

ANNOUNCING ORTHO-CREME

● Ortho-Creme is a soft white cream, designed for those who prefer a cream. It is essentially the active ingredients of Ortho-Gynol in a cream base. Ortho-Creme is used the same as Ortho-Gynol and is made with the same high standards of manufacture. It has been carefully tested and proved in laboratory and clinic. Same volume, same method, same price as Ortho-Gynol.

Stage Set for State Meet May 19-21

Outstanding scientific and entertainment programs planned for record crowd; Tulsa to invite annual convention to oil capital for next meeting in 1942.

With the dates—May 19-20-21—for the annual state meeting of the Oklahoma State Medical Association rapidly approaching, word from Oklahoma City indicates that the record attendance of more than 800, established in Tulsa a year ago, will be broken and the general convention committee, of which Dr. C. R. Rountree is chairman, is planning an outstanding scientific and entertainment program for the entire three-day convention.

At the last regular meeting of the Tulsa County Society, the organization voted to invite the Oklahoma State meeting back to Tulsa in 1942 and even before the opening of this year's meeting, Tulsa leaders are looking forward to the next meeting to be held in Tulsa.

From the opening day until the final paper on Wednesday, a varied and unusual program has been arranged.

Every member has, of course, noted the dates of the Annual Meeting in this Journal as well as in previous editions and an unusually interesting program has been prepared.

Monday at 4:30 the profession of the state will do honor to the memory of LeRoy Long with the dedication of a plaque in his memory. The ceremony will take place at the Medical School where he served as Dean and did much to promote and improve the standards of the institution.

Monday evening all of the members of the State Association and the guest speakers will be guests at a buffet supper served by the Oklahoma County Medical Association. The program for the meeting will be conducted by Col. W. Lee Hart, Surgeon-General, Eighth Corps Area, Ft. Sam Houston, and Col. Raymond W. Bliss, Ft. Sill, who has recently returned from an assignment in London, England.

Monday afternoon from 1:30 to 4 o'clock there will be an interesting program for the members of the profession who are doing Selective Service examinations. Lieut. Col. R. H. Eanes, Washington, D.C., second in command for Selective Service, and Gov. Leon C. Phillips will appear upon the program.

The most prominent social event of the meeting and one especially attractive to the ladies will be Tuesday evening at a dinner dance at which time the inauguration of the president for this year will be held. The dance will be preceded by an accoutrement hour for the doctors and their wives.

On Wednesday will be held the Second Annual Secretaries' conference, an innovation started last year at the Tulsa meeting. This conference is extremely important to the county secretaries and should even be attended by all other officers of county societies who are present.

All scientific sessions, sections, com-

mercial exhibits and scientific exhibits will be in the Silver Glade room of the Skirvin Tower. As usual, the Councils will meet Monday afternoon and the House of Delegates Monday evening and Tuesday morning.

The scientific sessions and sections will be held as usual on Tuesday and Wednesday, May 20 and 21. Excellent guest speakers will be presented and for the first time each section will have a guest speaker. For the general sessions, the following subjects will be presented:

GENERAL SURGERY—Dr. Earl Garside, Chicago, Ill.

"The Conservative Treatment of Appendiceal Peritonitis"

EYE, EAR, NOSE AND THROAT—Dr. Meyer Wiener, St. Louis, Mo.

"The Significance of Accurate Detailed Ophthalmological Information and Its Interpretation as a Factor in Neurological Diagnosis"

DERMATOLOGY AND RADIOLOGY—Dr. A. N. Arneson, St. Louis, Mo.

"Carcinoma of the Cervix Uteri"

OBSTETRICS AND PEDIATRICS—Dr. James R. Reinberger, Memphis, Tenn.

"The Diagnosis and Treatment of Puerperal Infection With Special Reference to Sulphanilamide"

GENERAL MEDICINE—Dr. Ralph Pemberton, Philadelphia, Pa.

"The Present Status and Treatment of Chronic Arthritis"

NEUROLOGY, PSYCHIATRY AND ENDOCRINOLOGY—Dr. Lauren H. Smith, Philadelphia, Pa.

"Psychiatric Aspects of the National Emergency."

GENERAL INFORMATION

HEADQUARTERS—Skirvin Tower Hotel, Oklahoma City.

