTE.—It is stated that the Minneapolis, Sault Ste. Marie and Atlantic Railroad will make this an important shipping port. Last year over 300 vessels entered the harbor, and it is expected that next year the number will exceed 1,000.</p>	Submitted.....				10,000 00		

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats. at Large, or to Revised Statutes.			Estimated amt required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.
		Vol. or R. S.	Page.	Sec.			
<p><i>Gray's Harbor Light and Fog-Signal Station, Washington—</i> Establishing a first-order light and fog-signal station at Gray's Harbor, Washington, in addition to the amount already appropriated</p> <p>NOTE.—On further examination it is found that a small light will be inadequate for the needs of commerce at this point.</p>	July 7, 1884 Submitted.....	23	198	1	} \$60,000 00		
<p><i>Green Island Light-Station, Maine—</i> Establishing a light-station on Green Island, near the entrance to Burnt Coat Harbor</p> <p>NOTE.—Burnt Coat Harbor is an excellent and capacious harbor of refuge. The range-lights which guided to the harbor were unsatisfactory, and a vessel was wrecked in 1833, while trying to make the harbor by their aid. One of them was accordingly discontinued, and it is proposed to erect in its stead a light-house on Green Island, about 1 mile to the southward of the entrance.</p>	Submitted.....					12,000 00	
<p><i>Heron Neck Light-Station, Maine—</i> Construction of a keeper's dwelling.....</p> <p>NOTE.—The keeper's dwelling, which was built in 1853, was built by contract. The joints in its walls do not exclude moisture. The building is very damp. The site is of saturated soil. The dwelling is so unhealthy that five deaths have occurred in it.</p>	Submitted.....				3,300 00		
<p><i>Hillsboro' Inlet Light-Station, Florida—</i> Establishing a light-station at or near Hillsboro' Inlet, sea-coast of Florida.....</p> <p>NOTE.—A light on this important point is necessary to complete the system for this dangerous coast.</p>	Submitted.....				90,000 00		
<p><i>Hog Island Light-Station, Virginia—</i> Establishing a first-order light to take the place of the fourth-order one now at Hog Island, south side of Great Machipongo Inlet, sea-coast of Virginia.....</p> <p>NOTE.—The light now on Hog Island does not illuminate the entire interval between Assateague and Cape Charles. It is considered important to commerce that this dangerous coast should be fully lighted, and it is therefore proposed to place a first-order light on a tower 150 feet high.</p>	Mar. 3, 1891 Submitted.....	26	955	1	} 125,000 00		
<p><i>Hog Island Shoal Light-Vessel, Rhode Island—</i> Constructing, equipping, and outfitting, complete for service, a first-class steam light-vessel, with steam fog-signal; and the Light-House Board is authorized to employ temporarily at Washington three draughtsmen, to be paid at current rates, to prepare the plans for the light-house vessels, for which appropriation may be made during the Fifty-second Congress; such draughtsmen to be paid from the appropriation for building said vessels; such employment to cease and determine on or before the date when, the plans for such vessels being finished, proposals for building said vessels are invited by advertisement.....</p> <p>NOTE.—The vessel now on this station is old, obsolete in fittings, structurally weak, and will hardly more than last until a proper vessel is built to take her place.</p>	Submitted.....					70,000 00	
<p><i>Inside Passage Beacon-Lights, Georgia and Florida—</i> Establishing beacon-lights in the Inside Passage from Savannah, Georgia, to Fernandina, Florida.....</p> <p>NOTE.—This passage, which runs nearly parallel with the ocean, is largely used in daylight by river steamers and small craft not strong enough to go to sea. The establishment of some 25 post-lights would make it almost equally navigable by night.</p>	Submitted.....				4,000 00		
<p><i>Lazaretto Point Light-House Depot, Maryland—</i> Construction of a dwelling for the accommodation of the keeper of the Lazaretto Point Light-House Depot.....</p> <p>NOTE.—The quarters now occupied by the keeper are in the warehouse; they are unsuitable and uncomfortable. It would cost nearly as much to make the present quarters habitable as it would to build a new dwelling, even if the room thus occupied was not required for other purposes. The depot-keeper must be constantly on the spot, and therefore can not live away from the premises.</p>	Submitted.....				2,500 00		
<p><i>Libby Island Light-Station, Maine—</i> Construction of a keeper's dwelling.....</p> <p>NOTE.—There are three keepers employed at this station. There are but two sets of quarters. Another set of quarters is needed.</p>	Submitted.....				3,200 00		

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats. at Large, or to Revised Statutes.			Estimated am't required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.
		Vol. or R. S.	Page.	Sec.			
<p><i>Little Gull Island Light and Fog-Signal Station, Michigan—</i> Establishing a light and fog-signal station on or near Little Gull Island, St. Martin's Passage, entrance to Green Bay, Lake Michigan, Michigan.....</p> <p>NOTE.—St. Martins Passage, though relatively narrow, is deep and clear, and can be made, by a light and fog-signal on Little Gull Island, and another on the northwest end of St. Martins, which has been recommended elsewhere, a very excellent passage.</p>	Submitted.....				\$20,000 00		
<p><i>Little River Fog-Signal, Maine—</i> Establishing a steam fog-signal in place of the bell now at the Little River Light-Station, Cutler Harbor, Maine....</p> <p>NOTE.—Cutler Harbor is a station of the Eastport, St. John's, and Bay of Fundy pilots. It is rapidly growing as a summer resort. Vessels entering the Bay of Fundy first make Libby Island, and then try to make Little River light. Steamers of the International Line wish to make this harbor a stopping place. They carry much freight and many passengers. It is the only near harbor of refuge, and is used as such by vessels when they can get in; but this is impossible in a fog without a fog-signal. On July 21, 1889, the Spanish steamer Eduardo, bound for St. John's, struck on Old Man Ledge, 2 miles south of Cutler Harbor, during a dense fog. The crew of forty persons was saved, but the ship, valued at \$285,000, was a total loss.</p>	Submitted.....				10,500 00		
<p><i>Ludington Pierhead Light and Fog-Signal Station, Michigan—</i> Construction of a light-keeper's dwelling at or near Ludington Pierhead light and fog-signal station, Lake Michigan, Michigan.....</p> <p>NOTE.—There is no dwelling for the light and fog-signal keepers at this station. One is needed.</p>	Submitted.....				4,500 00		
<p><i>Matineus Rock Light-Station, Maine—</i> Construction of a keeper's dwelling.....</p> <p>NOTE.—Four keepers are employed at this station. They and their families are the only inhabitants of this rock. There are now but three sets of quarters for the four keepers. Another set is needed.</p>	Submitted.....				3,200 00		
<p><i>Mount Cornelia Light-Station, Florida—</i> Establishment of a first-order light-station on or near Mount Cornelia, north side of the mouth of the St. John's River, Florida.....</p> <p>NOTE.—The light now maintained at the mouth of the St. John's River is of the third order. For years there have been complaints of its inefficiency as a sea-coast light. A first-order light on Mount Cornelia would answer the requirements of commerce.</p>	Submitted.....				175,000 00		
<p><i>North Head Light-Station, Washington—</i> Establishment of a first-order light on North Head, Cape Disappointment, sea-coast of Washington.....</p> <p>NOTE.—The present light at Cape Disappointment is inadequate. It is proposed to establish a first-order light at North Head and reduce that at Cape Disappointment to the fourth order. When the proposed lights which are being constructed at Gray's Harbor and Destruction Island are completed it will only need the proposed light at North Head to finish the lighting of the coast from Cape Flattery to Tillamook Rock with first-order lights.</p>	Submitted.....				50,000 00		
<p><i>Point Arguello Light and Fog-Signal Station, California—</i> Establishing a light and fog-signal station at or near Point Arguello, sea-coast of California.....</p> <p>NOTE.—This is a prominent point about 12 miles north of Point Conception, and one of the foggiest regions of the Pacific coast. A sharp bend in the coast here makes it particularly desirable that proper aids should be established.</p>	Submitted.....				35,000 00		
<p><i>Point Buchon Light and Fog-Signal Station, California—</i> Establishing a light and fog-signal station at or near Point Buchon, near San Luis Obispo.....</p> <p>NOTE.—This is a prominent and dangerous point, where vessels going to and from Port Harford make a sharp turn.</p>	Submitted.....				33,000 00		
<p><i>Point Pinos Light-Station, California—</i> Purchase of land for landing supplies at Point Pinos Light-Station, entrance to Monterey Harbor.....</p> <p>NOTE.—There is at present no sea front to the light-house site. For convenience of landing stores and supplies it is essential that the United States should own a strip between the light-house and the sea-coast.</p>	Submitted.....				2,000 00		

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats. at Large, or to Revised Statutes.			Estimated am't required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.
		Vol. or R. S.	Page.	Sec.			
<i>Pointe Seul Choix Light and Fog-Signal, Michigan—</i> Increasing the appropriation for establishing a light and fog-signal station at or near Pointe Seul Choix, Lake Michigan, Michigan.....	May 1, 1886 Aug. 4, 1886 Submitted.....	24 24	19 225	1 1	} \$5,000 00		
NOTE.—An appropriation of \$15,000 was made by act of August 4, 1886. It has been found insufficient; \$3,500 more is needed to establish the light, and \$5,500 more is also needed to place a steam fog-signal here.							
<i>Portage Lake Light-Station, Michigan—</i> Constructing a keeper's dwelling at or near Portage Lake Pierhead Range, Portage Lake Harbor, Lake Michigan.....	Submitted.....					3,500 00	
NOTE.—A dwelling for the keeper of this new light should be erected, as there are but few houses in this vicinity which can be used as quarters.							
<i>Porte des Morts Range-Lights and Fog-Signal Station, Michigan—</i> Establishing range-lights and a steam fog-signal on or near Plum Island in the Porte des Morts (Death's Door) passage, entrance to Green Bay, Lake Michigan, Michigan.....	Submitted.....				21,000 00		
NOTE.—These aids to navigation would be invaluable to vessels going through this passage at night or in thick weather.							
<i>Pork Point Light-Station, North Carolina—</i> Establishing a light and fog-signal station off Pork Point, Roanoke Island, Croatan Sound.....	Submitted.....				20,000 00		
NOTE.—A large inland commerce navigates these waters and many serious accidents have occurred at this place for want of a light. It is also a turning-point for vessels navigating the Sound.							
<i>Presqu'ile Pierhead Fog-Signal, Pennsylvania—</i> Establishing a steam fog-signal at Presqu'ile Pierhead Light-Station, entrance to Presqu'ile Bay, Erie Harbor, Lake Erie, Pennsylvania.....	Submitted.....				4,300 00		
NOTE.—The bell used here is ineffective, and should be replaced by a steam fog-signal.							
<i>Punta Gorda Light and Fog-Signal Station, California—</i> Establishing a light and fog-signal station, at or near Punta Gorda, between Shelter Cove and Cape Mendocino, California.....	Submitted.....				40,000 00		
NOTE.—There are here several dangerous sunken rocks that add to the hazards of navigation, and in dark nights the overhanging mountains keep the shore line in dark shadows, so as to confuse even the most experienced.							
<i>Round Island Light and Fog-Signal Station, Michigan—</i> Authorizing the establishment of a light and steam fog-signal at Round Island, Lake Huron, Michigan.....	Submitted.....				15,000 00		
NOTE.—This light and fog-signal are needed to enable vessels to hold a safe and close course through the narrow strait between Mackinac and Round Islands. As Round Island is owned by the Government a site can be provided without expense.							
<i>St. Joseph's Pierhead Fog-Signal, Michigan—</i> Establishing a steam fog-signal on or near the north pier of St. Joseph's Harbor, Lake Michigan, Michigan.....	Submitted.....				5,000 00		
NOTE.—The fog-bell at the light-tower is ineffective, and should be replaced by a steam fog-signal.							
<i>St. Joseph's Point Light-Station, Florida—</i> Establishing a light-station at or near St. Joseph's Point, in St. Joseph's Bay, west coast of Florida.....	Submitted.....				25,000 00		
NOTE.—This light is needed to guide into St. Joseph's Bay, the only harbor of refuge for some 60 miles. It would be of great advantage to the numerous fishing-vessels on this coast.							
<i>St. Martin's Island Light-Station, Michigan—</i> Establishing a light and fog-signal station on or near St. Martin's Island, entrance to Green Bay, Lake Michigan, Michigan.....	Submitted.....				15,000 00		
NOTE.—The passage between St. Martin's Island and Little Gull Island, if marked by lights and fog-signals, would be much safer than the Poverty Island Passage, as the entrance is capacious and unobstructed.							
<i>St. Mary's Island Light and Fog-Signal Station, Alaska—</i> Establishing a light and fog-signal at or near St. Mary's Island, sea-coast of Alaska.....	Submitted.....				80,000 00		
NOTE.—Petitions have been received for this from many vessel owners and masters. Commerce is rapidly increasing in Alaskan waters.							

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats. at Large, or to Revised Statutes.			Estimated amt required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.
		Vol. or R. S.	Page.	Sec.			
<p><i>Sheffield Harbor Light-Station, Connecticut—</i> Establishment of a light-station in Sheffield Harbor, Connecticut.....</p> <p>NOTE.—A large and increasing commerce is now centering here. Last year nearly 100,000 tons of coal and more than that quantity of general merchandise were landed, and in view of new railway connections it is said that the tonnage will be double. A light is needed at this point to make more certain the safety of life and property.</p>	Submitted.....				\$10,000 00		
<p><i>South Bass Light-Station, Ohio—</i> Establishing a light-station on or near South Bass Island, Lake Erie, Ohio.....</p> <p>NOTE.—This light would aid vessels to clear the shoals in the south passage, which is much used by vessels bound to and from Sandusky and Marblehead, or to Toledo from the east, or during heavy blows from the northeast. The dangerous shoals in it are buoyed, and so are practicable for daylight passages. The light is needed to make these passages practicable by night.</p>	Submitted.....				8,600 00		
<p><i>State Ledge Light-Station, Massachusetts—</i> Establishing a light-house and fog-signal at or near State Ledge, Boston Harbor.....</p> <p>NOTE.—Required to mark an important turning-point in the main ship-channel, Boston Harbor. Large steamers are obliged to anchor in thick weather because they have no guide between Nix's Mate and the wharves.</p>	Submitted.....				42,000 00		
<p><i>Statue of Liberty Light-Station, New York—</i> Completing the pedestal of the Statue of Liberty Enlightening the World, Bedloe's Island, New York Harbor.....</p> <p>NOTE.—Congress having placed this statue under the care of the Light-House Board, it is found that the above sum is required to complete the structure.</p>	Mar. 3, 1887 Submitted.....	24	516	1	50,000 00		
<p><i>Sturgeon Bay Canal Light-Station, Michigan—</i> Establishing a light-station at or near the entrance to the Sturgeon Bay Ship-Canal, Lake Michigan.....</p> <p>NOTE.—A large and increasing commerce passes the canal, both up and down the lake, and in and out of the canal. A coast-light is requisite for its safety.</p>	Submitted.....				20,000 00		
<p><i>Swan Point Bar Light-Station, Maryland—</i> Establishing a light and fog-signal station on or near Swan Point Bar, opposite Bodkin Point, Chesapeake Bay, Maryland.....</p> <p>NOTE.—This is an important turning-point for vessels navigating Chesapeake Bay. It is proposed to place a light-house in 12 feet of water on the extreme point of the bar. It must be strong enough to withstand ice.</p>	Submitted.....				50,000 00		
<p><i>Tibbett's Point Light-Station, New York—</i> Establishing a steam fog-signal at Tibbett's Point Light-Station, Lake Ontario, New York.....</p> <p>NOTE.—This light is at the entrance to the St. Lawrence River. Fogs largely prevail there. It is especially important that its location be made known in thick weather. This can only be done by a steam fog-signal.</p>	Submitted.....				4,300 00		
<p><i>Wilson Harbor Light-Station, New York—</i> Establishing a light-station at or near Wilson Harbor, Lake Ontario, New York.....</p> <p>NOTE.—In thick and foggy weather and after nightfall it is difficult for vessels to make this harbor. A light will make it much safer than it is now.</p>	Submitted.....				2,500 00		
<p><i>Wreck Point Light-Station, North Carolina—</i> Establishing a light-station at or near Wreck Point, southeast of Cape Lookout, on the sea-coast of North Carolina.....</p> <p>NOTE.—This light would be of great assistance to the many vessels which seek a lee under Cape Lookout.</p>	Submitted.....				5,000 00		
					1,642,000 00		
Total for Light-Houses, Beacons, and Fog-Signals.....					\$626,750 00	\$35,500 00

<i>New Meridian Circle—</i>								
One 6-inch meridian circle, with mounting, collimators, reflection apparatus, reversing carriage, personal equation apparatus, illumination, and all accessories, complete.....	Submitted.....		10,000 00		
<p>NOTE.—The new meridian circle is needed for the exact determination of the positions and motions of the fundamental stars, the foundation of all our knowledge of the structure of the universe. The labor and expense involved in the reduction of observations of this kind necessarily throw this work upon a limited number of large Government observatories. Only two other nations, Great Britain and Russia, have systematically kept up this work for a long period of years. The large transit circle which was mounted at the Naval Observatory in 1865 has proved to be only suited for differential work, and a new and modern instrument is needed for fundamental work, particularly since the position of our observatory, so much farther to the south than those of Europe, gives us special facilities for extending the fundamental system of the northern sky well to the southward of the equator, where so little work of this character has been done. The west meridian circle room of the new observatory was originally designed for this instrument.</p>								
<i>New Buildings—</i>								
Three dwellings for observers, at \$10,000 each.....	Submitted.....	30,000 00	34,000 00		
Repair shop and storehouses for instruments.....do.....	4,000 00			
<p>NOTE.—<i>Dwellings for observers.</i>—In order that the work of a large observatory may be properly and economically done, it is absolutely necessary that the observers be within prompt call to their instruments throughout day and night. Very important observations can often be secured from the clearing of the sky for a few hours, or even in some cases for a few minutes, if the observer be within easy call by the watchman. This can only be accomplished, in the isolated situation of the new observatory, by having dwellings upon the grounds for the observers. The Government erects dwellings at all its navy-yards, arsenals, forts, and schools for the officers on duty there. But no service requires such unremitting attention and constant presence at all hours as that of the astronomer, and no observatory can be regarded as economically managed which does not furnish dwellings for all its observers close by their instruments. It is estimated that with the observers living on the grounds of the new observatory, not only will two or three times as much work be done as it will be possible to do otherwise, but the quality of this delicate work will be materially improved on account of the observers being in a proper physical condition to begin their labors, instead of with nerves unstrung from hurrying some miles from their homes immediately after meals or at unseasonable hours of the night.</p> <p><i>Repair shop and storehouses.</i>—The old observatory has a storehouse for instruments, and also a repair shop, but no provision has been made for either at the new observatory. The basement of the main building has been so constructed that it can not be used for either of these purposes, and separate buildings must be constructed for storing the large number of delicate instruments belonging to the Navy and to the observatory, and for repairing the same.</p>

<i>Engine-House and Senate and House Stables—</i> Repairs to engine-house and Senate and House stables.....	Submitted.....					700 00	
<i>Buildings and Grounds, Government Hospital for the Insane—</i> General repairs and improvements.....	Appropriated..	26	973	1	\$20,000 00		
<p>NOTE.—This estimate is designed to include the repainting of the exterior woodwork of the main hospital buildings and the renewal of the tints on the chapel walls and ceiling, a necessary repair at this time. For more than a decade each year has witnessed some addition to the number of the buildings, extensions rendered necessary by the increasing numbers of the inmates. So each year more floors and ceilings want renewal, gutters and roofs need to be gone over, there are the very considerable changes and repairs incident to the daily needs of a great hospital that must be done, until the \$12,000 that has for several years been appropriated for this has come to be insufficient to meet the pressing demands for the necessary work to maintain the hospital in good repair and keep it efficiently equipped to meet the scientific requirements of the times.</p>							
Additional accommodations for the insane, viz: Distinct provision for the epileptic insane, including the furnishing and radiators.....	do.....				68,250 00		
<p>NOTE.—The experience of the last two years shows that we have each year to provide for more than one hundred additional inmates, and Congress has wisely decided that each year's added provision shall be that which will afford the greatest relief to the whole by making the hospital most complete in all its arrangements for the special care of all classes. The epileptic insane are a class who, by reason of their infirmity and peculiarities, are best cared for in distinct wards, and wherever their numbers will justify it, in buildings and grounds arranged and set apart for their use. They are a difficult class to provide for with others, and their association in wards in common with the rest of the insane is a trial to those of sensitive feelings. The number of the insane afflicted with epilepsy remaining in the hospital June 30, 1891, was 125, and it is understood that there is quite a number of this class in the National Home for Disabled Volunteer Soldiers awaiting room for admission here. The sum asked is intended to provide special accommodations for 150, including finishing and furnishing.</p>							
Special improvements, viz: Taking down and rebuilding machine shop.....	do.....				6,375 00		
Electric plant, for incandescent lights and ventilating fans.....	do.....				22,500 00		
Inclosing new farm and refitting buildings thereon for hospital use.....	do.....				7,360 00		
						124,485 00	84,200 00
<p>NOTE.—The cracks in the walls of the machine shop, a shop built in 1856 and in constant use ever since, are steadily widening, and the building will now have to be condemned and taken down whether rebuilt or not. This is due to defects in the original foundation, it having been constructed in part over made ground, where the jar of the machinery is gradually bringing it to the earth. The hospital has almost daily use for the saw, lathe, and planer, and it is proposed to rebuild on a firm foundation and an enlarged plan. An electric plant is asked for lighting and ventilating the hospital. The gas works were built many years ago, when the hospital was about one-half its present extent, and if this system of lighting is continued, the works and mains, long since outgrown, must be wholly renewed, at an expense not varying much from that necessary to provide electric lighting. But the electric system has passed beyond the age of experiment, and is recognized as the safest and most satisfactory method of lighting buildings occupied by the insane. Its freedom from heat and smoke and the removal of danger from fire are good reasons for introducing it. Congress should provide for either electric light or renewal of the gas works during the coming year. At the new farm, wire fences to inclose and separate the pasturage for the young stock from the cultivated fields will be needed, while, at the same time, the plants should be set for permanent hedges to inclose the whole. The old mansion house and another brick building standing on the place, although somewhat deteriorated with time and neglect, can, with a moderate expenditure, be made serviceable for the use of the hospital. The sum asked is for these changes that are necessary to put the new land in condition for working and occupation.</p>							
<p>The estimate for the current expenses, Government Hospital for the Insane, will be found under the title of "Miscellaneous," <i>post.</i></p>

Annual repairs of court-house, Washington, D. C., per estimate of the Architect of the Capitol.....	Mar. 3, 1891	26	985	1		\$1,000 00	\$5,180 00
<i>Utah Penitentiary—</i>							
Constructing and furnishing shops for the employment of the inmates of the penitentiary, to be under the management and control of the United States marshal, said shops to be situated adjoining the penitentiary building:							
Constructing the building.....	Submitted.....				\$3,000 00		
Purchase of tools and the necessary implements for the use of the inmates.....	do.....				1,000 00		
Steam connections and radiators for wardens' and guards' quarters.....	do.....				800 00	4,800 00	
NOTE.—This estimate is made in compliance with a request of the United States marshal of December 20, 1890. See his letter in Appendix "U."							
Total Public Works under Department of Justice.....						5,800 00	5,180 00
UNDER THE WAR DEPARTMENT.							
ARSENALS.							
<i>Rock Island Arsenal, Rock Island, Ill.—</i>							
Machinery and shop fixtures.....	Mar. 3, 1891	26	974	1	\$5,000 00		
General care, preservation, and improvements, etc.; for building new roads; for painting and care and preservation of permanent buildings, bridges, and shores of the island; for building fences and sewers; for grading grounds, and care and preservation of the water power.....	do.....				9,000 00	\$14,000 00	\$17,500 00
NOTE.—This sum is absolutely necessary for the ordinary care and preservation of the extensive buildings, roads, fences, grounds, shores of the island, water power, bridges, railroads, etc.							
<i>Allegheny Arsenal, Pittsburgh, Pa.—</i>							
Grading sidewalks and putting down a brick pavement on Thirty-ninth and Fortieth streets, between Penn avenue and the Allegheny Valley Railroad, adjoining arsenal wall.....	Submitted.....					7,500 00	
NOTE.—A brick pavement is necessary to accommodate the constant foot travel along the streets surrounding the arsenal. From the curb-stone to the arsenal wall there is nothing but earth; the opposite sides of these streets—private property—are built up and well paved. There is a population of at least about 40,000 people living about the arsenal, and the travel from this population is constantly passing along these streets that are not paved on the Government side.							

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats. at Large, or to Revised Statutes.			Estimated amt't required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.
		Vol. or R. S.	Page.	Sec.			
<i>Benicia Arsenal, Benicia, Cal.—</i>							
Construction, repairing, and preservation of roads, walks, and fences, grading grounds, and repairs of permanent buildings.....	Submitted.....				\$5,000 00		
NOTE.—The roads about the arsenal should be thoroughly repaired and macadamized. They are now very poor, and during the rainy season some are almost impassable. Many of the buildings have had but few repairs since their erection.							
Establishing a complete and proper system of sewerage, and to perfect the plumbing system at officers' quarters Nos. 1, 2, 3, and 4.....	do.....				15,000 00		
NOTE.—There are no such things that can rightly be designated main sewers existing at this arsenal. Attention is invited to letter to the Chief of Ordnance, dated November 29, 1890, and the report of the attending surgeon and estimate which accompanied it (see House Ex. Doc. 83, 51st Cong., 2d sess.). The difference in the amount called for in this estimate and the estimate submitted November 29, 1890, is required on account of additional pipe and excavation found necessary.							
Purchase and erection of one gas machine.....	do.....				2,000 00		
NOTE.—The present machine is old pattern and worn out, and will soon be practically worthless, and involves unnecessary expense in gasoline. The machine has been in use over twenty years.							
Purchase and erection of one smokestack, for use of steam-pump, for pumping water from well to reservoir.....	do.....				50 00		
NOTE.—The present smokestack is badly eaten with rust, and will hardly support itself.							
Repairs of wharf and dredging around same.....	do.....				1,500 00		
NOTE.—The wharf needs replanking throughout and many piles are loose and will have to be replaced by longer ones. The slip between the two parts of the wharf has filled in so much that it is now impracticable to unload freight schooners at the inner wharf.							
One steam pumping engine for artesian well.....	do.....				1,000 00		
NOTE.—The present engine is old, single-acting, and requires constant overhauling. The supply of artesian well water, although limited, is of considerable importance as an additional water supply for this post.							
						\$24,550 00	
<i>Columbia Arsenal, Columbia, Tenn.—</i>							
Gate at main entrance.....	Submitted.....				1,000 00		
NOTE.—The amount required is for the erection of the gate at main entrance to the arsenal grounds, to consist of one large double gate for the roadway and one small gate on each side of same, somewhat similar in design to that submitted by General (then Colonel) Flagler, in his report, dated June 30, 1888. In order to harmonize with the adjoining buildings, Bowling Green stone should be used in its construction, although this will add somewhat to the cost thereof.							
One flagstaff.....	do.....				350 00		
NOTE.—A handsome flagstaff should be erected.							
Constructing roads and walks and grading grounds.....	do.....				11,000 00		
NOTE.—This amount will be required to construct the necessary roads. Walks of some kind, affording means of communication between the different buildings, are an absolute necessity, and the grounds will require considerable grading.							
Construction of a cistern of 120,000 gallons' capacity; dimensions, 80 feet by 20 feet by 10 feet.....	do.....				2,500 00		
NOTE.—A cistern of the above capacity, to be located between the storehouse and shop, is necessary in case of an emergency. During the present summer nearly all the springs went dry, and no water was taken from them for any purpose. Had there been, they would have entirely failed; they can not be relied upon. The Columbia Improvement Company has a four-inch water-main connecting with the one already laid on the arsenal grounds. There is no other source of supply, and the Department can not fix the price at which they will deliver the water. The water in this main is taken from Duck River, a stream that is always very muddy. It is not, to say the least, desirable for drinking or household purposes, otherwise than for use in bathrooms and water-closets. A large cistern to collect and hold the water that falls on the roofs of the main storehouse and shop would be an unfailing supply, and, in a measure, render the arsenal independent of the water company. It is believed that the best interests of the service require the construction of such a cistern.							
Purchase and setting out of shade trees.....	do.....				500 00		
NOTE.—It is proposed to plant three rows of trees, one row on each side of the walk, and the other on the far side of the roadway. The trees should be about sixteen feet apart, quick and slow growth alternating, as recommended in General (then Colonel) Flagler's report.							

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.			References to Stats. at Large, or to Revised Statutes.			Estimated amt't required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.
	Vol. or R. S.	Page.	Sec.						
<i>Columbia Arsenal, Columbia, Tenn.—Continued.</i>									
Fire apparatus.....	Submitted.....						\$1,650 00		
NOTE.—This is necessary to afford protection against fire occurring in any of the buildings on the grounds.									
One six-ton wagon scale (Fairbanks).....do.....						600 00	\$17,600 00	
NOTE.—The wagon scale is for use in receiving and issuing such stores as hay, coal, straw, etc.; is absolutely necessary for this purpose, and should be provided. Provision is made in the amount asked for for the erection of a shed over the scale to protect it from the inclemency of the weather.									
<i>Frankford Arsenal, Philadelphia, Pa.—</i>									
One complete set of machines for manufacture of field } artillery ammunition..... }	Mar. 3, 1891 } Submitted..... }			26	974	1	11,000 00		
Preparation of the rolling mill building for the reception of the present cartridge plant, including the purchase and fitting up of the power plant and other appliances necessary for the present requirements of the Ordnance Department, and to meet the demands of an increased output in case of emergency, such as boilers, boiler house, engines and stacks, annealing furnaces, dry house for cartridge primers, elevators, heating appliances, water-closets, etc									
.....do.....do.....						52,500 00	63,500 00	\$5,000 00
NOTE.—The accommodations for manufacture of cartridges are limited and very inconveniently arranged. The various operations are of necessity conducted in four different detached buildings, not suited by reason of location or size for the most economical manufacture of even the present output. The average annual production is at the rate of about 24,000 per day of eight hours, which can be increased to 36,000 per day of eight hours. All the room is occupied, giving no place for further extension of any description. The proposed building offers space enough under one roof for convenient arrangement for all the successive operations (impracticable at present), and makes possible an expansion of the output to 250,000 cartridges per day of eight hours, besides giving room for the manufacture of cartridges of other description, for revolving cannon, etc., should such be desired. The room made available by this transfer will greatly relieve the crowded machinshop, besides giving needed room for miscellaneous work and the contemplated fuze plant, as well as affording accommodation for draughtsman and shop stores. These latter now occupy two rooms in the barracks which will be much needed when the detachment is recruited to its full strength.									
<i>Indianapolis Arsenal, Indianapolis, Ind.—</i>									
Construction of a post hospital.....	Mar. 3, 1891 } Submitted..... }			26	974	1	10,000 00		
NOTE.—The erection of a post hospital was contemplated in the original design of the arsenal, and the need of such a building as a part of all military posts is so evident as to require no elaboration.									
Iron fence on Clifford avenue (1,260 feet, at \$5).....do.....						6,300 00	16,300 00	30,110 00
NOTE.—The present wooden fence on Clifford avenue was placed there upwards of twenty years ago. It is old, worn-out, unsightly, and in the main unserviceable, and should be replaced by an iron fence of suitable design.									
<i>Powder Depot, Dover, N. J.—</i>									
Erecting barracks for enlisted men.....	Submitted.....						16,500 00		
NOTE.—It is necessary to have more police protection to the post than is afforded by one day and one night watchman. Civilians and a sufficient number of men should reside on the post where they can be called upon at any hour when needed by reason of fire or other contingency. Again, the surrounding county is a mining region and most, if not all, are of the worst classes of foreigners. In case of war or labor troubles ample police protection would be at all times required. It will be noted that the post is 3 miles long by 1 mile wide.									
Erecting quarters for noncommissioned officers and married soldiers.....do.....						7,500 00		
NOTE.—The most experienced and reliable non-commissioned officers are married men, who can not live with their families in barracks. It is in the interest of the service to comfortably house desirable non-commissioned officers.									
Erecting one set of quarters for the commanding officerdo.....						15,000 00		
NOTE.—There are no quarters for officers at the post. The commanding officer is compelled to rent private quarters some miles distant from his post and command. There is no available house within 5 miles of the depot.									
Quartermaster and commissary storehouse.....do.....						3,000 00	42,000 00	
NOTE.—When soldiers are stationed at the depot, storage room will be required for their clothing and food.									

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats. at Large, or to Revised Statutes.			Estimated amt required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.
		Vol. or R. S.	Page.	Sec.			
<i>Proving-Ground, Sandy Hook, New Jersey—</i>							
Repairs to wharf and crane on same.....	Mar. 3, 1891 Submitted.....	26	974	1	\$4,000 00		
NOTE.—The wharf and crane thereon are in need of general repairs, and the wharf should be strengthened so that it will safely carry a 12-inch gun. Under existing conditions such guns must be landed on the beach and hauled up therefrom at great expense of time and money.							
One steam capstan.....	Same acts.....				500 00		
NOTE.—The steam capstan is required to facilitate and cheapen the handling of heavy weights. A large amount of this class of work has to be done at this post, and great expense and delay are caused by lack of proper appliances for performing it.							
One steam duplex pump, of about 100 gallons per minute capacity, and boiler, and one tank, to hold about 25,000 gallons, with the necessary tube or driven wells, wrought-iron pipe, hydrants, fixtures and attachments required to supply with water the buildings pertaining to this post and for fire purposes.....do.....				10,000 00		
NOTE.—The necessity of a proper water supply at this post, especially for fire purposes, is urgent. One office building at this post, with its contents, was recently destroyed by fire. The buildings, containing costly machinery and valuable instruments, not easily duplicated, should be properly protected.							
						\$14,500 00	\$19,000 00
<i>Powder Depot, St Louis, Mo.—</i>							
Labor and material for pointing and painting the exterior of five brick magazines.....	Submitted.....				1,500 00		
NOTE.—These magazines have been painted but once since their construction, over twenty-six years ago. The paint originally put on was washed off years ago, causing the brick to absorb moisture and in many places crumble away; and to prevent more serious deterioration, they should be pointed, and painted with two coats of good paint, without further delay.							
Repairs of roofs, gutters, spoutings, lightning-rods, doors, windows, and floors of seven magazines, including an entire new floor in magazine No. 2.....do.....				1,800 00		
NOTE.—The gutters on all magazines have been, to some extent, torn off by snow slides and long wear and tear, causing the water to run along the foundations, damaging them and filling natural drains.							
Repairing, reducing pitch, and resodding slopes of magazines.....do.....				2,000 00		
NOTE.—The slopes of magazines Nos. 1, 3, and 4 are too steep to retain the sod and are, consequently, badly washed by the rains; the earth thus washed is carried in the roadways and drains of magazines, stopping the latter up and may cause water to stand, in heavy rains, injuring the foundations of magazines and retaining walls. The amount estimated for this work (\$2,000) is the minimum for which it could properly be done.							
Repairing, repointing, and coping walls.....do.....				1,400 00		
NOTE.—These walls are without coping to protect them and are injured each season by rain and frost, which will ultimately destroy them if allowed to remain in present condition.							
Repairs of main road, running through the magazine grounds, by covering with gravel; for repairing sidewalk from quarters to office and repairing gutters and drains.....do.....				1,500 00		
						8,200 00	
<i>Watertown Arsenal, Watertown, Mass.—</i>							
Machine for testing small specimens.....	Submitted.....				12,000 00		
NOTE.—To cover the purchase of a machine of 200,000 pounds' capacity, intended as an auxiliary to the large testing machine at Watertown Arsenal. The tests of gun metal, and many other materials required for the use of the Department, are made on small specimens, and the use of a smaller machine for these tests would be a measure of economy, and would leave the large machine free for tests of large pieces, or bridge members, such as are frequently required by engineers, builders, etc.							
Fitting up new carpenter and pattern shop, moving and setting up machinery, shaftings, etc., including new machines required.....do.....				9,400 00		
NOTE.—The carpenter shop now in use is in an unsuitable building, too small and inconveniently located, and requiring extensive repairs. It is proposed to move it to a more suitable building, near the other shops, and also to put in a few modern machines.							
						21,400 00	

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats. at Large, or to Revised Statutes. <i>Watervliet Arsenal, West Troy, N. Y.—</i>							
New iron wagon bridge.....	Submitted.....				\$5,000 00		
NOTE.—This bridge is needed to replace the old wooden covered bridge across the canal, built in 1840, which is weak and unsightly and does not meet the wants of the service required of it.							
Paving Broadway with granite blocks to the extent of the arsenal frontage (1,650 feet), except the part between extreme rails of motor car tracks. Total frontage, 1,650 feet; width of street, 69 feet. The present sidewalk on west side of street (flagging and bricks) is not to be disturbed for a width of 15 feet from iron fence. The remainder of street (including new sidewalk on east side of street) to be paved with granite blocks, except a strip of 14 feet in width between extreme rails of motor car tracks. Curbstones 20'' by 4'' on each gutter of street. Three (3) crossings. Granite pavement, 1,650' x 40' = 66,000 sq. ft. = 7,333 square yards, at \$3 = \$21,999 (including digging up and macadamizing road, grading, furnishing and laying granite blocks, and sand for beds, joints, and covering). Three thousand three hundred feet of curbstones (20'' x 4''), furnished and laid, at \$0.85 = \$2,805.							
Alteration of barracks.....	do.....				8,997 00		
NOTE.—The present barrack building has not been enlarged since the increase of the detachment, and is at present greatly lacking in proper facilities for messing. The squad-rooms are not sufficiently commodious and some are difficult to ventilate. It is proposed to erect an addition to this building, to be used as a mess hall and kitchen, to enlarge the squad-rooms by removing partitions, to replace the stoves now in use with a furnace, to renovate the interior and woodwork, and also to improve the water-closet.							
Paving roads in arsenal grounds.....	Mar. 3, 1891	26	975	1	5,000 00	\$18,997 00	\$5,000 00
NOTE.—This paving is necessary to continue the work already begun, and is needed about the shops and other places where there is much hauling to be done.							
<i>Repairs of Arsenals—</i>							
To meet such unforeseen expenditures at arsenals as accidents or other contingencies during the year may render necessary.....	Mar. 3, 1891	26	975	1		100,000 00	45,000 00
NOTE.—The \$50,000 which has been the annual appropriation for some years is found to be totally inadequate to preserve and keep in repair the extensive buildings, grounds, roadways, and fences at the various ordnance establishments.							
<i>Testing Machine, Watertown Arsenal, Mass.—</i>							
Purchase of labor and material in caring for, preserving, and operating the United States testing machine, including new tools and appliances.....	Mar. 3, 1891	26	975	1		10,000 00	10,000 00
Total Arsenals.....						358,547 00	131,610 00

<i>Gun and Mortar Batteries—</i>							
Construction of gun and mortar batteries.....	Feb. 24, 1891	26	767	1		\$2,647,000 00	\$750,000 00
<i>Sites for Fortifications and Seacoast Defenses—</i>							
The procurement of land, or right pertaining thereto, needed for the site, location, construction, or prosecution of works for fortifications and coast defenses.....	Aug. 18, 1890 Feb. 24, 1891	26 26	316 767	1 1		500,000 00	500,000 00
<i>Preservation and Repair of Fortifications—</i>							
Protection, preservation, and repair of fortifications for which there may be no special appropriation available.....	Feb. 24, 1891	26	767	1	\$80,000 00		
Preparation of plans for fortifications.....	do.....				5,000 00		
Repair and preservation of Fort Marion, Florida, and for construction of sea-wall to preserve the site.....	Aug. 18, 1890 Submitted.....	26	316	1	6,500 00		
						91,500 00	85,000 00
<i>Artesian Well at Fort Monroe, Va.—</i>							
Obtaining water for the garrison.....	Feb. 24, 1891	26	767	1		4,000 00	6,000 00
NOTE.—The officer in charge of the defensive works at Fort Monroe reports that the \$6,000 appropriated by the act of Congress approved February 24, 1891, will not cover the cost of sinking a well beyond a depth already demonstrated to be insufficient. He recommends the additional appropriation.							

