THE need for supplementary amounts of vitamins to maintain essential vitamin balance varies in accordance with the patient's dietary restrictions and habits and such contributing factors as pregnancy, wasting diseases, and the anemias. Prophylaxis is assured by optimal quantities of each of the six water and fat-soluble vitamins contained in one Gelseal 'Multicebrin' (Pan-Vitamins, Lilly). In addition, each Gelseal 'Multicebrin' contains significant amounts of two other important factors, considered to be essential to health, for which optimal requirements have not been definitely established. Two to five Gelseals 'Multicebrin' daily are indicated when multiple vitamins in particularly high potency are desired.

Supplied in packages of 100 and 1,000.

NAVAL RESERVE MEDICAL POST OPEN

Advantages of Membership in Tulsa Organized
Naval Reserve Outlined. Medical Officer Billet In
Marine Corps Unit Also Available.

The Organized Naval Reserve of Tulsa, now rapidly attaining a full complement of 600 officers and men, last month announced that one billet for a medical officer was available to a qualified applicant. A rank of Lieutenant (Junior Grade), Lieutenant, or possibly Lieutenant-Commander is being offered. This billet will augment the present medical department of one senior medical officer and fifteen hospital corpsmen.

The Organized Marine Corps Reserve, a parallel organization now being created in Tulsa and Oklahoma City, has one available billet of senior medical officer in the Tulsa unit. The rank to be offered will extend through all grades up to and including Commander.

To be eligible for appointment to these billets, a doctor must be a member of the regular United States Naval Reserve. Any physician interested in the post, who is not a veteran, must first be commissioned in the Reserve before making application.

The medical department of the Organized Naval Reserve of Tulsa is now meeting weekly in the offices of Cmdr. G. H. Henry, senior medical officer, to examine and inoculate personnel of the Tulsa unit. Few billets remain at present, except in a few specialized grades, although a steady flow of applications is being received.

Officials of the unit emphasized that in case of an emergency, officers of an organized unit are not subject to call any sooner than officers in inactive reserve status. As interpreted by the Bureau of Naval Personnel, this is a time of peace and Naval Reserve officers cannot be

called to active duty except at their own request.

The time requirements of the Organized Naval Reserve are comparatively small and do not penalize the private practice of any medical officer. Attendance at weekly drill periods or examining panels is expected. However, cruises are entirely optional. These can be taken in a 15-day vacation period with full pay and allowances. If they so elect, doctors may take these cruises by remaining at home in their own offices. If they prefer, two weeks active duty with Naval units at New Orleans, Louisiana, may be arranged with the Commanding Officer of the unit. The cruises are needed only as a requirement for promotion.

Advantages accruing to enlistment in Organized Naval Reserve may be outlined as follows:

(1) Monetary benefits consist of drill pay for a weekly drill on a sliding scale commensurate with rank. Commanders receive \$10.00 per drill; Lieutenant-Commander, \$9.17; Lieutenant, \$7.67; and Lieutenant (Junior Grade), \$7.00. A government check is mailed quarterly for reporting at these weekly drill periods.

(2) Officers electing to take the cruises receive full pay and allowances in accordance with rank for a period of 15 days.

(3) Members of the Organized Naval Reserve qualify for an additional regular Naval uniform allowance of \$50.00 once each four years.

(b) Members participate in the Officers Mess located in the new Armory at

(Continued on Page 19)

PRESIDENT'S PAGE

The Oklahoma State Medical Association has been doing some excellent work in the past two or three years in strengthening relationships between medicine and its allied professions, dentistry and pharmacy. This is a splendid program which our Tulsa County Medical Society highly endorses, and one which every county medical society in Oklahoma should initiate individually as well. Much is to be gained by a closer harmony between these professions, and the cooperative effort in attaining mutual goals will pay handsome dividends. As doctors, we have perhaps been guilty in past years in considering the members of the dental and pharmacy professions as mere competent mechanics. The rounded training now being received in American dental schools no longer justifies this type of thinking. The dentist of today has a full knowledge of the pathological and the histological, and an increasing ability to recognize conditions associated with each. Similarly, our pharmacists by their educational requirements and increasing standards of professional conduct are attaining new stature. Finally, we must not overlook the fact that criticism of pharmacy and dentistry as being mechanical arts is one equally applicable to medicine. Surgery is largely mechanics with a large appreciation of tissues and their responses, for instance.

All three of these professions contribute much individually, and their independence necessitates the closest degree of cooperation. I believe that we have much to gain by a cooperative program with dentistry and pharmacy, and I should like to see the Tulsa County Medical Society take the lead in prosecuting such a project. The potentialities are great. I would greatly appreciate your suggestions for such a program, and your reaction to my views.

