TRI-CALSATE *the buffered gastric antacid*

The nucleus of the peptic ulcer problem lies in the neutralization of excess HCl in the stomach contents by an antacid that will meet the requirements of real physiologic and therapeutic economy. TRI-CALSATE has these advantages:

1. TRI-CALSATE neutralizes the HCl of the gastric contents and desensitizes the pain producing mechanism.
 2. There is no evolution of carbon dioxide during the reaction in the stomach, hence the distress from gastric distention and belching is eliminated.
 3. It does not make the gastric contents alkaline.
 4. The possibility of the development of alkalosis is minimized.
 5. The probability of gastro-intestinal irritation is remote.
 6. It does not injure the kidneys.
 7. It is palatable and convenient to take.
- Approx. percentage composition when in aqueous suspension:
- | | |
|---|-------|
| Tri-calcium phosphate U.S.P. | 35.5 |
| Tri-sodium phosphate crystals
(arsenic free) | 12.5 |
| Sodium citrate crystals | 52.0 |
| | 100.0 |

Available on Rx in 4½ oz. and 18 oz. bottles.

Write for trial package and literature.

CHARITY HOSPITAL PROSPECTS GOOD

Tulsa County Commissioners Endorse Recommendation For Construction Of Million Dollar Charity Hospital. Ways And Means Committee To Study Financing Problems.

Tulsa's prospects for a city-county charity hospital, much needed to alleviate a numerical shortage of hospital beds, brightened considerably last month as two members of the Tulsa County Board of County Commissioners promised support of the project. Commissioners J. B. Gray and Curtis Greer assured Tulsa County Medical Society leaders that the County Commission was willing to call a bond issue to finance construction of the hospital although warning that maintenance remained a financial problem yet to be solved.

The unofficial expression of the Commission's sentiments came after a lengthy discussion of the hospital situation at a public meeting at the Tulsa Chamber of Commerce last April 4. At that time, invited leaders of civic, governmental, and professional groups met with the Hospitals Committee of the Tulsa Chamber of Commerce—Tulsa County Medical Society to hear Chairman Oakah L. Jones make a positive demand that the project be supported or entirely dropped. Mr. Jones told a large group present that the doctors and lay leaders represented on the joint committee were at the end of their work unless community support for the project was forthcoming. "We have made our recommendations for a 200-bed charity hospital and for certain other hospital facilities after months of study and in answer to a public request for such information," Jones said. "Unless we now receive the public support necessary to prosecute the project, we

must consider our obligation fulfilled and our work at an end. We cannot carry this load alone."

In the discussion which followed, an almost unanimous endorsement and promise of support came from the many civic and governmental leaders present. Commissioner J. B. Gray asserted that no doubt existed as to the need for the hospital and other hospital facilities but expressed the doubt that adequate financing for maintenance of the hospital could be arranged. "We can call a bond issue, and I believe the voters of Tulsa County will authorize the issue to raise the necessary funds for construction," Mr. Gray said, "but I am not sure of the method of raising the necessary operating expenses each year." Another commissioner, Curtis Greer, expressed the belief that ways and means of financing the hospital could be found once the structure was built.

Dr. Frank J. Nelson, co-chairman of the joint investigating committee, told assembled leaders that the Committee had secured blueprints and estimates of cost of construction from the United States Public Health Service. A hospital of the desired character can be constructed for approximately \$1,250,000.00, Dr. Nelson said. In answer to several questions, he outlined measures whereby the estimated annual operating cost of \$300,000.00 could be pared to a net \$200,000.00. These included the following suggestions:

(1) Inclusion of the Tulsa County

Medical Clinic as the outpatient department of the projected hospital.

(2) Combination or consolidation of city and county public health services as a means of effecting a considerable savings.

(3) Income from treatment or hospitalization utilizing the tuberculosis, mental, or contagion wards of the hospital.

Mr. Jenkin Lloyd Jones, editor of the *Tulsa Tribune*, injected a sound note into the discussion with the suggestion that additional income might be derived from part-pay patients. Jones criticized the present system of dividing pay and charity patients arbitrarily and making no provision for that group that might be able to pay a portion of the cost of their medical care. In a subsequent newspaper editorial, Jones supported the need for additional hospital facilities but suggested "proper safeguards" to prevent the proposed charity hospital from becoming a burden to taxpayers. Among his suggestions were that patients from outside the county pay their costs of care, and that the hospital be not designated as a home for old age pensioners with no ills other than senile infirmities. Members of the *Tulsa County Medical Society* joined with the editor in support of these contentions.