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats. at Large, or to Revised Statutes.			Estimated amt required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.
		Vol. or R. S.	Page.	Sec.			
<i>Sea-Wall at Governor's Island, New York Harbor—</i> Additional sea-wall	Submitted.....					\$17,000 00	
<p>NOTE.—The officer in charge of the defensive works at Governor's Island reports that a sea-wall is required on the east side of the island to replace wharf fronts and timber bulkheads now decaying and rapidly deteriorating, and he recommends the appropriation.</p>							
<i>Sea-Wall at David's Island, New York Harbor—</i> Additional sea-wall and embankment	Submitted.....					30,000 00	
<p>NOTE.—The officer in charge of engineer works at David's Island reports that, besides protecting the shore, 1½ acres of land will be reclaimed by the sea-wall and embankment for which this appropriation is asked. He recommends the appropriation.</p>							
<i>Torpedoes for Harbor Defense—</i> Needful casemates, cable-galleries, etc., to render it possible to operate submarine mines.....	Feb. 24, 1891	26	767	1		200,000 00	\$116,000 00
<i>Armament of Fortifications—</i> Finishing and assembling of 8-inch, 10-inch, and 12-inch seacoast guns at the Army Gun Factory.....	Feb. 24, 1891	26	768, 770	1	\$125,000 00		
<p>NOTE.—It is estimated that the following guns may be completed by June 30, 1893, viz: Eighteen 8-inch, fourteen 10-inch, six 12-inch, which, including work that will be done on parts of unfinished guns, will amount to..... \$300,000 For finishing and assembling guns there has been appropriated the following sums: Fortifications Act of March 2, 1889..... \$35,000 Fortifications Act of August 18, 1890..... 70,000 Fortifications Act of February 24, 1891..... 70,000 Total 175,000 Leaving a balance to be appropriated of..... 125,000 This is the minimum sum that will be required for the coming fiscal year.</p>							
Eight, 10, and 12 inch guns manufactured by contract under the provisions of the Fortifications Acts approved August 18, 1890, and February 24, 1891.....	Same act.....				148,667 00		
<p>NOTE.—The above is to cover the cost of one type 8-inch, and two service 8-inch guns, and one type 10-inch gun, including ammunition for test, which it is estimated may be completed by June 30, 1893. Under the terms of the contract with the Bethlehem Iron Works for supplying the Department with the 100 guns provided for in the acts above cited, the type 8-inch gun will be delivered not later than two years from date of contract, or, say by October 1, 1893; the 10-inch type gun not later than two years and five months from date of contract, or, say by March 1, 1894, and the 12-inch type gun not later than two years and nine months, or, say by July 10, 1894. This office is informed, however, that the contractors intend to make somewhat earlier deliveries than specified in their bid. The number that it is estimated will be completed has been furnished the Department by the contractors.</p>							
Necessary expenses, other than for powder and projectiles, incident to the test and inspection of the twenty-five 8-inch, fifty 10-inch, and twenty-five 12-inch guns provided under the Fortifications Acts of August 18, 1890, and February 24, 1891, and as provided for by said act.....	do.....				10,000 00		
<p>NOTE.—The Fortifications Act of February 24, 1891, reserves from the appropriation of \$4,250,000 for the manufacture of 100 guns, the sum of \$50,000 for covering all necessary expenses incident to test and inspection other than for powder and projectiles. These expenses include the services of skilled assistants and inspectors, and the procurement of suitable inspecting instruments. Considerable time is required in the preparation of the latter, and their manufacture should be taken in hand at once, in order that they may be in readiness when required. The \$10,000 estimated is deemed to be sufficient for the fiscal year ending June 30, 1893.</p>							
Steel field-guns of 3.2-inch caliber.....	do.....				25,000 00		
<p>NOTE.—This sum will procure about twenty-five guns, including the steel forgings therefor. One hundred of these guns have been completed, and twenty-five more, for which an appropriation was made by the Fortifications Act approved February 24, 1891, are now under manufacture at the Army Gun Factory, Watervliet Arsenal, West Troy, N. Y. At least sixty of these guns are required for the regular service at this time. The Department considers it imperative that the manufacture should be continued from year to year in order to provide a reserve and to anticipate requisitions from the militia.</p>							
Carriages for field-gun batteries.....	do.....				61,000 00		
<p>NOTE.—To provide about twenty-five carriages, limbers, and caissons each, and six combined battery wagons and forges, with tools for the equipment of the twenty-five 3.2-inch guns under the preceding item. The necessity for the carriages is the same as that for the guns.</p>							

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats. at Large, or to Revised Statutes.			Estimated am't required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.
		Vol. or R. S.	Page.	Sec.			
<i>Armament of Fortifications—Continued.</i>							
Steel siege B. L. rifles of 5-inch caliber.....	Mar. 2, 1889 Submitted.....	25	887	1	\$84,250 00		
NOTE.—This sum will procure about twenty-five guns, including forgings therefor. Under the provisions of the acts approved March 2, 1889, and August 18, 1890, the forgings for ten of these guns were procured, and the finishing and assembling is now in progress at the Army Gun Factory. Some recent failures in service of the 4½-inch cast-iron M. L. siege rifles have so impaired confidence in the safety of these pieces, even when using small charges, that they have been withdrawn altogether, thus leaving the siege service without a rifled gun. The Department desires to procure a sufficient number of these new steel B. L. rifles to supply the Military Academy, the artillery school, and the several posts designated as posts of artillery instruction.							
Steel siege B. L. howitzers of 7-inch caliber.....do.....				41,100 00		
NOTE.—This sum will procure about twelve howitzers, including the forgings therefor. Ten of these pieces are now under manufacture under the provisions of the acts approved March 2, 1889, and August 18, 1890. The remarks under the preceding item apply with equal force to the procurement of these howitzers. There are no siege howitzers in the service. The old 8-inch cast-iron smooth-bore howitzer is utterly inefficient under modern conditions, and has been justly set aside as obsolete.							
Carriages for siege B. L. rifles of 5-inch caliber.....	Feb. 24, 1891	26	768, 770	1	75,000 00		
Carriages for siege B. L. howitzers of 7-inch caliber.....do.....				42,000 00		
NOTE.—These carriages are required for the guns and howitzers stated in the two preceding items.							
Sights for cannon and for fuzesdo.....				10,500 00		
NOTE.—This sum will procure about 2,500 of the new type combination time and percussion fuzes for field shrapnel, 500 base fuzes for mortar shell, and leave a balance of about \$4,750 for sights for the new field, siege, and seacoast guns, as follows: For about 25 sets of field sights, 37 sets of siege sights, 38 sets of seacoast sights. It is expected that these sights will be required by July 1, 1893. Of the sums appropriated under the acts of March 2, 1889, August 18, 1890, and February 24, 1891, aggregating \$10,000, there remains about \$2,200, which is barely sufficient to provide the necessary sights for the twenty-five 3.2-inch guns, the ten 5-inch siege rifles, and ten 7-inch howitzers now under manufacture, and the twenty-four 3.6-inch field guns which will be placed under manufacture during the coming year. After numerous experiments a satisfactory combination time and percussion fuze for the field service has been worked out. A very promising base fuze for mortar shell, admitting of delayed action in the attack of deck armor is now under trial, and its details should be perfected during the coming autumn.							
Inspecting instruments, gauges, and templets, for use in the manufacture of cannon and projectiles.....do.....				4,000 00		
NOTE.—These instruments are required in connection with the manufacture of cannon at the Army Gun Factory, and for the use of inspectors of ordnance on duty at the foundries and steel works.							
Powder for issue to service.....do.....				94,400 00		
Estimated as follows:							
For field guns.....					\$16,700		
Siege cannon.....					5,600		
Seacoast steel cannon.....					60,300		
Seacoast mortars.....					11,800		
In all.....					94,400		
The annual allowance for target practice for the sixty 3.2-inch field guns required for service is twenty-five rounds per gun, exclusive of blank cartridges. The full supply for each piece, on a war footing, is one hundred and seventy-six rounds per piece, making a total of 12,160 rounds. The amount of ammunition is the least that should be kept on hand in readiness for issue to meet demands for the supply of batteries suddenly called into the field. The powder now on hand, or for which there are funds available, is barely sufficient for the regular issues during the current year, and it is deemed a matter of very great urgency that the sum estimated for procuring a further supply be appropriated. The amount estimated covers also about two hundred rounds each for the twenty-four 3.6-inch field guns and sixteen 3.6-inch mortars. These last named pieces are of new type, and should be issued to the artillery as soon as they are completed for instruction and practice. The amount estimated for siege guns should supply about one hundred rounds each for the ten 5-inch siege rifles and the ten 7-inch howitzers, now under manufacture. The amount for seacoast cannon should provide about two hundred rounds for 8-inch guns, two hundred rounds for 10-inch guns, and two hundred rounds for 12-inch guns. The amount for 12-inch B. L. mortars will provide for about five hundred rounds.							

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats. at Large, or to Revised Statutes.			Estimated amt't required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.
		Vol. or R. S.	Page.	Sec.			
<i>Armament of Fortifications—Continued.</i>							
Projectiles for issue to the service.....	Feb. 24, 1891	26	768, 770	1	\$65, 800 00		
Estimated as follows:							
For field B. L. cannon.....			\$20, 200				
For siege B. L. cannon.....			9, 600				
For seacoast B. L. cannon.....			20, 000				
For seacoast mortars.....			16, 000				
In all.....			65, 800				
NOTE.—This will supply, approximately, the following quantities of projectiles:							
For field service: 1,500 3.2-inch shrapnels, 3,000 3.2-inch cast-iron shells, 4,000 3.6-inch cast-iron shells.							
For siege service: 1,000 5-inch cast-iron shells, 1,000 7-inch cast-iron shells.							
For seacoast service: 200 8-inch cast-iron shots, 200 10-inch cast-iron shots, 200 12-inch cast-iron shots.							
For 12-inch B. L. Mortars: 400 cast-iron shells.							
These shells are required for instruction and practice firing.							
Powders and projectiles for the proof of 8-inch, 10-inch, and 12-inch guns.....	Submitted.....				29, 250 00		
NOTE.—It is estimated that eighteen 8-inch guns, fourteen 10-inch guns, and six 12-inch guns may be completed by the end of 1892, and the above sum will provide the necessary powder and projectiles for seven proof rounds each.							
Powder and projectiles for proving 12-inch B. L. mortars.....	Aug. 18, 1890 Submitted.....	26	317	1	3, 840 00		
NOTE.—The Builders' Iron Foundry will complete thirty 12-inch mortars, under their contract, in 1892. The steel parts for thirty additional mortars will be delivered by the Midvale Steel Company by June 30, 1892; so that if there is no default under the contracts with the South Boston Iron Works, thirty additional mortars will be completed by the end of 1892, making a total of sixty mortars. The powder and projectiles required for proving these mortars, five rounds each, will cost \$20,880, for which there is available, under the act of August 18, 1890, \$10,000 for projectiles and \$7,040 for powder, making a total of \$17,040, thus leaving a balance to be appropriated of \$3,840.							
Steel deck-piercing shell for 12-inch B. L. mortars.....	Feb. 24, 1891	26	768	1	100, 000 00		
NOTE.—Experiments are now in progress for determining the best form of shell and quality of material for piercing deck plates, and should be completed within the next six months. The estimate will cover the purchase of about 350 to 400 shell. The experiments abroad have demonstrated that cast iron is not a suitable material for deck-piercing shell.							
Purchase and erection of steel plates for the test of deck-piercing shell.....	do.....				10, 600 00		
NOTE.—The steel shell provided for in the preceding item must pass a satisfactory test before acceptance, by penetrating a representative deck plate of stated thickness. The sum asked for in the preceding item is sufficient to provide for the purchase and erection of about four such plates.							
Steel armor-piercing shot, for seacoast B. L. guns.....	do.....				200, 000 00		
NOTE.—This estimate is for continuing the manufacture of armor-piercing shot, authorized by the acts of August 18, 1890, and February 24, 1891, for use with the high power steel seacoast guns of 8-inch, 10-inch, and 12-inch caliber. Under the appropriations thus far made, the Department has placed contracts with the Midvale Steel Company for 318 8-inch, 422 10-inch, and 50 12-inch shot. These projectiles are to be made by the well-known Holtzer process, which is believed to be the best process extant. The sum now asked for will provide about 200 8-inch, 200 10-inch, and 228 12-inch shot.							
Purchase and erection of armor plates for testing armor-piercing projectiles.....	do.....				36, 000 00		
NOTE.—These plates are for the proof tests of the projectiles provided for under the preceding item, and the sum asked for will procure about four such plates, with their backing and cost of erection.							
Alteration of the 12-inch gun lathe at the Army Gun Factory, Watervliet Arsenal, West Troy, N. Y., to adapt it to the manufacture of a type 16-inch gun.....	Submitted.....				10, 500 00		
NOTE.—This alteration will be necessary if the manufacture of a type 16-inch gun is determined upon, as none of the gun lathes at the gun factory have sufficient length for the purpose.							
Machine tools and fixtures adapted to the manufacture of steel seacoast cannon, to complete the equipment of the south wing of the Army Gun Factory, Watervliet Arsenal, West Troy, N. Y.....	Feb. 24, 1891	26	769	1	326, 000 00		
Together with \$20,600 of the sum of \$248,743 appropriated by the act approved February 24, 1891, to complete the Army Gun Factory building at Watervliet							

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

<i>Armament of Fortifications—Continued.</i>							
<p>Arsenal, West Troy, N. Y., by the erection of the south wing, which sum is hereby reappropriated for the object herein stated.</p> <p>NOTE.—This sum will complete the equipment of this wing so as to provide for the manufacture of fifteen 12-inch guns and three 16-inch guns per annum. The amount thus far appropriated for the south wing is as follows:</p> <p>For the erection of south wing, inclusive of ways for traveling crane..... \$248,743 For tools, machinery, fixtures, etc..... 583,000</p> <p>Making a total of..... 836,743</p> <p>The bids received for the erection of the south wing were lower than had been anticipated, thus leaving a balance on the appropriation for that purpose of \$25,000, which should now be made available for the purchase of machinery, etc., to complete the equipment of that wing.</p>							
Steel breech-loading rifled seacoast mortars of 12-inch caliber.....	Aug. 18, 1890 Submitted.....	26	317	1	\$725,000 00		
<p>NOTE.—The seventy-three 12-inch mortars, cast iron, hooped, contracted for under the provisions of the acts approved September 22, 1888, and August 18, 1890, should be completed by the end of 1893. A fresh appropriation should have been made in 1891, and was included in the estimates of the Department. It is therefore imperative that an appropriation be made in 1892, else the manufacture of seacoast mortars will stop. The above estimate is for breech-loading built-up mortars of steel, and should procure about fifty mortars, including the forgings.</p>							
Purchase of oil-tempered and annealed steel, for high power coast-defense guns of 8-inch, 10-inch, and 12-inch caliber, including the parts required for the manufacture of one 16-inch type gun, in quality and dimensions conforming to specifications, subject to inspection at each stage of the manufacture, and including all the parts of each caliber.....	Feb. 24, 1891	26	768	1	1,122,000 00		
<p>NOTE.—The twenty-three sets of 8-inch forgings, under contract with the Bethlehem Iron Company, will be delivered early this autumn; the twelve sets, under contract with the Midvale Steel Company, by August 1, 1892. Of the thirty-five guns to be manufactured from these forgings, eleven are to be finished and assembled under contract with the West Point Foundry Company, the remaining twenty-four at the Army Gun Factory. The latter will be completed near the end of 1893. A further appropriation for twelve sets of 8-inch forgings will therefore be required in 1892 to prevent a deficiency at the Army Gun Factory. The first set could be delivered by the beginning of 1893 and the remaining sets by the end of 1893.</p> <p>The twenty-three sets of 10-inch forgings, under contract with the Bethlehem Iron Works, will be delivered by March 1, 1893; the twelve sets, under contract with the Midvale Steel Company, by June 15, 1894. The number of 10-inch guns that can be completed at the Army Gun Factory by the end of 1894 is thirty-four, and by the end of 1895, forty-nine; so that there will be a deficiency of fourteen sets of forgings by the end of 1894 unless a fresh appropriation is made therefor in 1892. The first set of these forgings could then be delivered by September 1, 1893, and the remaining thirteen sets by the end of 1894.</p> <p>The fifteen sets of 12-inch forgings, under contract with the Bethlehem Iron Company, could be delivered by December 1, 1893; the nine sets, under contract with the Bethlehem Iron Company, by June 16, 1896. But owing to the slow rate of delivery under the latter contract, deficiencies will occur at the Gun Factory as follows:</p> <p>Seven sets of 12-inch forgings by the end of 1894. Seventeen sets of 12-inch forgings by the end of 1895. Twenty-nine sets of 12-inch forgings by the end of 1896.</p> <p>Hence, a fresh appropriation should be made in 1892 for twelve sets, the first of which could be delivered by the end of 1893, and the remaining eleven sets by the end of 1894; which, with fresh appropriations yearly from 1893 to 1896 for from twelve to thirteen sets each, would suffice to keep the Gun Factory fully supplied with forgings of this caliber for that period.</p> <p>An appropriation to enable the Department to procure the forgings for one type 16-inch gun is urged on the grounds that in the plans of the War Department for a system of coast defense, the proposed armament includes a number of 16-inch guns for the principal ports of the country. The manufacture and test of the type guns should precede their manufacture in quantity, and this first step should be taken without further delay. If an appropriation be made available by June 30, 1892, the type gun could hardly be completed and tested before June 30, 1895, while the first three 16-inch guns for issue to the service could not be completed before the end of 1898. From published information it appears that there were afloat in European navies in the year 1890 about forty guns of 16-inch caliber and upwards, mounted on armored sea-going ships, and it is indisputable that the land defenses should possess guns not only equal in power to any that the attack can bring forward, but that it should endeavor to hold the superiority in this respect over the attack. The necessity for guns of this caliber is becoming daily more and more emphasized by reason of the improvements made in the processes for treating armor plates, and by means of which their hardness and resistance to penetration is vastly increased, so that a corresponding increase in the size and power of the gun is required to overcome them.</p>							

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats. at Large, or to Revised Statutes.			Estimated am't required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.						
		Vol. or R. S.	Page.	Sec.									
<i>Armament of Fortifications—Continued.</i>													
Enlargement and improvement of the heavy gun-carriage plant at Watertown Arsenal, Watertown, Mass.	Feb. 24, 1891	26	768	1	\$151,000 00								
<p>NOTE.—The estimate is to cover the following expenditures: The erection of an assembling shop for carriages, including the moving of buildings and preparation of site, \$42,000; for extension of foundry building to provide shop room for finishing large parts of carriages, \$14,000; for machinery, fixtures, and railroad tracks for use in the manufacture of seacoast carriages, \$95,000.</p> <p>In addition to the work of alterations of 10 and 15 inch carriages, the manufacture of an 8 inch and a 12-inch barbette carriage of a new design is now in progress at this arsenal. The object of the above estimate is to provide more adequate facilities for the manufacture of the carriages that will now be required in considerable numbers for the new high-power guns for coast defense. The manufacture of some of these carriages has already been placed with several private manufacturers, but it is considered in the interest of economy and sound policy that provision should be made for the manufacture of a portion at least of the new carriages by the Government in its shops. The Watertown Arsenal is well located and well adapted for this class of work, and no very great expense is anticipated in increasing the facilities there to the extent desired and deemed expedient.</p>													
Defraying expenses incurred in procuring expert opinion on large lathes for Army Gun Factory, the sum of \$588.53 is hereby reappropriated for the object herein stated from the sum of \$268,000 appropriated by the act approved February 24, 1891, for machinery, tools, power-plant, and fixtures for the equipment of the south wing of the Army Gun Factory	Submitted.												
<p>NOTE.—The lathes required for the equipment of the Army Gun Factory are of much larger dimension than heretofore made in this country, and in some respects involved features of new design. As these designs were worked up mainly by the Department, there being no designs extant in the trade, expert opinion was required on the merits of some of the points of construction. The services have been rendered, and the amount above stated is now due therefor.</p>													
Alterations of existing carriages for 10-inch and 15-inch smooth-bore guns to adapt them to present service conditions	Feb. 24, 1891	26	768	1	100,000 00								
<p>NOTE.—This sum will cover the alteration of about twenty 10-inch carriages for use with the 8-inch M. L. rifle, converted, and fifteen 15-inch carriages for the 15-inch gun, using increased powder charges. Thus far there have been altered one hundred and twenty-seven 10-inch carriages and fifty-one 15-inch carriages. The number of guns on hand is as follows: 210 8-inch, converted; 300 15-inch, smooth-bores, and a large number of carriages for each caliber of gun is on hand and available for alteration.</p>													
Carriages for breech-loading rifled mortars of 12-inch caliber	Aug. 18, 1890 Submitted.....	26	317	1	449,500 00								
<p>NOTE.—The Department expects to receive the following numbers of 12-inch B. L. mortars under its contracts with the Builders' Iron Foundry and the South Boston Iron Works, viz: From Builders' Iron Foundry, thirty 12-inch B. L. mortars by November 1, 1892; from South Boston Iron Works, forty-three 12-inch B. L. mortars by December 30, 1893; total, seventy-three 12-inch B. L. mortars by December 30, 1893.</p> <p>A contract has already been placed with the Builders' Iron Foundry for eight spring-return mortar carriages, under the provisions of the act approved March 2, 1889, with the proviso that the number may be increased by twenty-five carriages, at reduced rates, if desired. The cost of the entire seventy-three carriages at present contract rates would be..... \$774,500</p> <p>There has been appropriated for mortar carriages the following sums, viz:</p> <table style="margin-left: 20px;"> <tr> <td>By the act approved March 2, 1889.....</td> <td>\$100,000</td> </tr> <tr> <td>By the act approved August 18, 1890</td> <td>225,000</td> </tr> <tr> <td></td> <td style="border-top: 1px solid black;">325,000</td> </tr> </table> <p>thus leaving a balance of..... 449,500</p> <p>This is the least sum that should be appropriated for mortar carriages during the year 1892.</p>								By the act approved March 2, 1889.....	\$100,000	By the act approved August 18, 1890	225,000		325,000
By the act approved March 2, 1889.....	\$100,000												
By the act approved August 18, 1890	225,000												
	325,000												
Carriages for mounting new steel breech-loading 8, 10, and 12 inch guns.....	Feb. 24, 1891	26	769	1	1,805,000 00								
<p>NOTE.—It is important that appropriations should be made at once for coast defense gun carriages. Even if made at once, the guns and fortifications will be ready for them before the carriages can be provided.</p> <p>The types of some of the carriages are not yet determined. Experimental carriages are now being manufactured and tested. Until the models are adopted exact estimates can not be made, but immediate action is of such importance that estimates for appropriations are submitted now, that the work may go on as soon as models are adopted.</p>													

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats. at Large, or to Revised Statutes.			Estimated am't required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.
		Vol. or R. S.	Page.	Sec.			
<i>Armament of Fortifications—Continued.</i>							
<p>The work of manufacturing and testing experimental carriages will have progressed far enough before the end of the fiscal year to give more accurate knowledge of cost than is available now.</p> <p>The details of the above estimate are as follows:</p> <p>Eight-inch carriages: At the end of the calendar year 1893 there will have been completed thirty-three 8-inch guns (twenty-four at Gun Factory and nine at West Point). Of these it is probable that not more than eight will be mounted on barbette carriages. Sufficient money has already been appropriated for four barbette carriages, leaving four to be procured.</p> <p>Estimate: Four 8-inch barbette carriages, at \$15,000, \$60,000.</p> <p>The remaining guns of this caliber are to be mounted on disappearing carriages.</p> <p>Estimate: Twenty-five 8-inch disappearing carriages, at \$27,000, \$675,000.</p> <p>Ten-inch carriages: At the end of the calendar year 1893 nineteen 10-inch guns should be completed. Of these five may be mounted on barbette and the remainder on disappearing carriages.</p> <p>Estimate: Five 10-inch barbette carriages, at \$18,000, \$90,000; fourteen 10-inch disappearing carriages, at \$35,000, \$490,000.</p> <p>Twelve-inch carriages: At the end of the calendar year 1894 fifteen 12-inch guns will be completed. Two of these are to be mounted on barbette carriages, and twelve on gun-lift carriages.</p> <p>Estimate: Two 12-inch barbette carriages, at \$20,000, \$40,000; twelve 12-inch gun-lift carriages, at \$25,000, \$300,000.</p> <p>Casemate carriages: This type of carriage is one of the most difficult which the Department has to provide, and although the construction of casemates is still some distance in the future, in view of the time required to procure an experimental carriage, try it, and arrange for its reproduction, this work should commence at once. Therefore an estimate for this purpose is made.</p> <p>Estimate: 12-inch casemate carriages, etc., \$150,000.</p> <p>NOTE.—There is an offer to furnish one type 12-inch casemate carriage, complete, delivered in this country with full detail working drawings, and full detail working drawings for one other caliber of the same carriage and all rights to manufacture, for \$150,000. The above estimate for casemate carriages is intended for carrying out this offer, if we can not do better.</p>							
<p>For the ordnance proving-ground, Sandy Hook, N. J., as follows:</p> <p>Current expenses and maintenance of the ordnance proving-ground, Sandy Hook, N. J., including general repairs and alterations and accessories, incidental to testing and proving ordnance, including hire of assistants for the Ordnance Board, skilled mechanical labor, purchase of instruments and other supplies, building and repairing butts and targets, clearing and grading ranges.</p>							
Necessary expense of ordnance officers while temporarily employed at the proving-ground and absent from their proper stations, at the rate of \$2.50 per diem while so employed, and the compensation of draughtsmen while employed in the Army Ordnance Bureau on ordnance construction	Feb. 24, 1891	26	768,'9	1	\$22,000 00		
NOTE.—This estimate is to cover the current annual expenses of the Ordnance Proving Ground, and pay of draughtmen employed in the construction office at the Ordnance Bureau.							
The work included under this estimate is of the most important character as respects the development, trial, and proof of guns for coast defense and the investigation of all questions pertaining thereto. The provision for compensation of officers temporarily employed at the proving ground, for the draughtsmen employed at the Ordnance Office, was first embodied in the act of September 22, 1888.							
One steam engine and boiler.....	Submitted.....				2,000 00		
NOTE.—This steam engine and boiler are required to replace those on hand, which are old and worn, of insufficient capacity, and liable at any time to become absolutely unserviceable. They are also required for heating purposes, the present arrangement being inadequate.							
Woodworking machinery, to increase the capacity of carpenter shop.....do.....				1,000 00		
NOTE.—The woodworking machinery required includes planer, lathe, and band saw. They are necessary to meet the increased demand on the carpenter shop at the proving ground, and to diminish cost of production.							
Two railway trucks of 30 tons capacity.....do.....				700 00		
NOTE.—These trucks are required for the transportation of guns and their projectiles from the wharf to the proof butts, and powder to the magazines, and are very necessary.							
<i>Board of Ordnance and Fortification—</i>							
<p>To pay the salary of the civilian member of the Board of Ordnance and Fortification provided by the act of February 24, 1891 (26 Stat., pages 769 and 770), \$5,000,</p>							
					\$5,891, 107 00	\$2, 140, 803 00

		Vol. or R. S.	Page.	Sec.			
<p><i>Board of Ordnance and Fortification—Continued.</i> and for the necessary traveling expenses of said member when traveling on duty, as contemplated in said act, \$1,000</p> <p>NOTE.—The necessity for the above estimate is explained in the following letters of the honorable Second Comptroller of the Treasury and General Byron M. Cutcheon, the civilian member of the board:</p> <p style="text-align: center;">TREASURY DEPARTMENT, Second Comptroller's Office, Washington, D. C., July 31, 1891.</p> <p>SIR: I have given to the subject of our conversation on the 29th instant, and also to the contents of your letter of the 31st instant, very thoughtful consideration, and I am now satisfied that the accounting officers of the Treasury would be without authority to give credit for payments, if any should be made, to you as member of the Board of Ordnance and Fortification, on account either of salary or traveling expenses.</p> <p>It is clear that section 1761 of the Revised Statutes is a bar to any payment whatever to you as salary, you having been appointed after the adjournment of Congress to fill a vacancy in an existing office, and the vacancy having existed while the Senate was in session.</p> <p>It is by reason of the provisions of the same section of law that the justices of the Court of Private Land Claims, appointed under the act of March 3, 1891, can not draw their salaries until they shall have been confirmed by the Senate.</p> <p>For the same reason the additional Assistant Secretary of the Treasury provided for in the last legislative act can receive no compensation until the Senate shall confirm his nomination.</p> <p>With respect to the item of your traveling expenses, I now think it is also clear that there is no fund available for that purpose under the Fortification Act of February 24, 1891. The appropriation of \$150,000 to which you refer was, I think, made only for the objects set forth specifically in the act in the first clause under the head of "Board of Ordnance and Fortification," and I do not think there is evidence of such close connection between this clause and the one immediately following it in the act as would justify me in holding that the said appropriation can be charged with traveling expenses provided for in the latter clause.</p> <p>Further, I do not believe it can be maintained that either of the appropriations made by the acts of 1888 and 1890, for "the necessary expenses of the board," viz, \$5,000 each, is available for the payment of the traveling expenses of the additional member of the board authorized by the act of 1891. The act of 1888 provided for "the necessary expenses of the board," other than traveling expenses. The traveling expenses of the board, as constituted under that act, are payable from the appropriation "pay, etc., of the Army," the members thereof at that time being exclusively Army officers, and as such they are entitled, when traveling, to mileage and the cost of transportation.</p> <p>Therefore I think it is clear that Congress could not have had in contemplation the payment of any traveling expenses whatever when it made provision in the earlier acts for the necessary expenses of the board.</p> <p>I regret that I can not meet your views in this matter, but I am satisfied that I have correctly construed the law, and therefore no other course is left to me.</p> <p style="text-align: right;">Very respectfully, B. F. GILKESON, Comptroller.</p> <p>Hon. BYRON M. CUTCHEON, Member of Board of Ordnance and Fortification, Army Building, New York City, N. Y.</p> <p style="text-align: center;">BOARD OF ORDNANCE AND FORTIFICATION, War Department, October 17, 1891.</p> <p>DEAR SIR: * * * I would also beg to suggest that in making up the estimates for the regular appropriation bill for Fortifications for the next year, that the estimate be made for salary and actual traveling expenses of civilian member of the Board of Ordnance and Fortification, say, \$6,000, the salary being fixed at \$5,000. While the Second Comptroller has allowed the traveling expenses, so far, to be paid out of the expense fund under the act of 1890, it would clear the matter from some doubt if it were specially estimated. The expense fund is for necessary expenses of the board and the statute allows the civilian member "actual traveling expenses."</p> <p style="text-align: right;">Very respectfully yours, BYRON M. CUTCHEON, Member of the Board of Ordnance and Fortification. Hon. REDFIELD PROCTOR, Secretary of War.</p>	Feb. 24, 1891	26	769, 770	1	\$6,000 00	\$150,000 00

Improving the quality of the Potomac water and restoring the capacity for its storage, by improving the receiving reservoir, including the purchase or condemnation of the necessary land.....	Submitted.....				290,625 00				
Further improving the quality of the Potomac water by lowering the height of the cross-dam at the distributing reservoir.....	do				12,500 00				
Protecting the inlet to the aqueduct at Great Falls.....	do				5,000 00				
Extending the outlet of waste weir No. 3.....	do				2,500 00				
Purchase or condemnation of a site for a storage yard.....	do				10,000 00				
Cleaning out the distributing reservoir.....	do				13,825 00				
NOTE 1.—The necessity for the above increase of the estimate over the appropriation for the present fiscal year, and for the new estimates submitted, is explained in the statement of the officer in charge, in Appendix "V."									
NOTE 2.—The act of July 11, 1878 (20 Stat., 104), providing a permanent form of government for the District of Columbia, directs that the estimates for the "Expenses of the Washington Aqueduct and its appurtenances," shall be submitted by the Commissioners of the District of Columbia.									
NOTE 3.—The officer in charge of the work urgently recommends that the following clause be attached to the next appropriations for the aqueduct, and be made to operate on all future appropriations for it: <i>Provided</i> , That all appropriations for the Washington Aqueduct shall be available until expended, and if it shall appear to the Secretary of War, on the report of the Chief of Engineers, that for any cause any work pertaining to said aqueduct can not be carried on, or material therefor can not be obtained as rapidly as is necessary for the best and most vigorous prosecution of it, he is authorized to provide material by purchase in open market, or by contract for the fabrication thereof, and to carry on the work by days' labor or otherwise, as may seem to him expedient.									
<i>Fish-Ways at Great Falls—</i>									
To complete the erection of fish-ways at the Great Falls of the Potomac.....	Feb. 1, 1888	25	8	1	}.....	15,000 00			
	Submitted.....								
NOTE.—The officer charged with the disbursement of the funds appropriated for the erection of these fish-ways reports that the Commissioner of Fish and Fisheries is of opinion that in addition to the funds now available the sum of \$15,000 will be required for their completion. He recommends the appropriation.