REGISTRATION — SILVER GLADE ROOM, THIRD FLOOR, SKIRVIN TOWER HOTEL. All physicians, except those from outside the state, visiting guests, and those on military assignment, must hold membership cards for 1941 before registering. Dues will not be accepted at the meeting except from county secretaries.

Registration will open at 8:00 a. m., Monday.

LE ROY LONG MEMORIAL SERVICE, Monday, May 19, at 4:30 p.m., in the Oklahoma University Medical School.

Women's Program

State Auxiliary Officers

Mrs. W. A. Fowler, president, Norman, Oklahoma.

Mrs. Edw. D. Greenberger, president-elect, McAlester, Oklahoma.

Mrs. A. R. Sugg, vice-president, Ada, Ok-

lahoma.

Mrs. James L. Haddock, secretary, Norman, Oklahoma.

Mrs. O. E. Howell, treasurer, Norman, Oklahoma.

Mrs. C. M. Pounders, convention chairman, Oklahoma City, Oklahoma.

Mrs. W. F. Keller, social chairman, Oklahoma City, Oklahoma.

Mrs. E. P. Allen, historian, Oklahoma City, Oklahoma.

Mrs. Chas. Paramore, parliamentarian, Shawnee, Oklahoma.

CONVENTION PROGRAM

Monday, May 19, 1941

8:00 A.M. — Registration — Lobby Skirvin Tower Hotel.

6:30 P.M.—Pre-Convention Executive Board Meeting. Buffet Supper in the home of Mrs. C. M. Pounders, 904 Northeast 19th Street, Okla. City.

Tuesday, May 20, 1941

8:00 A.M.—Registration.

12:00 Noon — Luncheon at the Oklahoma Club, \$1.00. All visiting ladies are invited to attend.

Please secure your tickets at registration desk. Grady F. Mathews, M. D., Director of the State Health Department, Oklahoma City, speaker. The luncheon will be followed by the Annual Meeting.

3:00 P.M.—Pre-Convention Board Meeting following the General Meeting.

SCHEDULED EVENTS

Monday, May 19, 1941

Registration

8:00 P.M.—Silver Glade Room, Third Floor, Skirvin Hotel.

Oklahoma Pediatric Association

Parlor D, West Balcony, Silver Glade Room Skirvin Tower Hotel

President—Ben H. Nicholson, M.D., Oklahoma City.

Vice-President—G. R. Russell, M.D., Tulsa.

Secretary—Luvern Hays, M.D., Tulsa.

10:00 A.M.—"Allergy."—Herbert J. Rinkel, M.D., Kansas City, Mo.

2:00 P.M.—Business Session.

2:30 P.M.—"Allergy in Relation to Certain Clinical Syndromes."—Herbert J. Rinkel, M.D., Kansas City, Mo.

Golf Tournament

Oklahoma City Golf and Country Club
Hugh Jeter, M.D., Chairman

Registration—All morning; Entrance fee, \$1.00.

12:00 Noon—Teeing off time. Trophies will be awarded. Entrance fee includes everything except caddy fees.

Selective Service Examining Physicians Meeting

General Assembly Hall, Silver Glade Room, Third Floor, Skirvin Tower Hotel

The Case of Private Medicine

This Is the Much Commented upon Article which Appeared in the May, 1940, issue of Nation's Business. Because of its great Interest It Is Reprinted Through Courtesy of the Editors of Nation's Business

Germany, the pioneer, is still the best example of political medicine. A picture of social insurance in that country was given by Gustave Hartz, German labor economist, in 1935.

During Germany's economic crisis, the premium went up from three per cent to 6½ per cent of insured employees' wages. The whole scheme continued to grow and expand its organization until there was one administrative employee for every 200 insured and two of these bureaucrats for each doctor serving the insured. The number of insurance offices rose to 1,100, occupying the finest buildings in many cities and towns.

Sickness Becomes a Bargain

But the worst side of the health insurance feature was its encouragement of hypochondriacs, pretenders and spongers. Those who were paying for insurance and wanted to get their money's worth consulted the doctors several times where once would have sufficed. At one time a comparison showed that four times as much was being spent for doctors' fees and medicine for 35,000,000 insured as for 30,000,000 uninsured. The average length of sickness incapacity per year rose among insured workers from 5.5 to 28 days. The average in the United States, according to the National Health survey, is 9.8 days for all persons not on relief and 16.3 days for relievers.