To further advance the project, Co-chairmen Oakah L. Jones, representing the

DR. CALDWELL TO SPEAK

Tulsa's critical shortage of hospital beds will be the subject of an address by Dr. Bert Caldwell, nationally known hospital authority and former president of the *American Hospital Association*, speaking before the open forum of the *Tulsa Chamber of Commerce* next May 10. Dr. Caldwell will report on the results of his recent survey of hospital facilities in *Tulsa and Oklahoma*, a report which recognized the need of 650 additional beds in *Tulsa County*. Luncheon will be served at 12:00 Noon in the fourth floor dining room of the *Tulsa Building*. All *Tulsa* doctors are especially invited to attend.

Tulsa Chamber of Commerce, and Dr. Frank J. Nelson, representing the *Tulsa County Medical Society*, announced the creation of a *Ways and Means Committee* to study the problems of financing the project. In addition to Dr. Nelson, the new Committee will include Dr. James Stevenson as a member and Jack Spears, Executive Secretary of the *Tulsa County Medical Society*, as a committee secretary.

Among the leaders attending the hearing were Dr. John C. Perry, president of the *Tulsa County Medical Society*; County Commissioners J. B. Gray and Curtis Greer; George H. Stoner, *Tulsa* city street commissioner; Jenkin Lloyd Jones, editor of the *Tulsa Tribune*; Charles Follansbee, representing the *Oklahoma Crippled Children's Commission*; Dr. Homer A. Ruprecht, Dr. Ralph A. McGill, Dr. Fred E. Woodson, and Dr. James Stevenson, all of the *Tulsa County Medical Society*; Dr. R. M. Adams, city health superintendent; Lee Erhard, managing editor of the *Tulsa World*; Arthur Lewis, of the *National Bank of Tulsa*; Oakah L. Jones, chairman of the *Tulsa Chamber of Commerce Civic Department*; Lee Harrington, *Tulsa* clothier; Friendly Ford, executive secretary of the *Tulsa Council of Social Agencies*; Roger V. Devlin, *Tulsa Tribune* columnist; Jack Spears, executive secretary of the *Tulsa County Medical Society*; Preston V. Kors, manager of the *Tulsa Chamber of Commerce Civic Department*; and Dr. Frank J. Nelson, chairman of the *Hospitals Committee* of the *Tulsa County Medical Society*.

During the course of the meeting, Mr. Charles Follansbee, prominent young *Tulsa* attorney representing the *Oklahoma Crippled Children's Commission*, said that the Commission was prepared to spend between \$30,000 and \$50,000 to equip a ward in the new hospital for the care of polio victims. Follansbee said the Commission could not underwrite any funds for any general construction but said a ward of perhaps four beds could be completely equipped and staffed with an employed physiotherapist.

Cancer of Colon and Rectum. Its Diagnosis and Treatment, second printing. By Fred W. Rankin, M. D., and Stephens Graham, M. D. 358 pages. Illustrated. Charles C. Thomas Publishers, Springfield, Illinois. 1945.

Although only a small volume, yet comprehensive, the second printing of this book gives evidence of its value. Legibly written in a free and easy style, excellently illustrated, it is a distinct contribution to the literature on cancer. The book is divided into three parts; the first part concerns the anatomy, the physiology, pathology, etiology and diagnosis of cancer of the colon and rectum; the second part the operability and prognosis of carcinoma of the colon and rectum; the third part, the operative procedure in surgery of the colon, recto-sigmoid, rectum and anus is depicted. The Rankin operative technic is described clearly step by step. The advantages and disadvantages of radiotherapy in treatment is well written by Fred M. Hodges, M. D. Possibly no other surgeon today has accumulated such a wealth of information pertinent to this one subject, as has Dr. Rankin, and he gives the benefit of his knowledge to the profession in a most enlightening manner in this compact text. This book may be found in the library, for your convenience.