MILITARY ACADEMY.							
<i>Buildings and Grounds, Military Academy—</i>							
Buildings and grounds: For repairing roads and paths, including roads and bridges on reservation.....	Mar. 2, 1891	26	821	1	\$500 00		
Continuing construction of breast-high wall in dangerous places.....	do.....				500 00		
Water-Works: Renewal of material in filter-beds; improving ventilation of filter-house and water-house; hose for use in cleaning filter-beds and water-house, and for use in fire-service at same; tools, implements, and materials for use of the two keepers and for repairs of siphon-house, filter-house, and of four and one-half miles of supply-pipes; for shed for tools and storage of fuel for keeper at Round Pond, and for tool-house at filter; for gauges at Round Pond and Delafield Pond, and stairs for access to same.....	do.....				500 00		
Broken stone and gravel for roads.....	do.....				2,000 00		
Maintaining and improving the grounds of the Post Cemetery, including the purchase of trees, plants, tools, and materials, to be immediately available.....	do.....				1,200 00		
<p>NOTE.—The sum asked for is absolutely necessary, in order that the grounds of the cemetery may be kept in proper condition. In this connection, attention is respectfully invited to the fact that the cemetery has been more than doubled in size within the past two years, and that no funds are available for beautifying it.—(Capt. W. H. Miller, A. Q. M., U. S. A.)</p>							
Repairs of cooking utensils, and the replacement of worn-out cooking-utensils in the cadet subsistence department, to be expended without advertising.....	do.....				326 00		
Repairs of chairs, tables, and other furniture in cadet subsistence department, and for contingent repairs, to be expended without advertising.....	do.....				50 00		
<p>NOTE.—This estimate is somewhat changed from that of last year, in order to show where the furniture is used.—(Capt. W. H. Miller, A. Q. M., U. S. A.)</p>							
Continuing repairs on married enlisted men's quarters.....	Submitted.....				3,000 00		
<p>NOTE.—The amount appropriated by Congress during the current fiscal year for the repair of married enlisted men's quarters was found entirely inadequate for placing the buildings in a fairly comfortable condition. With the sum asked for, it is proposed to place these quarters in as good a condition as circumstances will permit.—(Capt. W. H. Miller, A. Q. M., U. S. A.)</p>							
One set of officers' quarters.....	do.....				6,000 00		
<p>NOTE.—The erection of these quarters is deemed expedient, inasmuch as the five sets of officers' quarters now in course of erection will be insufficient for properly housing the many officers on duty here. For several years the quarters for officers at this post have been inadequate, necessitating in many cases the crowding of two families into quarters which were originally intended for one family in each. It is thought that with the erection of the set of quarters asked for the wants of the service in the matter of quartering officers will be met for many years to come.—(Capt. W. H. Miller, A. Q. M., U. S. A.)</p>							
Six sets of married enlisted men's quarters.....	do.....				9,000 00		
<p>NOTE.—I deem the erection of these quarters necessary in view of the condition of many of the old dilapidated frame buildings now occupied by the families of married enlisted men. With the erection of these quarters and the married enlisted men's quarters provided for in this and last year's acts for the support of the Military Academy, the health and comfort of our married soldiers will, for many years, be assured. In addition to this, it may be said that experience has shown that if quarters were provided for the married soldiers, now living in the adjacent village, the interests of this institution would be subserved.—(Capt. W. H. Miller, A. Q. M., U. S. A.)</p>							
Improving and modernizing the plumbing and sewerage of the post.....	do.....				18,000 00		
<p>NOTE.—\$15,000 was appropriated last year and is now being used for the purpose indicated, but it will not suffice. The amount asked for is estimated to be sufficient to place the plumbing and sewerage of the post in proper sanitary condition.—(Capt. W. H. Miller, A. Q. M., U. S. A.)</p>							
Completing the general overhauling and repair of the plumbing and sewerage system of the West Point Hotel.....	do.....				2,000 00		
<p>NOTE.—The amount appropriated for last year (\$1,500) is barely sufficient to purchase the necessary material and pay for the skilled labor. As the closets are located in a frame addition to the hotel, they are almost certain to freeze up in winter. The amount asked for herein will suffice to build an addition of brick in place of the present one and thus provide against danger of freezing.—(Capt. W. H. Miller, A. Q. M., U. S. A.)</p>							

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

<i>Buildings and Grounds, Military Academy—Continued.</i>							
New sinks and bath-rooms for cadets.....	Submitted.....				\$28,700 00		
<p>NOTE.—I concur in the remarks made last year by Capt. Chas. W. Williams, A. Q. M., U. S. Army, and beg to again submit them for congressional action: "The present sinks and bath-rooms for cadets have been condemned by all persons who have seen them in recent years. The bath-rooms are in the basement of cadet barracks, where they are badly located as to sun-light and ventilation, and are in such a position as any sanitarian would condemn. The renewal and enlargement of the sinks is a vital necessity.</p> <p>"With the foregoing amount, if appropriated, it is intended to put up a substantial building, with proper plumbing fixtures, properly lighted and heated, well ventilated, conveniently located, and one fulfilling all the requirements of modern sanitary science."—(Capt. W. H. Miller, A. Q. M., U. S. A.)</p>							
Repairs to cadet barracks:							
Repointing building.....	do.....				350 00		
Renewing flagging.....	do.....				210 00		
Repairing and painting roof.....	do.....				432 00		
Renewing woodwork in bath-rooms.....	do.....				760 00		
Kalsomining ceilings in cadet-rooms.....	do.....				1,200 00		
Placing a two-light pendant, with slide light, in each cadet-room.....	do.....				3,360 00		
<p>NOTE.—An inspection shows the immediate need of repointing this building in order to place it in proper repair. Many of the flagstones are old and broken, and the walk generally is in a wretched condition. The roof needs repairs and painting, and the woodwork in bath-rooms should be renewed. All ceilings of cadet rooms should be kalsomined. The item for placing a two-light pendant, with slide light, in each cadet room is submitted, in view of the many complaints made by cadets during the past year of soreness of eyes, due to defective burners and insufficient light. With the sum asked for herein, it is proposed to remedy, as far as possible, the defects complained of. Some provision should be made for the cadet to enable him to properly pursue his studies. With this end in view, I submit this estimate.—(Capt. W. H. Miller, A. Q. M., U. S. A.)</p>							
One set of quarters for clerk to the adjutant, to be immediately available upon approval of this act.....	do.....				3,000 00		
<p>NOTE.—From the best information obtainable, it is found that the building at present occupied by the adjutant's clerk is of revolutionary origin. In 1780-'82 it stood directly south of the present cadet chapel, and was afterwards known as "North's" and then as "Gridley's" Tavern. At the present writing it is old, unsafe, and not worth repairs. A new building is urgently needed.—(Capt. W. H. Miller, A. Q. M., U. S. A.)</p>							
Double set of quarters, for teacher of music and master of sword, to be immediately available upon approval of this act.....	do.....				10,000 00		
<p>NOTE.—The following remarks in connection with the estimate for the erection of these quarters made last year by my predecessor, Captain Chas. W. Williams, A. Q. M., U. S. Army, are respectfully submitted:</p> <p>"With this sum, it is proposed to erect at some convenient point a neat, two-story brick building for the accommodation of these most efficient and excellent employes." * * *</p> <p>"The quarters occupied by the teacher of music are required for the subaltern on duty with Company E, Engineers. For many years, and up to last fall, this officer occupied quarters in the engineer barracks; but owing to the strength of the company being increased to one hundred men it was found expedient to quarter this officer temporarily in the cadet barracks."</p> <p>The necessity for this building being as great as it was last year, favorable action on this estimate is respectfully recommended.—(Capt. W. H. Miller, A. Q. M., U. S. A.)</p>							
Altering roof of wing of quarters No. 39.....	do.....				1,200 00		
<p>NOTE.—The following remarks made by the officer occupying these quarters (Prof. C. W. Larned, U. S. M. A.), are respectfully submitted for consideration in connection with the work estimated for herein: * * *</p> <p>"I have referred for several years to a defect in the construction of the wing of the quarters occupied by me, the effect of which is to render the upper rooms almost unfit for occupancy in extremes of temperature, either in summer or winter. This defect consists in imposing a tin roof immediately above the chamber ceiling, without sheathing above the ceiling joists, and an air space of only about 18 inches at the ridge line diminishing to nothing at the eaves. As a consequence, in hot weather the ceilings of the chambers become so heated as to render the interior almost intolerable, while in winter the converse holds, and the ceiling is so cold as to cause a constant current of cold air falling from above. During the past winter I was obliged to abandon one of these rooms on this account, and I attribute much of the sickness of my family to cold and draughts occasioned by the causes described.</p> <p>"An inspection shows that this difficulty can not be remedied by sheathing above the ceiling joists, for the reason that there is not room for the accommodation of a man's body. The only remedy which will be effective is to raise the roof to a full gable.</p>							

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats. at Large, or to Revised Statutes.			Estimated amt required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.
		Vol. or R. S.	Page.	Sec.			
<i>Buildings and Grounds, Military Academy—Continued.</i>							
<p>"In this connection I will call attention to the fact that outside of the servant's room there are in this set of quarters but four chambers, <i>i. e.</i>, two in main building and two in wing—a smaller number I believe by at least two chambers than in corresponding sets occupied by permanent residents. By raising the roof of wing to a full gable one or possibly two chambers might be added to the wing affording very much needed room, and at the same time remedying the trouble described above. These considerations are so important to the comfort and well-being of my household that I have the honor to request that the change above described or some similar alterations be effected, by which additional chamber accommodations will be afforded and the rooms above referred to rendered comfortable."</p> <p>With the amount asked for herein it is proposed to change this roof to a full gable, thereby adding one more chamber to these quarters.—(Capt. W. H. Miller, A. Q. M., U. S. A.)</p>							
Repairs and improvements to barracks of Company E, Battalion of Engineers, and steam plant for heating same.....	Submitted.....				\$3,500 00		
<p>NOTE.—This barrack needs certain repairs in the shape of painting, pointing, etc., in order to place it in good condition. With the sum asked for, it is proposed, in addition to making the repairs needed, to introduce into the building a system of steam heating. The present system of heating is costly, and it is thought that the sum saved by heating with steam will, in a few years, pay for the plant asked for.—(Capt. W. H. Miller, A. Q. M., U. S. A.)</p>							
Addition to house of master mechanic.....	do.....				800 00		
<p>NOTE.—This is required to make the house now occupied by the master mechanic sufficiently large to accommodate his family, and is strongly recommended.—(Capt. W. H. Miller, A. Q. M., U. S. A.)</p>							
One soldiers' bath-house.....	do.....				4,450 00		
<p>NOTE.—The bathing facilities here are of the poorest description, and are entirely inadequate for the number of enlisted men stationed here. In order to insure the health of the command, a suitable building, well equipped for the purpose, should be provided.—(Capt. W. H. Miller, A. Q. M., U. S. A.)</p>							
Earthen closets for twenty-five sets of married enlisted men's quarters.....	do.....				750 00		
<p>NOTE.—The present privies are of the old vault system, and as they are located on shelving rock the drainage from them runs down the hillside and saturates the surrounding soil. These should be replaced by properly-constructed earthen closets, situated outside of the houses.—(Capt. W. H. Miller, A. Q. M., U. S. A.)</p>							
New sewer from new soldiers' hospital to river.....	do.....				3,576 00		
<p>NOTE.—An absolute necessity for the drainage of the new hospital.—(Capt. W. H. Miller, A. Q. M., U. S. A.)</p>							
New sewer from Rugertown, to connect with new sewer to be run from new soldiers' hospital to river.....	do.....				2,800 00		
<p>NOTE.—There is no drainage of any kind except surface drainage in the vicinity. For sanitary reasons this sewer should be built in connection with the sewer for the new soldiers' hospital, which is located in this vicinity.—(Capt. W. H. Miller, A. Q. M., U. S. A.)</p>							
New sewer from Logtown.....	do.....				1,300 00		
<p>NOTE.—Absolutely necessary for draining six sets of enlisted men's quarters located under the hill below the cemetery. Has been reported on several times by medical department as unsanitary and dangerous to health.—(Capt. W. H. Miller, A. Q. M., U. S. A.)</p>							
Conducting water in pipes to fifty-five sets of married enlisted men's quarters.....	do.....				1,500 00		
<p>NOTE.—These fifty-five sets of enlisted men's quarters are now dependent for their water supply on two springs, which are not only inadequate but do not supply pure water. With the sum asked for it is intended to run the water from the nearest water-pipe line to the inside of kitchens.—(Capt. W. H. Miller, A. Q. M., U. S. A.)</p>							
New water main from Sinclair Pond to new soldiers' hospital.....	do.....				650 00		
<p>NOTE.—Absolutely necessary to supply water to new soldiers' hospital.—(Capt. W. H. Miller, A. Q. M., U. S. A.)</p>							
New 10-inch water main from corner of cadet barracks to south gate.....	do.....				6,840 00		
<p>NOTE.—At present the water supply of this part of the post is dependent upon an old 7-inch water main, which extends about one half the distance, the other half being composed of four and two inch pipes. This supply is inadequate to the present and growing wants of the post, and a new 10-inch water main is urgently needed.—(Capt. W. H. Miller, A. Q. M., U. S. A.)</p>							

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats at Large, or to Revised Statutes.			Estimated am't required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.
		Vol. or R. S.	Page.	Sec.			
<i>Buildings and Grounds, Military Academy—Continued.</i>							
New gas main from post-office to new soldiers' hospital...	Submitted.....				\$4,968 00		
NOTE.—Absolutely necessary to furnish gas for the new soldiers' hospital.—(Capt. W. H. Miller, A. Q. M., U. S. A.)							
New gas main from old cadet hospital to south gate.....	do.....				2,812 00		
NOTE.—This new main is necessary in order that the officers' quarters at the south end of post may be furnished with sufficient gas for illuminating and other purposes.—(Capt. W. H. Miller, A. Q. M., U. S. A.)							
Building a breast-high masonry wall on east side of road from north gate to entrance to Post Cemetery	do.....				1,800 00		
NOTE.—This wall is necessary in order that the cemetery and the old cadet garden can be consolidated in one plot, with the entrance near the present north gate.—(Capt. W. H. Miller, A. Q. M., U. S. A.)							
Asphalt road and walk in front of and around new gymnasium.....	do.....				2,000 00		
NOTE.—In view of the muddy condition of the roads and gravel paths here during the late fall, winter, and early spring, and as the new gymnasium, when finished, will be one of the finest buildings on the post, an asphalt road and walk around it is deemed necessary. In order to provide a proper approach to the building this estimate is respectfully submitted.—(Capt. W. H. Miller, A. Q. M., U. S. A.)							
Repairing road from village of Highland Falls to south gate and laying a board foot walk along same.....	do.....				1,300 00		
NOTE.—Until the purchase by the United States of the Kinsley estate, this road was cared for by the village of Highland Falls, but since the purchase it has become considerably worn, because there has not been means at hand to keep it in repair. The walk is required for foot travel between the post and the edge of the reservation.—(Capt. W. H. Miller, A. Q. M., U. S. A.)							
General repairs to cadet laundry, painting, pointing, and for incidental repairs to machinery, to be expended without advertising.....	do.....				300 00		
Incidental repairs to the cadet quartermaster's department storehouse, repairs to plumbing therein, necessary painting, whitewashing, to be expended without advertising.....	do.....				300 00		
Painting, kalsomining, whitewashing, and repairing interior walls of cadet mess building, kitchen, dish pantry, bakery, and storerooms, to be expended without advertising.....	do.....				150 00		
NOTE.—These buildings are in need of the repairs, painting, pointing, whitewashing, kalsomining, etc., noted in the three preceding items. With the sum asked for in each case, the buildings can be placed in good condition.—(Capt. W. H. Miller, A. Q. M., U. S. A.)							
Grading and concreting inclosed rear area of cadet hospital (340 square yards) to prevent dampness of foundation walls, etc.....	do.....				294 00		
Connecting rain conductors (rear main building) with main house drain to prevent flooding of inclosed rear area of cadet hospital and existing dampness of cellar walls.....	do.....				120 00		
Repairing trenches containing return heating pipes in cellar concrete floor, and providing same with suitable iron covers for protection of pipes.....	do.....				264 00		
Re-oiling and re-lacquering hard-wood floors of cadet hospital throughout.....	do.....				140 00		
Fitting up an additional kitchen in hospital (needed to separate the cadet and hospital corps messes, as recommended by the Assistant Inspector-General of the Army), viz, range, boiler, hot and cold water connections, kitchen sink, dresser, cupboard, and gas-pipe rack.....	do.....				404 00		
NOTE.—The improvements specified in the first four items are needed very much in order that the hospital, one of the finest buildings on the post, may be placed in the best possible condition.							
The item providing for fitting up an additional kitchen for the purpose of separating the cadet and hospital corps messes is of paramount importance, inasmuch as it is not deemed to the interest of the cadet sick to have meals pertaining to both messes prepared in the same kitchen. With the limited facilities in the present kitchen for the preparation of meals it is impracticable to have the cooking done separately, and in view of the fact that the men of both messes are subsisted from entirely separate appropriations, it is thought the additional kitchen asked for should be allowed.—(Capt. W. H. Miller, A. Q. M., U. S. A.)							

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats. at Large, or to Revised Statutes.			Estimated amt required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.
		Vol. or R. S.	Page.	Sec.			
<i>Buildings and Grounds, Military Academy—Continued.</i>							
Reflooring Grant Hall, substituting for the board floor therein a tile floor 96 feet long by 45 feet wide, to be immediately available upon approval of the act.....	Submitted.....				\$3,200 00		
NOTE.—Immediate availability is requested because of the urgency for a new floor.—(Capt. Wm. F. Spurgin, 21st Infantry, Treasurer U. S. M. A.)							
Equipment of new gymnasium :							
Machines, mattresses, apparatus, and measuring outfit, and all labor and material for setting the same in position	do.....				2,476 00		
New fencing goods, and new racks and closets for storage of material	do.....				500 00		
Bolts, ropes, wringers, and fixtures for swimming tank...	do.....				100 00		
Balls, pins, and fixtures for bowling alley.....	do.....				100 00		
NOTE.—As no funds are available for the equipment of the new gymnasium, and as the articles enumerated above are necessary for the physical development of the cadet, this estimate is respectfully submitted, with the strongest recommendations in its favor.—(Capt. W. H. Miller, A. Q. M., U. S. A.)							
Improving the subsoil and surface drainage, and for modernizing, as far as practicable, the plumbing of the barracks for enlisted men on this post, in accordance with recommendations submitted by the medical department of the post.....	do.....				16,675 00	\$156,357 00	\$86,172 70
NOTE.—An inspection of these buildings shows that each of them is provided with a basement, on one or more sides of which is an embankment either in contact with the walls or separated from them by an area; that in all these buildings except one the embankment is very nearly level with the first floor; that the basements are divided into rooms which are used as kitchens, dining-rooms, and storerooms; that these rooms are entered from the lower or free side of the building, where the ground level is about the same as that of the basement floor; and that only in isolated rooms in one or two of the buildings have cement or concrete floors been put down. It appears from the sanitary report of Assistant Surgeon W. F. Carter, U. S. Army, for the month of June, 1891, that in the construction of the band and engineer barracks no measures whatever were taken, so far as can be seen, to secure the drainage of the soil around and beneath the foundations, or to prevent moisture rising along the cellar walls above the floor level; and that the conditions found to exist in the basements of the band barracks are certainly not to be considered satisfactory from a sanitary standpoint. The soil beneath the floors is damp and wet, and the walls damp and even wet to some distance above the floors. While the defects in the subsoil drainage of the cavalry and Army service barracks are not so pronounced, it is thought that they are sufficiently serious to warrant attention in order that the health of the occupants will be assured. It is thought that the defects will be removed by laying, as the surgeon recommends, tile drains where practicable, or by the erection of impervious, intercepting walls with rubble backing where the foundations rest upon shelving rock tending to conduct water under the buildings; by the removal of all present floors and putting down concrete, asphalt and cement floors in all basement rooms, and coating the inner surfaces of walls with some impervious material for several feet above the floor level. <i>Surface drainage.</i> —The surface drainage of all these barracks should be remodeled, inasmuch as no adequate means are provided for carrying off the water falling into the areaways from the sloping ground in the immediate vicinity of the buildings. It is thought that proper surface drainage will be assured by deepening, as the surgeon recommends, the areaway on south side of engineer barracks, and east, north, and south sides of cavalry barracks, by paving with cobblestones coated with coal-tar pitch all areaways about all barracks and the entire surface between south side of Army service barracks and chapel; and the construction of a suitable surface drain on upper side of road in front of band barracks. <i>House drainage.</i> —The great difficulty, as the surgeon reports, in dealing with the house drainage of the band barracks is the low line of the basements in which of necessity the principal plumbing appliances are placed. There are no proper grades for any of the floor or surface pipes, and without some efficient means of flushing, regularly and forcibly, it can not be expected that they will long remain open. Little can be done with the plumbing in these barracks to improve it or make it safe. The whole thing should be torn out and replaced with a new and more rational system, embracing a separate bath-room with ample bathing facilities for use of the women and children. The plumbing in the engineer barracks seems to be in better condition as to repair than that of any of the barracks; but there is an entire want of a proper sanitary system. The absence of ventilation of traps, the concealment of lead waste pipes under the flooring, etc., show that the work has been done without any regard whatever to the principles of modern house drainage.							

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats. at Large, or to Revised Statutes.			Estimated am't required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.
		Vol. or R. S.	Page.	Sec.			
<i>Buildings and Grounds, Military Academy—Continued.</i>							
<p>The bathing facilities in all the barracks of the post are poor and entirely inadequate. The bath tubs in band and engineers barracks only are supplied with hot water, and in the latter the supply is sufficient for only two of the four tubs. It is important that each set of quarters should have ample and convenient bathing facilities.</p> <p>The lavatory fixtures in the cavalry and Army service barracks are placed in small, poorly lighted, and damp cellar rooms. In each barrack this room is reached by a stairway and is provided with no other opening of approach or exit. These rooms are so easy of access and afford so complete concealment that in all probability the fixtures within are used as urinals by the men.</p> <p>It is strongly advised to do away with the scattered and haphazard plumbing in all these quarters, and to select rooms in each building and place in them a system of house drainage in every respect up to the requirements of modern sanitary practice.</p> <p><i>Privies.</i>—The privy used by the occupants of the band barracks is situated in the rear of this building. The house is a wooden structure, divided into 14 compartments, 7 in each half of the house. Beneath the seats is a large vault, circular at the bottom, running nearly the whole length of the privy. A current of water supplied by a perforated pipe on each side of the vault is supposed to carry away all the solid and liquid wastes discharged into the vault. But a large volume of water is required to accomplish this; a larger volume than the present water supply could furnish regularly. The arrangement is ineffective and unsanitary.</p> <p>The privies for the engineer barrack, a brick building situated opposite the west end of the barracks, and the privy for the cavalry and Army service barrack, in one separate building divided into two rooms, are provided with 18 urinals and 18 hopper closets in all, six urinals and six closets for use of the occupants of each set of quarters.</p> <p>The water to these closets is taken direct from the general water supply of the post. They are unsuitable in design, and nearly all of them are worn-out, and it is hardly possible that anything can be done to render them suitable or serviceable.</p> <p>The water-closets of enlisted men of the post should be completely renovated; new floors in privy-house, preferably of slate or tile; closets of an improved pattern, each provided with an ample flush tank (9 gallons), and an inch and one half or two inch flush pipe from tank to closet, all to be properly connected with the house soil pipe, and to have traps vented to the roof.</p> <p>With the sum asked for herein it is proposed to carry out the recommendation of Assistant Surgeon Carter in the matter of improving the drainage and plumbing of enlisted men's barracks at this post, with a view of placing them in the best possible sanitary condition. I concur with the surgeon in all his recommendations and strongly urge the same for favorable consideration.— (Capt. W. H. Miller, A. Q. M., U. S. A.)</p>

<i>Improvement of Yellowstone National Park—</i>							
For construction of road between Grand Cañon, Yancey's, and Mammoth Hot Springs, and for the repair, maintenance, and completion of roads and bridges generally throughout the park.....	Mar. 3, 1891	26	977	1	150,000 00	75,000 00
<p>NOTE.—The officer in charge of this improvement remarks: "The appropriations for this work have so far been made under an annual appropriation, which has to be expended during the fiscal year for which it was made. In this class of appropriations all balances unexpended at the close of the fiscal year revert to the Treasury, so that during the long sessions of Congress, on the 1st of July the work suddenly finds itself out of funds. Since the appropriation bills are usually passed some time in July or August, all hands have to be discharged right</p>							

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.			References to Stats. at Large, or to Revised Statutes.			Estimated amt required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.

<i>Improvement of Yellowstone National Park—Continued.</i>									
in the best part of the season. Everything has to be cleared up, carted a long distance and stored, and we have to trust to luck for assembling our experienced hands a month or so later when the new appropriation becomes available. Now, the working season at such high altitudes is very short, from May to October at best, and the operation of cutting it in two in the middle is not wise. This matter can easily be remedied by adding to the appropriation section a proviso that the funds shall be available until wholly expended whether within the fiscal year or not. Another proviso, to the effect that the Secretary of War may carry on the work by contract, or otherwise, as may be most economical and advantageous to the Government, would have the effect of placing it on exactly the same status as the appropriations for river and harbor improvements. The work being of the same character, and being conducted under the same organization and methods would be placed upon the same advantageous plane for economical administration as those."

Rivers and Harbors.—Statement showing the amount that can be profitably expended in the next fiscal year.

NOTE.—The following statement is not furnished as a part of the "annual estimates for the public service" required by the act of March 3, 1875 (18 Stat., p. 370), to be furnished by the Secretary of War to the Secretary of the Treasury, but is inserted as a convenient and customary summary of items taken from the annual report of the Chief of Engineers for the fiscal year 1891, showing under the provisions of the act of Congress approved March 2, 1867 (14 Stat., p. 421), "the amount that can be profitably expended in the next fiscal year" on each of the works mentioned:

For what object.	Date of last appropriation.	Reference to statutes.			Amount that can be profitably expended in the next fiscal year, as reported by the Chief of Engineers.

PUBLIC PRINTING AND BINDING.							
The following are the estimates for public printing, binding, and paper for the same, as furnished by the Library of Congress and the several Executive Departments, under the provisions of section 2, act of May 8, 1872 (R. S., page 720, section 3661):							
LIBRARY OF CONGRESS.							
<i>Printing and Binding</i> —							
Printing and binding, to be executed under the direction of the Public Printer, as follows: Printing and binding copyright records and blanks, binding of books and periodicals for the Library of Congress, and printing and binding Catalogue.....						\$15,000	
STATE DEPARTMENT.							
<i>Printing and Binding</i> —							
Printing and binding, to be executed under the direction of the Public Printer.....						25,000	
TREASURY DEPARTMENT.							
<i>Printing and Binding</i> —							
Printing, and paper for the same; blank books, binding, ruling, and all other work for the Treasury Department, heretofore estimated for by the Public Printer.....						325,000	
SMITHSONIAN INSTITUTION.							
<i>Printing and Binding</i> —							
Printing labels and blanks, and for the bulletins and annual volumes of the Proceedings of the National Museum.....						18,000	
NOTE.—The sum of \$18,000 was asked for last year, for the purpose of enlarging the mailing list so as to include in it the more important public libraries and educational institutions, and to render it possible, in response to urgent requests, to send the publications of the Museum to individuals who need them for use in connection with scientific investigations.							
The sum appropriated (\$15,000) enabled the Museum to enlarge considerably its mailing list, but the full amount estimated for will be necessary to insure a satisfactory distribution.							
WAR DEPARTMENT.							
<i>Printing and Binding</i> —							
Printing and binding for the War Department and its bureaus, to be executed under the direction of the Public Printer, as follows:							
Office of Secretary of War (including the Record and Pension Division).....						\$25,000	
Office of Adjutant-General.....						28,000	
Office of Inspector-General.....						1,000	
Office of Judge-Advocate-General..						500	
Office of Quartermaster-General....						18,000	
Office of Commissary-General.....						4,500	
Office of Paymaster-General.....						3,500	
Office of Surgeon-General (including \$12,000 for the index-catalogue of the library).....						30,000	
Office of Chief of Engineers (including a sum not exceeding \$5,000, for publication of Professional Papers when approved by the Secretary of War).....						20,000	
Office of Chief of Ordnance.....						20,000	
Office of Chief Signal Officer.....						1,800	
Office of Rebellion Records.....						1,500	
						\$153,800

LIGHT-HOUSE ESTABLISHMENT.							
<i>Indispensable.</i>							
Under this head are classed only those items which are urgently required for the protection, care, and efficiency of existing aids to navigation, or for carrying out the expressed will of Congress.							
<i>Supplies of Light-Houses—</i>							
Supplying fog-signals, light-houses, and other lights with illuminating, cleaning, preservative, and such other materials as may be required for annual consumption; for books, boats, and furniture for stations, and not exceeding one hundred dollars for purchase of technical and professional books and periodicals for the use of the Light-House Board, and other incidental expenses.....	Mar. 3, 1891	26	956	1	\$408,000 00 \$375,000 00	
NOTE.—The amount estimated as needed for last year was \$408,000; the amount appropriated for use was \$375,000. The number of light-stations at the beginning of the last fiscal year was 852. This number will be still further increased in 1892 by 39 light-stations, which are now being built, and it is fair to expect that appropriations will be made, during the next session, for still other light-stations. Articles of light-house supply not manufactured in this country were formerly imported, duty free; now duties must be paid on them. The appropriation of the present year will barely serve to keep the lights supplied.							
<i>Repairs of Light-Houses—</i>							
Repairing, rebuilding, and improving light-houses and buildings; for improvements to grounds connected therewith; for establishing and repairing pierhead and other beacon-lights; for illuminating apparatus and machinery to replace that already in use; and for incidental expenses relating to these various objects.....	Mar. 3, 1891	26	956	1	400,000 00 345,000 00	
NOTE.—The board depends upon this appropriation for means with which to preserve the fixed aids to navigation and to keep them in a state of efficiency. The number of these aids is increased from year to year. The appropriation should be increased in like proportion.							

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats. at Large, or to Revised Statutes.			Estimated am't required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.
		Vol. or R. S.	Page.	Sec.			
<i>Salaries of Keepers of Light-Houses—</i>							
Salaries, fuel, rations, rent of quarters, where necessary, and similar incidental expenses of not exceeding 1,200 light-house and fog-signal keepers and laborers attending other lights.....	Mar. 3, 1891	R. S. 26	908 956	4673 1	\$678,000 00	\$645,000 00
<p>NOTE.—It is estimated that \$678,000 will be needed. The exact number of keepers who will then be in the service can not readily be determined, but it is safe to take as a basis 1,200, although it is not impossible that the number may run up to 1,250. The average rate fixed by law, not to be exceeded, is \$600 per keeper, but taking \$575 as the average, the amount needed will be \$678,000.</p>							
<i>Expenses of Light-Vessels—</i>							
Seamen's wages, rations, repairs, salaries, supplies, and temporary employment and incidental expenses of light-vessels.....	Mar. 3, 1891	26	956	1	290,000 00	250,000 00
<p>NOTE.—There were 31 light-vessels in service on June 30, 1891; since then 5 new light-vessels have been built and are now in service. There are 5 new light-vessels now under construction, each of which is to take the place of an old or obsolete vessel. There will be in actual service during the next fiscal year 9 more light-vessels than were in service this year, and will cost an additional \$50,000 to maintain them. The last appropriation, \$250,000, was all expended, leaving many things to be desired. The next appropriation should be at least \$50,000 more than the last.</p>							
<i>Expenses of Buoyage—</i>							
Expenses of establishing, replacing, and maintaining buoys, spindles, and day-beacons, and for incidental expenses relating thereto.....	Mar. 3, 1891	26	956	1	400,000 00	335,000 00
<p>NOTE.—Last year there were in place 14 electric-lighted buoys, 59 whistling-buoys, 79 bell-buoys, and 4,172 iron and wooden buoys, making in all 4,324 buoys. These, with 391 spindles and day or unlighted beacons, make a total of 4,715, as against 4,651 of last year, showing an increase of 63. Beacons and day-marks, being placed in exposed positions, are extremely liable to injury and destruction. Many of them are now sadly in need of repairs, which will cost \$25,000. For the electric buoys of the Gedney Channel \$25,000 is required to purchase cables and keep up the system. For the whistling and bell buoys and to keep up the reserve stock of buoys and appurtenances, \$15,000 will be required. Therefore, \$400,000 will be required for the expenses of buoyage during the next fiscal year.</p>							
<i>Expenses of Fog-Signals—</i>							
Establishing, replacing, duplicating, and improving fog-signals and buildings connected therewith, and for repairs and incidental expenses of the same.....	Mar. 3, 1891	26	956	1	80,000 00	70,000 00
<i>Inspecting Lights—</i>							
Mileage or traveling expenses of members of the Light-House Board, including rewards paid for information as to collisions, and for the apprehension of those who damage light-house property.....	Mar. 3, 1891	26	956	1	5,000 00	3,000 00
<p>NOTES.—The theory is that light-house inspectors and engineers inspect the light-houses, light-ships, light-house and buoy depots, and other appurtenances, and that the members of the Light-House Board inspect the work of the inspectors and engineers. Proper inspection by members of the board is, however, limited by the fact that their mileage or traveling expenses can be paid only from this appropriation, which is burdened by the provision that from it must be paid the rewards offered for information as to collisions and for the apprehension of those who damage light-house property. It is therefore recommended that this amount be increased to \$5,000 for the coming year, or that the board be authorized to pay its members mileage or traveling expenses from the several general and special appropriations to which the travel may pertain.</p>							
<i>Lighting of Rivers—</i>							
<p>Establishing, supplying, and maintaining post-lights on the Hudson and East Rivers, New York; the Raritan River, New Jersey; Connecticut River, Thames River, Connecticut; the Delaware River, between Philadelphia and Bordentown, New Jersey; the Elk River, Maryland; the Cape Fear River, North Carolina; Savannah River, Georgia; St. John's and Indian Rivers, Florida; at Chicot Pass, and to mark the navigable channel along Grand Lake, Louisiana; at the mouth of Red River, Louisiana; on the Mississippi, Missouri, Ohio, Tennessee, Illinois, and Great Kanawha Rivers; Sacramento and San Joaquin Rivers, California; on the Columbia and Willamette Rivers, Oregon; and on Puget Sound, Washington Sound, and adjacent waters, Washington; the Light-House Board being hereby au-</p>							

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893.—Continued.

General object (title or appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats. at Large, or to Revised Statutes.			Estimated am't required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.
		Vol. or R. S.	Page.	Art.			
<i>Lighting of Rivers—Continued.</i> thorized to lease the necessary ground for all such lights and beacons as are for temporary use or are used to point out changeable channels, and which, in consequence, can not be made permanent.....	Mar. 3, 1891	26	956	1	\$350,000 00	\$283,000 00
<p>NOTE.—The appropriation to support river lights during the year ending June 30, 1891, was \$283,000. The increase in the number of lights during the last fiscal year was much less than river commerce required, but it was all that the appropriation would support. If the lights asked for on the rivers already named in the appropriation act are all provided there will be at least 1,900 of them. But it will be practically impossible to greatly increase the present number of lights from this appropriation, as the board, because of lack of funds, has had not only to refuse to establish many lights asked for, but it has had, actually, to discontinue certain lights previously established. In 1888, but 18 rivers were lighted; in 1889, that number was increased to 22; in 1890, to 25; in 1891, 25. If a proportionate increase is made in the special appropriation asked for in 1892 the number of rivers to be lighted will be some 30 at least, and there will be some 1,900 lights to be maintained. As the rivers which are to be lighted are mainly in the East, where the expense of establishing and maintaining river-lights is the greatest, it is estimated that for the lights that will then have to be provided for \$350,000 will be required.</p>							
<i>Survey of Light-House Sites—</i> Preliminary examinations, surveys, and plans for determining the proper sites and cost of light-houses and structures for which estimates are to be made to Congress.....	Mar. 3, 1891	26	957	1	1,000 00	1,000 00
Total Light-House Establishment.....						2,612,000 00	2,307,000 00
UNITED STATES COAST AND GEODETIC SURVEY.							
<i>Coast and Geodetic Survey—</i> Every expenditure requisite for and incident to the survey of the Atlantic, Gulf, and Pacific coasts of the United States and the coast of the Territory of Alaska, including the survey of rivers to the head of tide-water or ship navigation; deep-sea soundings, temperature, and current observations along the coasts and throughout the Gulf Stream and Japan Stream, flowing off the said coasts; tidal observations; the necessary resurveys; the preparation of the Coast Pilot; continuing researches and other work relating to terrestrial magnetism and the magnetic maps of the United States and adjacent waters, and the tables of magnetic declination, dip, and intensity usually accompanying them; and including compensation not otherwise appropriated for; of persons employed on the field-work, in conformity with the regulations for the government of the Coast and Geodetic Survey adopted by the Secretary of the Treasury; for special examinations that may be required by the Light-House Board or other proper authority, and including traveling expenses of officers and men of the Navy on duty; for commutation to officers of the field force while on field duty, at a rate to be fixed by the Secretary of the Treasury, not exceeding two dollars and fifty cents per day each; outfit, equipment, and care of vessels, used in the Survey, and also the repairs and maintenance of the complement of vessels, to be expended in accordance with the regulations relating to the Coast and Geodetic Survey from time to time prescribed by the Secretary of the Treasury, and under the following heads: <i>Provided</i> , That no advance of money to chiefs of field parties under this appropriation shall be made unless to a commissioned officer, or to a civilian officer, who shall give bond in such sum as the Secretary of the Treasury may direct.							
<i>Party Expenses, Coast and Geodetic Survey—</i> For party expenses: Triangulation, topography, and hydrography of the coast of Maine, and to the international boundary monument; the vicinity of the east end of Long Island, Nantucket Shoals and approaches, including Vineyard Sound; the coast of Massachusetts (including resurvey of Boston Harbor), and New Hampshire; the Connecticut River to Hartford, the Hudson River to Troy, and to continue to date corrections of former surveys of the Delaware River, from the vicinity of Philadelphia to Trenton..... Mar. 3, 1871 Mar. 3, 1891	R. S. 16 26	910 508 959	4681- 4691 1 1	} \$18,000 00		

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

Discussion and publication of observations.....	Mar. 3, 1891	26	962	1		1,000 00	1,000 00
<i>General Expenses, Coast and Geodetic Survey—</i>							
Office expenses:							
Purchase of new instruments, for materials and supplies required in the instrument-shop, carpenter-shop, and drawing-division, and for books, maps, charts, and subscriptions.....	Mar. 3, 1891	26	962	1	9,000 00		
Copper-plates, chart-paper, printer's ink; copper, zinc, and chemicals for electrotyping and photographing; engraving, printing, photographing, and electrotyping supplies; for extra engraving and drawing, and for photolithographing charts and printing from stone and copper for immediate use.....	Same act.....				20,000 00		
Stationery for the office and field parties, transportation of instruments and supplies when not charged to party expenses, office wagon and horses, fuel, gas, telegrams, ice, and washing.....	do.....				7,500 00		
Miscellaneous expenses, contingencies of all kinds, office furniture, repairs, and extra labor, and for traveling expenses of assistants and others employed in the office sent on special duty in the service of the office.....	do.....				4,500 00		
Total general expenses of office.....						41,000 00	46,900 00
That no part of the money herein appropriated for the Coast and Geodetic Survey shall be available for allowance to civilian or other officers for subsistence while on duty at Washington (except as hereinbefore provided, for officers of the field force ordered to Washington, for short periods for consultation with the Superintendent), or to officers of the Navy attached to the Survey, except as now provided by law.							
<i>Printing and Binding, Coast and Geodetic Survey—</i>							
Printing and lithographing, photolithographing, photo-engraving, and all forms of illustration done by the Public Printer, on requisition by the Treasury Department, for the Coast and Geodetic Survey, namely: Tide-tables, Coast Pilots, appendices to the Superintendent's annual reports, published separately; notices to mariners, circulars, blank-books, blank forms, and miscellaneous printing, including the cost of all binding and covering; the necessary stock and materials, and binding for the library and archives.....	Mar. 3, 1891	26	988	1	20,935 00		
NOTE.—No engraving is done by the Public Printer for the Coast and Geodetic Survey.							
NOTE.—In relation to above estimates, see letter of Superintendent Coast and Geodetic Survey in Appendix "Y."							
Total Coast and Geodetic Survey, exclusive of printing and binding.....						508,430 00	513,630 00

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats. at Large, or to Revised Statutes.			Estimated am't required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.
		Vol. or R. S.	Page.	Sec.			
UNDER SMITHSONIAN INSTITUTION.							
<i>Preservation of Collections, National Museum—</i>							
Continuing the preservation, exhibition, and increase of the collections from the surveying and exploring expeditions of the Government, and from other sources, including salaries or compensation of all necessary employes	Mar. 3, 1891	26	963	1	\$145,000 00	\$145,000 00
[The Smithsonian Institution estimates for an increase in this item of \$35,000 over the present appropriation.]							
<p>NOTE.—The constant growth of the collections, the steady increase in the number of visitors, and the yearly extending demands of educational institutions and of the public upon the Museum render the appropriations of last year insufficient, although expended with the strictest economy.</p> <p>A small amount of money is also essential for the purchase of specimens which can not be obtained otherwise and which are indispensable for completing series in the collections.</p> <p>It is desirable that the number of persons in the paid scientific staff should be increased. At present much of the scientific work is performed by volunteers without compensation, a system which is found advantageous to a limited extent only. Even with this aid from scientists not connected with the Museum it is impossible for the curators and their assistants to perform the urgent work of their departments. This is attributable in a degree to the growing frequency of the demands of educational institutions and the outside public upon the staff for information and aid.</p> <p>The salaries paid the scientific staff should be greater, their compensation being at present less for actual service than that of teachers of the higher grades in the public schools.</p> <p>The salaries of clerks and other administrative employes are much smaller than the compensation for similar services in the Executive Departments of the Government.</p> <p>A greater number of watchmen is required to insure the safekeeping of the valuable collections; and in order that the number of hours of service of the laboring force may not be increased, more laborers and cleaners are necessary for the care and arrangement of the cases and collections and for keeping the buildings in proper condition.</p>							
<i>Duties on Articles Imported for National Museum—</i>							
To meet customs-duties on glass, tin, and other dutiable articles and supplies, imported for the National Museum	Mar. 3, 1891	26	866	1	1,000 00	1,000 00
[The Smithsonian Institution estimates for an increase in this item of \$1,000 over the present appropriation.]							
NOTE.—Rendered necessary under the provisions of the act of October 1, 1890, "to reduce the revenue." etc.							
<i>Furniture and Fixtures, National Museum—</i>							
Cases, furniture, fixtures, and appliances required for the exhibition and safekeeping of the collections of the National Museum, including salaries or compensation of all necessary employes	Mar. 3, 1891	26	963	1	25,000 00	25,000 00
[The Smithsonian Institution estimates for an increase in this item of \$5,000 over the present appropriation.]							
<p>NOTE.—To keep pace with the constant increase in the number of objects, especially in the educational and study series, and with the growing demands of the public, and to care properly for the valuable objects now in the custody of the Museum and constantly being added to the series, provision must be made for the construction of additional cases; especially is this true of the valuable lay figures illustrating the characteristics of the races of mankind, many of which it has so far been necessary to leave unprotected. About one-half the amount heretofore appropriated has been needed, year by year, to pay for the services of constructors, carpenters, engineer of property, and two clerks, leaving only about \$12,000 for other purposes. It is therefore hoped that the entire amount asked for will be appropriated.</p>							
<i>Heating and Lighting, National Museum—</i>							
Expense of heating, lighting, electrical, telegraphic and salubric service for the National Museum, including salaries or compensation of all necessary employes.....	Mar. 3, 1891	26	963	1	12,000 00	12,000 00
[The Smithsonian Institution estimates for an increase in this item of \$3,000 over the present appropriation.]							
<p>NOTE.—It is necessary to keep the buildings at a nearly uniform temperature throughout the twenty-four hours; unless this course is followed, as stated last year, the safety of the collections will be endangered. Should the winter prove a severe one, unless the entire amount asked for is appropriated, a deficiency estimate will be found necessary.</p>							