These abuses became so flagrant that official account had to be taken of them. One group of 2,008 patients who were drawing sickness benefits was ordered to appear at an insurance office for a special examination. Of these, 816 did not appear but went back to work at once. Apparently they had enjoyed an immediate and complete recovery. Of the rest, 289 were pronounced well. More than half the total had been trying to take a rest at the public expense.

The necessity for closer surveillance by the doctors tended to change the doctor-patient relationship into one more nearly resembling that of detective and suspect. Many honest patients lost confidence in their doctors.

In Great Britain the average Government doctor's panel includes about 1,000 names, and that number of patients means, says the American Medical Association, that, in the busy season, the doctor would have to see in his office about 21 patients a day. But some doctors have up to 2,500 names, which would mean a maximum of about 50 visits a day. That is in addition to any private practice the doctor may have, and to all his

home calls. Under these circumstances is there any doubt that much medical service will be of the "lick and a promise" sort? The busy man who goes to see his doctor about a pain in the back had better allow plenty of time for waiting in his office.

The threat of the National Health Program still hangs as a shadow on the land far more sinister than that in Surgeon-General Parran's book of the same title. Only two things have barred its enactment. One is the terrific cost. In itself, of course, this is more of a recommendation than a drawback to the Borrow-Spend-Lend-Scatter school of statesmanship. But its initiation last year would have interfered with other favorite schemes for more munificence to the people, and so the wasters couldn't agree to give it immediate right of way. The other delaying factor is the recalcitrant private practitioners who constitute most of the medical profession. If they continue to stand steadfast they can certainly defeat it.

Behind the Program are issues much bigger than the more concrete questions we have been discussing here. One is the issue of whether a scientific question is to be decided by listening to those professional men who are learned in that science, or by an appeal to the emotion and the cupidity of the mob. We are told that this is the method of democracy.

Social frauds like compulsory health insurance are insinuated under honeyed words about relieving the sufferings of helpless, poverty-stricken people. But an examination of the Wagner Health Bill reveals that the language does not limit its benefits to the indigent or medically needy. It is drawn to apply to every person, whether needy or not. This is deliberate. It anticipates the establishment of universal State medical service for everybody. That is socialism as unadulterated as if it came from the sanctified pen of Karl Marx himself.

Unless Americans want to sign up for all time they should resolutely resist taking any more of these first steps toward regimentation. Once a social insurance scheme is started, there is seldom any turning back. When people have paid into such funds for years they have an interest that persists. No mere change of administration can correct the evil. The German social insurance system, heavy liability that it has proved to be, has survived two revolutions. From empire to republic to Nazi state, none has been able to get rid of it.

(Conclusion)

PRESIDENT'S PAGE

This year, more than ever before, every member of organized medicine should attend the annual state meeting of the Oklahoma State Medical Association in Oklahoma City, May 19-20-21. I want to take time here to urge every member of the Tulsa County Medical Society to make plans to attend at least some if not all, of the sessions on the convention program.

There are many reasons why you should make plans now to attend the state meeting.

YOU NEED to keep abreast of the highly important problems which are facing the medical profession today.

YOU NEED the new scientific knowledge that will be presented in the various papers by the outstanding physicians listed in the program.

YOU NEED the renewal of friendships, the rubbing of shoulders with other practitioners so that you will not get into a rut.

YOU NEED to get away from your practice with all of its exacting details and really do and see something different for a few days.

YOU NEED to visit some of the outstanding clinics and see some of the Oklahoma City physicians at work. There may be a solution to some of your own problems awaiting you.

YOU NEED to go out to the baseball game or to the golf links and know that **YOU** will not be called for an emergency.

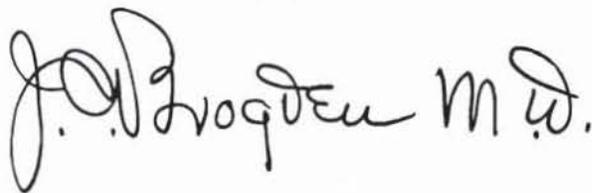

YOU NEED to look over the various exhibits of the pharmaceutical houses and get a better understanding of their products.