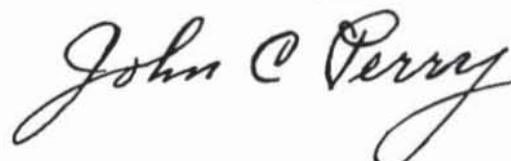

NEW JOURNAL RECEIVED

The United States Naval Medical Bulletin, volume 45, 1945 has been presented to the library by Dr. Joe T. Trimble. Dr. Trimble will give this journal to the library currently, which will add to the ever increasing number of periodicals received.

PRESIDENT'S PAGE

One of the most enjoyable features of the annual convention of the Oklahoma State Medical Association each year is the opportunity of renewing our friendship and acquaintance with the physicians who fill such a vital need in the smaller towns and rural areas of Oklahoma. Here in Tulsa, where the practice of a medical specialty is the rule, we are inclined to forget the demands made upon our so-called "country doctors" by their widely scattered practice. Most of these men are faced with the necessity of practicing without adequate hospital or laboratory facilities, sometimes without so much as another doctor for consultation in cases of need. They must keep abreast of the medical progress in all fields for most are general practitioners—the men who must do obstetrics one moment, dermatology the next, and internal medicine in a third, and so on. The remuneration is sometimes good, too often a poor living. However, in meeting these men, especially in their own offices as is too seldom the case, I get the impression that they are much closer to their patients than we here in Tulsa. I feel certain that they enjoy a stature and respect that is not so easily distinguishable in the big city. These men are perhaps a vanishing group, but they remain nevertheless a monument to medical progress, a representation of the pillars of the profession. It has been my intention to pay them tribute, and I am happy to take this opportunity of saluting their fine work and invaluable contribution to the public health and welfare of the communities which they serve.

Sincerely,

President

SPASTIC SCHOOL CLINIC PLANNED

Oklahoma Crippled Children's Commission Will Inaugurate Spastic Training Program Here Next September. Project Endorsed By Tulsa County Medical Society At April 5 Meeting.

Increased opportunities for the treatment and physical training of spastic children in the Tulsa area were seen last month as the Oklahoma Crippled Children's Commission announced plans for the creation of a permanent school clinic for spastics next September at Tulsa's Lincoln School. As presently proposed the clinic would offer a program of normal education, physical training, physio-therapy, occupational rehabilitation or training, and specialized medical supervision and treatment. The project was quickly endorsed by the Tulsa County Medical Society with many local physicians expressing interest in the proposals.

The proposed school clinic for spastic children is an outgrowth of certain investigations of the spastics situation in the Tulsa area as made by the Tulsa Council of Social Agencies and the City Schools Health Department. The two latter groups are joining with the Oklahoma Crippled Children's Commission in sponsoring the school. It is believed that arrangements can be made to care for a large number of spastic children at the school although certain rules of admission must yet be created.

A trained physio-therapist will be employed for the school, and it is hoped that an occupational therapist may be employed later. The medical supervision of the clinic is to be under local Tulsa physicians who are interested in spastic problems. As with the present program of the Oklahoma Crippled Children's Commission, such physicians will either donate their services or receive only a most nominal fee.

Mr. Joe N. Hamilton, executive secretary of the Commission, stated last month that as many physicians as could be qualified in spastic medicine would be brought into active participation in the project. He called attention to the fine work done by many Tulsa orthopedists and pediatricians in the Commission's

present programs and expressed the belief that their interest in spastic problems would be quickly demonstrated. Mr. Hamilton said he had been advised that a young physician now doing specialized postgraduate study in spastic problems in the East would locate in Tulsa for private practice next Fall, and that the Commission had been encouraging the studies of this doctor in spastic medicine. Mr. Hamilton said that it was most likely that the Commission might give similar encouragement to Tulsa physicians wishing to do postgraduate medical study in the treatment of spastics.

Many operative details of the school must yet be worked out. It will not be possible to take all spastics and some limitations must be devised. These limitations will probably be set as to ability of the child to perform physical needs, age, and mental intelligence quotient.

The Board of Trustees of the Tulsa County Medical Society, meeting April 5, gave endorsement of preliminary details of the plan and offered the cooperation of the membership in placing the plans into operation. In a letter to the Tulsa Council of Social Agencies advising of the endorsement, Dr. John C. Perry, Society president, termed the proposed clinic a partial answer to Tulsa's need for facilities for spastics training and medical supervision. Dr. Perry attacked certain lay groups in Tulsa who had asserted that treatment of spastics was not a medical problem, terming such statements "irresponsible" and as being "nothing farther from the real truth." Other Society officials stated that the proposed clinic represents "a step in the right direction" although acknowledging that much remained to be desired in present methods of spastic training.