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats. at Large, or to Revised Statutes.			Estimated am't required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30 1892.
		Vol. or R. S.	Page.	Art.			
<i>Addition to Electric-Light Plant, National Museum—</i> Increasing the electric-light plant of the National Museum by the addition of one engine, two dynamos, and complement of arc and incandescent lamps, including all necessary expenses of installation.....	Submitted.....				\$5,000 00		
<p>NOTE.—There are at present in use in the Museum building twenty-five arc lights, but this number is not sufficient to illuminate the entire building, there being no lights in the courts, and an insufficient number in the halls. It is thought that with this additional plant the building may be so lighted that it can be thrown open occasionally to the public at night, to the advantage of those persons who are unable to avail themselves of the regular hours of exhibition. The purchase of an additional engine will also render it possible to provide against the contingency of total darkness, in case of damage to dynamo, line, or motor.</p>							
<i>Galleries, National Museum—</i> The erection of two galleries, one in the southwest court, the other in the southeast range, National Museum building; said galleries to be constructed of iron beams, supported by iron pillars, and protected by iron railings, and provided with suitable staircases; the work to be done under the direction of the Architect of the Capitol, and in accordance with the approval of the Secretary of the Smithsonian Institution.....	Submitted.....				8,000 00		
<p>NOTE.—The erection of these galleries will add materially to the area now available for exhibition purposes; the space needed for their construction can be used without disadvantage to the exhibits already in the halls.</p>							
<i>Postage, Smithsonian Institution and National Museum—</i> Postage-stamps and foreign postal-cards and postage for the Smithsonian Institution, National Museum, and international exchanges.....	Mar. 3, 1891	26	963	1		\$500 00	\$500 00
<i>International Exchanges, Smithsonian Institution—</i> Expenses of the system of international exchanges between the United States and foreign countries, under the direction of the Smithsonian Institution, including salaries or compensation of all necessary employes..... [The Smithsonian Institution estimates for an increase in this item of \$6,000 over the present appropriation.]	Mar. 3, 1891	26	963	1		17,000 00	17,000 00
<p>NOTE.—An appropriation of \$17,000 is now made to the Institution to cover a portion of the expenses of the system of international exchanges, and from specific or contingent appropriations about \$3,000 more are paid by various Government departments to the Institution for the same purpose. Needless complication will be avoided by combining these appropriations in a single item.</p> <p>Attention is earnestly called to the fact that no provision has yet been made for carrying out the treaty for the immediate exchange of parliamentary documents, for which \$2,000 is here included.</p> <p>The aggregate of \$23,000 covers but a portion of the expense for freight, the Government still being under obligation to many of the transatlantic steamship companies for the privilege of free freight generously accorded to the exchange service at its inception.</p>							
<i>North American Ethnology, Smithsonian Institution—</i> Continuing ethnological researches among the American Indians, under the direction of the Smithsonian Institution, including salaries or compensation of all necessary employes.....	Mar. 3, 1891	26	963	1		50,000 00	50,000 00
<i>Astro-physical Observatory, Smithsonian Institution—</i> Maintenance of astro-physical observatory, under the direction of the Smithsonian Institution, including salaries of assistants, apparatus, and miscellaneous expenses.....	Mar. 3, 1891	26	963	1		10,000 00	10,000 00
<p>NOTE.—An astro-physical observatory has been established under the Smithsonian Institution, in part from the Smithsonian fund and in part by subscriptions of private individuals. Its maintenance was provided for by Congress in an appropriation of \$10,000 for the year ending June 30, 1892.</p> <p>Researches of great scientific and economic value are carried on by every considerable civilized government at well-equipped astro-physical observatories. The investigations here contemplated are not provided for at any other observatory. They conflict in no way with the work carried on by or proposed for the U. S. Naval Observatory.</p>							

Estimates of appropriations required for the service of the fiscal year ending June 30, 1898—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats. at Large, or to Revised Statutes.			Estimated am't required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.
		Vol. or R. S.	Page.	Art.			
<i>Building, Smithsonian Institution—</i>							
For completing the repairs upon the Smithsonian building, including necessary skylight in roof and such other work as is needed to protect the building from further deterioration, and to place it in proper sanitary condition; it being provided that any unexpended balance remaining to the credit of the appropriation for fire-proofing, etc., shall be available for the purposes above stated; this work to be done under the direction of the Architect of the Capitol, and in accordance with the approval of the Regents of the Smithsonian Institution.....	Aug. 30, 1890 Submitted.....	26	383	1	} \$5,000 00		
<i>National Zoological Park, Smithsonian Institution—</i>							
Improvement and care of grounds: Continuing the construction of roads, walks, bridges, water-supply, sewerage, and drainage, and for grading, planting, and otherwise improving the grounds of the National Zoological Park, including salaries or compensation of all necessary employes.....	Mar. 3, 1891	26	963	1		\$15,000 00	\$15,000 00
Buildings and inclosures: Erecting and repairing buildings and inclosures for animals, and for administrative purposes, in the National Zoological Park, including salaries or compensation of all necessary employes.....	Same act.....					18,000 00	18,000 00
Maintenance and increase of collections: Care, subsistence, and transportation of animals for the National Zoological Park, and for the purchase of rare specimens not otherwise obtainable, including salaries or compensation of all necessary employes, and general incidental expenses not otherwise sufficiently provided for.....	do.....					17,500 00	17,500 00
[The Smithsonian Institution estimates for an increase of \$5,000 for improvements, \$9,000 for buildings, and \$8,500 for maintenance over the present appropriations.]							
NOTE.—The appropriations asked for are less than the estimates of last year, and provide for actual requirements only, in the way of improvements to grounds, roadways, etc., and for the work of constructing or completing the buildings and inclosures necessary to insure the safekeeping of the animals, the maintenance and care of those already in the Park, and others likely to come into its possession during the year.							
Total under Smithsonian Institution.....						311,000 00	311,000 00
FISH COMMISSION.							
<i>Salary of Commissioner—</i>							
Compensation of Commissioner of Fish and Fisheries... {	Jan. 20, 1888	25	1	1	}	\$5,000 00	\$5,000 00
	Mar. 3, 1891	26	964	1			
<i>Propagation of Food-Fishes—</i>							
Introduction by the United States Fish Commission into and the increase in the waters of the United States of food-fishes and other useful products of the waters, including lobsters, oysters, and other shell-fish, and for such general and miscellaneous expenditures as the Commissioner of Fish and Fisheries may find necessary to the prosecution of his work, including salaries or compensation of all necessary employes.... <i>Mortuary Chapel, Arlington, Va., National Cemetery—</i>							
Erection of a mortuary chapel at the western entrance to the Arlington, Va., National Cemetery for funeral and other religious ceremonies at the cemetery, and also for use as a chapel for the post of Fort Myer, Va.....	Submitted.....					39, 752 15	
<i>Custer Battle-field National Cemetery—</i>							
Erection of a permanent fence inclosing the Custer Battle-field (Montana) National Cemetery, and of a lodge for use of superintendent of same.....	Submitted.....					29, 900 00	
NOTE.—This cemetery is in a neglected condition, with nothing to mark the site except the monument erected to the troops who fell there in June, 1876, and the headstones erected to mark the graves of the officers and enlisted men removed to that cemetery from old Fort Phil. Kearney and other abandoned posts. An inspection of the cemetery shows that the gates are open, giving free ingress to cattle, and that a party of immigrants are encamped there. A permanent inclosure and a superintendent's lodge are necessary for the preservation of the cemetery.

MISCELLANEOUS OBJECTS.								
<i>Surveys and Reconnaissances in Military Departments—</i>								
Military surveys and reconnaissances and surveys of military reservations by the engineer officers attached to the several headquarters of military departments, being an average of \$2,142.86 for each of seven military departments west of the Mississippi River.....	Submitted.....				\$15,000 00	\$25,000 00		
	Publication of maps for use of the War Department, inclusive of war maps.....				do.....			10,000 00
<i>Survey of Northern and Northwestern Lakes—</i>								
Surveys, additions to and correcting engraved plates (see note).....	Mar. 3, 1891	26	978	1	50,000 00	53,000 00	\$12,000 00	
Printing and issuing charts for use of navigators, and electrotyping plates for chart-printing.....	do.....				3,000 00			
NOTE.—This increased appropriation is asked for in order that certain special areas may be reexamined for the benefit of the enormous commerce now upon the lakes. The draft and size of vessels carrying the commerce has considerably increased in the last few years, and will again be increased when the new lock in St. Mary's River, now under construction, is completed. Localities deemed perfectly safe for navigation when the maximum draft of vessels was 12 feet, are regarded with suspicion when the draft is one-half or more greater. Consequently certain special reexaminations should be made.—(Thos. Lincoln Casey, Brig. Gen'l, Chief of Engineers.)								
<i>Transportation of Reports and Maps to Foreign Countries—</i>								
Transportation of reports and maps to foreign countries through the Smithsonian Institution.....	Mar. 3, 1891	26	978	1	100 00	100 00		
<i>Artificial Limbs—</i>								
Furnishing artificial limbs and apparatus, or commutation therefor, and transportation.....			R. S.	929	4787-	}	
	Aug. 15, 1876	19	203	1, 2	4791	175,000 00		125,000 00
	Mar. 3, 1891	26	979	1				
NOTE.—This estimate exceeds that of last year by \$50,000, because under the amendment of March 3, 1891, to Revised Statutes 4787, artificial limbs and their commutation are granted every three years, and the cases that were paid during the year ending June 30, 1890, recur in 1893. In 1890, the sum of \$186,364.51 was expended.								
<i>Appliances for Disabled Soldiers—</i>								
Furnishing surgical appliances to persons disabled in the military or naval service of the United States, and not entitled to artificial limbs or trusses for the same disabilities.....	Mar. 3, 1891	26	979	1	3,000 00	2,000 00		
NOTE.—An increase over last year of \$1,000, because the appropriation of that year was insufficient to meet the calls made by increasing age and disabilities.								
<i>Support and Medical Treatment of Destitute Patients—</i>								
Support and medical treatment of ninety-five medical and surgical patients who are destitute, in the city of Washington, under a contract to be made with the Providence Hospital by the Surgeon-General of the Army.....	Mar. 3, 1891	26	979	1	19,000 00	19,000 00

<i>Support of Military Prison, Fort Leavenworth, Kans.—Continued.</i>							
Medicines, medical and surgical appliances and dressings, and all other articles required for the care and treatment of sick prisoners; hospital furniture and supplies; heating appliances; expenses of interment of deceased prisoners.....		R. S.	242	1344-1361	} \$2,000 00		
	May 21, 1874	18	48	1			
	Mar. 3, 1891	26	980	1			
Transportation of prisoners on their discharge from the prison to their homes (or elsewhere as they may elect) provided the cost in each case shall not be greater than to the place of last enlistment.....	Same acts				6,000 00		
Fuel for generating steam for running engines, heating buildings, and cooking purposes; materials for extension and repair of steam-heating apparatus, and water circulation; hose, belting, machinery, castings, horses and mules, horse and mule shoes and nails; articles for repairing harness and wagons; stoves and stove-pipe, lime, cement, fire-clay, fire-bricks, iron, tin, solder, blacksmith's coal, charcoal, putty, nails, whitewash-brushes, painting materials, disinfectants; axes, shovels, spades, wheelbarrows, and all articles required for proper police of buildings and grounds; horse medicines and dressings, tools and miscellaneous articles for use in shops, laundry, barber-shop, bath-room, stables, printing office, bookbindery, and photograph gallery; furniture for use in offices; oil and electric light supplies; postage stamps, letter paper, and envelopes for issue to prisoners in confinement; stationery and books for prisoners' school; blankets, bed sacks, and bunks for prisoners' use, and miscellaneous articles which can not properly be included under other heads of expenditure.....	do				20,000 00		
Advertising for proposals for supplies.....	do				200 00		
Expenses of pursuing escaped prisoners, and reward of \$60 for each recapture.....	do				600 00		
Pay of civilian employes: One clerk, at \$1,800 per annum; one clerk, at \$1,400 per annum; one clerk, at \$1,200 per annum; five foremen mechanics and one engineer, at \$1,200 per annum each; one forage and wagon master, at \$60 per month; one teamster, at \$40 per month; four teamsters and two night-watchmen, at \$30 per month each; one fireman (in charge of heating-apparatus and electric-light apparatus at night), at \$60 per month; extra-duty pay for prison guard.....	do				18,000 00		
Construction of buildings and repair of all buildings on prison grounds, including plumbing and all other civilian labor which can not be done by prison labor.....	do				5,000 00		
						\$89,400 00	\$83,200 00
<p>NOTE.—The estimates made by the Quartermaster-General for appropriation for transportation of the Army for the fiscal year 1892 contained the item of transportation of discharged prisoners, and it was ignored in the regular estimate for the support of the prison. It should not be made an item of Army transportation, and to correct the inadvertent transfer, the item is repeated in this estimate, and increases it by \$6,000 over the current appropriation.</p> <p>The reward paid for apprehension of deserters from the Army having been increased to \$60 by General Orders No. 145, December 19, 1890, Headquarters of the Army, Adjutant-General's Office, the estimate for reward for recapture of escaped prisoners is increased to the same amount, and is \$300 more than the current appropriation.</p> <p>The estimate for tobacco is \$200 greater than the current appropriation, and the estimate for forage, etc., is \$300 less.—(J. C. Kelton, Adjutant-General.)</p>							
<i>Support of National Home for Disabled Volunteer Soldiers—</i>

Estimated am't required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.
		Vol. or R. S.	Page.	Sec.			
UNDER THE INTERIOR DEPARTMENT.							
COLLECTING THE REVENUE FROM PUBLIC LANDS.							
<i>Salaries and Commissions of Registers and Receivers—</i>							
Compensation of registers and receivers of local land offices, at not exceeding \$3,000 each. (See Appendix "H h.")	Mar. 3, 1891	R. S. 26	392 970	2237, 2240 1	\$600,000 00	\$600,000 00	
<p>NOTE.—The estimate submitted is based upon the actual earnings of registers and receivers of fees and commissions collected and turned into the Treasury by them during the fiscal year ending June 30, 1891. (See detailed statement herewith marked Exhibit "A.")</p> <p>During the year ended June 30, 1891, the fees and commissions earned by registers and receivers amounted to \$944,933.65, while the entire appropriation for their salaries and commissions was \$612,967.80, which, if all expended, will leave a net revenue to the United States of \$331,970.85.</p>							
<i>Contingent Expenses of Land Offices—</i>							
Clerk-hire, rent, and other incidental expenses of the several land offices	Mar. 3, 1891	26	970	2	240,000 00	200,000 00	
<p>NOTE.—The appropriation for the fiscal year ending June 30, 1891, amounting to \$175,000 (and deficiency, \$25,000), in all \$200,000, was entirely inadequate to the needs of the service.</p> <p>This office was compelled to refuse many applications for allowances of clerk-hire, office rent, and other absolutely necessary expenses from the various offices during the past year owing to the limited appropriation. This office is now unable to authorize clerk-hire and office rent in very many cases where the public business, absolutely requires such allowance, and in no instance have fuel or lights been paid for by the United States.</p> <p>During the fiscal year just ended the registers and receivers were called upon for a statement of the amount necessary to meet the incidental expenses of their offices for the fiscal year 1892, a copy of which will be found in Appendix, marked "Exhibit B," and to properly provide for the expenses of the offices the amount asked for will be necessary. (See Appendix "H h.")</p>							
<i>Expenses of Depositing Public Moneys—</i>							
Expenses of depositing money received from the disposal of the public lands	Mar. 3, 1891	R. S. 26	713 970	3617 1	10,000 00	10,000 00	
<i>Depredations on Public Timber, Protecting Public Lands, and Settlement of Claims for Swamp Lands and Swamp Land Indemnity—</i>							
To meet the expenses of protecting timber on public lands, and for the more efficient execution of the law and rules relating to the cutting thereof; of protecting public lands from illegal and fraudulent entry or appropriation, and of adjusting claims for swamp lands, and indemnity for swamp lands	Mar. 3, 1891	26	970	1	300,000 00	240,000 00	
<p>Provided, That agents and others employed under this appropriation shall be allowed per diem in lieu of subsistence, at a rate not exceeding \$3 per day, and actual necessary expenses for transportation.</p>							
<i>Expenses of Hearings in Land Entries—</i>							
Expenses of hearings held by order of the Commissioner of the General Land Office to determine whether alleged fraudulent entries are of that character or have been made in compliance with law	Mar. 3, 1891	26	970	1	25,000 00	25,000 00	
<i>Reproducing Plats of Surveys, General Land Office—</i>							
To enable the Commissioner of the General Land Office to continue to reproduce worn and defaced official plats of surveys on file, and other plats constituting a part of the records of said office, and to furnish local land offices with the same	Mar. 3, 1891	26	971	1	25,000 00	5,000 00	
<p>NOTE.—To reproduce the 30,000 old plats in this office, and to preserve them from actual destruction, the amount asked for is absolutely necessary.</p> <p>During the current year about 5,000 copies of plats were sold, and about 5,000 used in the local land offices, Geological Survey, and other bureaus of the Government. For those sold the Government received \$1,250.</p>							
<i>Transcribers of Records and Plats—</i>							
Furnishing transcripts of records and plats, to be expended under the direction of the Secretary of the Interior	Mar. 3, 1891	26	971	1	12,500 00	12,500 00	
Total Public Lands Service, exclusive of surveying					1,212,500 00	1,092,500 00	

Estimates of appropriations required for the service of the fiscal year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats. at Large, or to Revised Statutes. <i>Supreme Court Reports—</i>							
To pay the reporter of decisions of the Supreme Court of the United States for seventy-six copies, each, of volumes 141 to 145, inclusive, of the United States Reports, at a rate not exceeding \$2 per volume, under the provisions of the act of February 12, 1889.....	Mar. 3, 1891	26	973	1	\$760 00	\$456 00
<i>Current Expenses, Government Hospital for the Insane—</i>							
Support, clothing, and treatment, in the Government Hospital for the Insane, of the insane from the Army and Navy, Marine Corps, Revenue-Cutter Service, inmates of the National Home for Disabled Volunteer Soldiers, persons charged with or convicted of crimes against the United States who are insane, all persons who have become insane since their entry into the military or naval service of the United States, who have been admitted to the hospital and who are indigent, also the indigent insane of the District of Columbia... }	R. S.	938	4838-4858	}	268,300 00	233,930 00
	Mar. 3, 1891	26	973	1			
NOTE.—The basis of the above estimate is an annual per capita cost of \$220 for an estimated average number of 1,650 insane persons who, under the statutes, are entitled to treatment in the hospital. Congress for many years has divided the appropriation between the sundry civil and the District bill. Following the ratio of former years, based on the increase in numbers of the District patients during the past year, the amount to be appropriated in the District bill will be \$94,700, leaving \$268,300 to be provided in the sundry civil bill. Of the latter sum it is asked that the usual amount, not to exceed \$1,500, may be used for defraying the expense of the return of patients to their friends.							
<i>Current Expenses, Columbia Institution for the Deaf and Dumb—</i>							
Support of the institution, including salaries and incidental expenses, for books and illustrative apparatus, and for general repairs and improvements..... }	June 10, 1872 Mar. 3, 1891	17 26	360 973	1 1	}	61,000 00	50,500 00
NOTE.—In relation to this estimate, and for list of persons employed in the Institution, see Appendix "S."

Estimates of appropriations required for the service of the fiscal-year ending June 30, 1893—Continued.

General object (title of appropriation) and details and explanations.	Date of acts, or treaties, providing for the expenditure.	References to Stats. at Large, or to Revised Statutes.			Estimated amt required for each detailed object of expenditure.	Total amount to be appropriated under each head of appropriation.	Amount appropriated for the fiscal year ending June 30, 1892.
		Vol. or R. S.	Page.	Sec.			
<i>Education of Children in Alaska—</i>							
Industrial and elementary education of children of school age in Alaska, without reference to race (increase of \$10,000 submitted).....	Mar. 3, 1891	26	970	1	\$60,000 00	\$50,000 00
NOTE.—The appropriation under this head for the present year will be expended as follows:							
Salaries of teachers and officers of eighteen public day-schools.....						\$18,640	
Subsidies to fourteen contract boarding-schools.....						31,000	
Balance for fuel, text-books, and supplies.....						360	
Total.....						50,000	
With this sum it will be impossible to erect any buildings or to establish new schools in any of the places where they are greatly needed. It will even be difficult to provide for the natural growth of the schools now in operation. For any extension of education in the Territory the moderate increase asked will be absolutely required next year. An increase of \$10,000 a year for the next five years can be used to the greatest possible advantage, and will be recommended each year.							
Total Miscellaneous Objects.....						1,480,449 00	1,422,211 00
Total Miscellaneous under Interior Department.....						3,928,821 00	3,519,111 00

<p><i>Expenses of Treasury Notes, Act July 14, 1890—</i> That the Secretary of the Treasury is hereby directed to purchase, from time to time, silver bullion to the aggregate amount of four million five hundred thousand ounces, or so much thereof as may be offered in each month, at the market price thereof, not exceeding one dollar for three hundred and seventy-one and twenty-five hundredths grains of pure silver, and to issue in payment for such purchases of silver bullion Treasury notes of the United States to be prepared by the Secretary of the Treasury, in such form and of such denominations, not less than one dollar nor more than one thousand dollars, as he may prescribe, and a sum sufficient to carry into effect the provisions of this act is hereby appropriated out of any money in the Treasury not otherwise appropriated. That the Treasury notes issued in accordance with the provisions of this act shall be redeemable on demand, in coin, at the Treasury of the United States, or at the office of any assistant treasurer of the United States, and when so redeemed may be reissued; but no greater or less amount of such notes shall be outstanding at any time than the cost of the silver bullion and the standard silver dollars coined therefrom, then held in the Treasury purchased by such notes; and such Treasury notes shall be a legal tender in payment of all debts, public and private, except where otherwise expressly stipulated in the contract, and shall be receivable for customs, taxes, and all public dues, and when so received may be reissued; and such notes, when held by any national banking association, may be counted as a part of its lawful reserve. That upon demand of the holder of any of the Treasury notes herein provided for the Secretary of the Treasury shall, under such regulations as he may prescribe, redeem such notes in gold or silver coin, at his discretion, it being the established policy of the United States to maintain the two metals on a parity with each other upon the present legal ratio, or such ratio as may be provided by law.....</p>	July 14, 1890	26	289	1-2	\$126,000 00	\$225,000 00	\$218,362 60
<p><i>Coinage of Silver Bullion—</i> That the Secretary of the Treasury shall each month coin two million ounces of the silver bullion purchased under the provisions of this act into standard silver dollars until the first day of July, eighteen hundred and ninety-one, and after that time he shall coin of the silver bullion purchased under the provisions of this act as much as may be necessary to provide for the redemption of the Treasury notes herein provided for, and any gain or seigniorage arising from such coinage shall be accounted for and paid into the Treasury. That the silver bullion purchased under the provisions of this act shall be subject to the requirements of existing law and the regulations of the mint service governing the methods of determining the amount of pure silver contained, and the amount of charges or deductions, if any, to be made. That so much of the act of February twenty-eighth, eighteen hundred and seventy-eight, entitled "An act to authorize the coinage of the standard silver dollar and to restore its legal-tender character," as requires the monthly purchase and coinage of the same into silver dollars of not less than two million dollars, nor more than four million dollars' worth of silver bullion, is hereby repealed.....</p>	July 14, 1890	26	289	3-5			210,893 14

OFFICE CHIEF OF ENGINEERS, UNITED STATES ARMY,
Washington, D. C., September 15, 1891.

THOS. LINCOLN CASEY,
Brigadier-General, Chief of Engineers.

APPENDIX D.

Explanation of estimates for Public Buildings and Grounds for the fiscal year ending June 30, 1893. (Estimates on pages 46 and 195.)

In submitting these estimates, some of which are larger than heretofore appropriated, and some for new work, the following explanation is presented by the officer in charge:

1. One public gardener, \$2,000. I have asked for an increase in the salary of the public gardener, a position now so satisfactorily filled by Mr. George H. Brown. The duties of the office require that the gentleman who fills it shall be thoroughly skilled in the culture of trees, shrubs, and plants, and shall have a practical knowledge of civil engineering as applied to landscape gardening. Mr. Brown combines these attributes, to which he adds taste, industry, and integrity. His duties take him from one end of the city to the other. He is directly responsible for the care of the valuable collection of plants in the propagating garden, and superintends the propagation of plants that are annually raised for the public grounds, which this year numbered about 402,000.

2. One clerk in charge of old public records of Washington City, \$1,500. These records include maps, deeds, record books, letters, etc., from the organization of the original board of commissioners, near the close of the last century, up to 1867, when the duties were turned over to the chief of engineers; they are constantly examined by attorneys and others interested in lands in Washington, and the person in charge of them is frequently required to produce them in courts; to index them properly, to be able to turn at once to the details of any question raised, requires familiarity with every paper. This work has for the last few years been entrusted to the only draughtsman allowed this office, and during the past year more than three-quarters of his time has been actually employed on this duty. It is desirable that this appropriation be made in order that the draughtsman may be permitted to attend to the necessary and legitimate duties of his office.

3. One clerk, \$1,400. Of late years the office work has increased to such an extent that to properly perform it has required continuous work at night and on Sundays and holidays. This is a hardship, and, as a remedy, an appropriation for an additional clerk is recommended.

4. For one telegraph lineman, \$1,000. The telegraph system under charge of this office includes about 8 miles of overhead wire and 2.6 miles of underground cable; there are twenty-one offices connected with these lines, the main battery being at this office; the lineman is constantly engaged in the care of the main and local batteries, and such necessary repairs and extensions as a system of wires of this kind requires; he is industrious, efficient, and capable, and has won the confidence of all with whom he has come in contact by faithful attention to his duties.

5. An estimate for a captain of the watch is submitted and recommended. Such an officer is much needed in order that the park watchmen may be under proper supervision.

6. Estimates for a day watchman for Marion and Folger Squares and adjacent reservations, and for a day watchman for Garfield Park, are submitted and recommended. Marion and Folger Squares contain an aggregate area of about 3 acres, and Garfield Park contains an area of about 24 acres. They are highly improved, and the necessity for providing watchmen for their care is apparent.

7. It will be observed that the estimate for "improvement and care of public grounds" is submitted in a smaller number of separate items than heretofore. A large number of items, being for such purposes as are required regularly every year, are lumped together in a single item, the several items, however, being enumerated; and it is recommended that the appropriation be made in that way instead of designating a specific sum for each of these small objects. Great labor in keeping

the accounts would be saved, and the full amount of the appropriation be made available if a lump sum could be appropriated. It is not always practicable to spend an exactly even number of dollars for a particular purpose. When a specific amount is stated for each object it must not be exceeded, and the result is that some remnants of those small items can not be used at all. The method of appropriating a lump sum, as here suggested, seems to be in accordance with the practice of Congress in other cases, as, for example, for the regular supplies and incidental expenses of the Quartermaster's Department, pages 149, 150, and 151, Digest of Appropriations, 1892.

The aggregate amount requested for the consolidated items exceeds, in the sum of \$10,250, the appropriation made for similar purposes for the fiscal year 1891-'92. The excess arises as follows, viz: \$1,000 is asked for painting watchmen's lodges, iron fences, etc., instead of \$750, last appropriated; \$20,000 is asked for improvement, care, and maintenance of various reservations in place of the \$12,000 granted this year; and \$7,000 is asked for improvement, care, and maintenance of Judiciary Square, in place of \$5,000 last granted. It is proposed to improve as many as possible of the 200 unimproved reservations; each year from one to five are added to the list of improved reservations, and if the funds now requested become available eight or ten can be added during the fiscal year ending June 30, 1893. As reservations are thus improved the expense of the care of the whole is slightly increased, for the improvements must be maintained.

8. For placing granite curbing about Franklin Square, \$5,000 is asked. The beauty of this handsome park will be greatly enhanced by placing around it a granite curbing similar to those used around parks of the same style in the larger cities elsewhere.

9. For the care and improvement of the Monument Grounds, \$10,000. It is desirable that this important improvement should progress more rapidly than heretofore.

10. For laying asphalt walks in various reservations, \$5,000. It is proposed to replace with first-class asphalt walks the gravel paths in Washington Circle, Mount Vernon Square, Executive Mansion Grounds (south side), Lincoln Square, Stanton Square, Folger Square, Marion Square, Henry and Seaton Parks, and to renew those in Farragut Square. In the late fall, winter, and early spring these walks are muddy and pedestrians seek the lawns, which are thus destroyed by trespassers. The amount of these paths which it is proposed to lay this year is about 3,500 square yards. Each autumn it becomes necessary to put down plank walks, which must again be removed in the spring. If asphalt walks are laid the annual expense incident to plank walks will be avoided.

11. For improvement, care, and maintenance of Henry (Armory) and Seaton Parks, \$5,000. These reservations, extending from Seventh street to the Botanic Gardens, cover an area of 34 acres, with road and walk surfaces of over 10,000 square yards. They are in an advanced state of improvement. Their beauty has been marred by the depot and tracks of the Baltimore and Potomac Railroad. A mound has been constructed around the depot, upon which it is intended to plant trees and shrubs, so that in time the depot will be hidden partially from view. The materials for this mound have thus far been obtained free of expense to the United States, and it is now proposed to grade the mound and to seed and plant it. The funds requested are needed for this purpose, and for the care of roads, lawns, gutters, etc., and laying out additional paths.

12. For lodges for park watchmen in Stanton, Mount Vernon, Iowa, Dupont, Thomas, McPherson, and Folger reservations, at \$500 each, \$3,500. The watchmen in these reservations are exposed to the inclemency of the weather at all seasons of the year. Ordinary humanity seems to call for this appropriation.

13. For constructing an ornamental fountain in Lafayette Square upon the site originally selected for the Lafayette Statue, \$4,000. This space is on the Pennsylvania-avenue side of the square, directly opposite the Executive Mansion. The old foundation made for the pedestal of the statue can not be removed without considerable expense, but can be utilized for the foundation of a basin for an ornamental fountain, for the erection of which this estimate is submitted.

14. For replacing the old flagging pavement of the sidewalks in the grounds north of the Executive Mansion by a granolithic pavement, \$2,500. These sidewalks lead from the entrance gates on Pennsylvania avenue to the north front of the Executive Mansion. The old flagging at present composing them is in bad condition, and should be replaced by a granolithic pavement.

15. An estimate amounting to \$6,000 is also submitted for constructing a large greenhouse at the propagating gardens for palms and subtropical plants. The greenhouse structures now existing at the gardens are of small size and not of sufficient capacity to accommodate that class of plants.

16. An estimate amounting to \$5,000 is submitted for improving reservation No. 246, known as Howard University Park. This park contains an area of about 11½ acres and is unimproved.

17. For renewing the superstructures of two greenhouses connected with the Executive Mansion, \$3,000. These structures are old and in bad condition, and must be renewed to preserve the plants which they contain.

18. The estimate for the item for "gas, pay of lamplighters," etc., under the title "Lighting the Executive Mansion and the public grounds," has been increased from \$14,000 to \$15,000. In the appropriation act for the fiscal year ending June 30, 1892, the amount to be paid per annum for lighting, etc., each gas lamp in the public grounds was increased from \$20 to \$21.50, and to provide for this increase, and for the additional amount that it is estimated will be required for the care and maintenance of the electric lamps and wires recently introduced into the Executive Mansion, the additional \$1,000 is asked.

19. An estimate of \$2,000 is submitted for erecting eight iron posts in the Monument Grounds, connecting them with underground wires for electric lights, and supplying electric lights for the same. Since the introduction of electric lights in the grounds south of the Executive Mansion the travel after nightfall through that park has increased. Much of this travel passes through the Monument Grounds, which are not now provided with any system of illumination.

20. The estimate for "Repairs to water pipes and fire plugs" has been increased from \$2,500 to \$5,000. The sources of the spring which supplies the United States Capitol with water were much impaired by the excavations made in connection with the construction of the large reservoir near the Howard University for the increase of the city's supply of Potomac water, which has resulted in diminishing the pressure at the Capitol. It is proposed to use the additional amount requested in making connection with the strongest springs in the vicinity, and in overhauling and repairing the old pipe line, and renewing such portions of it as may be found unserviceable.

21. An estimate is again submitted for replacing the overhead wires between the Capitol and the Departments with a duplicate underground six-wire cable. The growth of the trees on the sidewalks renders it absolutely necessary, in order to maintain telegraphic communication over these wires, either to erect at once taller poles, at a cost of about \$1,600, or to lay an underground cable, at a cost of \$31,000. It appears to be the will of Congress that no more overhead wires shall be placed in this city. (See District of Columbia appropriation act of July 18, 1888.) Otherwise I should recommend the appropriation of the smaller amount.

22. I recommend that the salaries of the two steam engineers at the Washington Monument be increased from \$80 and \$60 to \$90 and \$70 per month, respectively. The duties of these two men are of great importance; upon their efficiency and intelligence depend, to a great extent, the lives of those who use the elevator. The increase asked is small and the men deserve it. I also recommend that the pay of the two firemen be placed at \$60 per month each. That is the rate allowed firemen in the Executive Departments, and there appears to be no reason why the firemen at the Monument should receive less.

The item for fuel, lights, oil, waste, repairs, etc., should be increased from \$3,000 to \$3,600, for the purpose of painting the ironwork in the interior of the monument.

APPENDIX E.

In relation to the estimate submitted by the Secretary of the Interior for salaries, etc., for his office. (See pages 52-54.)

SALARIES.

The increase in number of clerks and other employes estimated for is intended to cover an equal number borne upon the roll of bureaus of the Department, but on duty in the Office of the Secretary. The force provided by law for the Secretary's Office has not been increased in proportion to the increase of amount of business, and it has been necessary, from time to time for many years past, to detail assistance from the bureaus of the Department. The number now on duty is absolutely required for the transaction of the business of the Secretary's Office, and it would seem to be just to the bureaus which are charged with employes, from whose services they derive no benefit, that these persons should be transferred to the roll of the office wherein they are employed.

The additional \$300 in compensation of telephone operator is asked for in view of the inadequacy of the present pay to the service required. This operator has charge of the Department telephone switch-board, and the proper discharge of this duty exacts unremitting attention and the exercise of skill and patience, for which salary equal to that of copyist should be provided.

The additional skilled mechanic, at \$900, is asked for to provide for an expert, whose services are constantly required in connection with repairs, etc., of electric light wires and the electric bells in the buildings occupied by the Department and its bureaus. Besides the greater convenience and promptness in having this work done by a person under the control of the Department, it is believed that the amount of salary estimated for will not equal the cost of the work if done by private parties.

The increase of three folders will be necessary in the wrapping and mailing of the volumes of the Eleventh Census. The present force of the document division is barely able to handle the usual issue of documents, and without the increase of force asked for it will be impossible to dispose of the publications of the Eleventh Census, soon to be issued.

Three watchmen additional are necessary to provide watch service for quarters (outside the Department building) occupied by the General Land Office. It is possible from the present force of watchmen to provide a watchman for the detached portion of the Land Office for part of the day only. The valuable records and files of this office should be better protected.

Since the installation of the electric-light plant in the Department building (in 1888) no provision has been made for an engineer to operate it. This duty has been performed by the assistant engineer, whose services are required for the heating apparatus for which they were intended.

The three firemen additional are required for heating apparatus of quarters for the General Land Office outside the Department building.

CONTINGENT EXPENSES.

The appropriation for contingent expenses for this Department and its bureaus for the past three years has been entirely inadequate to the needs of the service. In keeping the expenditures within the appropriation it has been impossible to meet the demand for cases necessary to provide for the accumulation of files and records, and to provide new furniture, carpets, etc., to properly and comfortably equip the buildings and offices of the Department, and meet the other contingencies which this appropriation is intended to cover.

RENT OF BUILDINGS.

There is absolutely no room under control of this Department for the storage, folding, and shipment of the publications of the Eleventh Census. It will, therefore, be necessary to rent rooms outside the Department building before any of the volumes can be received, and an estimate is therefore submitted for appropriation for that purpose.

DEPARTMENT OF THE INTERIOR, OFFICE OF INDIAN AFFAIRS,
Washington, October 24, 1891.

SIR: I have the honor to invite your attention to the necessity for providing in the near future additional accommodations for filing papers, accounts, etc., in this office.

There are now about one hundred and twenty-five disbursing officers in the Indian Service who render quarterly accounts, and in order to properly care for them, and the large and constantly increasing number of letters, record books, etc., accumulating in this office, it will be absolutely necessary to rent more rooms.

At the present time it is found necessary to store in the cellar of the building occupied by this office many valuable records and papers which must be necessarily injured if left there, and in the room at present occupied as the general files-room there is no room for a number of valuable papers and records, which now find a resting place on the floor.

In the files room of the accounts division of this office, where the quarterly accounts of disbursing officers are filed, nearly all the space is now filled, and with the yearly acquisition of about five hundred large bundles of vouchers, abstracts,

constituting the accounts of these agents, the present accommodations will soon be overcrowded, and the result will be that many valuable papers will have to be stored in the cellar, where they will be almost inaccessible, on account of the already crowded condition, and where they must necessarily be injured, unless additional rooms are rented in which to file them.

I would therefore earnestly recommend that there be included in the estimates of the Department for insertion in the legislative bill for the fiscal year 1893 a request for a sum not less than \$7,500 for the rent of sufficient rooms for the accommodation of the business of this office.

Very respectfully,

T. J. MORGAN,
Commissioner.

Hon. SECRETARY OF THE INTERIOR.

APPENDIX F.

In relation to the estimates for the Post-Office Department. (See pages 64-68.)

OFFICE OF THE POSTMASTER-GENERAL,
Washington, D. C., November 21, 1891.

SIR: I have the honor to transmit herewith the estimates of appropriations required for the service of this Department, and to be incorporated in the legislative, executive, and judicial appropriation bill for the fiscal year ending June 30, 1893.

The only additional items estimated for are the following:

In the office of the Postmaster-General.—One clerk of class one, \$1,200; 1 clerk, \$1,000; 1 clerk, \$900.

These items will in reality not be increased appropriations, except in the sum of \$60, but rather transfers. For a number of years three men, at \$1,200, \$1,000, and \$840, have been employed in the mail-room of this Department, having in charge all the departmental registered and ordinary mail matter. These men have been employed and paid as mail messengers from the appropriation for mail-messenger service. The term in their case is a misnomer. They have been and are in fact clerks in this Department, as much so as any other clerks employed therein, and should be transferred to the departmental roll. It is not certain that the civil-service rules will admit of such transfer, or that the Civil-Service Commission could authorize the transfer of these people to the classified service of the Post-Office Department, but since they have actually been employed as clerks for periods ranging from seven to nine years, it is respectfully suggested that they be appropriated for as estimated, with this proviso, that they may be transferred to the classified service of the Post-Office Department without examination under civil-service rules.

In the office of the First Assistant Postmaster-General.—One clerk of class one, \$1,200; 1 clerk, \$1,000; 1 page, at \$360; 1 clerk, at \$1,000; 1 page, at \$360; 2 clerks, at \$900, \$1,800.

One of these clerks, at \$1,000, is for the free-delivery division, where a typewriter at the same salary has for some months been borrowed from another branch of the Department.

One page is for the salary and allowance division, for which neither messenger nor page is at present provided.

One clerk, at \$1,200, is for the supply division, an increase by no means commensurate with the current steady increase of business, due to the increase in the number of post-offices, and to the additional demands for stationery and supplies therefor.

One clerk, at \$1,000, and a page, at \$360, are for the Money-Order Office, where the work in one division, that which has charge of the weekly statements of money-order business, has almost doubled in the past two years, due in part to the creation of additional money-order offices and to the increased volume of business transacted by the system generally.

Two clerks, at \$900 each, are for the Dead-Letter Office, where there has been an increase of but four clerks in seven years, notwithstanding that the business of the office has increased from 5 to 12 per cent. annually for a number of years.

In the office of the Second Assistant Postmaster-General.—One clerk, at \$1,600; 1 page, at \$360.

One clerk, at \$1,600, is not really an increase, but is to take the place of one at the same salary, provision for whom was inadvertently omitted from the last annual appropriation bill, which upon examination will disclose a decrease from the prior year of one clerk at that salary.

The page is needed for miscellaneous errand duty, and is recommended instead of a higher-paid messenger.