YOU NEED the entertainment that will be provided for you and for your wife.

YOU NEED—INSTRUCTION—FELLOWSHIP—FUN.

Knowing the Oklahoma City Medical leaders as I do, I will guarantee you an interesting and entertaining time every minute you are at the convention.

Very truly yours,

President

TULSA COUNTY MEDICAL AND DENTAL ASSISTANTS SOCIETY

Our April meeting should prove one of the highlights of the year. The Dinner Committee, with Madelyn Dermont at its head, quite outdid itself with a grand menu and beautiful table decorations of tulips. Hostesses for the evening were Dorothy Flanagan, Eunice Fly and Lena Trotter. First on the program was an impressive installation of new officers by Maurean Dewey, a former president, and this was followed by the business and interesting reports from all of

the committees. Mr. Bryce Twitty, of Hillcrest Memorial, addressed the members on "The Place of Hospitals in our Community." Mr. Twitty is a very able speaker and we received much valuable information on a topic close to us. (We also received an invitation from him to come out to dinner sometime.)

Members of T.C.M.D.A. participate in many activities together. One of them during the past month was a well-attended weiner roast at which Dr. and Mrs. H. L. Farris were welcome guests. Twenty of our girls will soon be graduating from a Red Cross First Aid class which meets every Friday night. The girls who are knitting sweaters for "Bundles for Britain" will meet next on May 6 at the home of Maurine Hardison. Our bowlers meet for practice each Wednesday evening, and frequently at lunch hour.

Our Executive Board has a very ambitious program for the coming year which we should like to reveal to you from time to time.

"My main desire for the year is to achieve closer cooperation and more recognition from our employers; to acquaint them with our aims and the value of our Society to them in carrying out our twofold program of social fellowship and education."

O. C. Approves Liability Insurance

Special meeting of county representatives and members of state committee to hold special meeting at Oklahoma City during State Society meeting.

The state-wide liability master-policy insurance program received a big boost recently when the special malpractice insurance committee of the Oklahoma County Medical Society reported favorably on the program after an exhaustive investigation, according to Dr. Leo J. Starry who was chairman of the committee.

W. M. Eberle, head of Eberle and Company of Oklahoma City and general agents for Londo and Lancashire, in which company the Master-Policy is written, has invited all members of the state insurance committee and the chairman of local committees in Tulsa, Muskogee, Oklahoma, Washington, Garfield, Pottawatomie and a number of other counties to attend a special luncheon at the Skirvin Hotel, Tuesday noon, May 20, during the state convention, Mr. Hudson, of Tulsa, will present an interesting discussion of malpractice insurance procedure.

Following is the report of the Oklahoma City Committee:

Your Malpractice Insurance Committee, recently appointed, held its initial and organization meeting on March 11, 1941, and presents the following in the nature of a report of the proceedings of that meeting.

ATTENDANCE: In addition to the committee, consisting of Doctors John L. Glomset and Robert L. Noell, there was in attendance Mr. Lloyd Stone, Executive Secretary of the Tulsa County Medical Society, Mr. W. M. Eberle of the Eberle Insurance Company, general agents for the London and Lancashire Indemnity Company, and his associate, Mr. Roger Bainbridge, Mr. Draper Grigsby, the attorney for the insurance company, Mrs. Rascoe, Executive Secretary of the Oklahoma County Medical Association, and the President of the Oklahoma County Medical Association.

TRANSFER—The reason for the transfer of our group policy from the Houston Fire and Casualty Company to the London and Lancashire Indemnity Company, as set out in a letter to all members of this organization over the signature of Dr. James Stevenson, the Chairman of the Tulsa County Med-

ical Society Malpractice Insurance Committee, dated February 27, 1941, was again presented. It is to be noted that approximately 17% of the members of the State Society carried the group insurance in the Houston Fire and Casualty Company, and another 17% carried London and Lancashire individual policies. A combination of these two groups which is conservatively expected will result in an immediate coverage of more than a third of the entire membership of the Oklahoma State Medical Association.