Meeting late in March, the Tulsa Council of Social Agencies gave approval to the Oklahoma Crippled Children's

Medical Calendar

WEDNESDAY, May 1st:

Annual convention of the Oklahoma State Medical Association opens at the Skirvin Towers Hotel in Oklahoma City, extending through Friday, May 3rd.

FRIDAY, May 3rd:

Holders of Group Hospital Service, Blue Cross Hospital Insurance, policies in the Office Assistants Group are reminded that quarterly premiums are due by Saturday, May 11, 12:00 Noon.

MONDAY, May 6th:

Hillcrest Hospital Staff Meeting.

TUESDAY, May 7th:

Medical Broadcast, "Healthful Recreation In The Public Parks," Radio Station KOME, 3:30 p. m. Speaker, Miss Lois O'Connell.

FRIDAY, May 10th:

Board of Trustees Meeting, Tulsa County Medical Society, Mezzanine of Medical Arts Coffee Shop, 1:00 p. m.

SATURDAY, May 11th:

Final date for Office Assistants Group to pay quarterly premiums for Blue Cross hospital insurance. Pay at Tulsa County Medical Society offices.

TUESDAY, May 14th:

Medical Broadcast, "Planning For Parenthood," Radio Station KOME, 3:30 p. m. Speakers: Dr. W. A. Dean and Mrs. Charles D. O'Hern.

FRIDAY, May 17th:

Bulletin Committee Meeting, Tulsa County Medical Society, Mezzanine of Medical Arts Coffee Shop, 1:00 p.m.

SATURDAY, May 18th:

Copy deadline for the June issue of The Bulletin.

MONDAY, May 20th:

St. John's Hospital Staff Meeting.

TUESDAY, May 21st:

Medical Broadcast, "The Diet Of The Pregnant Mother," Radio Station KOME, 3:30 p.m. Speaker to be announced.

FRIDAY, May 24th:

Board of Trustees Meeting, Tulsa County Medical Society, Mezzanine of Medical Arts Coffee Shop, 1:00 p.m.

MONDAY, May 27th:

Tulsa County Medical Society, Scientific Program, Mayo Hotel, 8:00 p.m. Speaker, Dr. T. E. Jones, proctological surgeon, Cleveland Clinic, Cleveland, Ohio. Subject: "Surgical Management and Diagnosis of Lesions of the Colon."

TUESDAY, May 28th:

Medical Broadcast, "Health Supervision of Infants," Radio Station KOME, 3:30 p.m. Speaker: Dr. G. R. Russell.

THURSDAY, May 30th:

The Executive Offices will be closed all day in observance of Memorial Day.

DR. T. E. JONES SPEAKER AT MAY 27 PROGRAM

Dr. Thomas E. Jones, nationally known proctological surgeon of Cleveland Clinic at Cleveland, Ohio, is to be the guest speaker at the May 27th scientific program of the Tulsa County Medical Society, it has been announced. Dr. Jones' subject will be "Diagnosis and Surgical Management Of Lesions Of The Colon." His appearance here will close the Spring programs of the Society, which will recess until September 23, 1946.

Dr. Jones is chief surgeon of the Cleveland Clinic Foundation and a widely read author of obstetrical, proctological, and surgical subjects. He is a fellow of the American College of Surgeons, a member of the American Surgical Association, a member of the American Association of Obstetricians, Gynecologists, and Abdominal Surgeons, as well as local, state, and national medical societies.

The program will be held at the Mayo Hotel at 8:00 p.m. A large attendance is expected to include many physicians from neighboring towns in Eastern Oklahoma. Tulsa County surgeons will entertain Dr.

Jones with a small dinner preceding the meeting, although there will be no general membership dinner.

Scientific programs will be discontinued through the summer months, resuming September 23 with the appearance of Dr. Raymond W. McNealy, Northwestern University School of Medicine surgeon.

THIRTEEN TULSA DOCTORS PRESENT CONVENTION PAPERS

Members of the Tulsa County Medical Society presented a number of excellent scientific papers at the annual meeting of the Oklahoma State Medical Association in Oklahoma City last May 1-3. Speakers and their subjects included:

Dr. J. W. Rogers, "Syphillis In Private Practice."