In the office of the Third Assistant Postmaster-General.—One clerk, at \$1,600; 1 clerk, at \$1,200; 1 clerk, at \$1,000.

This office has charge of the issues of postage stamps, stamped envelopes, postal cards, etc., and of the finance division, which pays by warrant the debts of the Department, and supervises the deposit of its revenues through certificates of deposit. It takes no argument to show that additional force is required in this office, since the revenues of the Department increase annually from 8 to 10½ per cent. The increased estimate is a very moderate one.

In the office of the Fourth Assistant Postmaster-General.—Chief clerk, at \$2,000; 1 stenographer, \$1,600; 1 page, \$360.

The office of Fourth Assistant Postmaster-General was created in the last annual appropriation bill, it being the purpose to transfer to this officer certain existing divisions of the Department, to wit, the appointment division, the bond division, and the division of mail depradations. This reorganization has been effected and is in operation, but there was no provision whatever made for the immediate personal staff of the Fourth Assistant. Every head of a bureau needs a chief clerk, a stenographer, and a messenger. The usual estimate is submitted. In lieu of a messenger a page at a lower salary is recommended.

In the office of Disbursing Clerk and Superintendent.—Two lieutenants of the watch, at \$840 each, in lieu of 2 watchmen, at \$720, \$240.

This is the only increase asked for for the building force of the Post-Office Department. It is one very desirable and necessary. The present watch force is divided into tours, each of which should be in charge of a superior officer, for the sake of discipline and good service. There is now no superior officer except the captain, so that two of the tours are without heads. It would enhance the discipline of this force and at the same time secure better service by providing this small increase of two lieutenants, since each tour of duty would then be properly supervised, and moreover the faithful watchmen, for the greater part composed of soldiers, would have some hope of promotion from time to time.

Contingent expenses, Post-Office Department.—Fuel, \$1,000; miscellaneous expenditures, \$500; wiring and equipping the main Post-Office Department building for electric lights, \$3,000; city directories, \$1,000.

The first two are increases asked for to meet normal increases in expenditures due in part to additional buildings,

The third, for electric lights, is most desirable; much time, labor, and money must now be spent upon the pipes and gas fixtures of the Department, and after all the lights are dim and unsatisfactory.

The city directories are essential to the proper transaction of the work of the Dead-Letter Office. This office ought always to be equipped with the latest directories of all the principal cities of the United States, to enable it to discover the addresses of persons and firms, and to properly treat and return undelivered mail matter. Such directories as have heretofore been purchased have been obtained by moderate drafts on the miscellaneous fund of the Department, which is ill able to afford such expenditures.

Rent of buildings.—Additional for rent of building for the storage of Post-Office supplies, \$1,000.

This estimate is submitted without argument, at the request of the agents of the owners of the property, who state in a letter addressed to the Department that the present rental of \$4,000 pays but a trifle over 4 per cent. on the value of the property, and they submit that the Government ought not to expect to be furnished with quarters at a rental which will not pay a fair return on the investment.

Total increases estimated for, \$25,280.

Under the competitive merit system for promotions inaugurated in the Post-Office Department July 1, 1891, whenever a vacancy occurs in any grade the clerks in the next lower grade are entitled to compete in examination for promotion. In certain offices of the Department certain of the grades are required by the terms of the appropriation act to be filled with females. The result is that when these employes are promoted their places can only be filled by females, the result being that in time the offices will contain nothing but female clerks. It is therefore suggested that wherever the word "female" occurs in the appropriation act it be omitted.

Under the head of the disbursing clerk and superintendent there is no need for providing after the item "one clerk of class one" that he shall be "storekeeper." That provision would prevent the occupant of the place from receiving any promotion in salary so long as he remained in that place.

The rearrangement of the existing force under the heads of the various bureaus follows the recent reorganization of the Department incident to the appointment of a Fourth Assistant Postmaster-General.

CONCLUSION.

Total estimates.....	\$923,360
Appropriations, 1892.....	898,080
Total increase estimated for.....	25,280

Or less than 3 per cent.

Very respectfully,

JNO. WANAMAKER,
Postmaster-General.

Hon. CHARLES FOSTER,
Secretary of the Treasury.

APPENDIX G.

In relation to the estimates for the Diplomatic Service. (See page 87.)

DEPARTMENT OF STATE, Washington, November 13, 1891.

SIR: I have the honor to submit herewith certain explanations in view of the fact that the estimates for the diplomatic appropriations for the fiscal year ending June 30, 1893, heretofore transmitted to your Department, embrace a few items not contained in the estimates for the current fiscal year.

Item 1. Mission to Venezuela:

This mission has been submitted in the ten thousand dollar (\$10,000) class, for the reason that it is regarded as of equal importance with the other South American Republics, and is the only one in that section where the minister receives less than that sum, excepting Ecuador and Bolivia.

Item 2. Mission to Greece, Roumania, and Servia:

This has been submitted for seven thousand five hundred (\$7,500), which is only one thousand dollars more per annum than is now appropriated. The increase is asked and demanded by reason of the expensive cost of living in Roumania or Servia—when the minister is officially called to either of those countries, which frequently happens—and the maintenance of a permanent residence and legation at Athens, Greece.

Item 3. Secretaries of legation in Guatemala and Nicaragua:

1. Secretary of legation in Guatemala and Honduras, and consul-general to Guatemala:

This change in language is rendered necessary in consequence of the mission to the Central American States having been divided by the act of March 3, 1891, making appropriations for the fiscal year ending June 30, 1892. It involves no additional appropriation.

2. Secretary of legation to Nicaragua, Costa Rica, and Salvador:

This is a new mission (see act of March 3, 1891), and the services of a competent secretary of legation are highly essential. Not only is this true, but as the minister is liable to officially visit either of the two other countries to which he is also accredited, it is of the first importance to the public service that the archives at Managua, where the legation is established, should always be left in responsible hands.

Item 4. Rent of legation in China:

The act of Congress approved March 3, 1875 (United States Statutes at Large, 43d Congress, 1873-'75, volume 18, page 377), provides as follows: "That the Secretary of State be, and he is hereby, authorized to rent, furnish, and keep suitable buildings, with grounds appurtenant, at Peking, for the use of the legation in China, at an annual cost not exceeding five

thousand dollars; that the period of such lease shall be for two or more years, and with renewals, as the Secretary of State shall determine; and that the sum of five thousand dollars is hereby appropriated, out of any money in the Treasury not otherwise appropriated, therefor."

The United States minister at Peking represented to the Department that extensive repairs and additions to the present legation premises at Peking were necessary in order to make them habitable, and afford adequate security to our valuable archives there. In consequence of Mr. Denby's statements, the Department entered into negotiations with the agents and owners of the premises, who were made acquainted with the pressing needs of the public service in this regard; and a new lease for two years has lately been entered into between the lessors and the United States, by which it is agreed that the necessary repairs and alterations shall be perfected before the expiration of this new lease. The owners are consequently entitled to this increased rental, and in fact entered into the new agreement on condition that should the changes be made, an equitable increase should be granted. Congress should, therefore, make the necessary appropriation in this case, which involves an increase of but nineteen hundred dollars (\$1,900). The contemplated repairs include the erection of a fire-proof building.

Item 5. Mexican Boundary (Land) Commission :

The sum asked is forty-nine thousand five hundred and fifty-six dollars and seventy-five cents (\$49,556.75).

This amount is necessary to enable the Government of the United States to meet its engagements under the treaty with Mexico of July 29, 1882, revived by that of February 18, 1889, to relocate the monuments marking the boundary between the two countries. The estimates formerly asked an appropriation of \$224,556.75. Since then \$175,000 has been appropriated, as follows: Statutes at Large, volume 23, page 478, \$100,000; Statutes at Large, 1889-'90, page 504, \$75,000. The additional sum required is about \$50,000 under the head of this item.

Item 6. Mexican Boundary (Water) Commission :

This appropriation is needed to enable the Government of the United States to defray the expenses of an International Boundary Commission provided for by the treaty of March 1, 1889, which was negotiated to give effect to the treaty of November 12, 1884.

This commission has power to definitely decide all questions affecting the water boundary between the two countries as fixed and determined by article V of the treaty of February 2, 1848, and by article I of that of December 30, 1853. The Mexican Government has communicated the names of its commissioners.

Item 7. Intercontinental Railway Commission :

The items of increase under this title are fully explained in the annexed copy of a letter from the president of the commission.

Item 8. International Catalogue of Exports and Imports :

The letter of Mr. William E. Curtis, herewith inclosed, contains the reasons for the request for ten thousand dollars (\$10,000) on this account.

Item 9. American and Venezuelan Claims Commission :

The letter of Mr. J. Hubley Ashton, of which I inclose a copy, sets forth clearly the grounds upon which the sum of two thousand dollars (\$2,000) is asked, in order to make his compensation amount to eight thousand dollars (\$8,000).

Item 10. Balance due from the United States to Messrs. Villanova Hermands y Cia, of Barcelona :

This firm was charged with the work of taking down and removing the American section of the exhibition held in Barcelona in 1888. The cost of this work was \$2,939.14. The sale of old material amounted to only \$123, thus leaving due to Messrs. Villanova Hermands & Co. the sum of \$2,816.14. They were, however, entrusted by certain of the American exhibitors with the sale of their goods, and the net proceeds of such sale, amounting to \$2,890.49, are being withheld from the various exhibitors by this firm as a set-off against its claim upon the United States.

I have the honor to be, sir, your obedient servant,

JAMES G. BLAINE.

HON. SECRETARY OF THE TREASURY.

Inclosures :

From J. Hubley Ashton, Washington, June 19, 1891. Copy.

From A. J. Cassatt, Washington, November 11, 1891. Copy.

From W. E. Curtis, Washington, November 12, 1891. Copy.

WASHINGTON, June 19, 1891.

SIR: I will thank the Department to cause to be paid to me the amount appropriated in respect to my compensation as the representative of the United States before the late United States and Venezuelan Claims Commission, under the treaty of December 5, 1885.

In this connection, however, I beg to submit that my compensation should be the same as that paid by the Venezuelan Government to Mr. Phillips, who represented that Government before the commission, which, Mr. Phillips has informed me, was \$8,000.

The commissioners, in their first opinion, affirmed the principle that the real parties to the arbitration were the two Governments, who were represented by counsel, and that the true interests of the parties in respect to the just determination of the controversies submitted to the commission were identical.

When I had the honor to receive the tender of the employment, I was instructed that the Government deemed it of great importance that the commission should complete the difficult and delicate task assigned to it within the year limited by the treaty of 1885, and it was specially desired that I should omit no effort on my part that might contribute to that result. I accordingly devoted, as I found it necessary to devote, my entire time and energies to the examination, preparation, and arguments of the cases referred to the commission, to the practical exclusion of other professional employment during the period in which I was engaged in the work. The commission remained in session without intermission during the summer of 1890, and it was only by very strenuous exertions that it was able to complete its labors within the time prescribed by the treaty. As the commissioners stated in their final report to the President, of September 2, 1890, their hearings and

proceedings were conformed as far as practicable to those ordinarily obtaining in municipal courts of justice, a procedure which required the constant attendance and service of the counsel of the two Governments to the last hour of the life of the commission. In their report to the President the commissioners recognize the importance and value of the assistance rendered by counsel in respect to the completion of the work within the year of the treaty.

In view of the general principle governing the arbitration, and the extent and character of the services of the counsel of United States, it has appeared to me that his compensation should not be less than the amount received from Venezuela by the learned counsel of that Government.

As the present appropriation is \$6,000, I would respectfully request, if agreeable to the Department, that the matter of the small difference referred to may be reserved for adjustment in such manner as may be proper.

I have the honor to be, with great respect, your obedient servant,

J. HUBLEY ASHTON.

Hon. JAMES G. BLAINE, *Secretary of State.*

THE INTERCONTINENTAL RAILWAY COMMISSION, 1016 VERMONT AVENUE,
Washington, November 11, 1891.

SIR: I have the honor to request that an estimate for one hundred thousand dollars (\$100,000) be submitted to Congress for the purpose of carrying on the preliminary surveys for an intercontinental railway during the fiscal year of 1892-'93.

The understanding had at the International American Conference was that each Republic should pay towards the first expenses of the survey in a ratio of one thousand dollars (\$1,000) for each million of inhabitants. The Congress of the United States accordingly appropriated sixty-five thousand dollars (\$65,000) for the fiscal year ending June 30, 1891, and a like amount for the following year. Several of the Republics have paid in their first quota, but some, owing to the want of congressional action and other reasons, have not as yet paid theirs.

The amount appropriated by the United States, together with the sums paid in by other countries, were only sufficient to maintain three parties in the field. It is most desirable that, in order to expedite the work, two or more additional parties be sent out. Hence, an increase of the appropriation by Congress to one hundred thousand dollars (\$100,000) for the fiscal year ending June 30, 1893, is earnestly recommended.

The three parties now in the field are making good progress. The one to which the survey in Central America was assigned has nearly completed its work in Guatemala. The two parties in South America commenced operations at Quito, one working north and the other southward from there. The first party has now reached the valley of the Cauca, and is making its way towards the north at a good rate of speed. All the parties report having found no insurmountable engineering difficulties in the way of the construction of a railroad.

It is also respectfully suggested that an appropriation of nine thousand dollars (\$9,000) be made to pay the three commissioners of the United States a salary of three thousand dollars (\$3,000) each; this to include traveling and all other expenses.

I have the honor to remain, sir, with great respect,

A. J. CASSATT,
President Intercontinental Railway Commission.

Hon. SECRETARY OF STATE, *Washington, D. C.*

BUREAU OF THE AMERICAN REPUBLICS, DEPARTMENT OF STATE,
Washington, November 12, 1891.

SIR: I have the honor to request that you will include in the regular estimate for appropriations for the fiscal year ending June 30, 1893, the sum of "\$10,000 for completing the compilation and publication, under the direction of the Secretary of State, of a uniform code of nomenclature of articles of merchandise exported and imported, in the English, Spanish, and Portuguese languages, as provided by the International American Conference."

The recent International Conference recommended the publication of a code of nomenclature of articles of merchandise exported and imported, which has been undertaken under the direction of this bureau, and is now more than half completed. This will be a commercial dictionary, containing between twenty-five and thirty thousand terms used to designate articles of commerce between the American Republics arranged alphabetically, with their equivalents in English, Spanish, and Portuguese. Local terms used in the several countries to designate the same articles are inserted in smaller type in their proper place. At this writing the work has been carried to and including the letter M, and the proof-sheets have been read and corrected as far as the letter H.

The necessity and value of this code can be fully realized only by those who have had actual experience in commerce with people speaking a different language, and having their own peculiar terms to designate every article of trade; and it is frequently the case that the same term that is used to designate a particular article in one country is applied to an entirely different article in another. A merchant in South America who sends an order to a merchant or manufacturer in the United States naturally writes in his own language, and uses the terms that are common to the country in which he lives. The manufacturer in the United States, being unfamiliar with that language, is unable to fill the order properly, and that fact has been the cause of serious misunderstanding, financial loss, and a great obstacle to the extension of trade. It is intended, when the commercial dictionary is completed, to secure its adoption by the several American Governments as an official guide in making out consular invoices and manifests, which will relieve the merchants and manufacturers of the United States of serious inconvenience and embarrassment.

The expense of publication will be so great, however, that the free distribution of the volume will scarcely be justified, and I take the liberty to recommend that the Public Printer be directed to issue an edition of one thousand copies for the use of the customs and consular service of the United States, five hundred copies to be presented to the Governments of the several American Republics, and that he be authorized to furnish copies to the public, on application, at the cost of publication, plus 10 per cent.

I have the honor, sir, to be your obedient servant,

WILLIAM E. CURTIS.

Hon. SECRETARY OF STATE.

APPENDIX H.

In relation to the estimates for "Salaries, Secretaries of Legations." (See page 88.)

DEPARTMENT OF STATE,
Washington, November 30, 1891.

SIR: I have the honor to submit, with a view to its being brought in due course to the attention of Congress, the following statement in explanation of the inclusion in the estimates for the fiscal year 1892-'93 of two items for the salaries of first and second secretaries of legation in Mexico at the respective rates of \$2,625 and \$2,000, instead of the appropriation of \$1,800 for one secretary of legation, as heretofore.

In the annual message of the President, sent to Congress at the opening of the last session, December 1, 1890, the following passage is found:

"I recommend that our mission in the city of Mexico be raised to the first class."

It was doubtless the intention of the President, as it was the expectation of the Department of State in submitting this recommendation for the President's consideration, that its effect should be to organize the mission on the same footing as the other missions of the first class at London, Paris, and Berlin with first and second secretaries. A prominent reason for suggesting the change, apart from the desire to testify appreciation of the intimacy and importance of the relations between the United States and Mexico, was that the official business of the legation at the city of Mexico is larger in volume and bears more heavily on the clerical force there authorized than in any other legation of our service.

In pursuance of the President's recommendation, the current appropriation for the diplomatic and consular service, act of March 3, 1891, provides for the salary of the envoy extraordinary and minister plenipotentiary at Mexico at the rate of \$17,500. The same act, however, made no change in the appropriation for the secretary of legation, leaving it at the same rate, \$1,800, as had been regularly assigned heretofore to the office while the mission was of the second or \$12,000 class. This circumstance was not noticed until it was too late to procure legislative amendment during the last session.

The increase now recommended in the number and compensation of the subordinate offices of our mission to Mexico is deemed just and proper for the following reasons:

1. Under the rule of section 1675 of the Revised Statutes, the compensation of secretaries of legation, unless otherwise provided by law, is fixed at 15 per centum of the amounts allowed to the respective chiefs of missions, and thus the first secretaries of legation at St. Pétersburg are compensated at the rate of \$2,625 per annum, being 15 per centum of the minister's salary at those posts. It is submitted that the principal secretary of legation at Mexico City should be compensated in accordance with the same rule.

2. The importance of the mission and the arduous character of the duties devolving upon the subordinate force, no less than upon the minister, justifies provision for two secretaries of legation, as at London, Paris, and Berlin. It is true that but one secretary is provided at St. Petersburg, but it is submitted that this is an exception to the general rule of organization of missions of the first class, and that while such exception may be permissible at St. Petersburg, because not tending to impair the utility of the mission, it could not justly be applied to the over-worked legation in the city of Mexico. Consequently it is recommended that a second secretary be appropriated for at the rate of \$2,000, the same as at the more active first-class missions.

In this connection, I would call attention to the fact that the Mexican minister at this capital has for assistants one first secretary of legation, two second secretaries, three third secretaries, one attaché, and several clerks.

I have the honor to be, sir, your obedient servant,

JAMES G. BLAINE.

Hon. SECRETARY OF THE TREASURY.

APPENDIX I.

In relation to the estimate for Diplomatic History of the United States. (See page 90.)

DEPARTMENT OF STATE,
Washington, November 20, 1891.

SIR: I have the honor to request that in the estimate for appropriations for Foreign Intercourse, to be submitted to Congress at its next session, there may be included an item asking for an appropriation of fifteen thousand (\$15,000) dollars, to provide for the purchase from Mr. B. F. Stevens of transcripts of a very large number of unpublished state papers in the archives of several European governments, relating to the early diplomatic and political history of the American Colonies and of the United States.

It is a curious fact that, after over a century of political independence, there is nowhere to be found within the United States the records (or copies of them) showing many of the most important acts by which that independence was acquired and maintained. The archives of the Continental Congress, carefully preserved in this Department, contain the records of the transactions to which that Government was a party, but there were many negotiations of the first importance before the Continental Congress came into existence, or which were not directly with it or its representatives. Mr. Stevens has devoted more than twenty years to searching for and copying these foreign records. Even for official purposes they would be a valuable supplement to our own archives. It would also seem to be a worthy object of national pride for the United States Government to open up this wide field to American scholars, and to make it possible for them to prosecute their researches in their own country.

I desire, therefore, to express my hearty concurrence in the recommendations heretofore made on this subject by my two immediate predecessors in the Office of Secretary of State, which were supported by an urgent memorial from a large number of our well-known historians and historical societies, as shown by the accompanying document, Senate Executive Document, No. 133, 50th Congress, 1st session.

I have the honor to be, sir, your obedient servant,

JAMES G. BLAINE.

Hon. SECRETARY OF THE TREASURY.

APPENDIX J.

Memorandum explanatory of requests for increased appropriations for consular service. (See pages 90–99.)

DEPARTMENT OF STATE, Washington, November 28, 1891.

Page 90. *Kanagawa*—Consulate-general: Appropriated, \$4,000; additional submitted, \$1,000.

The reasons for asking this increase are, the great importance of the place, the consul-general being a judicial officer, having the most extended powers known to the law; the cost of transportation, which, for an ordinary family out and back, will be at least \$2,500; and finally, that it should equal Shanghai and Calcutta.

Page 90. *Panama*—Consulate-general: Appropriated, \$4,000; additional submitted, \$1,000.

Increase asked for in view of the vital importance of the location, particularly at the present time, when the entire world is giving so much attention to the subject of isthian transit, a question about which the United States, more than any other nation, should at all times be fully informed, which can only be accomplished by having the office filled by a man of unusual ability and judgment. Secondly, the dangers to, and discomforts of, life are exceptionally great upon the Isthmus of Panama. The commercial interests (shipping) of the United States to be protected at Panama are very large.

Page 90. *Berlin*—Consulate-general: Appropriated, \$4,000; additional submitted, \$500.

The consul-general in Berlin has the supervision of twenty-five consular offices, and the office is besides the most important consular office of the United States in Germany. The increase asked for still leaves the position far less well paid than many others of less importance.

Page 90. *Halifax*—Consulate-general: Appropriated, \$3,500; additional submitted, \$500.

This increase has been repeatedly asked for upon the ground of justice as compared with the salary at Montreal. It is now requested on that ground, and because of its very great importance, as has been shown during the last three years in the fisheries difficulties.

Page 91. *Frankfort-on-the-Main*—Consulate-general: Appropriated, \$3,000; additional submitted, \$1,000.

This consulate-general has jurisdiction over twenty-one consular offices, and has a very large trade of its own. The increase asked for is moderate in the extreme, and it is most earnestly hoped that it will be given.

Page 90. *Ottawa*—Consulate-general: Appropriated, \$3,000; additional submitted, \$1,000.

This office, by the last appropriation act, was raised from a consulate to a consulate-general. The officer in charge is a consul-general, and has been given supervision of the consular offices in the province of Ontario, forty-one in number; is in the capital of the Dominion, where the officer in charge is obliged to live in a style becoming his position. The cost of living in Ottawa is greater than in any other city in the Dominion. The fees collected last year amounted to \$8,200, or double those of Montreal, which has a salary of \$4,000.

Page 90. *St. Petersburg*—Consulate-general: Appropriated, \$3,000; additional submitted, \$1,000.

This increase is requested in view of the remoteness of the location and the great and unusual cost of living in the capital city of Russia, to which should be added the exceptional severity of the climate to a person from the United States.

Page 90. *Dresden*—Now a consulate with salary: Appropriated, \$2,500; to be raised to a consulate-general with additional submitted, \$500.

This place is the capital of the Kingdom of Saxony. All European nations maintain diplomatic representatives at this court, and it is believed that the dignity of the United States, coupled with its extensive trade relations with Saxony, requires the immediate adoption of the proposed change.

Page 91. *Vienna*—Consulate-general: Appropriated, \$3,000; additional submitted, \$1,000.

Vienna, the capital of Austria, and the chief trade center of that nation, is a place of great commercial value to the United States, and is, and should always be, filled by an officer of a high order of ability, and the pay of the office should equal that of offices of like grade in other capital cities of the world. Living in Vienna is far more expensive than in Washington.

Page 91. *Munich*—Now a consulate; to be raised to a consulate-general: Appropriated, \$1,500; additional submitted, \$1,500.

This case is identical in every respect with that of Dresden, save that Munich is the capital of the Kingdom of Bavaria, and that it now has a salary of only \$1,500. The increase asked for is demanded by justice and the needs of the service.

Page 91. *Ecuador*—Consulate-general: Appropriated, \$3,000; additional submitted, \$1,000.

The consular officer in Ecuador is the sole representative of the United States in that Republic. Although not rated as a diplomatic officer, he acts as such in all cases where the United States has occasion to communicate with the Ecuadorian Government. The trade is very considerable and rapidly increasing. The discomforts of life in Ecuador are very great, and the cost of transportation to and from the official residence in Ecuador and the home of the consul-general in the United States is quite out of reason, considering the distance to be traveled.

Page 91. *Nuevo Laredo*—Consulate-general: Appropriated, \$2,500; additional submitted, \$1,500.

This office has been raised from a consulate to a consulate-general and given supervisory powers over the United States consular officers on the entire Rio Grande frontier and throughout the northern part of Mexico. Owing to the rapid extension of railroads from the United States into Mexico, the importance of the office at Nuevo Laredo has increased several hundred per cent. within the last three years, and is still becoming more and more important. The increased salary is due to the office, and will greatly tend to improve the service.

Page 91. *San Domingo*—Consulate; to be raised to a consulate-general: Appropriated, \$1,500; additional submitted, \$1,500.

Page 91. *Tangier*—Consulate: Appropriated, \$2,000; additional submitted, \$2,000.

The consular officer at Tangier is the principal representative of the United States in the Barbary States. All of the other great powers are represented by full ministers or other high diplomatic officers. The present salary is, beyond question, inadequate, as has been clearly shown by recent experiences. And, while the increase asked for is not as great as it should be, it is hoped that if granted it will enable the Department to secure the services of a suitable representative, who will creditably discharge the very important and delicate duties of this peculiar position.

Page 91. *Antwerp*—Consulate: Appropriated, \$3,000; additional submitted, \$1,000.

The port of Antwerp, in its trade relations with the United States, is second only to Liverpool in the whole of Europe, if not the world. It is one of the termini of several direct lines of steamships to New York and other United States ports, and is the center of an immense trade with our country. It is visited by citizens of the United States, bent on business or pleasure, in very great numbers. The duties of the consul are trying, delicate, and very important, and the salary should be in some degree in keeping with the magnitude of his duties.

Page 91. *Brussels*—Consulate: Appropriated, \$2,500; additional submitted, \$1,000.

This submission is presented because the compensation is now not liberal. It is a capital city, and it is proposed to raise the grade to that of consul-general. The increase asked for is deemed necessary and just.

Page 91. *Bradford*—Consulate: Appropriated, \$3,000; additional submitted, \$1,000.

The reason for asking for an increase is that this place is the largest trade center of the United Kingdom, exclusive of London and Liverpool. The labors and responsibilities of this office are very great. The exports to the United States exceed \$22,000,000 in value yearly, and the fees collected and turned into the Treasury amounted last year to \$16,110.50.

Page 91. *Manchester*—Consulate: Appropriated, \$3,000; additional submitted, \$1,000.

Reasons the same as given in the case of Bradford. Fees last year, over \$21,000.

Page 91. *Buenos Ayres*—Consulate: Appropriated, \$2,500; additional submitted, \$1,000.

This is one of the most important trade centers in all of South America. Its trade with the United States is large, and shows a steady and rapid increase. The present salary does not support the consul, owing to the very large demands made upon him by American traders and visitors.

Page 91. *Ningpo*—Consulate: Appropriated, \$3,000; additional submitted, \$500.

This place, although not quite as important as some of the other China ports, is, like all others in the Empire, very expensive to reach and return from, and should have all the salary asked for. The consul here is vested with judicial functions, and, like all other consuls in China, should be a man of fine ability.

Page 91. *Pernambuco*—Consulate: Appropriated, \$2,000; additional submitted, \$1,000.

This is a large and important seaport of Brazil, and has a very extensive direct trade with the United States. It is visited by a large number of American vessels annually. Like nearly all South American ports, it is expensive and unhealthy.

Page 91. *Manila*—Consulate: Appropriated, \$2,000; additional submitted, \$1,500.

This office is regarded by the Department as being of as much importance as any consulate in China, while the cost of living and the discomforts of the place are second to no place in the world where we have consular representation. The increase asked for is most earnestly recommended.

Page 92. *Barranquilla*—Consulate: Appropriated, \$2,000; additional submitted, \$1,000.

This is less than the fees collected last year, and much less than will be collected in times of peace. The commercial interests of the United States require the presence of a salaried consul at this port at all times. The position is of very great political importance to the United States when war prevails in Colombia.

Page 92. *Chemulpho*—Consulate: Submitted, \$3,000.

This is a new office, and is to be the principal consular office of the United States in Corea. As to the necessity for the needs of such an office, attention is called to the following, quoted from a recent dispatch from the minister resident and consul-general of the United States at Seoul:

"I beg to submit to the attention of the Department of State the fact that as yet no provision has apparently been made by the Government of the United States for the legal investiture of the ministers and consuls of this country with the powers of jurisdiction provided for by statutory law in the cases of similar countries, as China, Japan, etc.

"Already a number of cases requiring the exercise of such powers have been presented at this legation and consulate-general, and in each case, in the absence of the full and clear paraphernalia of the jurisdiction required, the treatment was attended with much doubt and embarrassment. There are already indications that the understanding is going abroad that while Corea is open to their visits through treaties, criminals and other dangerous persons may find there greater freedom of action and security against the law. Full provision for dealing with such characters should be made, and, as well, for the exigencies of jurisdiction arising in the growing ordinary civil life of the foreign residents.

"I would earnestly recommend that this subject receive the prompt and energetic action of the Department to the effect that the provisions of articles 4083-4130, Revised Statutes, and all other applicable laws of the United States, may be extended to include Corea.

"In this connection, I would again refer to the urgent need of a consular office at Chemulpho. Seoul is an inland city, some 28 miles from Chemulpho, from which transportation and communication are difficult. The service of a jail at this legation could only be obtained at much expense, as well as with other disadvantages. Our first consular jail should unquestionably be at Chemulpho. There, also, as it is the first and most rapidly growing commercial port (city of Corea), are the services of a consul in matters of jurisdiction and commerce most imperatively required."

Page 92. *Lyons*—Consulate: Appropriated, \$2,500; additional submitted, \$500.

This is one of the most important of the European consulates. Value of annual exports to the United States, about \$50,000,000; amount of annual official fees, nearly \$13,000. The fees collected and the value of the goods exported are about five times greater than any other consulate in France, save Bordeaux, and are about double those of Bordeaux. The increase asked for is not equal to the importance of the place.

Page 92. *Bremen*—Consulate: Appropriated, \$2,500; additional submitted, \$500.

This is one of the great seaports of Germany, and is the foreign terminus of numerous steamship lines plying between the United States and German ports. The export and import trade with the United States is very large.

Page 92. *Chemnitz*—Consulate: Appropriated, \$2,500; additional submitted, \$1,000.

The fees collected at Chemnitz for official services amount to about \$15,000 per annum, which sum is only exceeded by two consulates in the entire service—Liverpool, with a salary of \$6,000, and Bradford, with a salary of \$3,000, to which an additional \$1,000 has been estimated for.

Page 92. *Nuremberg*—Consulate: Appropriated, \$2,000; additional submitted, \$1,000.

This place has a large direct trade with the United States. The official fees collected are nearly \$6,000 per annum.

Page 92. *Birmingham*—Consulate: Appropriated, \$2,500; additional submitted, \$500.

This is one of the largest manufacturing towns in the world, and has a very large direct trade with the United States. The duties of the consul are very important.

Page 92. *Cape Town*—Consulate: Appropriated, \$1,500; additional submitted, \$1,500.

This is the great seaport of South Africa, and is of much importance, in a commercial way, to the United States. The trade with this country is mostly direct, and is rapidly increasing. The port is visited by all United States naval vessels on that station for the purpose of obtaining supplies and refitting. It is also visited by more of our merchant marine than are to be found in all of the other ports of that part of the world combined. The cost of going to and returning from Cape Town is excessive, and the discomforts of life are great in that locality.

Page 92. *Leeds*—Consulate: Appropriated, \$2,000; additional submitted, \$1,000.

This place is the center of a very extensive industrial district, and has a very large trade with the United States. The official fees collected amount to \$4,727.75 per annum.

Page 92. *Nottingham*—Consulate: Appropriated, \$2,500; additional submitted, \$500.

The case of Nottingham is identical in every respect with that of Birmingham.

Page 92. *Sheffield*—Consulate: Appropriated, \$2,500; additional submitted, \$500.

The value of the annual direct exportations from Sheffield to the United States is about \$2,200,000. The official fees collected amount to about \$6,000 per annum. The character of the trade of this place is such as to require the services of a thoroughly competent man, in order that the interests of the United States may not suffer. The salary asked for will only place Sheffield upon the same level as that of other consulates of like or less importance in that part of the United Kingdom.

Page 92. *Sydney*—Consulate: Appropriated, \$2,000; additional submitted, \$1,000.

This place has now become the most important port in New South Wales in its trade relations with the United States. It has very much more shipping and far greater exports to the United States than Melbourne, which has a salary of \$4,500. The increase asked for is in every way proper and needed.

Page 92. *Asuncion*—Consulate: Appropriated, \$1,500; additional submitted, \$1,500.

This is a new office, and has been established with the hope and belief that it will prove to be the first and most important step towards securing for the United States nearly or quite all of the trade of Paraguay, of which country Asuncion is the chief city and the capital. The small salary provided has rendered it impossible to secure and retain the services of a suitable person for the position thus far, hence the increase is asked for.

Page 92. *Smyrna*—Consulate: Appropriated, \$2,500; additional submitted, \$500.

This is the most important United States consulate in the Turkish dominions. The consul is vested with judicial powers, the same as in China and other non-Christian countries, where the salaries range much higher. The place is unhealthy and very expensive, and the salary asked for is very moderate.

Page 92. *St. Galle*—Consulate: Appropriated, \$2,500; additional submitted, \$500.

This is by far the most important consulate in Switzerland. The exports to the United States have increased in value from about \$4,000,000, six years ago, to the very large amount of \$18,000,000 last year. The increase asked for is very moderate, indeed, when judged by the great growth in the trade and importance of the office. Favorable action upon this recommendation is most earnestly desired.

Page 93. *Maracaibo*—Consulate: Appropriated, \$2,000; additional submitted, \$1,000.

The principal seaport of Venezuela. Its trade is very extensive and varied. The official fees collected amount to over \$3,000 per annum. If fees were collected for services to American vessels, as formerly, the total would be much more than double the amount now reported. The duties of the consul are more important than those of any other consular officer in the Republic, while cost of living is nearly double that of any other city in Venezuela. The climate is pestilent in the extreme. The increase asked for is an absolute necessity.

Page 93. *Santos*—Consulate: Appropriated, \$1,500; additional submitted, \$1,000.

The sum asked for here is about \$400 more than the fees formerly collected, when fees were charged for services rendered to American vessels. The services are still rendered, but the fees were abolished by the act of June, 1884, and, in view of the cost of living and the deadly nature of the climate, the above sum is submitted.

Page 93. *Vancouver*—Commercial Agent: Compensated by fees, which amount to \$2,000, and rapidly increasing; submitted, \$2,500.

This place is the Pacific terminus of the Canadian Pacific Railway, and is increasing in population and importance perhaps more rapidly than any other place upon this Continent. It is here that the Canadian Pacific Railway steamers, direct from China and Japan, discharge their cargoes of tea, silk, etc., from the East, and take on their return freights of manufactured articles and cloths from (in a large part) the United States. It is the place where the greater portion of the opium intended to be smuggled into the United States is landed, and the presence of an intelligent, honest, and fairly paid consul is of the very greatest importance. The consul should be deprived of the privilege of trade, which he now enjoys.

Page 97. *Plauen*—Commercial agent: Compensated by fees; submitted, \$2,500.

The official fees collected last year amounted to nearly \$8,000, and the trade is steadily increasing. The salary asked for would result in a saving to the Government and remove the office from the trading to the non-trading class.

Page 94. *Breslau*—Consulate: Appropriated, \$1,500; additional submitted, \$500.

Official fees collected last year, \$3,151.50, which shows that it has a large direct trade with the United States. The goods sent from Breslau to the United States are nearly, or quite, all ad valorem duty paying, and it requires the constant and intelligent attention of an able and efficient officer to protect the interests of the Treasury. It is hoped that the increase asked for will be given as a matter of justice and of good public policy.

Page 93. *Crefeld*—Consulate: Appropriated, \$2,000; additional submitted, \$500.

This is a place of great commercial value to the United States. The exports are very large. The official fees collected average about \$8,500 per annum. The importance of the office demands the increase asked for.

Page 93. *Dusseldorf*—Consulate: Appropriated, \$2,000; additional submitted, \$500.

The salary asked for this place is about equal to the fees collected annually for official services within this district.

Page 93. *Leipzig*—Consulate: Appropriated, \$2,000; additional submitted, \$500.

The population of Leipzig is more than 250,000. The city is a great commercial center, and has a very large direct trade with the United States. The official fees collected amount to upward of \$6,500 per annum. Very many American students are in attendance at the University of Leipzig each year, and are naturally a source of much care and labor to the consul.

Page 94. *Mannheim*—Consulate: Appropriated, \$1,500; additional submitted, \$500.

The official fees collected here annually amount to more than \$3,000. The situation here is identical with that at Breslau, and the same reasons for an increase here obtain as at the consulate at Breslau.

Page 93. *Cardiff*—Consulate: Appropriated, \$2,000; additional submitted, \$500.

The direct trade between this port and the United States is not very great, but it is very important to United States shipping. The usual number of seamen shipped and discharged there is at least 600 per annum.

Page 93. *Dunfermline*—Consulate: Appropriated, \$2,000; additional submitted, \$500.

The change proposed here is requested as a matter of fairness and justice to the consul; the official fees collected amount to about \$3,800 per annum, and, besides, it is of very great importance that this office, located, as it is, in the very heart of the Scotch linen district, should be retained in the non-trading list of consulates with an adequate compensation.

Page 93. *Hamilton*—Consulate: Appropriated, \$2,000; additional submitted, \$500.

This is an important trade center in Ontario.

Page 93. *Newcastle on-Tyne*—Consulate: Appropriated, \$1,500; additional submitted, \$1,000.

The port of Newcastle is of much importance to United States shipping, being about equal to Cardiff in that line, and having at least four times the amount of direct trade with the United States as Cardiff, and is far less desirable as a place of residence.

Page 93. *Toronto*—Consulate: Appropriated, \$2,000; additional submitted, \$500.

This is by far the most important consular office in Canada, exclusive of the two consulates-general. It has more American vessels and seamen to watch over and protect than all other consulates in Canada combined. The increase asked for is needed and is just.

Page 93. *Tegucigalpa*—Consulate: Appropriated, \$2,000; additional submitted, \$500.

This office is located in the capital city of Honduras, and the consul is our highest representative in that Republic. The increase asked for is deemed very moderate, in view of the fact that the consul is required to perform duties of a diplomatic character.

Page 93. *Florence*. Consulate: Appropriated, \$1,500; additional submitted, \$1,000.

The present salary of this post is very much less than the official fees collected, and less than the actual expense of the consul holding the position. The city of Florence is in the very heart of the line of American travel, and the consul there is compelled to spend much money and time in attending to the wants and necessities of the tourists. The expense of living in Florence is very great.

Page 93. *Tampico*—Consulate: Appropriated, \$1,500; additional submitted, \$1,000.

Tampico has just now come to the very front as a seaport of Mexico, owing to the completion of the branch railroad which connects the grand harbor of Tampico with the great Mexican Central railway system. This means that from this time on Tampico, and not Vera Cruz, will be the chief port of the Mexican Republic. The increase asked for is very reasonable, and it is hoped that it will be at once given.

Page 93. *Tamatave*—Consulate: Appropriated, \$2,000; additional submitted, \$500.