ADVANTAGES OF GROUP COVERAGE—It was set out that the primary advantage of the group policy over the individual policy was a much broader coverage as evidenced by the coverage, including in the group plan, all non-professional assistants. There are many other instances of the Broader coverage of the group plan, which can be learned by comparison of the individual policy with the master policy. Under the group policy only members of the State Medical Society will be covered, thereby removing from consideration the chiropractors, osteopaths and other cultists. The effect of this restriction will be to eliminate a large group whose inclusion in the past has meant an increase in the number of claims, more losses, and in turn, higher premiums. Another advantage lies in the matter of legal advice. Under the London and Lancashire policy this is provided by Mr. Draper Grigsby whose ability many of you are familiar with. He has had a rather long and varied experience in insurance and professional practice. Either Mr. Grigsby or an associate will be in a position to give legal advice at any time with respect to any phase of medical practice which may constitute a threat, or may develop into a claim. This advice, of course, is given without additional cost.

TRANSFER OF POLICIES—Those who now have individual policies under the London and Lancashire Indemnity Company, are to retain such policies just as they are, but each individual doctor will have the advantage of the broader group policy without additional cost. It will be noted that the master policy is somewhat more expensive for surgeons than the individual policy bought on the three year plan. However if the usual annual premium has been paid, the cost is practically the same. This pertains only to the surgeons—the rates for general practice and for x-ray and radium, are considerably

(Continued on Page 17)

Schools Safeguard Students Health

Staff of physicians and nurses at work constantly to find defects through routine examinations; health program provides medical care for indigent students in all public schools.

By Dr. Mabel Hart, School Physician

How grateful we are that still, as one group among others, we can dedicate our talents and our efforts toward building the child life of our community, not for war but for peace and happy living.

The Tulsa Public School Health Department was authorized by an act of the State Legislature in 1937. This act gave to Boards of Education the right to hire Health People and pay them out of school funds. This new act placed certain restrictions on these Health Departments, however. They are not permitted to do any corrective work, no treatments other than First Aid. They are permitted to make examinations of children and to have any manner of consultations with parents. Certain other functions may be assumed at the discretion of the Director in so far as they do not conflict or abrogate rulings or public health practices of State, County or City Health Departments.

The Staff of the School Health Department consists of two physicians, one EEN&T specialist who gives two half days a week, a dental hygienist, a lip-reading teacher who has had special training in the use of the Audiometer, two white and one colored nurses (recently one of the white nurses has had to resign), a trained social worker, and two persons who look after the mechanics of the Department, secretarial work, etc.

There are many persons employed in the maintenance work of the schools and in the cafeterias. These must all have a yearly examination, at least, and as many others as the situation warrants. Several thousand boys of varying ages are taking part in more or less strenuous athletics, swimming, basket-ball, football, track, wrestling, tumbling, etc.

These must be checked thoroughly at least once each year and, too, more often if necessary. Especial attention in these examinations is given to the heart and lungs, however, we attempt to be extremely alert to any defect which may make these activities hazardous.

In these days of unemployment many boys and girls have been called upon to curtail some of their school work and participate in the support of families. Because they are under the legal age of regular employment, they may receive permits for part time employment and part time attendance at school. These permits are issued by the Attendance and Guidance Department of the School. A physical examination is required before they are issued.

These above named responsibilities are delegated to the Assistant School Physician. He also takes care of the major part of the First Aid work and that is considerable where so many thousands of children are so close together.

The work of our nurses is our "front line of defense". It has had to be spread very thin also. Three nurses for over thirty thousand children is covering a lot of ground. Their program cannot be as adequate as we know it should be, but in tribute to their loyalty, I should like to take this opportunity of saying that many, many times they have sacrificed their own well being for children who have been so desperately in need of help.

They make preliminary tests of vision; check as adequately as their training permits, any child referred to them by the principal or teacher or called to their attention by parents or agencies. They make cursory checks as to the sanitary conditions of the buildings, check children with symptoms which might warrant exclusion from school for a time. They act as a clearing house for the

proper disposition of cases in the school, sending them to the proper clinics, agencies, family physicians or school physicians. They assist twice weekly in the tonsil clinics held at the Tulsa County Clinic. When extensive immunization is necessary they cooperate with the nurses of the City and County Health Departments. Morning inspection is made by them of the children in the nursery school at Webster and Will Rogers high schools.

Routine hearing tests with the Audiometer are given to each elementary school child above the third grade every year. Younger children are tested by appointment in the office because, obviously, they cannot always interpret what they hear in writing.