Dr. Joseph Fulcher, "Unusual Pyelograms."

Dr. James Stevenson, "Unusual Manifestation of Erythema Multiforme."

Dr. Thomas R. Turner, "Myanthenia Gravis."

Dr. E. O. Johnson, "Management Of Uterine Fibroids."

Dr. D. L. Garrett, "Surgical Lesions In Children."

Dr. Ralph A. McGill, "Carcinoma Of The Corpus Uteri."

Dr. George R. Russell, "Brucelosis In Children."

Dr. Samuel Goodman, "Survey Of The Pneumonias."

Dr. E. Rankin Denny, "Periarthritis Nodosa."

Dr. Felix R. Park, "Diagnosis And Treatment Of Cardiac Emergencies."

Dr. A. B. Carney, "Kronlein Technique In Gastric Resection Of The Stomach."

Dr. B. H. Blocksom, "Traumatic Urology."

Discussants of papers presented included Dr. Eugene G. Wolff, Dr. Henry S. Browne, Dr. M. O. Nelson, Dr. H. A. Ruprecht, and others

THE WAY AHEAD

Much attention has recently been given by American doctors as to the desirability of spending increased sums of money in public relations programs designed to protect medical and professional interests. The seriousness of the current threat of the socialization of the medical profession via national legislation had awakened many doctors as to their laxity in defending their own individual rights. There is no doubt that much of the support for such proposals as the current Wagner-Murray bill stems from misinformed or uninformed persons, but it is also true that these people are uninformed through failure of the medical profession to properly acquaint them with true facts. A program of public education of this character is going to be costly. There is no doubt but that a definite need for such programs exist. The profession has been too complacent in evaluating its public responsibilities along this line. It has also been inclined to hide behind the protection of medical ethics in shunning publicity in praise of its own accomplishments. As a result, the American medical profession, which has a wonderful record of achievement, is being criticized for negligence by a public acutely uninformed of the profession's commendable record in providing the finest medical care in the world.

We are living today in an age when the rights of any individual group is protected by unified efforts of the members of the group. Powerful labor unions have risen to power, and in management and capitalistic circles equally powerful organizations. Whole industries have created efficient lobbying interests that operate effectively but at large cost. Unfortunately, this has not been true of the medical profession, and for that reason the profession has become the victim of the professional politician and those groups who would subjugate it for personal profit.

Far-seeing medical leaders, which includes those of the Tulsa County Medical Society, can recognize no course except an increased state of effective medical organization backed by an adequate budget to properly promote a much-needed public relations program. Tulsa doctors long ago foresaw the advantage of such organization in the creation of their own Executive Offices and with the employment of an Executive Secretary. They have received immeasurable benefits from the small amount of dues which they pay each year. The need is for more and more such Executive Offices, operating under the supervision of recognized medical leaders. Such programs are the salvation of the profession for they tend to stimulate medical thinking and to devise the answers to the multitude of problems confronting the American doctor.

As to the question of putting more money into public relations, that appears to be one which can have but one answer. However, it should be correctly determined if the money is being spent wisely and if the profession receives value for its money. Medicine is now at the bottom of the list of industries and professions as to the amount of money spent in protection of self-interests, especially in relation to the average medical incomes throughout the nation. It has recently been observed that in the majority of professional medical and dental buildings throughout the nation, the operators of the elevators in those buildings pay more to a union to make an estimated \$30.00

New members of the Tulsa County Medical Society elected at the meeting of April 22 are: DR. HERSCHEL J. RUBIN, Pediatrics, 1102 Medical Arts Building, and DR. ALBERT W. WALLACE, internal medicine, Springer Clinic. Applications pending include DR. LOWELL STOKES, general practice, 517 Medical Arts Building, and DR. WALTER F. SETHNEY, pediatrics, 2828 E. 15th Street.

DR. CHARLES H. HARALSON has returned to his office after an illness of several weeks.

DR. RUSSELL C. PIGFORD, recently returned from service with the United States Navy, has taken offices at 201 Stanolind Building, Tulsa.

DR. STUART W. DITTMAR has removed his practice to West Virginia.

Recent speakers on the Tulsa County Medical Society radio broadcasts have included DR. H. A. RUPPRECHT, DR. RALPH A. MCGILL, DR. H. LEE FARRIS, and DR. W. C. ELLER.