Tamatave is the chief port of the island of Madagascar, and is of much commercial value to the United States. The official fees collected are not large in amount, but generally each fee of \$2.50 represents an entire ship's cargo, and of great value. The import trade direct from the United States is very valuable, and will promptly increase when the country becomes tranquil. The consul is not vested with diplomatic functions, yet he is the only medium of communication between the United States Government and that of Madagascar. The delicate and important nature of the duties of the office require a man of marked ability to properly perform them, who should be given a living salary. The dangers and discomforts of life in Madagascar are very great. The consul is granted judicial powers, the same as consuls in China, etc.

Page 94. *Amsterdam*—Consulate: Appropriated, \$1,500; additional submitted, \$1,000.

This is a very important port and point of trade with the United States. The exports to the United States are very large and rapidly increasing. The official fees collected amount to more than \$4,500 per annum. The growing importance of the place to the United States commercially renders the raising of the grade of the consulate proper and necessary.

Page 94. *Batavia*—Consulate: Appropriated, \$1,000; additional submitted, \$1,500.

This is our chief consular office in Java, and experience has shown that we can not secure the services of a proper person who is not engaged in trade. The place is remote, unhealthy, and expensive, and it is most strongly urged that the increase asked for be given.

Page 94. *Rotterdam*—Consulate: Appropriated, \$2,000; additional submitted, \$500.

A very important port of the Netherlands, having very intimate and extensive trade relations with the United States. Direct lines of steamships and sailing vessels connect Rotterdam with New York, Boston, and Baltimore. The port is visited annually by a large number of American vessels and American business men and tourists.

Page 94. *San Juan del Norte*—Consulate: Appropriated, \$2,000; additional submitted, \$500.

This office has recently advanced from comparative insignificance to a place of great and peculiar importance. This is owing to the steps now being taken to construct an isthmian canal across Nicaragua, under the direction of citizens of the United States. The necessity for increasing the salary at this place is pressing.

Page 94. *Orange Free State*—Consulate: Submitted, \$2,500.

The reasons for asking for the establishment of consulates in the Orange Free State and Transvaal Republic are nearly identical, and are as follows: The Transvaal Republic is by all means the richest and most valuable as an inviting market for American goods of all the South African states. There are at present large numbers of United States citizens within its borders, and more are constantly going thither. Many complaints have been made because we have no consular representative in the Republic. It should be stated that as yet we have no treaty with the Transvaal, but steps are now being taken looking to the conclusion of such an instrument. In the absence of a consular representative of the United States in the Transvaal tariff legislation adverse to the interests of the United States has been enacted and will continue until we are properly represented there, which can not be until the appropriation asked for has been made.

The United States has a very favorable treaty with the Orange Free State, and will send a consular representative there as soon as Congress shall provide a suitable salary for such an officer.

Page 94. *Transvaal Republic*—Consulate: Submitted, \$2,500. (See Orange Free State.)

Page 94. *Odessa*—Consulate: Appropriated, \$2,000; additional submitted, \$500.

This is the principal port of Russia on the Black Sea, and has an extensive trade, exporting large quantities of wool to the United States. The cost of living in Odessa, as in all cities of Russia, is exceptionally great, while the discomforts of life there are very considerable indeed.

Page 94. *Zurich*—Consulate: Appropriated, \$2,000; additional submitted, \$500.

This is the principal city in a commercial point of view. The annual exports direct to the United States amount in value to \$1,500,000. The official fees collected amounted last year to \$2,799. The vigilance of the consul, aided by his expert, has resulted during the past year in saving to the revenues of the United States at least twenty times the increase asked for.

Page 94. *Alexandria*—Consulate: Submitted, \$2,500.

This office is now an agency under Cairo, from which place it is distant 150 miles. The commerce, while not very extensive, is important and likely to be very quickly and greatly increased. The raising of the grade of the office is demanded by the tremendous flood of American travel, which has grown from about twenty in 1884-'85 to more than ten thousand in 1888-'89. The money expended in Egypt by this army of United States citizens was about \$3,000,000 last year, and the demand for a full grade and properly salaried consul at Alexandria is great, and should be responded to by granting the appropriation asked for.

Page 94. *Sophia*—Consulate: Submitted, \$2,500.

This place is the capital of Bulgaria, and is the home of about twenty American missionaries, with their families. They have four or five schools at different points, with about four hundred pupils. The school-houses, dwellings, etc., are owned by American citizens. The remoteness of Sophia from any place where we have a consul, and the peculiar political condition which prevails there, renders it very important that the appropriation asked for be given and the office established.

Page 96. *Buda-Pesth*—Consulate: Compensated by fees, which average about \$1,500 per annum; submitted, \$1,500.

This city is the capital of Hungary of the Austro-Hungarian Empire. It has about 225,000 inhabitants, and has a large direct trade with the United States. The office is now in the trading class and filled by a foreigner, and it is deemed to be very important that it at once be given such a salary as shall place it in the non-trading class, and render it necessary that the office be filled by a citizen of the United States. The salary asked for will only entail a very nominal expense to the Treasury.

Page 94. *Bahia*—Consulate: Appropriated, \$1,500; additional submitted, \$500.

The reasons for asking for an increase at Bahia and Para are identical. Para and Bahia are large and important seaports of Brazil; each has a large and increasing direct trade with the United States. The trade of these ports consists of imports as well as exports, and should be fostered. The present salaries are manifestly inadequate, when the cost of living, the unhealthy character of the climate, and the commercial importance of the places are considered.

Page 94. *Para*—Consulate: Appropriated, \$1,500; additional submitted, \$500. (See Bahia.)

Page 94. *Copenhagen*—Consulate: Appropriated, \$1,500; additional submitted, \$500.

This office is like the one at Stockholm. The consul fills the place of a secretary of legation, while he is in fact only a consul. The interests of the service require that the consul at Copenhagen should be better rewarded for his double duties.

Page 94. *Nice*—Consulate: Appropriated, \$1,500; additional submitted, \$500.

Nice is a favorite winter resort of many invalids from America, not a few of whom die there, leaving their estates to be settled by the consul, entailing upon that officer great labor in addition to his regular duties, for which there is no extra compensation. The present salary is entirely inadequate. The United States fleet has winter quarters in the immediate vicinity.

Page 94. *Kehl*—Consulate : Appropriated, \$1,500 ; additional submitted, \$500.

The sum asked for this place is less than the official fees collected each year, and much less than the consul received when compensated by fees.

Page 94. *Bristol*—Consulate : Appropriated, \$1,500 ; additional submitted, \$500.

This city has over 200,000 inhabitants, has a large direct export trade to the United States, and a large import trade therefrom. It is the principal port to which our live stock for England is shipped. The business of the port and justice to the consul demand the increase asked for.

Page 95. *London, Canada*—Consulate : Appropriated, \$1,500 ; additional submitted, \$500.

The official fees collected at this place are considerably greater than the salary asked for. The proposed change will result in restoring to the consul a compensation approaching in amount that which was enjoyed while the office was in the feed list, and which was then deemed too small.

Page 93. *Quebec*—Consulate : Appropriated, \$1,500 ; additional submitted, \$1,000.

The trade between Quebec and the United States is not very great, but the place is expensive as a residence, and especially so to a United States consul, in consequence of the large number of American tourists that visit the city each year.

Page 95. *Barcelona*—Consulate : Appropriated, \$1,500 ; additional submitted, \$500.

The official fees collected at this port are not large, but the value of the exports to the United States is very considerable, while the imports from the United States reach a very large sum—that is, more than *three-fourths* of the entire importations from the United States into Spain are entered at this port. It is at present the poorest consulate in Spain, in compensation.

Page 95. *Cádiz*—Consulate : Appropriated, \$1,500 ; additional submitted, \$500.

This port is the second in importance in Spain, and has a large direct trade with the United States.

Page 95. *Malaga*—Consulate : Appropriated, \$1,500 ; additional submitted, \$500.

This port is the first in importance as a place of refuge—vessels can enter it in any wind. The official fees collected here are somewhat less than the salary asked for, but if the consul were permitted to collect fees for services to American vessels and seamen the total would largely exceed the sum now submitted. It is very probable that Almeria, a very important consular agency under Malaga, will be raised to an independent office, and a citizen of the United States appointed to the office so elevated. This will very largely reduce the present income of the consul at Malaga, and this increase is asked as a matter of justice to the present officer and because it is believed to be required in the interest of the public service.

Page 96. *Rosario*—Consulate : Submitted, \$1,500.

The compensation of the consul at this port last year was \$1,451.97, and there was derived from invoice certificates, \$1,066, and for services to American vessels, \$38.97 ; which last amount was paid to the consul direct from the Treasury, as provided for by the act of June 26, 1884. This consul has the right to engage in trade, and is so engaged, and, owing to his position, enjoys a substantial monopoly, to the serious injury of others who desire to trade with the United States.

Page 95. *Ghent*—Consulate : Appropriated, \$1,000 ; additional submitted, \$500.

The great volume of business done at this place demands an immediate increase in the salary. The annual fees collected amount to (last year) \$2,650. The consul is permitted to engage in trade, much to the disadvantage of United States interests. The proposed salary places the office in the non-trading class, and is most earnestly recommended upon the grounds of justice and public policy.

Page 96. *Carthage*—Consulate : Submitted, \$2,000.

This is a trifle less than the annual compensation of the consul under existing law. The salary asked for is of the non-trading class.

Page 96. *Limoges*—Consulate : Submitted, \$1,500.

The amount asked for here is about \$250 less than the official fees collected, and it is desired that the office should be placed in the non-trading class and be filled by a citizen of the United States, to accomplish which, the salary asked for is required.

Page 96. *St. Pierre (Miquelon)*—Commercial agency : Compensated by fees ; submitted, \$1,500.

The Department asks in this case for salary something less than the official fees annually collected, but it desires a fixed salary and one that will require the office to be filled by a citizen of the United States, who will be prohibited from engaging in trade. The place, as is well known, is the center of the French fishing interests in the West Indies, and the experience of our country during the last three years has demonstrated the prime necessity of having this office at once filled by a citizen of the United States who shall be compensated by a salary which will preclude his engaging in trade of any kind whatever while he holds the office of consul.

Page 96. *Garee-Dakar*—Consulate : Compensated by fees ; submitted, \$1,000.

This office collects annually in official fees something over \$100, which constitutes the compensation of the consul. The consul is an American citizen, and is of course engaged in trade, but the fees collected do not equal the expenses resulting to him from his holding the office, and the Department is now informed that unless a sufficient salary is supplied to cover the usual expenses of the office, the present efficient incumbent will feel obliged to resign, which will necessitate the closing of the office. So far as the interests of the Treasury are concerned, the office might well be closed, but the loss which might accrue to merchants and business men of our country might and probably would amount to many thousands of dollars in a single year. The loss resulting in the case of a single wreck, owing to the lack of consular protection, might reach a sum equal to ten times the salary asked for in a single year. In the case of a refitting of one of our whalers or the procurement of supplies for one of our naval vessels, the active services of an efficient consul would be greatly needed, and would result in the saving of large sums to our private citizens or to the General Government. The appropriation is very earnestly commended.

Page 96. *Rouen*—Consulate: Submitted, \$1,500.

This is an important trade center of France, and the official fees collected there amount to considerably more than the salary asked for. The trade between Rouen and the United States is of such a character as to make it particularly desirable that the consul be restricted in that direction.

Page 95. *Stettin*—Consulate: Appropriated, \$1,000; additional submitted, \$500.

The salary asked for is about the average sum collected per annum for official services, but the Department is particularly anxious that this office be at once removed from the trading class. At present if the consul engages in trade he has to certify to his own invoices. The faultiness of such a system is of course obvious.

Page 93. *Belize*—Consulate: Submitted, \$2,500.

This place is of considerable commercial value, especially to American vessels; but its political importance to the United States renders it very desirable that the office should be filled by an able officer, one not engaged in trade and a citizen of the United States. The climate is an exceedingly trying one, and a less salary than that asked would be too small to attract a suitable person for the position.

Page 95. *Coaticook*—Consulate: Submitted, \$1,500.

The official fees collected at this place are about \$500 more than the salary asked for. It is desirable that this office should be denied the right to trade.

Page 97. *Hull*—Consulate: Submitted, \$2,500.

The salary asked for in this case is about \$800 greater than the official fees collected, but is as small as can be given if the best interests of the service are to be considered. The place is the most undesirable one in all of the United Kingdom as a place of residence, and, owing to the small compensation of the office, it has been difficult to obtain the services of a suitable person as consul for many years past. Great irregularities were at one time practiced there, owing to the consul acting as a factor in matters relating to shipping and seamen, with which the port abounds. The proposed salary will secure the services of a suitable officer, and will exclude the office from the trading class.

Page 97. *Moncton*.—Consulate: Submitted, \$1,500.

This office is now a commercial agency in New Brunswick. The fees collected are about equal to the salary asked for, and the appropriation is strongly recommended by the Department.

Page 97. *Newcastle, New South Wales*—Consulate: Submitted, \$2,500.

This is a trading commercial agency under Sydney. The official fees collected usually exceed by several hundred dollars per annum the salary proposed. It is very desirable that this office be filled by a citizen of the United States, and that trading be prohibited.

Page 97. *Port Rowan*—Consulate: Submitted, \$1,500.

The office will not be continued in the trading class if the salary asked for is appropriated. Fees, \$1,259.50.

Page 97. *St. Christopher*—Consulate: Submitted, \$1,500.

The salary asked for at this place is about the same as the annual official fees collected. The salary asked for places the office in the non-trading list.

Page 97. *St. Hyacinthe*—Consulate: Submitted, \$2,000.

The salary requested for this office is less than the official fees collected, and will prohibit trade.

Page 97. *Stanbridgè*—Consulate: Submitted, \$1,500.

The official fees collected at this place are considerably more than the salary proposed.

Page 97. *Trinidad*—Consulate: Submitted, \$3,000.

This is a trading consulate. The salary proposed is considerably less than the official fees received in the last fiscal year. The commerce with the United States is, however, steadily increasing, and the fees will probably soon exceed \$3,000 a year. The political importance of the place, owing to its proximity to Venezuela, and its being a place of refuge for Venezuelan exiles, is very considerable. It is an expensive and not very healthy post, in a tropical climate, and the salary should be at least equal to that of Demarara, which is now \$3,000.

Page 97. *Collengwood*—Commercial agency: Compensated by fees; submitted, \$1,500.

The salary asked for is less than the official fees annually collected, but it is desired to place the office in the non-trading class.

Page 97. *Waubauschene*—Commercial agent: Compensated by fees; submitted, \$1,500.

Salary estimated for is very much less than the official fees collected, and to grant it would be a saving to the Treasury and would remove the office from the trading class.

Page 96. *Venice*—Consulate: Appropriated, \$1,000; additional submitted, \$500.

This place has the privilege of trade and is in the line of very great American travel. The present salary is entirely inadequate, and the place should be placed in the non-trading class.

Page 95. *La Guayra*—Consulate: Appropriated, \$1,500; additional submitted, \$500.

This is one of the important seaports of Venezuela, and the raising of the salary has been urged by our diplomatic representatives in that country for many years past. The Department regards it as much more important now than ever before.

Page 95. *Puerto Cabello*—Consulate: Appropriated, \$1,500; additional submitted, \$500.

This is second port in importance in Venezuela, and every reason urged for an increase in the salaries at Maracaibo and La Guayra apply in this case with full force.

Page 97. *Curaçoa*—Consulate: Submitted, \$2,000.

The salary asked for in this case is a little more than the official fees now collected and retained by the consul, who also has the trading privilege, which will be cut off if the appropriation asked for be made.

ALLOWANCE FOR CLERKS AT CONSULATES.

Page 97. *London*: Appropriated, \$1,600; additional submitted, \$1,000.

The labor in the consulate-general at London is nearly double that of any other consular office in our service, and the sum asked for is absolutely required. The consul-general now pays \$1,000 out of his private funds.

Page 97. *Paris*: Appropriated, \$1,600; additional submitted, \$1,000.

For many years the sum of \$2,000 per annum for clerk-hire at Paris was appropriated, and the necessity for that allowance is far greater now than ever before. The consul-general is compelled to draw heavily upon his private funds to pay for clerical aid beyond that furnished by the Government. This is unjust, and should be remedied, at least to the extent herein proposed.

Page 97. *Halifax*: Appropriated, \$640; additional submitted, \$560.

Halifax is a consulate-general, with much more extensive and difficult labors than Montreal, which office has \$1,200 granted for clerk-hire, and which is needed even at that comparatively quiet port.

Page 97. *Maracaibo*: Submitted, \$800.

When this office was compensated by fees the consul was allowed to retain for the payment of clerks \$1,000 per annum; but when the post was transferred to the non-trading class, with a fixed salary, no provision was made for clerk-hire. The Department has allowed the consul \$400 per year from the fund subject to the order of the Secretary of State for clerk-hire, and the consul has paid from his own fund a like amount, making in all \$800, the sum now asked for.

Page 97. *Ecuador*: Submitted, \$800.

This office, although only a consulate-general, has as much diplomatic duties as consular to perform, and as no secretary of legation is allowed, and the consul-general must be in Quito at least half of the year, while the office at Guayaquil is at the same time kept open, it is indispensable that a clerk be provided.

Page 97. *Messina*: Submitted, \$800.

The need for a well-paid clerk at Messina is well known to the Department, and was for years recognized by Congress. There is now no specific appropriation for that office, and the Department again presents the case, with a most earnest recommendation that the sum asked for be appropriated.

Page 97. *Nuevo Laredo*: Submitted, \$800.

The salary and grade of the office at this place has been raised, the salary to \$2,500 and the grade to consul-general. The office is now a very important one, with jurisdiction over the entire Rio Grande frontier and most of the northern part of Mexico. Its importance is greatly increased by the higher grade. The duties of the office can not be properly discharged by a single individual.

Page 97. *Ottawa*: Submitted, \$800.

This has now become the most important office in Canada, both in the fees collected and in its location. The Department's experience during the past year has shown beyond question that a very competent clerk is required at this place. The sum asked for is regarded as entirely within the necessities of the case, the office being now a consulate-general, charged with the supervision of forty-one consular offices in Ontario.

Page 97. *Palermo*: Submitted, \$800.

It is well known that this is the most important commercial city in Italy. For many years the consulate was allowed \$800 per annum for clerk-hire, and it is now desired to renew this very important and necessary appropriation.

Page 97. *Smyrna*: Submitted, \$800.

The sum now asked for is only the salary which for some fifteen years was granted to this place, and which has always been regarded by the Department as very moderate indeed. The clerk should be, and the present is, familiar with at least five languages and dialects, viz, French, Italian, Turkish, Arabic, and English. It is most earnestly hoped that the very moderate sum now asked for will be appropriated.

Page 97. *Tangier*: Submitted, \$800.

This place, like Smyrna, only in a greater degree, requires a very competent clerk. Nearly every great power except the United States support very imposing legations at Tangier. It is thought, however, that, with an increased salary for our representative and the raising of his grade to that of consul-general, and by furnishing him with a competent clerk, who shall be versed in the numerous languages and dialects used in Morocco, we will be able to hold, for the present at least, a respectable position in that country. In view of all these facts, the appropriation is most earnestly commended.

Page 97. *Beirut*: Appropriated, \$480; additional submitted, \$160.

The peculiar nature of the duties of the consul at this port compels him to employ a clerk familiar with the dialects of the country and the habits of the people. Such a clerk can not be obtained for less than the sum asked for, and which is now being paid, the \$160 being contributed by the consul from his private funds.

Page 97. *Piedras Negras*: Submitted, \$640.

This post, like all others on the Rio Grande frontier, has suddenly grown into importance, owing to the railroad extension from the United State into Mexico. Four hundred dollars is now allowed to this place for the fund for additional clerk-hire, which is subject to the orders of the Secretary of State. It is desired that a specific appropriation be made as submitted, which sum is now being actually expended, the deficiency being made good by the consul.

Page 97. *Paso del Norte*: Submitted, \$640.

This post is, perhaps, to-day the most important consulate on the Rio Grande, and its trade with the United States is rapidly increasing. The present provision for clerk-hire is the same as at Piedras Negras, and the consul here, as at the last-mentioned office, is compelled to pay out his private funds for clerical aid.

Page 97. *Aix la Chapelle*: Submitted, \$640.

The situation at this consulate is identical with that at the two offices in Mexico just mentioned. The services of a fairly good clerk at Aix la Chapelle are an absolute necessity. The duties of the office can not be performed without such help.

It is believed that with the allowance asked for it will be possible for the consul to secure the services of some young American, who can also be made vice and deputy consul, thus putting the business of the office entirely in the hands of citizens of the United States.

Page 97. *Prague*: Appropriated, \$480; additional submitted, \$120.

Six hundred dollars was formerly allowed for clerk-hire at this place, and the business has increased very rapidly of late years, and is now nearly equal to that of Vienna.

Page 97. *Horgen*: Submitted, \$600.

This place has grown in commercial importance to the United States of late years, and is now in the front ranks, owing to the peculiar products of the district. The exportations are all ad valorem goods, and require the most critical examination. A good clerk is absolutely essential to the proper discharge of the duties of the office.

Page 97. *St. Galle*: Submitted, \$800.

This is by far the most important office we have in Switzerland. The yearly exportation of ad valorem goods to the United States now reaches the very large sum of \$18,000,000. The official fees collected are nearly equal to the total collected at all of the other principal consulates in Switzerland. The services of an expert clerk are absolutely indispensable.

Page 97. *Kingston, Jamaica*: Submitted, \$800.

This place is one of the most important British West Indian ports. We have very important commercial relations with Jamaica, and it is impossible for a consul to properly discharge his duties without the aid of a clerk. The sum asked for is the same as now provided for Demerara, which has a salary of \$3,000.

Page 97. *Rheims, France*: Submitted, \$480.

The demands for a clerk here are very great, and a clerk has been employed by the consul continuously. It is now proposed that the services be paid for by the Government.

Page 97. *St. Thomas, Ont.*: Submitted, \$480.

This is a very important office in Canada, and formerly had a clerk paid from the excess of fees. The office is now under a fixed salary, and it is very desirable that a clerk be provided for by law. The sum asked for is very moderate.

Page 97. *Trinidad, Br. W. I.*: Submitted, \$480.

Every thing that has been said in support of recommendation for a fixed salary at this place may be said in favor of a clerk. It has been and is now impossible for the consul to properly discharge the duties of his office without the help of a clerk. The great number of American vessels visiting this port requires very frequent journeys down the bay by the consul, and, if he has no clerk, the office must be closed when he is required to visit a vessel. The closing of a consulate during office hours causes much inconvenience and furnishes just grounds for complaint. The sum asked for is the same as is now given to Demerara, where less work is required.

MISCELLANEOUS.

Page 98. *Boat and boat's crew for official use of the consul-general at Apia*: Submitted, \$500.

The same reasons which obtain at Hong-Kong and at Hiogo exist in the case at Apia, only in a very greatly increased degree. There are absolutely no wharves or moles in Apia. The consular officer is obliged to employ a boat and crew each time he visits a vessel, and this he does daily. A fixed appropriation will be an economy, and will be in keeping with the dignity of the office.

Page 98. *Prisons—Rent of prison for American convicts in Madagascar, and for wages of keeper of same*: Submitted, \$1,500.

At present the United States has no prison in Madagascar, nor has there been any money appropriated to pay the rent of such a place, notwithstanding the fact that for a long time we had a prisoner there who was serving out a ten years' sentence from the consular court. A prison is required here quite as much as in any other non-Christian country where we have a consular court.

Page 98. *Interpreters, guards, etc., in Turkish dominions*: Appropriated, \$5,000; additional submitted, \$2,000.

All that has been said as to interpreters in China and Japan applies with equal force in Turkey. This appropriation is divided between at least ten persons, and it will be seen at once that any sum less than \$6,000 would be quite inadequate. The money appropriated under this head should be expended under the direction of the Secretary of State, the only restriction being that of the country. New offices are being created and old ones being closed, and the Secretary of State should have full authority to apply the fund to any and all offices within the Turkish dominions.

Page 98. *Marshals for Consular Courts in China, Corea, Japan, and Turkey*: Appropriated, \$9,000; additional submitted, \$300.

There is no provision for a marshal's salary at the consulate at Cheefoo, and the consul there has been compelled to ask the British consul to loan the services of his marshal when such an officer was required by the consul of the United States. This has been done in the past quite frequently, but now the British consul expresses the hope that our consul will make other arrangements for the future, and, in order that this may be done, the additional appropriation named is required. (For need of marshal and a prison and prison-keeper in Corea, see item relating to Chemulpho, page 304.)

Page 99. *Publication of Consular and other Commercial Reports*: Appropriated, \$20,000; additional submitted, \$5,000.

The additional sum asked for is requested to enable the Department to maintain the standard of these publications, and to extend their scope so as to make them at least equal to similar publications in England, France, and Belgium. The practical usefulness of the reports has been greatly increased by illustrations of new machinery, new processes, and the like, that may be of value to producers and manufacturers of the United States. The outlay necessary for this object is small when compared with the value of the results. The cost of distributing the reports has become so great, by reason of the large editions issued, as to make it advisable for an additional appropriation. These items are covered by the additional sum asked for.

Page 99. *Contingent Expenses, United States Consulates*: Appropriated, 150,000; additional submitted, \$50,000.

The additional sum asked for under this head is rendered necessary if the consular offices affected by the act of July 1, 1886, be granted fixed salaries, as contemplated by that act. It is proper to state, however, that the actual cost to the Treasury,

APPENDIX L.

In relation to the estimates for the Quartermaster's Department of the Army. (See pages 108 to 110.)

WAR DEPARTMENT, QUARTERMASTER-GENERAL'S OFFICE,
Washington, D. C., September 5, 1891.

SIR: I have the honor to submit herewith estimates of the appropriations required for the service of the Quartermaster's Department for the fiscal year ending June 30, 1893, amounting in the aggregate to \$8,542,600.

It will be observed that the amount asked for Army Transportation for next fiscal year is less, by \$50,000, than the amount estimated for the current fiscal year, and \$150,000 more than was appropriated, but the now known requirements of the service for the fiscal year 1890, and recent decisions of the accounting officers making payable in cash accounts of the Oregon Short Line and Utah Northern Railroad Company, make it doubtful whether the amount provided for this fiscal year will suffice, and it is fully believed that the sum now estimated for (\$2,900,000) will be required for fiscal year 1892-'93.

The full amount asked for under the head of "Clothing, and Camp and Garrison Equipage," should be appropriated to enable the Department to purchase a limited working stock of materials and clothing, and thus render practicable the prompt supplying of the wants of the Army and of the militia of the States and Territories.

The amounts shown to be required for "Construction and Repair of Hospitals" (\$100,000) and "Quarters for Hospital Stewards" (\$12,000) are in accordance with the recommendation of the Surgeon-General of the Army.

Very respectfully,

R. N. BATCHELDER,
Quartermaster-General U. S. Army.

HON. SECRETARY OF WAR.

APPENDIX N.

In explanation of certain estimates for the Indian Service.

DEPARTMENT OF THE INTERIOR, OFFICE OF INDIAN AFFAIRS,
Washington, October 5, 1891.

SIR: In compliance with the request contained in your communication of the 13th of July, I have the honor to submit herewith estimates of appropriations required for the Indian service for the fiscal year ending June 30, 1893.

Attention is respectfully invited to the estimate for sub-station and mill at Flathead agency (page 152). A full explanation as to the necessity for the same is found in the inclosed copy of a letter from Agent Ronan, of Flathead agency, dated July 9 last.

In regard to the increase of \$15,000 asked for under "Telegraphing and purchase of Indian supplies" (page 153), I would respectfully state that the shipments of goods and supplies from western points have increased so largely within the last few years that it is absolutely necessary, for the prompt and proper shipment of freight, that a warehouse, in addition to the one in New York, be opened in Chicago. During the fiscal year 1891 there have been shipped from western points, in addition to the bacon, pork, and other subsistence supplies, over 35,000 packages, weighing over 5,000,000 pounds, containing harness, agricultural implements, wagons, stoves, etc. All these articles, on account of lack of warehouse facilities, had to be inspected at the different railroad stations and at the warehouses of the contractor. This inspection I deem insufficient and not for the best interest of the service, and I consider the renting of an additional warehouse an absolute necessity for the proper shipment and inspection of the goods.

Very respectfully,

T. J. MORGAN,
Commissioner.

Hon. SECRETARY OF THE INTERIOR.

UNITED STATES INDIAN SERVICE, Flathead Agency, July 9, 1891.

SIR: Referring to "A" 6948-91, under date of March 24, 1891, calling attention to receipt of my report of the 18th of February, in relation to the location of Flathead agency, wherein I agreed with Inspector Gardner that its present location is a very inconvenient one to a large portion of the Indians; that the benefits which should be derived from mills, shops, etc., can not be availed by those living at a distance of thirty, forty, or fifty miles from the agency, except at a great sacrifice of time, and in view of these facts, I recommended that a new agency-headquarters be established on Crow or Mud Creek, and that the present grist and saw mill, blacksmith and carpenter shops should be maintained under charge of a farmer for the benefit of Chief Charlot's band of Bitter Root Flatheads. In your reply, you state that no funds were available during the remainder of last fiscal year for the removal or erection of buildings, and that the amount available for the present fiscal year is so limited that the question of expense becomes a vital one in the consideration of the recommendation.

In submitting statement showing the probable cost of the establishment of the proposed new agency, in view of all the facts, I deem it better to advise the retainment of the present agency as headquarters, and to submit a statement showing the probable cost of a sub-agency.

A saw-mill, with all necessary machinery, including engine and boiler, necessary to furnish power to run all required machinery, can be laid down at Ravalle, or any station designated, on this reservation, for \$2,500. A matching and planing machine and shingle machine for about \$600.

A cheap and complete flouring mill on a small scale, I am informed, can be procured from Straub Machinery Company, Cincinnati, Ohio. It consists of one run on wheat and one on corn, and as considerable corn is now raised on the reserve, with a slight added cost, this product might be further encouraged. The price complete, with full specifications, would be, on board, in the city of Cincinnati (\$1,075) ten hundred and seventy-five dollars; weight about 5,000 pounds.

When the saw-mill would be set up the cost of getting out lumber and shingles would be comparatively small for the erection of buildings. The grist-mill would be the only building which would require immediate outlay, and would cost for a two story building, 30 by 40, about \$1,000. The necessary tools to start a blacksmith and carpenter shop would cost in the neighborhood of \$200.

The erection of suitable buildings for shops and accommodation of employes could be done from lumber furnished by the new saw-mill and agency labor. Sash, doors, glass, nails, locks, etc., might be quoted at about \$200. Two teams, with harness and wagons, would also be needed, at a cost of about \$1,000. One carpenter, at \$800 per annum. One blacksmith, at \$800 per annum. One farmer, at \$800 per annum. One miller, who could run saw as well as grist mill, also shingle machine and matcher and plainer, and act as engineer, \$1,000 per annum.

About a thousand dollars would be required for freighting expenses from railroad station, labor of various descriptions, and contingent expenses.

In connection with foregoing I would respectfully report that, in company with Indians of good judgment, and with approbation of chief of the Pen'd Oreilles, who resides in the neighborhood, I selected a place on Crow Creek, which is a bold mountain stream of never-failing water. The land is unoccupied by any person. Excellent timber of white pine, tamerac, and fir grows in the surrounding country and extends far back into the mountains in almost inexhaustible quantities, while good farming, grazing, and hay land is also accessible.

I am very respectfully, your obedient servant,

PETER RONAN,
United States Indian Agent.

Hon. COMMISSIONER INDIAN AFFAIRS, Washington, D. C.

APPENDIX O.

Recapitulation of the estimates of Indian service as furnished by the Indian Office. (See pages 139-157.)

Appropriations for the fiscal year ending June 30, 1892.		Amounts embraced in estimates for 1893 not appropriated for 1892—Cont'd.

APPENDIX P.

In relation to the estimates for "Building, Bureau of Engraving and Printing." (See page 165.)

TREASURY DEPARTMENT, BUREAU OF ENGRAVING AND PRINTING.

SIR: I have the honor to submit herewith an estimate of an appropriation of \$30,000 for an out-building on the premises of this bureau.

The attention of the Department, and of Congress, has repeatedly been called to the urgent necessity for the erection of a suitable out-building for this bureau. The building is needed to provide proper accommodations for a carpenter shop, a stable, wagon house, the grinding of dry colors, the mixing and grinding of ink, and the storage of coal and other supplies and materials. All of these purposes are provided for at present either in the main building or in temporary frame structures, that are a menace not only to the bureau building proper, but to the entire neighborhood, on account of their combustible character. The mixing and grinding of the ink are now done in the main building, and the powdered color is carried by the belting, and otherwise, to different parts of the building, fouling the air, and discoloring the walls and ceilings. The lack of space compels the mixing of the dry colors in a dark room in the cellar, without sunlight and proper ventilation. The removal of these processes to the room provided for them in the plan prepared by the Supervising Architect for an out-building would remove these difficulties, and would also enable the bureau to buy the dry colors in lump, and grind them in its own mills, which it is very desirable that it should be able to do, in order to insure that the ink is of the proper quality, but which can not be done with the present facilities.

I can not too strongly urge the appropriation submitted, for the reason that it is absolutely essential for the proper transaction of the public business.

Respectfully yours,

WM. M. MEREDITH,
Chief of Bureau.

Hon. CHARLES FOSTER,
Secretary of the Treasury.

APPENDIX Q.

Statement (prepared in accordance with Statutes at Large, vol. 24, page 512) of persons employed on contingent force at public buildings in course of construction, etc., showing names, occupation, time of service, rates of compensation, and total amount of compensation during the fiscal year ended June 30, 1891.

TREASURY DEPARTMENT, OFFICE OF THE SUPERVISING ARCHITECT,
Washington, D. C., October 16, 1891.

SIR: In accordance with the requirements of act of Congress, approved March 3, 1887 (ch. 362, p. 512, vol. 24, U. S. Statutes at Large), I have the honor to inclose herewith a statement of the persons employed outside of the District of

Columbia as superintendents, clerks, watchmen, and otherwise, and paid from appropriations for the construction of public buildings, showing where said persons are employed, in what capacity, the length of time, and at what rate of compensation, during the fiscal year ended June 30, 1891, for transmission to Congress with the Estimates of Appropriations.

I have the honor to be, respectfully yours,

W. J. EDBROOKE,
Supervising Architect.

Hon. CHARLES FOSTER,
Secretary of the Treasury, Washington, D. C.

APPENDIX R.

Statement of expenditures from the appropriation for "Repairs and preservation of public buildings," for fiscal year 1891. (See 26 Stat., page 374.)

TREASURY DEPARTMENT, OFFICE OF THE SUPERVISING ARCHITECT,
Washington, D. C., October 22, 1891.

SIR: In accordance with the requirements of act of Congress approved August 30, 1890, page 274, volume 26, United States Statutes at Large, I have the honor to inclose herewith a statement of the expenditures made from the appropriation for "Repairs and preservation of public buildings," which shows the amounts expended on each public building, and the number of persons employed and paid salaries from said appropriation, during the fiscal year ending June 30, 1891, for transmission to Congress with the "Estimates of Appropriations for 1893."

Respectfully yours,

W. J. EDBROOKE,
Supervising Architect.

HON. CHARLES FOSTER,
Secretary of the Treasury, Washington, D. C.

APPENDIX S.

In relation to the estimate for Columbia Institution for the Deaf and Dumb. (See pages 182 and 258.)

THE COLUMBIA INSTITUTION FOR THE DEAF AND DUMB,
Kendall Green, Washington, D. C., September 24, 1891.

SIR: I have the honor to submit herewith estimates of expenses in this institution for the fiscal year ending June 30, 1893. Also, as required by law, a list of the regular employes of the institution during the past year, and the compensation paid to each.

The estimate for current expenses is the same in amount as the appropriation for the present year.

In the Sundry Civil Act of March 2, 1889, it was enacted "That one-half of all expenses attending the instruction of deaf and dumb persons admitted to said institution from the District of Columbia, under section 4864 of the Revised Statutes, shall be paid from the revenues of the District of Columbia, and one-half out of the Treasury of the United States, and hereafter estimates of such expenses shall each year be submitted in the regular estimates for the expenses of the Government of the District of Columbia." For two years separate estimates for the expenses of beneficiaries of the District of Columbia have been submitted, and the sum of \$10,500 has been appropriated each year for such expenses. But to show exactly what part of the fuel, gas, provisions, wages, salaries, etc., paid for in carrying on the institution has been for the benefit of pupils from the District is extremely difficult, not to say impossible. And still more difficult is it to furnish separate vouchers for these articles and services. In point of fact, it has been found impracticable to account, separately, at the Treasury for these expenditures, which, in the aggregate, are accounted for without difficulty.

It is therefore respectfully suggested that hereafter the whole amount for current expenses be appropriated in the Sundry Civil Bill, and that a proviso be added requiring the president of the institution to report to the accounting officers of the Treasury Department at the end of each fiscal year the cost of educating the beneficiaries of the District, as nearly as this can be ascertained. The proper proportion can then be charged to the District treasury.

The second estimate is to provide for repairs and improvements, the need for which has been growing more and more urgent for several years, some of these having now become matters of pressing necessity.

No special appropriation for repairs has been made for a number of years, and it has been necessary to leave many things in a condition far from creditable. Among these is the fence surrounding the grounds on the west, north, and east. What there is left of this fence has been standing for more than twenty years, and those portions still erect are rotten and ready to fall.

The entire length of the fence is 589.19 rods, and at \$4 per rod, which is a moderate estimate of cost, the expense of renewal would be \$2,356.76. The balance of \$643.24 is greatly needed for the grading of certain roads already laid out, and the completion of suitable pavements near the buildings.

The second item in the estimate for repairs and improvements will certainly be not more than enough to provide for exterior and interior painting, pointing up of stone and brick work, repairs of heating apparatus, plumbing, and sewerage. In many portions of our buildings there is prospect of actual damage and loss if the repairs indicated are not speedily made.

Hoping that these requests may not seem unreasonable to you and to Congress, I have the honor to be,

Very respectfully, your obedient servant,

E. M. GALLAUDET,
President.

Hon. JOHN W. NOBLE,
Secretary of the Interior.

Statement of the number of persons employed in the Columbia Institution for the Deaf and Dumb during the year ended June 30, 1891, and the compensation paid to each.

	Per annum.		Per annum.
One president and professor.....	\$4,000	One usher.....	\$225

One farmer and chief gardener.....	900		
One engineer and fireman.....	600	Total.....	30,767

APPENDIX T.

In relation to the estimates for Freedmen's Hospital, Washington, D. C. (See pages 182 and 258.)

FREEDMEN'S HOSPITAL, Washington, D. C., August 22, 1891.

SIR: I have the honor to transmit herewith the estimates of appropriations required for this hospital for the fiscal year ending June 30, 1893.

In the estimate for salaries there has been recommended an increase of \$3,064. This is necessary for the employment of three additional nurses to attend the patients having contagious diseases in the new building under course of erection, and by the increase of five dollars per month in the salaries of eleven female nurses, who receive at present only ten dollars per month—less than is paid to ordinary house servants. Fifteen dollars per month is small pay for the kind of nursing required in this hospital. Most of the nurses have had long experience. Their duties are laborious and often of such a character that money can not compensate them. The same is true of the male nurses; a slight increase has been made in their salaries also. My annual report shows that 2,605 patients were attended during the last year. To show the condition of the patients when admitted I will mention that 270 died, 208 were confined, 301 surgical operations were performed. There were 38 fractures and 179 cases of syphilis. I merely mention these five cases that some idea may be had of the duties devolving on the surgeons and the nurses.