Special equipment is needed for these. Lip-reading classes are formed from these routine findings for those whose parents give their consent.

Detailed examinations of the teeth of all elementary school children are made by the dental hygienist each year. Junior and Senior school students are examined as time permits. Diagrammatic and coded records are made of the dental findings. The dental hygienist from her records makes plans for two extraction clinics a week and one filling clinic. She assists the dentist, also, at these clinics. They are also held at the Tulsa County Clinic where the dentists, as the doctors, are giving so generously of their time. The filling clinic is made possible through a plan sponsored by the Tulsa County Dental Society and the Pilot's Club.

Notices are sent to the parents of the results of the eye examinations, the hearing tests, the dental examinations, tonsil examinations; or any defect which is remedial, that has been found by the staff or the School Health Department. These parents are urged to consult their family physician or dentist. In the event that they are not financially able to do this, they may request aid through this department by signing at the bottom of the notice sent them and returning it to the office at Lincoln School. Permission must be given, in writing, by the par-

ent or legal guardian for any examination, remedial work or first aid care (except in extreme emergencies).

Examinations of the eyes for glasses, and the ears in the cases of defective hearing are made by the specialist at the office at Lincoln School. All money for glasses and for the materials needed in the extraction clinics has been furnished by the Parent Teacher Organizations of Tulsa.

After the specific need is determined, no remedial aid is given, or the proper contacts for same made until the family has been recommended by the social worker. She goes into the homes discussing with the parents their financial abilities and inabilities. She checks carefully the records of the Social Service Exchange. Summing up these evidences she makes her recommendations.

There are other and varied responsibilities which fall upon the Director of the Department. All girls engaged in strenuous activities must be examined each year, there are several thousand of these. This includes white and colored. Lectures in hygiene are given to high school girls. Candidates for the Open Air Rest Rooms, both colored and white are examined by her before entrance. Children who need placement in the Room for Handicapped Children are given a physical examination by her. These children are recommended by the Orthopedists in the City but for matters of record this added examination is given. Examinations for placement in special classes is made frequently, also for placement in the Edison School, although this is not necessarily routine. Children needing free lunches (except those coming under the WPA School Lunch program) are examined by her. The Federal Nursery School children are examined yearly (except the Negro). Several hundred children referred to the Central Guidance Council of the Tulsa Public Schools are examined also, each year. So often there is a physical condition contributing in large measure to their difficulty.

Children entering school for the first time the following year are given exam-

Oklahoma City Approves Insurance Plan

(Continued from Page 13)

lower than the individual policy. The group insurance can be purchased through the local agent or broker just as the individual policy has been purchased in the past.

PLAN RECOMMENDED—The insurance representatives emphasized repeatedly their desire to reduce the cost of the insurance. This cost is entirely in the hands of the medical profession. It may be reduced by reducing the claims, and the subsequent losses. The insurance company representatives took occasion to point out that unless a doctor can be found to testify against another doctor, no suit would be filed. The more doctors throughout the state who have the group policy, the less of such testimony is to be expected, therefore there will be fewer claims, smaller losses, and likewise smaller premiums. The experience of the past two years of the Houston Fire and Casualty Company where only one claim was filed costing \$90.00, if continued over a period of three years would reduce the basic premium to as low as \$16.00. The company is much more vitally interested in the loss ratio than they are in the amount of the premium. In the state of Kansas, the loss ratio is such that the surgeons rate is down to \$20.00 in the London and Lancashire Indemnity Company. It is within the memory of the majority of the members that we formerly paid the basic rate of \$75.00, and it was London and Lancashire who came in and reduced the rate to \$33.50. Some of our members are still paying \$75.00 for protection. It might be well to review the premium rates which will be in effect under this master policy plan. For the limits of \$10,000 and \$30,000, the cost to general medicine is \$27.50; surgeons \$33.50, and to those who use radium and x-ray, \$41.50. You no doubt know that additional coverage in amounts up to \$30,000 and \$90,000 may be obtained with an increase of premium for such amounts. In general, one might say that the amount of coverage required depends on the net worth of the individual who is buying the protection.