Named as chairman of the Annual Golf Tournament Committee was DR. MARVIN D. HENLEY, serving with DR. R. Q. ATCHLEY and DR. HENRY S. BROWNE.

DR. JOHN C. PERRY, president of the Tulsa County Medical Society, and the Executive Secretary presented a mock hearing on the Wagner-Murray Bill before the Bristow Lions Club last April 10.

DR. BERTHE MARGOLIN LEE and DR. J. K. LEE are now in residence at 1344 E. 17th Pl., Tulsa.

DR. ALBERT COOK is vacationing in Kentucky prior to a South American trip.

DR. HENRY A. BROCKSMITH, discharged from the United States Army Medical Corps in April, has taken offices at 1307 South Main Street, Tulsa. He will specialize in internal medicine.

DR. H. B. STEWART was chairman of the medical division in the recent drive of the Oklahoma Division of the American Cancer Society.

NSN ALUMNI OUTING

The Tulsa alumni of Nu Sigma Nu medical fraternity were guests of Dr. H. D. Murdock at an all-day outing on Grand Lake last April 11. Members of the fraternity enjoyed a lengthy cruise on the Lake in Dr. Murdock's cabin cruiser, adding to their enjoyment with a delightful luncheon served at mid-day. In addition to Dr. Murdock, the Nu Sigma Nu members in attendance were Dr. Maurice J. Searle, Dr. D. O. Smith, Dr. Thomas B. Coulter, Dr. B. H. Blocksom, Dr. Robert E. Funk, and Dr. Walter E. Brown. Guests included Dr. A. Ray Wiley, Dr. A. J. Love of Claremore, and the Executive Secretary of the Tulsa County Medical Society.

SPASTIC SCHOOL

(Continued From Page 11)

Commission's proposal, offered Council facilities for the prosecution of the project. At the same meeting Council officials considered a suggestion that the Milton H. Berry Foundation, a private organization maintaining non-medical programs of treatment for spastics, be given endorsement in its efforts to locate a school in Tulsa. Mr. H. B. Dowell, president of the Council, termed the Berry school as "unsatisfactory" and reported that the adverse results of an investigation of the school, its methods of operation, treatment, and background did not permit the Council to consider it further as an answer to the spastics problem. The Berry school, presently under the auspices of the Tulsa Junior Chamber of Commerce, has been widely condemned and subject to much adverse criticism. It does not recognize that medicine has any place in the treatment of spastics, and despite a non-profit basis of incorporation operates at unusually high costs to the individual patient. At the end of April, it appeared that the Tulsa Junior Chamber of Commerce would continue its support of the Berry school despite the unfavorable reports.

In an effort to locate all spastics in Tulsa County, the Tulsa Council of Social Agencies is requesting all Tulsa County

Tulsa, Okla.

that attitude is sealing the doom of the profession with the inevitable state medicine.

What do you think, doctor? This editorial is written to stimulate your thinking on the subject. It is not written to advocate the increasing of the dues of the Tulsa County Medical Society, but is written to definitely suggest that the entire American medical profession must financially support a sound program to protect its rights as guaranteed by the American Constitution.

GOLF TOURNAMENT SET

As The Bulletin went to press plans were being made for the annual Spring golf tournament and supper of the Tulsa County Medical Society to be held at Indian Hills Country Club on Thursday, May 9. In the event of a change of these present plans, members will be notified of the correct date and location by mail.

The physicians who are partners in Springer Clinic last month announced the purchase of the Springer Clinic building, 604 S. Cincinnati.

For Children

NEO-CULTOL* provides corrective therapy in intestinal stasis, promoting normal elimination without discomfort and without resort to the "cathartic habit."

This preparation readily implants a strain of *Lactobacillus acidophilus* . . . providing an aciduric intestinal flora . . . favoring normal colonic function. Neo-Cultol is a suspension of viable *Lactobacillus acidophilus* in a chocolate-flavored mineral oil jelly whose composition is adjusted to give mild lubrication without leakage. Its chocolate flavor readily appeals to children.

To correct intestinal stasis in children, prescribe

NEO-CULTOL

REG. U. S. PAT. OFF.

Lactobacillus Acidophilus in a Refined Mineral Oil Jelly Chocolate Flavored
Dosage: One to 2 teaspoonfuls at night on retiring.
Supplied: In jars containing 6 ounces.