The salary of the surgeon-in-chief is raised to \$3,600. This is not an excessive pay by any means in view of the responsibility, experience, and skill required by the physician.

The present coal-house is merely an old rookery, dilapidated and dangerous, built of pine culls. I have asked for eight hundred (\$800) dollars to erect a new one of brick.

The importance of building new wards of brick was set forth by the committee appointed by you a year ago. I think that twenty-five thousand (\$25,000) dollars will erect one good, plain but substantial brick building that will accommodate about seventy-five (75) patients.

Very respectfully,

C. B. PURVIS, M. D.,
Surgeon-in-Chief.

Hon. JOHN W. NOBLE, *Secretary of the Interior, Washington.*

APPENDIX U.

In relation to the estimate for Utah Penitentiary. (See page 182.)

SALT LAKE CITY, UTAH, December 20, 1890.

DEAR SIR: On the subject of furnishing labor for the convicts at the Utah penitentiary, I would respectfully suggest that if an appropriation were made by Congress, say for \$2,500, to buy such material as roofing, doors, windows, and flooring, I can with prison labor erect such shops as would be adequate to furnish employment to all convicts, and making the matter of employment possible for those in confinement. At this time the only occupation is such as is furnished by outside employment on the farm. Of course, indolence is the most demoralizing evil that can be incurred. With the materials furnished as suggested above, the balance can all be secured from the old warden's residence and wall, which we shall have to remove as soon as the building and wall, under contract, are completed, and the work can all be done by prison labor. I desire that this may receive your attention.

Very respectfully,

E. H. PARSONS,
U. S. Marshal.

Hon. ATTORNEY-GENERAL, Washington, D. C.

[Telegram.]

SALT LAKE, UTAH, July 21, 1891.

ATTORNEY-GENERAL, Washington, D. C.:

Eight hundred for steam connections, radiators for wardens and guard quarters; two hundred for pump connections and piping.

E. H. PARSONS, Marshal.

APPENDIX V.

Explanation of estimates for Washington Aqueduct, District of Columbia, for the year ending June 30, 1893. (Estimates on page 195.)

In submitting these estimates, one of which is larger than heretofore appropriated, and the remainder for new work, the following explanation is presented by the officer in charge:

Now that the city is everywhere abundantly supplied with water except at a few points where its proper distribution is interfered with by the small size, and the reduction in capacity by internal corrosion, of the city's street mains and the service-pipes leading from them to residences, one of the most important works to be done in connection with the aqueduct is to furnish the city with better water, or, since the water of the Potomac as brought from Great Falls is, I am convinced, perfectly wholesome at all times, it would be more correct to say, with clearer water.

The muddiness of the water supplied to the city arises from the earthy matter carried down to the upper Potomac and its tributaries in storms, and most abundantly in winter and early spring by reason of the alternate freezing and thawing of the ground.

The following table gives the number of days in the four years ending June 30, 1889, on which the water had different degrees of turbidity at Great Falls:

Fiscal year--	Clear.	Slightly turbid.	Turbid.	Very turbid.
1885-'86.....	127	36	51	151
1886-'87.....	164	29	51	121
1887-'88.....	194	15	26	131
1888-'89.....	147	33	50	135
Average for four years.....	158	28	44	134

The following table gives the number of days in the four years ending June 30, 1889, on which the water had different degrees of turbidity at the effluent gate-house at the distributing reservoir, after passing through the reservoir to the mains leading to the city:

Fiscal year--	Clear.	Slightly turbid.	Turbid.	Very turbid.
1885-'86.....	147	35	72	111
1886-'87.....	256	39	32	38
1887-'88.....	240	16	52	58
1888-'89.....	193	24	64	84
Average for four years.....	209	28	55	73

It will be observed that the total time that the water was "turbid" and "very turbid" at the distributing reservoir was only about two-thirds of the total time that it was "turbid" and "very turbid" at Great Falls, and this great improvement in the water supplied to the city, as compared with its condition when it entered the conduit, was due to the time, short as it was, given for depositing its earthy (clayey) matter in the distributing reservoir.

Filtering the water consumed by the cities of Washington and Georgetown would be enormously expensive (it has been estimated that the first cost of filtration works would be from \$600,000 to \$800,000, and the annual cost from \$18,000 to \$43,000, according to the plan adopted). We have now no "head" to spare for it, and we can get no "head" for it without pumping.

Except by pumping, there can be no filtration without loss of "head" that we now have, and for every foot of "head" lost in our case there would be a section of Capitol Hill and a section of the northern portion of the city that would be deprived of the water that is now supplied to them.

Even if it should be decided at some time in the future that resort must be had to filters, it will be necessary, in order to save a great part of their cost of maintenance, to "settle" the water as much as possible before it enters the filters.

Turbidity does not necessarily make waters unwholesome. The clearest waters are sometimes the most dangerous, because they are deceptive, and filtration can, at most, only make waters clear.

During the times of its turbidity, the Potomac water has caused resort to the clear, but deceptive, well waters of the city for drinking purposes, and they, doubtless, have caused disease, which has been attributed to Potomac water, and some years ago, when the Potomac water was allowed to flow through the receiving reservoir, and mingle with the water of this reservoir, it had a disagreeable fishy and oily taste and smell, and there was much complaint, but the Potomac water itself, brought either directly from Great Falls, or through the distributing reservoir, has never, even in its worst condition, been proved to be unhealthful. On the contrary, it has been generally believed to be one of the best in the country.

Filtration, except by pumping the entire quantity of water consumed and wasted in Washington and Georgetown, then, being out of the question, a comparison of the foregoing tables clearly points out the most important step to be taken for improving the condition of the Potomac water.

It is to provide an additional settling basin, so that when the river is turbid, the water can have a longer time for depositing its sedimentary matter before passing into the mains.

This can be done by improving the receiving reservoir.

The receiving reservoir, about two miles, following the Conduit road, above the distributing reservoir, has about the same area as the latter, and contains about the same available amount of water. Its perimeter has a length of about two miles. The conduit from Great Falls to the distributing reservoir passes close to a portion of the margin of the receiving reservoir, and there is an inlet from the conduit to the latter reservoir at its upper end, and an outlet from the reservoir to the conduit at its lower end. They are so arranged that the water, in its route from Great Falls to the distributing reservoir, can be made to pass either directly through the conduit and around the receiving reservoir to the distributing reservoir, or through the receiving reservoir, as may be desired.

It was contemplated in the original design for the aqueduct that the water from Great Falls should always pass through the receiving reservoir, and the latter was intended to serve mainly as a settling basin, but its use as such, and all use, was, for reasons to be stated, suspended some years ago.

Unlike the distributing reservoir, which has no water-shed, the receiving reservoir has an extended water-shed of about 4,000 acres. It is mainly to the northward of the reservoir, its northern border crossing the Tenallytown and Rockville road, about two and a half miles above Tenallytown. Its eastern border follows pretty closely the Loughborough, the Tenallytown, and Rockville roads, and its general width from east to west is about two miles. The greater part of the area of the water-shed is very hilly, and nearly the whole of it is devoted to cultivation and grazing.

The population upon it is quite large, and it is rapidly increasing. The water falling upon this area is carried to the reservoir by several streams, one of which, Little Falls Branch, is of considerable size, and they carry, in storms and heavy showers, great quantities of detritus, which is rapidly shoaling the reservoir. With the receiving reservoir in its present condition there is no means of excluding the drainage water from the surrounding lands, and, if the Potomac water from Great Falls be permitted to flow through the reservoir, of preventing the mingling of these two waters; and so many complaints were made some years ago, in the public press and by the water-takers, that the passage of Potomac water through the reservoir was stopped and the reservoir was cut out from the system of supply to the city.

These complaints were doubtless well founded.

Every storm and heavy shower brings down to the reservoir through the streams that lead into it, and directly from the hill-sides, not only a great quantity of muddy water, which roils the reservoir, but probably some of the fertilizers and other deleterious substances from the cultivated and grazing lands of its water-shed. In fact, this reservoir has the usual defects of reservoirs surrounded by and supplied from cultivated and inhabited districts. A considerable portion of the margin of the reservoir is shoal with soft muddy bottom. The waves stir up the mud and add to the muddy water brought down by the streams, and in other portions of the shoal water near the shore there is a luxuriant growth of water plants of various kinds, and the water there being quiet and protected from the waves, there is promoted in these places growths of algae, and other minute vegetable substances that have given so much trouble in the reservoirs of other cities, as well as in the receiving reservoir, to which is attributed the offensive, oily, and fishy smell and taste of their waters at some seasons of the year, especially in hot weather.

This was the particular cause of complaint in Washington when this reservoir was thrown out of service.

The receiving reservoir is admirably suited for settling purposes, if all water be excluded from it except the water from the Potomac, and the margins be deepened and protected.

These can readily be done if Congress will grant the necessary appropriations.

Captain Symons, of the Engineers, some years ago conceived an excellent, and I believe the only practicable, project for the former, and it, and the drawings illustrating it, may be found in the Report of the Chief of Engineers for 1885, pages 2464-2468.

His project, which I have carefully examined and tested, is to take the waters of East Creek (the stream farthest to the eastward, that pollutes the reservoir), and conduct it in an open and paved channel to Mill Creek, together with all the water falling directly into the reservoir from the hills between these two streams; then to take the combined waters of both streams and the water which falls directly into the reservoir from the hillsides between Mill Creek and Little Falls Branch, by a proportionally larger channel and short tunnel, to Little Falls Branch. The combined waters of all the streams are then to be taken by a still larger channel, and another short tunnel, to a natural water course below the reservoir.

To catch and throw all the water of the streams into these channels and connecting tunnels, small dams are to be erected across the mouths of the streams below the points where the artificial channels enter and leave their basins, which points are in all cases as close to the reservoir as possible.

The work is planned to give the shortest tunnel lines possible, and both the channels and the tunnels were computed to carry off the greatest known rainfall.

The plan would make this splendid reservoir, which has capacity for about 175,000,000 gallons of water, which cost many thousands of dollars and is now useless, fully as valuable for settling purposes, and as completely shut off from all polluting influences as the distributing reservoir. By it the receiving reservoir would become an additional distributing reservoir and the time allowed for settling would be considerably more than double the time now allowed. It would give the water from Great Falls, after reaching the "North Connection" of the receiving reservoir, a variety of routes for reaching the mains leading to the city, and either could be adopted as the varying conditions of the water might require, as follows: It could be made to pass through the receiving reservoir, thence through the conduit to the distributing reservoir, and through this reservoir, or it could be made to pass around the receiving reservoir and thence to and through the distributing reservoir, using either reservoir alternately as a settling basin, or, when the water at Great Falls is quite clear, as it is (see the foregoing table) about one-half of the time, it could be made to pass from Great Falls directly into the mains, without passing through either reservoir.

The estimate of the cost of excluding the water of the surrounding country from the receiving reservoir, including the purchase of the small amount of land required, and the cost of completing the fencing of the reservoir lands, was \$130,000. From this I would deduct \$15,346, the then estimated cost of deepening and protecting the margins of the reservoir, as far as was possible at the time (the water could not then be drawn from the reservoir without great and prolonged inconvenience to the people of Washington), and add \$14,000 for a probable increase in the value of the land to be acquired, and 5 cents per cubic yard to the then estimated cost of earth excavation, or \$1,130, making in round numbers \$129,800.

To obviate the defects of the reservoir caused by shoal water, I would deepen the water everywhere at its margins to 12 feet, and protect the sides by slope walls of dry rubble-stone 12 inches thick, laid upon a lining of broken stone 6 inches thick, precisely as the sides of the distributing reservoir are now protected, at the following estimated cost:

148,300 cubic yards of excavation, at 35 cents.....	\$51,905 00
16,400 cubic yards of dry stone masonry, at \$4.50.....	73,800 00
8,200 cubic yards of broken stone lining, at \$2.50.....	20,500 00
	146,205 00
Add 10 per cent. for contingencies.....	14,620 50
	160,825 50

Adding to the latter amount \$129,800, the estimated cost of cutting off all access of the water from the water-shed of this reservoir and the purchase of land required, and we have for the thorough improvement and completion of the receiving reservoir \$290,625.

The improvement of the receiving reservoir as just indicated is necessary not only for the purpose of reducing the turbidity of the water supplied to the city, but for restoring the storage capacity of our aqueduct system.

With the double object, then, of improving the quality of our Potomac water and of restoring our reservoir capacity for storage, I can not too earnestly urge that the estimate for an appropriation for the improvement of the receiving reservoir, which will be found included in my estimates for the next fiscal year, be granted by Congress.

LOWERING THE HEIGHT OF THE CROSS DAM IN THE DISTRIBUTING RESERVOIR.

The lower reservoir, the distributing reservoir, is divided about half-way between the influent and the effluent gate-houses by a cross dam, in the middle of the length of which is a narrow cut lined with masonry, through which all the water on its way to the effluent gate-houses, where it enters the mains, must pass.

The draft through this cut is so strong that the major part of the water is drawn straight from the influent gate-house, which is in a corner of the upper division, the settling division, to the cut, so that when the water coming down the conduit is turbid, it does not diffuse itself through the whole body of water in this division (110,000,000 gallons) as it should, in order that the greatest amount of settling be done.

Neither is the water after it passes through the cut properly distributed through the lower division, which contains about 60,000,000 gallons, for the reason that the draft from the cut to the head of the mains leading to the city, from the lower end of the division, is so strong that the water all passes in a comparatively narrow stream straight to these mains, so that it also gets very little chance to settle in this division.

Now, as the upper layer of any body of water not quite free of turbidity, and in process of settling, is the clearest, if the top of the dam be lowered far enough to allow only a thin sheet (at the present rate of consumption it would be less than an inch deep) of water to pass over the dam, as was General Meigs's design, we should have in each division a very effective additional means of clarifying the aqueduct water, and I believe that this improvement in the distributing reservoir being made, and the receiving reservoir being improved as recommended, there would be but rarely, if any, complaint of muddy water.

I estimate the cost of this improvement at the distributing reservoir, by lowering the cross dam, at \$12,500.

PROTECTION OF THE INLET TO THE CONDUIT AT GREAT FALLS.

The bank of the Chesapeake and Ohio Canal, which runs parallel to the Potomac at Great Falls and about 150 feet from it, is about 16½ feet higher than the uncovered chamber, just above the Maryland end of the aqueduct dam, that forms the inlet from the river to the conduit.

In the flood of November, 1877, which rose at Great Falls to the height of 160 feet above the datum of the aqueduct, or 12 feet higher than the crest of the dam, the canal bank at a point opposite the inlet was washed down to the river and a part of it into the inlet. I quote from the annual report of the aqueduct for 1878:

"The masonry forming the arch of the feeder was uncovered from a point near the middle of the canal to the mouth of the feeder, a distance of 150 feet. The chamber at the head of the aqueduct was filled with stones that had formed the slope-wall of the canal, and the aqueduct feeder for a distance of 300 feet was filled with debris to depths varying from 3 to 6 feet, so as to entirely stop the flow of water during the ordinary low stages of the river."

In the still higher flood of June, 1889, which rose to the height of 16 feet over the aqueduct dam, the canal bank was again washed down to the river, but fortunately the damage did not occur immediately opposite the inlet to the conduit, but

from 200 feet to 400 feet higher up, so that the major part of the debris being left on the margin of the river and a part of it being carried over the dam, not so much filling-of the inlet to the conduit was done, but, as in the flood of 1877, it was partially obstructed. The annual report of the aqueduct for 1889 says:

"The banks of the Chesapeake and Ohio Canal above and below the mouth of the conduit were carried away, and that opposite the conduit was threatened; a number of men were kept at work on this bank during the freshet, and it is believed that had it not been for the energetic work of this force and the widening and strengthening of the bank at this locality in April, great damages would have occurred at the mouth of the conduit."

It will be observed that in the freshet of 1877 not only the inlet chamber, but the conduit itself, was filled to a depth of from 3 to 6 feet for a distance of 300 feet in from its mouth, but the water in the river being at a high stage, there was still waterway enough in the conduit above the debris to enable the supply to the city to be kept up. Had a complete closure of the mouth of the conduit occurred, with 12 to 16 feet of water over it, there would have been no possible way, with the torrent raging over the mouth, to remove the obstruction before the river subsided, and the water supply to the city would have been cut off.

There is no more important part of our system of water supply to be carefully guarded than the head of the conduit at Great Falls, and in order to avert dangers like those of 1877 and 1889, to which the water supply is liable in every freshet, a masonry wall should be built between the river and the canal bank, rising a few feet higher than the latter, and extending up river from the mouth of the conduit as far as the limit of the Government land, and thence at about a right angle and still on the Government land to the shore of the river. I estimate the cost of this wall at \$5,000.

EXTENSION OF OUTLET OF WASTE WEIR NO. 3.

In order to provide means for emptying the conduit in case of a break in it, or for any purpose of repair, and to regulate the quantity of water passing down the conduit, three waste weirs, or openings, from the conduit are provided in its 11½ miles of length. One of the most important of them is waste weir No. 3, which is between the receiving reservoir and the distributing reservoir and about one-half mile above the latter. One of its most important functions is to enable us to control the height of water in the distributing reservoir, so that on the one hand it shall not fall below the height required to give the best possible supply to the city, and on the other, it shall not rise so high as to endanger the dams of the reservoir. This is ordinarily done by telephonic orders to the watchman gate-keeper at Great Falls, who is in charge of the gates at the head of the conduit, but in case of a break in the telephone line, and communication with him, except by mail, being cut off, reliance must be had on the waste weirs, and especially on No. 3, which is in charge of the watchman gate-keeper at the distributing reservoir. The overflow from this waste weir is, for the distance of about 270 feet, in a deep gully through private property to a natural water-course, and thence under the Chesapeake and Ohio Canal to the Potomac. Property in this vicinity is getting to be valuable, streets are being laid out through it, and the outflow from the waste weir is liable to be obstructed by the filling of the gully by the owners of the land. The difficulty can be obviated by laying a 36-inch cast-iron pipe in the gully from the waste weir to the natural water-course, at an estimated expense of \$2,500.

STORAGE YARDS.

I have provided supplies for use in case of breaks in the 48-inch and other mains, comprising sections of pipe, curves, crosses, reducers, sleeves, etc., a heavy wagon for hauling them where needed, lifting-jacks and efficient pumps; also machinery for lowering the pipes in the trenches and the implements and material required for handling and calking.

A portion of these supplies have been placed in a yard which I have arranged on the public land at the distributing reservoir, for use in the country portions of the routes of the mains, and the remainder, for use in the city portions of these routes, have been placed in a portion of Twenty-seventh street near M-street bridge, which has been loaned for the purpose by the District Government until the street is wanted for improvement.

As we shall not be able, probably, to retain this place, except for a short time, a permanent yard in the city should be purchased for use as a storage yard. It should be near this office and at or near the grade of the street, so that the heavy castings and machinery required for repairs can be quickly gotten out.

I believe that a suitable lot can be obtained by purchase, or, if need be, by condemnation, for \$10,000, and I recommend an appropriation of this amount for the purpose.

CLEANING THE BOTTOM OF THE DISTRIBUTING RESERVOIR.

The sedimentary deposits of about twenty years, within which time the distributing reservoir has not been cleaned out, have raised the bottom of its upper division, the settling division, about 9 inches, and of the lower division about 4 inches.

These deposits have diminished the capacity of the reservoir about 8,000,000 gallons, and, although it is probable that these deposits, which are mostly clay, are not deleterious to the water, they should be removed as soon as an appropriation can be obtained for the purpose. It would require the removal of about 39,500 cubic yards, the estimated cost of which at 35 cents per cubic yard is \$13,825.

DESIRED PROVISION IN RESPECT OF APPROPRIATIONS FOR THE AQUEDUCT.

Appropriations for the aqueduct are now fiscal year appropriations and their availability terminates on the 30th of June of each year. Whenever appropriations are delayed there is liable to be a time in the early part of every other fiscal year during which, should a break occur in a main either in the city or in the country this side of the distributing reservoir, or in the conduit, or should any disaster occur at the reservoir or at Great Falls, there is no money available for repairs.

An example of the urgent need of a change in this respect is the recent repair of the dam which retains the water for supplying the conduit at Great Falls. It was a most important work and one that could be done only at the lowest stages of the river. Every rain stopped it and caused a loss of time and money. For a few weeks preceding the close of the fiscal year there had been an exceptionally favorable time for the work, and it was pushed forward with all the rapidity possible, up to the evening of the 30th of June, when, by reason of the limit of the appropriation as to time, it was necessary to discharge the workmen and wait for a new appropriation, which, even if it should be made early in July, would not be available at the Treasury until some weeks later.

If the appropriations for the aqueduct should be made available until expended, some of the least urgent repairs towards the end of the year could be postponed until the next appropriation should become available, so that there would always be

money in hand for repairing a break in a main, or for any other work, like the one mentioned at Great Falls, that can not be postponed without loss.

A leak in one of the city's old and decayed street mains, or in one of the hundreds of small service pipes that cross the route of the 48-inch main, for instance, by undermining it, may cause it to break, and the quantity of water that would be discharged on the street, especially in the low levels of the route, would be so enormous that property, and even life itself, might be endangered.

And in case of appropriations for specific works like those I have recommended, it is sometimes not advantageous either in respect of economy or the quality of the work, to oblige the work to be fully completed at the end of the fiscal year.

Sometimes, by reason of the late date at which appropriations become available, or of the weather, or of the condition of the river, the work can not be fully completed within this time without hurrying it so much as to be detrimental to the interest of the Government. I do not know of any appropriations that more require to be made available until expended, like appropriations for river and harbor improvements, than appropriations for the Washington Aqueduct. I urgently recommend, therefore, that it be done, and, also, that the same facilities that were provided in the act of March 2, 1889, making an appropriation for the construction of the 48-inch main, be provided for every part of the work pertaining to the aqueduct, and beg to suggest that the following clause be attached to the next appropriations for the aqueduct, and be made to operate on all future appropriations for it:

"Provided, That all appropriations for the Washington Aqueduct shall be available until expended; and if it shall appear to the Secretary of War, on the report of the Chief of Engineers, that for any cause any work pertaining to said aqueduct can not be carried on or material therefor can not be obtained as rapidly as is necessary for the best and most vigorous prosecution of it, he is authorized to provide material by purchase in open market, or by contract, for the fabrication thereof, and to carry on the work by days' labor or otherwise, as may seem to him expedient."

An increase of \$1,000 over the appropriation of former years for maintenance and repairs is made necessary by the increased amount that will be required by the addition of the 48-inch and the other new mains to the former system of supply.

APPENDIX W.

In explanation of the estimates for "Revenue-Cutter Service." (See pages 222, 223.)

TREASURY DEPARTMENT, OFFICE OF THE SECRETARY,
Washington, D. C., September 2, 1891.

SIR: I have the honor to transmit herewith an estimate of an appropriation required for the Revenue-Cutter Service during the fiscal year ending June 30, 1893, in detail, showing, separately, the amount required for pay of officers, rations for officers, pay of crews, rations for crews, clothing for crews, fuel, repairs, and outfits, ship chandlery, and engineers' stores, and for traveling and contingent expenses, as required by chapter 410 of the public acts of the Fiftieth Congress of the United States, passed at the second session (25 Stat., 907), and also, in accordance with the same act, herein include a statement showing the authorized number of officers in the Revenue-Cutter Service, their rank, and pay, as follows:

36 Captains, at \$2,500 per annum.....	\$90,000
36 First lieutenants, at \$1,800 per annum.....	64,800
36 Second lieutenants, at \$1,500 per annum.....	54,000
36 Third lieutenants, at \$1,200 per annum.....	43,200
26 Chief engineers, at \$1,800 per annum.....	46,800
26 First assistant engineers, at \$1,500 per annum.....	39,000
26 Second assistant engineers at \$1,200 per annum.....	31,200
222 Officers—annual pay.....	369,000

I also report the number of men constituting the crews of the vessels in the Revenue-Cutter Service:

On vessels on the Atlantic, Pacific, and Gulf of Mexico:

	Annual wages.		Annual wages.
9 Petty officers, at \$50 per month.....	\$5,400	1 Steward, at \$40 per month.....	\$480
1 Petty officer, at \$45 per month.....	540	60 Cooks and stewards, at \$35 per month.....	25,200
4 Petty officers at \$40 per month.....	1,920	On vessels on the Great Lakes, calculated as in commission	
45 Petty officers, at \$35 per month.....	18,900	eight months in the year:	
48 Petty officers, at \$30 per month.....	17,280	8 Petty officers, at \$35 per month.....	2,240
2 Seamen, at \$65 per month.....	1,560	12 Petty officers, at \$30 per month.....	2,880
16 Seamen, at \$45 per month.....	8,640	4 Seamen, at \$45 per month.....	1,440
5 Seamen, at \$40 per month.....	2,400	7 Seamen, at \$29 per month.....	1,624
2 Seamen, at \$35 per month.....	840	37 Seamen, at \$28 per month.....	8,288
8 Seamen, at \$32 per month.....	3,072	7 Boys, at \$15 per month.....	840
52 Seamen, at \$30 per month.....	16,560	8 Boys, at \$12 per month.....	768
6 Seamen, at \$28 per month.....	2,016	2 Firemen, at \$50 per month.....	800
32 Seamen, at \$26 per month.....	9,984	16 Firemen, at \$35 per month.....	4,480
151 Seamen, at \$25 per month.....	45,300	8 Coal-passers, at \$28 per month.....	1,792
6 Seamen, at \$20 per month.....	1,440	14 Cooks and stewards, at \$35 per month.....	3,920
8 Boys, at \$17 per month.....	1,632	815 Men—total annual pay.....	270,860
40 Boys, at \$15 per month.....	7,200	Pilots employed on vessels of the Revenue-Cutter Service:	
36 Boys, at \$12 per month.....	5,184	8 Pilots, at \$109.12½ per month.....	10,476
2 Firemen, at \$75 per month.....	1,800	8 Pilots, at \$100 per month.....	9,600
8 Firemen, at \$50 per month.....	4,800	3 Pilots, at \$100 per month, for eight months.....	2,400
23 Firemen, at \$45 per month.....	12,420	6 Pilots, at \$84.12½ per month.....	6,057
6 Firemen, at \$35 per month.....	2,520	1 Pilot, at \$80 per month.....	960
65 Firemen, at \$30 per month.....	23,400	2 Pilots, at \$69.12½ per month.....	1,659
2 Coal-passers, at \$40 per month.....	960	28 Pilots—total annual pay.....	31,152
9 Coal-passers, at \$30 per month.....	3,240		
33 Coal-passers, at \$25 per month.....	9,900		
12 Cooks and stewards, at \$50 per month.....	7,200		

The estimate herewith inclosed contains the amounts required for pay of officers, etc., resulting from a calculation based upon the total number authorized at full rates. In the ordinary course of business somewhat less would be required to defray these expenses, as vacancies and difference in pay when officers are on leave or waiting orders would make a considerable reduction, but this amount is so variable that it can not be accurately calculated, and, therefore, the full amounts stated should be appropriated, if separate appropriations are to be made for each particular object of expenditure for the support of this service. The same is true as to the other items which have been separately estimated for, when only a reasonable margin for contingencies has been added to the average amount expended in former years.

If but one appropriation is made for the Revenue-Cutter Service, as in former years, it need not be so large as the aggregate of a number of separate ones would be. The usual course of business is such that almost invariably when one class of expenditures is increased, another is diminished. When much is done in the way of repairing vessels, and large drafts are made on the general appropriation for this purpose, the pay of crews, consumption of fuel, rations, etc., is diminished by the enforced inaction of the vessels, and when comparatively little is required for repairs, the ability of the vessels to perform constant duty will require increased sums for fuel, pay of crews, and general supplies. These changes can not be calculated in advance, but the entire amount required can be quite fairly estimated by comparison with the actual expenditures of previous years. It is, therefore, respectfully suggested that the appropriation be made as formerly, to wit:

“Expenses of Revenue-Cutter Service, 1893.—For expenses of the Revenue-Cutter Service: For pay of captains, lieutenants, engineers, and pilots employed, and for rations for the same; for the pay of petty officers, seamen, cooks, stewards, boys, coal-passers, and firemen, and for rations for the same; for clothing to be resold to the enlisted men; for fuel for vessels, and repairs and outfits for the same; ship chandlery and engineers' stores for the same; traveling expenses of officers traveling on duty under orders from the Treasury Department; commutation of quarters; for protection of the seal fisheries in Bering Sea and the other waters of Alaska, and the interests of the Government on the seal islands and the sea-otter hunting-grounds, and the enforcement of the provisions of law in Alaska; contingent expenses, including wharfage, towage, dockage, freight, advertising, surveys, labor, and miscellaneous expenses which can not be included under special heads.”

If this is done it is believed that \$950,000 would be sufficient for the fiscal year ending June 30, 1893, in lieu of the aggregate sum of \$1,043,014 as shown in the estimate as transmitted, in which the principal items are separately stated.

Such a separation would greatly increase the clerical labor of accurately keeping the multiplicity of accounts which would be thus created in the authorization and settlement of these expenditures. The increase of labor would occur not only in the office of the Secretary and the accounting divisions of the Treasury but at every custom-house where the collector is now a disbursing officer for this service. Collectors of customs are required to render monthly accounts of disbursements under seven different heads, “Revenue-Cutter Service” being one. If the amount required for the proper maintenance of this service be divided into nine separate appropriations, monthly accounts being required for each, it is not believed that the advantage gained would be at all commensurate to the augmented labor in various localities, and consequent increase in clerical force rendered necessary thereby.

Respectfully yours,

L. G. SHEPARD,
Chief Revenue-Marine Division.

Hon. SECRETARY OF THE TREASURY.

APPENDIX X.

In relation to the estimates for the “Bureau of Engraving and Printing.” (See page 223.)

TREASURY DEPARTMENT, BUREAU OF ENGRAVING AND PRINTING,
Washington, October 29, 1891.

SIR: I have the honor to submit herewith the estimates of the appropriations required for labor and expenses of engraving and printing for the fiscal year 1893. The work required to be done, according to the estimates submitted by the heads of the several bureaus, shows that there will be needed in the fiscal year 1893 49,310,655 sheets of securities, stamps, and miscellaneous work, requiring 64,944,865 printings. Of this amount the Treasurer of the United States estimates that 2,700,000 sheets of Treasury notes will be needed, requiring 5,535,000 printings, the cost of which will be paid from the appropriation for the purchase of silver and the issue of Treasury notes under act of July 14, 1890, leaving 46,610,655 sheets, requiring 59,409,865 printings, to be provided for by specific appropriations for this bureau. It is estimated that the cost of the aggregate amount of work which will be required will be as follows:

Compensation of employes.....	\$441, 248 38
Plate printing.....	498, 675 80
Materials and miscellaneous expenses.....	204, 624 19
Total.....	1, 144, 548 37

The estimated cost of the 2,700,000 sheets of Treasury notes which will be charged against the permanent appropriation for the work is \$108,548.37. The amounts that will have to be provided by specific appropriations for this bureau are therefore as follows:

Compensation of employes.....	\$400, 000 00
Plate printing.....	452, 000 00
Materials and miscellaneous expenses.....	184, 000 00
Total.....	1, 036, 000 00

The aggregate amount of work to be done in 1893, on the basis of the number of printings required, which gives the proper comparison, exceeds the amount proposed to be executed in 1892 a little more than one per cent., and the estimated aggregate cost in 1893 is nearly 9 per cent. less than the estimated cost for 1892. The large decrease in the estimated cost of the work in 1893 is due in a great measure to the change made in the current fiscal year of printing the strip

tobacco stamps by the relief, instead of by the intaglio, process. The proposed number of these stamps to be furnished in the fiscal year 1893 is 11,395,000 sheets. To print these by the intaglio process would require that specific appropriation be made as follows :

Compensation of employés	\$407,888 10
Plate printing	588,770 20
Materials and miscellaneous expenses	203,485 55
Total	1,200,143 85

This is \$164,143.85 greater than the estimates submitted.
Respectfully yours,

WM. M. MEREDITH,
Chief of Bureau.

Hon. CHARLES FOSTER,
Secretary of the Treasury.

APPENDIX Y.

In relation to the estimates for Coast and Geodetic Survey. (See pages 225-228.)

UNITED STATES COAST AND GEODETIC SURVEY,
Washington, D. C., October 1, 1891.

SIR: I forward herewith, in response to your circular of July 15, my estimates for the expenditures of the Coast and Geodetic Survey for the year ending June 30, 1893. These estimates differ very little from those submitted a year ago, or from the appropriations made in the sundry civil act of March 3, 1891.

The changes made are confined almost exclusively to estimates under the head of "party expenses," the items for which must, in the nature of things, change from year to year. The total under that head is apparently greater than that of last year, but in reality it is less. The apparent increase is due to the placing of the item for repairs of vessels under the head of "party expenses," where it more properly belongs. The amount hitherto appropriated for repairs of vessels has proved inadequate to maintain the fleet of the Survey in good condition, as the majority of the vessels are now quite old, and the cost of repairing grows larger each year. I have therefore increased the amount in the estimates herewith by \$3,000, but a saving to the same extent under other items leaves the total the same as for last year. The total sum under the heading "pay of office force" is the same as the amount appropriated by the last Congress, but is apparently greater, on account of the distribution, under the appropriate classes, of the new force for chart printing provided for in the act of March 3, 1891. The items under office expenses remain unchanged, except in paragraph three, in which an increase of \$1,500 is asked. This is absolutely demanded, on account of the addition of the new buildings and extension of the printing facilities.

I am glad to say that as a result of a close supervision over the expenditures for the fiscal year ending June 30, 1891, we shall have no deficiency to be covered by the next Congress.

The estimates herewith submitted have been prepared with great care. The sum asked for is somewhat less than that appropriated at any session of Congress during the past four or five years. Any further reduction would be incompatible with the interests of the public service, the amount called for being, in my judgment, both necessary and sufficient for the proper discharge of the duties devolving upon this bureau.

Respectfully yours,

T. C. MENDENHALL,
Superintendent.

Hon. SECRETARY OF THE TREASURY, *Washington, D. C.*

APPENDIX Z.

In relation to the estimates of the Fish Commission. (See pages 231, 232.)

U. S. COMMISSION OF FISH AND FISHERIES,
Washington, D. C., October 12, 1891.

SIR: I have the honor to forward herewith estimates of appropriations required for the service of the United States Commission of Fish and Fisheries during the fiscal year ending June 30, 1893.

In explanation of the increases in certain items over the amounts appropriated for the present fiscal year, I beg to submit the following:

1. Propagation of food fishes, increase \$5,000. The acts of March 2, 1889, August 30, 1890, and March 3, 1891, provided for the establishment of a fish-hatching station at Green Lake, Maine. This station is now nearing completion, and will soon require a considerable personnel for the conduct of the same. It is estimated that the increased cost of this station for the coming year over the present one, during which but preliminary work has been carried on, will be not less than the amount asked.

2. Maintenance of vessels. The apparent increase in this item is \$15,000. Congress, however, has for several years past provided a deficiency appropriation of \$10,000, which sum will be asked for the present year. In view of the increased work done by the vessels of the Commission in the investigation of the fishing grounds, oyster beds, etc., of the Atlantic and Pacific coasts, and the fact that a considerable part of the personnel of the vessels formerly furnished by the Navy Department has been withdrawn, requiring the payment of the same from the appropriations of the Commission, the amount of the estimates, \$60,000, will be barely sufficient for their proper maintenance.

3. Statistical inquiry, increase \$5,000. The fisheries of the United States extend over a vast area of country, both on the ocean and gulf coasts and on the great lakes; and to properly inquire into their methods and relations as well as the collection of their statistics, requires the employment of a number of field agents, the salaries and traveling expenses of whom, as well as the compensations of an office force for the digesting of the field returns, entail a considerable expense, which will be not more than covered by the amount estimated, \$25,000.

4. Fish distributing car, \$8,000. The Commission has now three cars, which are insufficient to carry on its work, which has been greatly increased by the enlarged number of producing stations established under special acts of Congress during the past few years. Where formerly the active work of distribution was limited to three seasons of from six to ten weeks each, it is now practically continuous throughout the year; so that when a car requires to be repaired it causes a delay in the work, and in some cases, as in the distribution of shad, which is confined to a few weeks, during the hot weather of early summer, a loss to the localities intended to be stocked. Owing to their long service, the cars are requiring constant repairs, and one, formerly a baggage car, is in a condition that renders it unsafe for trips of great length. With an additional car, which can be at once put into service when any of the others are disabled, the work of the Commission will not be hampered. Based upon former experience, the sum asked for is but sufficient for the construction of a proper car, which must be fitted with water and refrigerating apparatus, with sleeping berths and kitchen arrangements for the housing and feeding of five to seven men, and, owing to the continuous and hard service to which they are subjected, must be built in the strongest manner and supplied with the best running gear.

5. In regard to the clause providing that ten per centum of certain items of appropriation shall be available interchangeably for expenditure on the objects named, I would state that the work of the Commission, especially in that of propagation and distribution of food fishes, is so closely allied, that often an arbitrary division has to be made in charging certain expenditures either to one or the other appropriation, making it extremely desirable that this provision be inserted in the appropriation bill. I would call attention that a similar provision has heretofore been embodied in the acts providing for the expenses of the work of the U. S. Coast and Geodetic Survey.

I have the honor to be, sir, very respectfully,

MARSHALL McDONALD,
Commissioner.

Hon. CHARLES FOSTER,
Secretary of the Treasury.

APPENDIX A a.

Detailed estimate for "Pay of assistant custodians and janitors." (See page 234.)

Amount estimated to be required for the "Pay of Assistant Custodians and Janitors, 1893," for the following named buildings, completed and to be completed prior to June 30, 1893, under the control of the Treasury Department.

APPENDIX Bb.

In relation to the estimates submitted by the National Board of Health. (See page 236.)

NATIONAL BOARD OF HEALTH,
Washington, D. C., October 28, 1891.

SIR: I have forwarded herewith for transmission to Congress the estimates of appropriations desired by the National Board of Health in order to enable it to carry out the laws providing for its establishment and prescribing its duties. The absence of appropriations during the past few years has prevented the board from continuing the investigations authorized by law. It is proper to say, however, that the executive officers are called upon to perform duty in receiving and caring for reports and papers received from consuls and sanitary organizations, and in answering inquiries and advising as to questions relating to public health.

The importance of this branch of the service is generally recognized, and in nearly all civilized countries similar organizations are established and ample provision made for the careful study of all questions relating to the protection and improvement of the health of the people.

It is hoped, therefore, that Congress will, in its wisdom, act favorably upon the estimates submitted, and thereby enable the board to perform the duties imposed upon it.

Very respectfully,

W. P. DUNWOODY,
Secretary.

The SECRETARY OF THE TREASURY, Washington, D. C.

APPENDIX Cc.

In relation to the estimates for the District of Columbia. (See pages 236 to 248.)

OFFICE OF THE COMMISSIONERS, DISTRICT OF COLUMBIA,
Washington, November 3, 1891.

SIR: The Commissioners of the District of Columbia herewith transmit their estimate of appropriations for the support of the government of said District for the fiscal year to end June 30, 1893.

Accompanying these estimates of expenditures are statements of estimated receipts of the District government, exclusive of the receipts of the water department, for said period; a memorandum of the reasons for submitting new or changed items as compared with the appropriations for the support of the District government for the current fiscal year, and schedules of proposed work on sundry streets, avenues, and roads embraced in these estimates, and the report of the Superintendent of Charities.