RECOMMENDED PROGRAM—The program which has been recommended is to have one meeting each year devoted to the education of the members of the County Medical Society in the matter of malpractice insurance. We are assured of the cooperation of the insurance company, their adjustors and the legal staff. Since every county of the state is not large enough to have a malpractice insurance committee of their own, it has been thought it would be well to consider having members of the committees which are active to appear before other county society meetings in an effort to ex-

plain the advantages of group insurance.

Respectfully submitted;
LEO J. STARRY, M.D.
Chairman,
JOHN L. GLOMSET, M.D.
ROBERT L. NOELL, M.D.

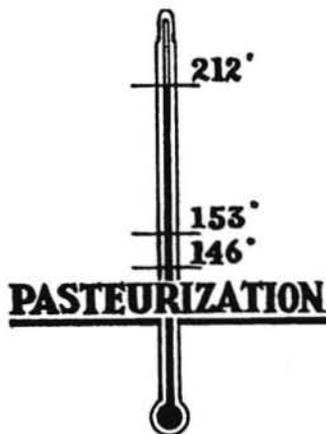

(Continued from Page 15)

inations with the parents present, through the Parent Teacher Summer Round-Up plan. Any child referred by any individual or agency is given a complete examination, as many of these are made as time permits. There are many, many requests for health talks which she must fill. From time to time plans are made for the showing of health films, puppet shows with health themes, and cooperation with other groups in giving health plays.

Holding together all of the ends, planning for progress and greater service, cooperating to the utmost with all other health agencies, to keep abreast of all that is new and fine in school health service, to give all aid possible to other than health agencies, in fact to dedicate all working hours to the one ideal of making this community one in which children are safe and secure, this is the creed of the Director (in all humility).

Before closing I should like to mention that there are classes for those with speech defects, a class for those with practically none or no hearing, plans for children needing it to rest in many of the schools, transportation is furnished for the children in the room for Physically Handicapped whose parents cannot provide this, physiotherapy treatments are made possible to these children by a representative of the State Crippled Children's Commission.

Closing, I should like to give grateful recognition to the Tulsa County Medical and Dental Societies, Crippled Children's Commission, Society for the Hard of Hearing, Pilot's Club, State, County and City Health Departments, Parent Teacher Organization, Auxiliaries of the Medical and Dental Societies, WPA in many of its functions, NYA, Community Fund Agencies; for these have made it possible for our services to be more effective.

 185°F. Milk Scalds
 160°F. Cooking Begins
 145°F.
 142°F.

PASTEURIZATION

139°F. Tuberculosis Killed
 137°F. Typhoid and Undulant Fever Killed
 134°F. Scarlet Fever, Streptococcic sore Throat and 27 Strains of Streptococci Killed
 131°F. Diphtheria Killed

How about Tulsa?

DO YOU KNOW THAT—

1. In the past 5 years in 5 private hospitals of Kansas City, Missouri, there were 104 diagnosed cases of undulant fever?
2. There were—
 - 5 cases in 1936
 - 13 cases in 1937
 - 20 cases in 1938
 - 31 cases in 1939
 - 35 cases in 1940
3. Roadside milk stands are capable of spreading the majority of undulant fever?
4. Pasteurization of milk and milk products destroys the bacteria of undulant fever?
5. Kansas City, Missouri does not have a compulsory pasteurization ordinance and is the largest city in the U. S. which does not?—Jackson Co. Med. Bulletin.

Here is the

OKLAHOMA GROUP

Liability Insurance!

✓ This is the most liberal malpractice insurance policy ever offered the medical profession in this state. It covers all the usual malpractice risks, with other features to be found in no other policy.

✓ More than 300 physicians and surgeons in Oklahoma are now embraced in this plan, which gives doctors complete protection at drastically reduced rates on what is practically a cost-plus basis.

OKLAHOMA GROUP
LIABILITY INSURANCE

is written and offered by

London & Lancashire

State Office in Terminal Bldg.
Oklahoma City

✓ For Professional Liability insurance which really gives you protection — call your own insurance agent; ask the Secretary of your local County Medical Society; or write the Executive Secretary of the Oklahoma State Medical Association for complete information.

DR. AND MRS. H. LEE FARRIS went to Austin, Texas where they picked up Hansford Lee and went to New Orleans where they attended the Easter Services and visited the old French colony.

DR. M. O. NELSON and wife attended the Opera in Dallas.

DR. B. L. BRANLEY'S little daughter fell out of a tree and broke her arm.

DR. R. G. SHERWOOD won two cans of Nash's Coffee over the radio, and DR. BROCKSMITH would have if he had of been at home.

DR. K. C. REESE won first prize at the Golf Tournament and DR. BRASWELL won the second prize.

DR. M. P. SPRINGER has been brushing up quite a bit on his golf lately.

DR. R. G. SHERWOOD, active in the Optimist club's programs here, was named the governor of the seventh district, Optimist International, at the district convention in Fort Worth. He is associated with the organization of the junior Optimist clubs at the Mohawk and Tulsa boys' homes.

DR. AND MRS. ALBERT COOK have gone to Louisville to attend the Kentucky Derby. They will be gone 4-5 days.

DR. FRANK STUART spent a few days in Memphis.

DR. A. W. PIGFORD spoke on the campaign against cancer at the Junior Chamber of Commerce luncheon April 29 and DR. J. D. SHIPP spoke before the Ladies Democratic Precinct

club, and DR. J. E. McDONALD spoke before the Kiwanis club Monday April 28.

DR. BROGDEN'S wife fell last week and broke her arm.

Young Mother: "Nurse, what is the most difficult thing for a young mother to learn?"

Nurse: "That other people have perfect children, too."

You can always tell a Yankee down below the Mason and Dixon line . . . he is the one who puffs out his chest when someone calls him "Colonel."

A great number of men are called materialists who never manage to acquire much material.

"Poor guy, he certainly has all kinds of trouble. He got himself an automobile, and it blew up. Then he got himself an airplane, and it blew down."

A true music lover is a man who, upon hearing a soprano in the bathroom, puts his ear to the keyhole.

Caution in Opening Medical Accounts Assures Prompt Payment

A Few Easy Questions That Will Obtain Valuable Information:

1. Is your present address new?
2. What do the Husband's and Wife's initials stand for?
3. The account will be due each month or when the services are completed. Is this satisfactory?
4. With what other physicians do you have credit established? (This question will obtain information to secure Medical Credit experience.)
5. Have you followed your present occupation for some time, and how long have you been with your present employer?

If the Patient Is a New Resident of the City:

1. What occupation did you follow at your former address?
2. With what physician had you established credit?
3. What was your former address and how long did you reside there?

People asking for credit expect to give information. Obtaining answers to these questions will impress the patient with their responsibility and will help to check Medical Credit and your secretary in securing prompt payment of accounts.

Use your Bureau for those slow and doubtful accounts. Call us about Medical Credit information on your new patients. 10,000 names are listed in our files.

Library Notes

E. Rankin Denny, M.D., Chairman
 Veneta Barlow, Librarian
 David V. Hudson, M.D.
 Thomas H. West, M.D.

If you think our Library isn't growing a glance at the following figures, will show you that we are getting out of the infant class, and are almost ready to hold our heads up. We had nearly one-hundred visitors, received fifty telephone calls, and loaned sixty books and journals during the month of April.

We received some nice donations last month, which we greatly appreciate and hope will continue. Dr. M. O. Nelson is donating his 1941 issues of the "Journal of Investigative Dermatology"; the library has this Journal complete for the years 1938 and 39 and would appreciate the 1940 issues. Dr. Fred Bolton gave us Appleton's "Gynecological and Obstretrical Monographs" as well as current issues of "The Archives of Surgery" and "American Journal of the Diseases of Children". Dr. R. C. Pigford gave us Nelson's Loose Leaf Living Medicine", which if it could be brought up to date would be a valuable asset to our Library.

We also have two new books the donor preferring to remain anonymous. These are "Laboratory Diagnosis of Syphilis" by Harry Eagle, M.D. 1937 and "Year Book of Dermatology and Syphilology" for 1938.

Most men acquire the fullness of their Education after they leave college and enter the "University of Experience". It is here that those who succeed make the reading of Scientific books a habit.

RADIO SPEAKERS for April were: Doctors H. Lee Farris, Marvin D. Henley, Mont. V. Stanley and H. Lee Farris.

RADIO SPEAKERS for May are: H. Lee Farris, M. J. E. McDonald, Ned R. Smith, J. L. Miner and Marvin D. Henley.