Respectfully,

J. W. DOUGLASS,
President Board of Commissioners District of Columbia.

Hon. CHARLES FOSTER, Secretary of the Treasury.

[First Indorsement.]

TREASURY DEPARTMENT, November 3, 1891.

Respectfully referred to the Hon. First Comptroller for examination and recommendation.

O. L. SPAULDING,
Acting Secretary.

[Second Indorsement.]

FIRST COMPTROLLER'S OFFICE, November 10, 1891.

Respectfully returned to the Secretary of the Treasury with recommendations made on the estimates.

J. R. GARRISON,
Acting Comptroller.

Memorandum of estimated receipts of, and reasons for changes and the appropriations for, the government of the District for the fiscal year to end June 30, 1893.

ESTIMATED RECEIPTS.

The Commissioners of the District of Columbia estimate that the receipts of the government of said District (exclusive of the water department), from sources other than the proportionate contribution of the United States, for the fiscal year to end June 30, 1893, will be \$3,160,645.51. With the 50 per cent. contribution of the United States, the total will be \$6,321,291.02.

The estimate of receipts from sources other than the United States is based upon the estimate of the assessor, herewith inclosed, calculated upon the assessments as they now appear on his books, and the probable receipts from licenses, markets, fines, and other miscellaneous sources of District government, amounting to \$2,665,645.51, upon the auditor's estimated surplus in the Treasury of \$120,000, and upon the Commissioners estimate of the probable increase in the assessable valuation of real property, from the general assessment now in progress, and which will be available as an additional source of revenue for the expenses of the said fiscal year. The Commissioners estimate that the amount that will be received from the latter source, in addition to the assessor's estimate, will be at least \$375,000.

CHANGES IN APPROPRIATIONS.

Executive office.—The increase of \$300 in the compensation of two clerks in the executive office is to promote two officials who have been in the District service for many years and whose present salary is deemed disproportionate to the character of service required of them. The estimate of \$200 increase in the salary of the clerk and architect in the office of the inspector of buildings is to better compensate an official whose services are very inadequately requited by his present salary. This officer not only performs an unusual amount of clerical work, but designs and supervises the duplication of all plans for the District buildings which are constructed under annual appropriations. The additional laborers in the same office are needed to help take care of the municipal building. The increase of \$300, estimated for the clerk in the property office, is to enable the Commissioners to suitably pay an officer who has more work and responsibility than any other employé of his grade within their knowledge. The estimate for two assistant inspectors of plumbing is based upon the necessities of the inspector of plumbing office. The present force of assistants is utterly inadequate to the demands upon the services of that office.

Assessor's office.—The addition of two clerks at \$1,400 each and one clerk at \$1,200 is merely a transfer from the collector's office of three clerks who now are provided for in the appropriation for the collector's office, but who perform work in the office of the assessor. The increase of \$200 in the salary of the license clerk is recommended as recognition of long, arduous, and valuable service. The estimate for two clerks at \$1,000 each to continue the arrears of tax accounts is an obvious necessity in order to keep those accounts up to current demands.

Collector's office.—The increase of two clerks at \$1,200 is necessary in order that the collector can have a subordinate to whom he may entrust the duty of attending to the cashing of checks and the deposit of collections in the Treasury Department; and the increase of one \$1,400 clerk, to act as assistant cashier, is to meet the demands for such service incidental to the increase of business.

Auditor's office.—The addition of one clerk at \$1,200 is to perform services heretofore largely performed by the person who has the position of disbursing clerk.

Attorney's office.—The recommended increase of \$400 in the salary of the special assistant attorney is a reasonable advance in the compensation of that officer, whose duties not only require a high professional capacity, but are laborious and confining.

Attorney's office.—The item "procurement of chains of title," added to the list of items of judicial expenses, is for the purpose of facilitating the examination of titles respecting property involved in condemnation proceedings for streets, alleys, sites for station-houses, school-houses, rights of way for sewers, etc., because the assessor's books do not always show the true state of title, and can not be relied upon as furnishing the names of persons who are the record owners of property and entitled to notice, and because the services of experts who make a special business of examining and keeping run of title records can only be relied upon for such work. The legal officers of the District not only have not the necessary time to devote to such investigations, but could only obtain a large portion of the information from the records of such experts, or by lengthy search; involving many times the value in time and money the amount charged by the experts.

Market masters.—The increase of \$700 for hired laborers, etc., is for the relief of the various market masters, who, by the gradual growth of the business under their supervision, are now obliged to meet, out of their own pockets, a large share of expense for this service.

Engineer's office.—The increase in the number of employés and in salaries asked for in this branch of service are to meet the growth of this business.

Contingent expenses.—The recommendation for the increase of \$2,000 in this item is rendered necessary in order to provide for the growing demands on this account; and the same reasoning applies to the item for the support of expenses of stables.

Judicial expenses.—The item of \$500 increase under this head is to meet incidental demands of increase of business.

Coroner's office.—The increase of \$200 for services in care of morgue, etc., is to enable the Commissioners to secure the services of suitable attendants, as it is impossible to retain anyone at the present restricted rate.

Rent of District offices.—The item of \$900 increase in this account is inserted in pursuance of an agreement of the predecessors of the present Board of Commissioners with the lessor of the District building that the Board would ask for \$4,000 for rent of the building, and in order that they may also be in a position to offer said lessor additional rent for additional rooms to said building, which are now absolutely necessary for the proper accommodation of the District offices and the conduct of the District business.

For general advertising.—The increase of \$500 asked for under this head is to meet the growing demands of business.

Advertising tax-sale notice.—The increase of \$2,500 in this item is based on the cost of the advertisement for the current year, the bills for which amount to \$7,719.50. The account will naturally be larger for next year.

Streets.—The item for the improvement, lighting, and cleaning are based upon careful consideration of the public requirements in this respect.

Public schools.—The increases under this head are based upon recommendations of the Board of School Trustees. The recommendation for an additional clerk to the superintendent of the first six divisions is to provide a suitable person to superintend the distribution of the free school-books, and keep the necessary accounts connected therewith, in addition to such other duties as said superintendent may call upon him to perform.

The item of \$500 for care of new building is to enable the school authorities to put some person in charge of the new buildings estimated for pending the appointment of the regular janitors in case of such buildings as may be completed before the appropriation of 1894 becomes available for the employment of additional janitors.

Metropolitan police.—The items of increase in this Department are incident to the growth of the service. The recommendation for a stable for ambulances and horses is to enable the Commissioners to provide accommodation for this service in a more central locality and better in keeping with the character of duty which falls to this branch of the service.

Fire department.—The Commissioners recommend \$200 increase in the salary of the chief engineer of this department in order that his compensation may better comport with the responsibility and labors of his position. The item for a new engine company and the necessary house and plant is to provide for better protection of the northern section of the city and the contiguous suburbs. The estimate for \$4,000 for exchanging engine is to keep the apparatus of the department in good condition.

Telegraph and telephone service.—The item for increase in the number of repairmen and for general supplies are for the better conduct of the service. The item for new poles and special line of repairs is principally to provide for the replacement of a large number of decayed poles, and for the extension of the line.

General supplies, telegraph and telephone service.—The increase of \$10,000 in the estimate under this head is to meet the ordinary increase in the demands of this branch of the government, and furthermore to enable the Commissioners to effect a general replacement of the poles, which by their decayed condition are now a menace to life and property. Recent accidents from this cause have impressed the Commissioners with the necessity of making a reconstruction of these defective plants without delay, and the estimate of increase will be none too much to provide for the thorough performance of this duty.

Health office.—The increase in the clerical force and provision for one janitor are necessary for the proper conduct of the office and care of the building. The inspector of dairy products is an officer whose services are imperatively needed.

The necessity for increase in the appropriation for the collection and removal of garbage and dead animals is obvious. The inadequacy of the present appropriation has been a cause of much public dissatisfaction, and of danger to the public health:

Police court.—The increase in the provision for this service is to provide for the additional force and duty required by the act of March 30, 1891. The estimate for a new story to the police court building is based upon the requirements of that expansion of the service.

Washington asylum.—The increase in the force and contingent expenses of this institution are normally incident to its growth, and the same reasoning applies to the estimate for additional improvements.

APPENDIX D d.

In relation to the estimates of the Treasurer of the United States for the Sinking-Fund Office, District of Columbia. (See page 238.)

TREASURY OF THE UNITED STATES,
Washington, November 10, 1891.

SIR: The Treasurer is informed that the estimates of appropriations required for the service of the District of Columbia for the fiscal year 1893 are now in your office awaiting your consideration. A copy of the estimates submitted by the Treasurer for the sinking-fund office is herewith inclosed, with an extract from the Treasurer's annual report in explanation thereof, containing a recommendation that the office should be made a regular division of the Treasurer's office, and the reasons therefor, which it is earnestly hoped will receive your favorable consideration.

Respectfully yours,

E. H. NEBEKER,
Treasurer United States, ex-officio Commissioner Sinking Fund, D. C.

Hon. CHARLES FOSTER,
Secretary of the Treasury.

ESTIMATES.

The estimates submitted to the Commissioners of the District of Columbia of the amounts required by the Treasurer for the service of the sinking-fund office for the fiscal year ending June 30, 1893, are as follows:

For interest and sinking fund on the funded indebtedness, exclusive of the water bonds.....	\$1, 213, 947 97
For current expenses of the sinking-fund office.....	4, 000 00
For interest and sinking fund on one-half of the amount appropriated, to increase the water supply of Washington, D. C.....	83, 193 57
For interest and sinking fund on one-half the cost of the 48-inch main and connections, and Fourteenth street main and connections.....	20, 713 89

The method of arriving at the sum required for interest and sinking fund on the amount due the United States by the District of Columbia on account of increasing the water supply of the city of Washington was fully explained in the last report.

The District appropriation act, approved March 3, 1891, under the head of "water department," contains the following:

"SEC. 2. That the amount charged against the District of Columbia on account of the forty-eight-inch main and connections as provided for by the deficiency appropriation act approved March second, eighteen hundred and eighty-nine, is hereby credited to said District, and the amount charged against the revenues of the water department for laying the main on Fourteenth street, west, as provided in the District of Columbia appropriation act, approved July eighteenth, eighteen hundred and eighty-eight, is hereby credited to said water department, and hereafter it shall be the duty of the Commis-

sioners of the District of Columbia to include in their annual estimates for the expenses of the water department, an estimate to be made by the Treasurer of the United States of the amount necessary to refund, in twenty-five equal annual installments, one-half the cost of the said forty-eight-inch main and connections, and one-half the cost of the said Fourteenth street main and connections, with interest on said amount at the rate of three per cent. per annum, computed annually on the principal sum remaining unpaid."

Cost of the 48-inch main and connections.....	\$564,290 09
Cost of the Fourteenth street main and connections.....	27,535 29
Total cost.....	591,825 38
One-half of which, to be refunded, is.....	295,912 69
Interest at 3 per cent. on \$295,912.69 is.....	8,877 38
One twenty-fifth part of \$295,912.69 is.....	11,836 51
Amount required for interest and sinking fund.....	20,713 89

The estimates for clerical services are the same as last year, and are but commensurate with the responsible and increasing duties of the office.

In this connection attention is invited to the following:

It is recommended that Congress be asked to make the sinking-fund office a regular division of the Treasurer's office and incorporate the estimates in the appropriation bill for the service of the Department, placing the employes upon the rolls on the same footing, as far as practicable, with the regular employes. To comply with the requirements of the present law it would only be necessary at the end of each fiscal year to charge one-half of the expenses of the office to the District of Columbia, similar to the manner in which the expenses of the national bank redemption agency are reimbursed to the United States from the funds contributed by the national banks.

The foregoing recommendation is based upon the fact that the sinking-fund office is legitimately an office of the United States and a branch of the Treasurer's bureau, and for which he is as much responsible, under his bond, as for any other division of his office.

That it is not a municipal office, nor in any way whatever an office of the District of Columbia, has been conclusively determined, as will appear from the facts to be submitted, and in view of which it is earnestly hoped the action asked for may receive indorsement.

Soon after said office was by law established the Commissioners of the District of Columbia assumed to entertain a view upon this subject differing from the position above affirmed, and which may possibly have engendered the idea that the office in question was not in fact an office of the United States.

At the time referred to Mr. Gilfillan was Treasurer of the United States, and he assailed the claim of the District officials in the following cogent manner, and maintained a view which has received the complete concurrence of all of his successors in office. The same appears in the Second Annual Report on the Sinking Fund, under the head of "Relations to the District Commissioners." He said:

"The Commissioners of the District have of late put forward the claim that the Treasurer of the United States is commissioner of the sinking fund of the District of Columbia, consequently a district officer, and hence, in that capacity, subordinate to them. The act of June 11, 1878, clearly and explicitly abolished the offices of the sinking-fund commissioners, and no such office now exists. Furthermore, there was never any legal basis for their claim to authority over the sinking-fund commissioners, even while the latter had official existence. * * *

"It is to be noted, too, that the act does not make the Treasurer of the United States commissioner of the sinking fund. It transfers to him, as Treasurer, the powers and authority formerly possessed by the commissioners of the sinking fund, whose offices are absolutely abolished. There is no commissioner of the sinking fund. There is simply the Treasurer of the United States, exercising, in addition to his former powers and duties, certain powers and duties in relation to the funded debt of the District of Columbia. These powers and duties he is to exercise 'in accordance with the provisions of existing laws.' This includes not merely the laws governing the sinking fund, but the acts of Congress governing the Treasury Department, among which are the laws constituting the Treasurer of the United States an officer of the Treasury Department, and subjecting him to the control and direction of the Secretary of the Treasury.

"The theory that the Treasurer himself is, in this relation, a subordinate officer of the District of Columbia is so absurd as to scarcely admit of serious discussion. The Treasurer is an officer of the United States, appointed by the President and confirmed by the Senate, exercising an independent authority in many matters and in others subject only to the control of the President, the head of the Department, and the proper accounting officers. His existence is coeval with that of the Treasury Department. To degrade an officer of this rank and responsibility into a subordinate of the local authorities would be an anomaly in legislation but one degree less ludicrous than the subordination of the Secretary of the Treasury himself to the Commissioners of the District of Columbia. It might as well be contended, and in fact it will as logically follow, that the accounting officers of the Treasury, who pass upon the accounts of the District, are subordinate to the Commissioners, because the law has devolved upon them duties formerly performed by subordinate officers of the District of Columbia." * * *

Now, it is to be observed that this argument rests upon the force and effect of the act of June 11, 1878, and by which the office of the sinking-fund commission, so far as it ever was a District office, was absolutely abolished and rendered extinct.

The legal aspect of the question has twice since come collaterally before the courts, and it is a fact to which special attention is invited that the decisions in both cases have been such as to confirm the position taken by Mr. Gilfillan, in the paragraphs above quoted.

The first case in which this point arose was that of *Butler vs. Strong et al.*, the decision in which was rendered February 23, 1889, and in which the court said:

"It is claimed that the Secretary of the Treasury is the agent of the District of Columbia, in relation to these claims against the District, and that the Treasurer of the United States, as sinking-fund commissioner, is also an officer of the District of Columbia. I must dissent entirely from that view. An agent is one who acts by authority of a principal, and is bound by his orders and owes obedience to his behests. Both the Secretary of the Treasury and the Treasurer of the

United States are officers of the United States, deriving their authority entirely from the laws of the United States. They derive no authority from the District of Columbia as a municipality. They do not hold their offices under the District of Columbia. They do not get any authority from it whatever. They derive all their powers and are charged with all their duties by the laws of the United States, and they are to all intents and purposes, therefore, officers of the United States.

"It is true that in one of the laws the offices of the sinking-fund commissioners were abolished and their duties were transferred to the Treasurer of the United States. These sinking-fund commissioners were officers of the District of Columbia, undoubtedly, and they were continued in being as such.

"But when their offices were abolished their duties were transferred to an officer of the United States. It is true, also, that in one of the acts he is called *ex-officio* sinking-fund commissioner of the District of Columbia, but that simply means that, by virtue of his office as Treasurer of the United States, he is charged with the duties of the sinking fund of the District of Columbia, and that is all. He remains an officer of the United States."

Could the case be more clearly stated than that? The conclusions follow that the office of the sinking-fund commission is abolished. The Treasurer, in relation to the duties conferred upon him by the act of June 11, 1878, "remains an officer of the United States," and that the division of his office, which was by said act created, and wherein he exercises his functions as *ex-officio* commissioner of the sinking fund, must of necessity be an office of the United States.

It would seem that this alone affords indisputable evidence of the soundness of the position taken by Treasurer Gillfillan, and should conclusively explain and determine the true status of the office.

But the point is further affirmed by the recent decision of the Court of Claims in the case of Wyman *vs.* The United States. In this case, the claimant, in suing for salary while acting as *ex-officio* commissioner of the sinking fund, though not admitting that the office was in any way related to the District, expressly endeavored, however, to make it appear that, as a distinct office, it still existed, but the opinion of the court was that no such office does exist, and that its powers and duties merely were transferred to the Treasurer of the United States.

Weldon, judge, delivered the opinion of the court:

* * * "On June 11, 1878, another act was passed entitled 'An act providing a permanent form of government for the District of Columbia.' In that act it is provided—

"That the offices of the sinking-fund commissioners are hereby abolished, and all duties and powers possessed by said commissioners are transferred to, and shall be exercised by, the Treasurer of the United States, who shall perform the same in accordance with the provisions of existing laws. (20 Stat. L., 102.)

* * * "The law of 1878, after the abolition of the office of 'sinking-fund commissioners,' transferred all duties and powers possessed by said commissioners to the Treasurer of the United States; but the office of commissioner was absolutely abolished, and the consequent office of treasurer thereof. The office was not transferred to the Treasurer of the United States, but simply the duties theretofore performed by the treasurer of the board of commissioners. * * *

"It is the judgment of the court that the petition be dismissed."

These powers and duties the Treasurer of the United States exercises in the capacity of a Federal officer by means of a separate department of his office, known as the sinking-fund office of the District of Columbia, which may appear anomalous in its character, but it is in point of law legitimately and properly an office of the United States, and upon this the Treasurer bases his recommendation.

APPENDIX Ee.

In relation to the estimate for "Maintenance of Garfield Hospital." (See page 250.)

WASHINGTON, D. C., September 29, 1891.

SIR: In behalf of the management of the Garfield Memorial Hospital, I have the honor to request that you will include in your estimates to be submitted to Congress for the fiscal year ending June 30, 1893, the following item:

"The Garfield Memorial Hospital.—For maintenance, to enable it to provide medical and surgical treatment to persons unable to pay therefor, \$15,000."

This is the amount appropriated by Congress for this purpose for each of the two fiscal years last passed, and it is absolutely necessary to enable the hospital to meet the urgent demands which are made upon it.

The whole expense of maintenance is double the amount asked, the difference being made up by voluntary contributions and by payments by a few patients who are able to bear a part of the expense of their care and treatment.

This is a "General Hospital," untrammelled by limitation as to sex, age, color, form of disease, residence, or nationality. It is open to all.

During the twelve calendar months ending August 31, 1891, the number of hospital days were 12,137, the patients coming from twenty-five different States of the Union and from nine different countries, and including a large proportion of clerks, mechanics, housewives, etc., who are not paupers, but who are, nevertheless, too poor to pay for hospital relief when unable to pursue their occupations by reason of disease or injury.

The entire plant of the hospital, including grounds, buildings, machinery, furniture, and equipment, has been paid for without the aid of any appropriation by Congress.

The management has lately begun the erection of a new building to contain fifty-five beds, which added to the fifty-eight already in use will give a total of one hundred and thirteen. The contract calls for the completion of the building by the 15th of February, 1892.

The board of directors, through its executive committee, and the Ladies' Aid, by its visiting committees, keep constant supervision of every detail of the hospital work, and in every expenditure the closest economy is exercised. Accounts for all expenditures under this appropriation, with proper vouchers, have been submitted to you, and these are finally audited and settled by the accounting officers of the Treasury. These vouchers show the absolute need of the aid requested, and the manner in which the money appropriated has been applied.

The fullest inspection of the hospital by you is cordially and earnestly invited.

I have the honor to be, your obedient servant,

JOHN M. HARLAN,
President.

Hon. REDFIELD PROCTOR,
Secretary of War.

APPENDIX Ff.

In relation to the estimate for Artillery School, Fortress Monroe, Va. (See page 250.)

Department of Artillery:	
Purchase of books, periodicals, books of reference, etc.....	\$275 00
Chemical Laboratory:	
Purchase of chemical apparatus.....	100 00
Purchase of chemicals.....	120 00
Total.....	220 00
Electrical Department:	
Electrical instruments and material needed for instruction purposes.....	600 00
Maintenance of lines and batteries, and material for repairs and operations of same.....	107 26
Total.....	707 26
Department of Steam and Mechanism:	
Purchase of text and reference books, plates, etc.....	225 00
Purchase of machinery and machine tools for instruction purposes.....	315 00
Total.....	540 00
Repair shops:	
Purchase of material and necessary tools, for metal and carpenter work, for the repair and preservation of engineering, electrical, and artillery apparatus in use in the several departments of the school, etc.....	375 00
Department of Engineering:	
Purchase and repair of instruments, for the purchase of drawing material, text and reference books, maps and plans, for the instruction of officers in military engineering, and for current expenses.....	335 00
Artillery School Library:	
Purchase of professional and scientific works for the instruction of student-officers, and for professional and scientific papers and periodicals..	500 00
Department of Military Science:	
Purchase of text-books and pamphlets, occasional publications, maps and books of reference, etc.....	260 00
Secretary of staff of Artillery School:	
Printing current papers and instruction manuals, including papers, inks, and printing material, etc.....	325 00
Lithographic material, etc.....	85 00
Bookbinding, current papers, instruction manuals, and preservation of professional library, such as leather, pasteboards, cloth for covers, and mounting maps, gilding, thread, and bookbinding material, etc.....	190 00
Total.....	600 00
Division for Non-commissioned Officers:	
Purchase of thirty sets of text-books in mathematics, surveying, and mechanical engineering, and electricity, for instruction purposes....	125 00
To enlisted men for extra-duty pay in scientific departments at 50 cents per day:	
One printer in charge of printing office, lithographic office, bookbindery, and Artillery school records, one clerk, two printers, one book-binder, one lithographer, one machinist, one engineer, one fireman, one carpenter, two laborers in electrical department, one assistant, in charge of surveying and engineering instruments, one chemist, one photographer, one assistant librarian, and one janitor, at \$5 per month.....	2,293 50

RECAPITULATION.

Department of Artillery.....	\$275 00
Chemical Laboratory.....	220 00
Electrical Department.....	707 26
Department of Steam and Mechanism.....	540 00
Repair shop.....	375 00
Department of Engineering.....	335 00
Artillery School Library.....	500 00
Department of Military Science.....	260 00
Secretary of staff of Artillery School (printing, lithographing, and binding).....	600 00
Division for Non-commissioned Officers.....	125 00
Extra-duty pay, etc.....	2,293 50
Total.....	6,230 76

ROYAL T. FRANK,
Lieutenant-Colonel Second Artillery, Commanding.

APPENDIX Gg.

Explanation of the estimate of the National Home for Disabled Volunteer Soldiers for the year ending June 30, 1893. (See pages 251-254.)

HARTFORD, CONN., September 26, 1891.

Central Branch.—The estimate for the support of this Branch is \$721,752.88, an amount less than that appropriated for the current year by \$17,015.28. This difference is due to the fact that the number estimated for is somewhat smaller than it was for the current year, and the board believes it to be sufficient.

The estimates "submitted" are \$16,040 for a gas-holder, which is required to replace one that is worn-out and too small, having been in use more than twenty years. The amount estimated is based upon an accurate estimate of the probable cost. Also \$16,100 for a barrack to replace a dangerous, dilapidated, and filthy wooden structure, which has been in use more than twenty years. The amount is based upon the cost of similar structures which have been built at the Branch from year to year, and is reasonable.

The number of members estimated for is 4,800. The annual cost of maintenance, not including construction, is \$134.66, and the daily ration costs 19 cents.

Northwestern Branch.—The estimate for the maintenance of this Branch is \$317,910.49, and is \$859.78 greater than the amount appropriated for the current year. The excess is not great, but is due to the fact that extensions of water and gas mains are required to make the service efficient.

The items "submitted," amounting to \$60,000, are, in the opinion of the board, necessary, and the amounts are based on plans and estimates which are reasonable.

Extension of hospital, \$20,000. The hospital is now crowded and has overflowed into ordinary barracks. The increase will continue. Boiler-house and coal-shed, \$12,000; smokestack, \$2,500; boilers, \$5,000; tunnel, \$4,000. These structures are required to concentrate the furnaces and coal receptacles, which are now scattered in six places over the grounds, and their isolated positions are a source of great danger from fire, and increase the annual cost of the Branch.

Extension of water supply, \$1,500. This extension is necessary to utilize the abundant water supply of the Home, by extending it to outlying buildings.

Headquarters building, \$15,000. The headquarters offices, governor's, treasurer's, secretary's, quartermaster's, etc., are now in a barrack building, taking up room that should be used for members' quarters. The capacity of the Branch would be increased by 100 if this building were allowed, and the Branch is now crowded to its utmost limit. The number of members estimated for is 2,200. The annual cost of maintenance per man, not including construction, is \$132.16, and the daily ration costs 15.9 cents.

Eastern Branch.—The estimate for the maintenance of this Branch is \$283,481.38, less by \$6,561.05 than the amount appropriated for the current year. This is due to an anticipated smaller cost of clothing and some other articles for the ensuing year.

The "submitted" item, \$25,000, is the cost of a sewer from the Branch to the Kennebec River, a distance of about five miles. The sewerage of the Branch has been officially reported a nuisance to the lands between the Branch and the river, and if suffered to remain as it now is will subject the Branch to damages, as has been the case at the Central Branch. The amount asked for will remove the nuisance, and is no greater than will be required.

The number of members estimated for is 1,800. The annual cost of maintenance per man, not including construction, is \$144.27, and cost of daily ration is 17.9 cents.

Southern Branch.—The estimate for the maintenance of this Branch is \$403,547.65, exceeding that for the current year by \$22,536.65. The increase is due to the probable increase of the number of members.

The "submitted" items are, first, \$31,000 for a new brick barrack to house 225 men. The amount is based upon the cost of similar structures erected at this Branch, and is reasonable. The barrack is necessary to give additional room, and to replace a very dangerous and discreditable wooden structure. Besides, for the last year 100 men have been sheltered in tents and 100 more will be so sheltered during the coming winter.

Second, \$15,200 for a building for a property storehouse. The amount is based on reasonable estimates. The building is necessary for the storage of property in the quartermaster and subsistence departments which must be stored, and the present storage room, which is cellars, is damp and unwholesome and insufficient, causing damage to the property.

Third, \$6,000 for a wharf. The cost of freight of coal, provisions, etc., is increased by the bad order and insufficiency of the existing wharf. It will be economical to build a new wharf, and the amount asked for is from a proper estimate of the cost.

The number of members estimated for is 3,000. The annual cost of maintenance per man, not including construction, is \$125.39, and the daily cost of ration is 18.66 cents.

Western Branch.—The estimate for the maintenance of this Branch is \$347,844.89, less than that of the current year by \$20,740.31, a saving caused by lower prices of provisions and fuel, and more economical methods.

The "submitted items" are \$15,250 for a storehouse for public property. The same reasons for the allowance of this sum exist as do in the Southern Branch, and the building is necessary.

Addition to hospital, \$20,000. This addition is necessary on account of the crowded condition of the hospital, and to care for patients like epileptics, weak-minded men, and others who ought not to be kept in a building intended for sick people.

The number of members estimated for is 2,300. The annual cost of maintenance per man, not including construction, is \$136.54, and the daily cost of ration is 16.25 cents.

Pacific Branch.—The estimate for the support of this Branch is \$180,616.02, against \$163,636.32, an increase due to the increase of membership of this Branch, the pressure for admission to it being very great.

Through delay, caused by some confusion in the papers at this Branch, the only "submitted" item which reached the board in time for action is \$20,000 for water supply. The estimated cost of the water supply is \$40,000. The item submitted is the unappropriated balance of the estimate, and this is necessary to utilize what has already been done.

The items which did not reach the board in time are as follows:

Three barracks, at \$25,000 each.....	\$75,000
Completing hospital.....	23,000
Kitchen.....	16,000
Treasurer's house.....	6,500
Superintendent's house.....	2,500
Gardener's house.....	600
Guard house.....	500
Barn and corral.....	2,500
Gates, lodges, etc., at entrances.....	1,100
Bathhouse and pavilion at beach.....	10,000
Electric light plant, complete.....	25,000

162,700

These items are respectfully forwarded. The expenditures are necessary for the proper completion of this Branch, which is in a very crude, unfinished, and crowded state. Proper estimates for them have been made.

The number of men estimated for is 1,000. The annual cost of maintenance per man, less construction, is \$142.84, and the cost of the daily ration is 19.17 cents.

Marion Branch.—The estimate for the support of this Branch is \$156,775.38, against \$150,000, the appropriation for the current year. The excess is due to the increased number of members.

The Branch, which is new, is still unfinished, and the items "submitted" for its completion are the following:

One barrack.....	\$23,000
Governor's house.....	6,500
Treasurer's and surgeon's houses.....	8,000
Commissary and quartermaster's houses.....	5,000
Wing to hospital.....	25,000

These items are all obtained from estimates that are just and reasonable. The number of men estimated for is 1,100. The annual cost of maintenance per man, less construction, is \$124.10, and the daily cost of ration is 16 cents.

Outdoor relief and incidental expenses.—For outdoor relief and incidental expenses, \$35,000. This amount is the same as that appropriated for the current year. It defrays the cost of salaries paid by the board to its employes in the president's, treasurer's, and secretary's offices, the cost of transportation, and stationery of the members of the board, and such clerical services as are from time to time required, and outdoor relief authorized by the board.

Aid to State homes.—Continuing aid to State and Territorial homes, 6,000 members at \$100 each, \$600,000. The amount appropriated for the current year is \$500,000, but the liability under the law will much exceed that amount.

For the fiscal year ended June 30, 1890, in which year \$400,000 were appropriated for this object, there were liabilities amounting to \$120,697.85 after the appropriation was expended.

RECAPITULATION.

Central Branch, 4,800 members.....		\$721,752 88

Total.....		720,697 85
Grand total.....		3,449,516 54

The board of managers, in a communication to Congress of December 13, 1889, made the following statement and table:

"The members of the Home wish at times to change their residences, and ask to be transferred from one Branch to another. Their requests are always granted, unless there be some reason why the transfer should not be made. Such reason may be that the Branch to which they wish to be transferred has already its full membership, as justified by the appropriation, or there may be some reason personal to the man, such as his health, as certified by the surgeon, or his inability to pay the cost of transfer. The board is sometimes embarrassed, from the fact that the changes in the number of the members who go away from or return to the various Branches of the Home seem to be governed by no rule except the fancy of the men. For this reason the appropriation for one Branch is often so seriously drawn upon that great care and seeming stinginess must be practiced to make the appropriation last through the year. In other Branches in the same year the appropriation would answer for more men than are actually present during the year. To avoid this sort of embarrassment it is respectfully recommended that hereafter, instead of appropriating for the maintenance of the Branches separately, as is now the method, the estimates be made as they are now for each Branch, and that they be then consolidated and the appropriation be made for the maintenance of the whole membership in one account for each item of expenditure. Should this change be made, the board will be enabled to so make its quarterly appropriations for maintenance that all of the Branches will be on the same footing as regards the annual appropriations, and the difficulty due to the increase and diminution of the number of members in any Branch can be at once obviated. The large average number of members now present and absent for the year, viz, 14,889, a number nearly equal to that of the whole Army as it exists to-day, and which will increase for some time, and the varying numbers of members of the Branches, as explained above, are, in the opinion of the board, good reasons for the change in the method of appropriating for the annual maintenance.

"Under the existing law, with the appropriations made by Branches, there are at least forty-eight separate items that the board of managers must look out for constantly, as there is always danger that the Branches may overrun the appropriations. By the system recommended there will be only eight such items, and the board, when it makes its quarterly appropriations, can always keep them within such amounts that there will be no possibility that it can be embarrassed by a careless and inefficient treasurer, and can always increase or diminish the amounts appropriated by it to conform to the greater or less requirements of each branch.

"The same system is in force in the Army and Navy, in which there are bodies of men at various places whose numbers continually change. If the system works well with them it should work well in the National Home, which institution has not the command of the clerical and other force that these bodies have.

"Another reason for the change is, it will simplify the procurement of clothing, bedding, medical stores, etc., which can always be better purchased by contract for the whole Home than they can be for each Branch separately.

"The cost of each Branch will be quite as much under the control of Congress as it is now, as the board of managers in each annual report gives the cost of each Branch for the preceding fiscal year, and the estimates for each Branch before consolidation will show approximately its contemplated cost."

Estimates of the National Home for Disabled Volunteer Soldiers for the fiscal year ending June 30, 1893.

For the support of the National Home for Disabled Volunteer Soldiers, as follows:

For current expenses, namely: Pay of officers and noncommissioned officers of the Home, with such exceptions as are hereinafter noted, and their clerks and orderlies; also payment for chaplains and religious instruction, printers, book-binders; telegraph and telephone operators, guards, policemen, watchmen, and fire company; for all property and materials purchased for their use, including repairs not done by the home; for necessary expenditures for articles of amusement, boats, library books, magazines, papers, pictures, and musical instruments, librarians and musicians, and for all repairs not done by the home; also for stationery, advertising, legal advice, and postage, and such other expenditures as can not properly be included under other heads of expenditure.....	\$212, 438 17
For subsistence, namely: Pay of commissary sergeants, commissary clerks, porters, laborers, and orderlies employed in the subsistence department; bakers, cooks, dishwashers, waiters, bread-cutters, and butchers; the cost of all animals, fowls, and fish purchased for provisions; of all articles of food, their freight, preparation, and serving; of tobacco; of all dining-room and kitchen furniture and utensils; bakers' and butchers' tools and appliances, and their repairs, if not done by the Home.....	1, 053, 705 00
For clothing, namely: Expenditures for clothing, underclothing, boots, shoes, socks, and overalls; also all sums expended for labor, materials, machines, tools, and appliances employed in the tailor shop, knitting shop, or other Home shops in which any kind of clothing is made.....	251, 800 00
For household, namely: Expenditures for furniture for officers' quarters; for bedsteads, bedding, and all other articles required in the quarters of the members, and for their repair if they are not repaired by the Home; for coal and fire-wood; for engineers and firemen; bath-house keepers, hall-cleaners, laundrymen, and privy watchmen, and for all machines, tools, materials, and appliances purchased for use under this head, unless the repairs are made by the home; also for all labor and material for upholstery, broom, and soap shops.....	336, 989 02
For hospital, namely: Pay of assistant surgeons, matrons, druggists, hospital stewards, wardmasters, nurses, cooks, waiters, readers, hospital carriage drivers, hearse-drivers, grave-diggers, funeral escort, and for such labor as may be necessary; for surgical instruments and appliances, medical books, medicines, liquors, fruits, and other necessaries for the sick not on regular ration; for bedsteads, bedding, and material, and all other articles necessary for the wards, kitchen and dining-room furniture and appliances; carriage, hearse, stretchers, coffins and materials; for tools of grave-diggers, and for all repairs not done by the Home.....	195, 827 50
For transportation, namely: For transportation of members of the Home.....	18, 200 00
For construction, namely: Pay of chief engineer, builders, blacksmiths, carpenters, cabinet-makers, coopers, painters, gas-fitters, plumbers, tin-smiths, wire-workers, steam-fitters, stone-masons, quarrymen, whitewashers, and laborers, and for all machines, tools, appliances, and materials used under this head, and for repairs generally for all departments.....	245, 367 43
For farm, namely: Pay of farmer, chief gardener, harness-makers, farm hands, gardeners, stablemen, teamsters, dairymen, hog-feeders, poulterers, and laborers, and for all machines, implements, tools, and appliances, and materials required for such work; for grain, hay, and straw, dressing and seed, carriages, wagons, carts, and other conveyances; for animals or fowls purchased for stock or for work, including animals in the park; for all materials, tools, and labor for flower-garden, lawn, and park, and for repairs not done by the Home.....	97, 601 57
For out-door relief and incidental expenses.....	35, 000 00
	2, 446, 928 69

SPECIAL APPROPRIATIONS.

Central Branch:		
For one gas-holder.....	\$16, 040 00	
For one brick barrack, to replace old frame barrack.....	16, 100 00	
		32, 140 00

APPENDIX I.

Letter of the First Comptroller in relation to the estimates for expenses of United States courts. (Estimates on page 260.)

TREASURY DEPARTMENT, FIRST COMPTROLLER'S OFFICE,
Washington, D. C., September 24, 1891.

SIR: Replying to the request of your Mr. Hodges that this office give an estimate of the probable amounts that will be needed to defray the expenses of the United States courts proper for the fiscal year 1893, I have the honor to report that, so far as I am able to judge from all available sources of information at my command, the following amounts will be required under the appropriations named:

Fees and expenses of marshals, U. S. courts.....	\$1,275,000
Fees of district attorneys, U. S. courts.....	290,000
Fees of clerks, U. S. courts.....	245,000
Fees of commissioners, U. S. courts.....	180,000
Fees of jurors, U. S. courts.....	650,000
Fees of witnesses, U. S. courts.....	1,200,000
Support of prisoners, U. S. courts.....	425,000
Pay of bailiffs, etc., U. S. courts.....	165,500
Miscellaneous expenses, U. S. courts.....	165,000

These estimates are based on the expenditures under these several appropriations during the fiscal year 1891 (see Sundry Civil Act, August 30, 1890, and Deficiency Act, March 3, 1891), together with the amounts of actual deficiencies now existing under said appropriations for fiscal year 1891.

Respectfully yours,

A. C. MATTHEWS,
Comptroller.

Hon. ATTORNEY-GENERAL.

APPENDIX Jj.

Statement of appropriations made during the second session of the Fifty-first Congress for the fiscal year ending June 30, 1892, for which no estimates are submitted for the fiscal year ending June 30, 1893; also, deficiency and miscellaneous appropriations made during the same session.

LEGISLATIVE.

UNITED STATES SENATE.

STATEMENT OF THE PROCEEDS OF GOVERNMENT PROPERTY, PUBLISHED IN CONFORMITY TO THE FOLLOWING PROVISIONS OF LAW.

All proceeds of sales of old material, condemned stores, supplies, or other public property of any kind, except the proceeds of the sale or leasing of marine hospitals, or of the sales of revenue-cutters, or of the sales of commissary stores to the officers and enlisted men of the Army, or of materials, stores, or supplies sold to officers and soldiers of the Army, or of the sale of condemned Navy clothing, or of the sales of materials, stores, or supplies to any exploring or surveying expedition authorized by law, shall be deposited and covered into the Treasury as miscellaneous receipts on account of "Proceeds of Government property," and shall not be withdrawn or applied, except in consequence of a subsequent appropriation made by law. A detailed statement of the proceeds of all sales of old material, condemned stores, supplies, or other public property of any kind, shall be included in the appendix to the Book of Estimates.—(Revised Statutes, pages 713, 722, sections 3618, 3672; act February 27, 1877, 19 Stat., 249.)

When covered into Treasury.	No. of warrant.	By whom sold.	Kind of property sold.	Bureau in charge of property.	Amount of each kind of property.	Total amount.