Sincerely,

A handwritten signature in cursive script that reads "E. O. Johnson". The signature is written in black ink and is positioned centrally below the word "Sincerely,".

President.

ALBERT WINFREY PIGFORD, M.D.

1883 - 1947

Dr. Albert Winfrey Pigford, prominent Tulsa medical and civic leader and a former president of the Tulsa County Medical Society, died at his home on July 26 following a lengthy illness. He was 63 years of age. Funeral services were conducted July 29 at the Boston Avenue Methodist Church of Tulsa.

The son of a railway official, Dr. Pigford was born in 1883 at Lockhart, Mississippi. His early education was obtained in the public schools of Lockhart and at Barton Academy of Mobile, Alabama. His interest in medicine and science led him to enter the University of Mississippi Medical College, from which he was graduated with the degree of Doctor of Medicine in 1907. Subsequently, Dr. Pigford completed postgraduate instruction at the University of Alabama and Tulane University of Louisiana. He practiced for a period of ten years at Meridian, Mississippi, and served as president of his county medical society and as Vice-President of the Mississippi State Medical Association. Coming to Tulsa in 1917, he quickly established himself as a leading surgeon and active civic worker. Dr. Pigford was commissioned a Captain in World War I and assigned as an Army medical officer at Camp MacArthur near Waco, Texas. Following his return from service, he was elected successively as secretary-treasurer, vice-president, and in 1921 as president of the Tulsa County Medical Society. He was particularly instrumental in the creation of the Tulsa County Free Medical Clinic in 1939, the establishment of Group Hospital Service of Oklahoma, staff activities of Hillcrest Memorial Hospital, and was an active worker in many church and civic programs. Ill-health forced his retirement from practice in 1945. He is survived by the widow, one son, one daughter, two brothers, and five sisters.

SEPTEMBER MEDICAL CALENDAR

MONDAY, September 1st:

The Executive Offices and Library will be closed all day in observance of Labor Day.

Members of the Tulsa County Medical Society who have not paid their 1947 membership dues in full by this date are suspended from membership privileges.
Hillcrest Hospital Staff Meeting.

TUESDAY, September 2nd:

Medical Broadcast, "The Role of the Army Doctor in World War II" Radio Station KOME, 3:45 p.m. Speaker, Dr. Thomas J. Hardman.

FRIDAY, September 5th:

Board of Trustees Meeting Tulsa County Medical Society, 1202 Medical Arts Building, 1:00 p.m.

MONDAY, September 8th:

No Tulsa County Medical Society meeting on this date.

TUESDAY, September 9th:

Medical Broadcast, "The Family Doctor," Radio Station KOME, 3:45 p.m. Speaker, Dr. James L. Miner.

FRIDAY, September 12th:

Constitution & By-Laws Committee Meeting, Tulsa County Medical Society, 1202 Medical Arts Building, 1:00 p.m.

MONDAY, September 15th:

St. John's Hospital Staff Meeting.
Copy deadline for the October issue of The Bulletin.

TUESDAY, September 16th:

Medical Broadcast, "New Advances In Ophthalmology," Radio Station KOME, 3:45 p.m. Speaker, Dr. Donald V. Crane.

FRIDAY, September 19th:

Civic Relations Committee Meeting, Tulsa County Medical Society, 1202 Medical Arts Building, 1:00 p.m.

MONDAY, September 22nd:

Tulsa County Medical Society, Scientific Program, The Mayo, 8:00 p.m. Speaker and subject to be announced later.

TUESDAY, September 23rd:

Medical Broadcast, "Modern Geriatrics," Radio Station KOME, 3:45 p.m. Speaker, Dr. H. Lee Farris.

FRIDAY, September 26th:

Postgraduate Course in Gynecology opens at Staff Room, Hillcrest Memorial Hospital, 8:00 p.m.

TUESDAY, September 30th:

Medical Broadcast, "One Hundred Years of Medicine," Radio Station KOME, 3:45 p.m. Speaker, Dr. Marvin D. Henley.

POSTGRADUATE STUDY COURSES SET

Ten-Weeks Course in Gynecology Opens in Tulsa on September 26. Studies in Pediatrics And Cancer Announced. Excellent Program of Speakers Indicated.

Of special interest to members of the Tulsa County Medical Society are three courses of postgraduate medical instruction scheduled for September, October, and November, 1947. These are:

A 10-weeks course of study in Gynecology, opening at Hillcrest Memorial Hospital on Friday, September 26, and continuing each Friday through November 28. Sponsored by the Oklahoma State Medical Association, it will feature Dr. J. R. Bromwell Branch, nationally known gynecologist, as lecturer.

A one-day course of study in Cancer, tentatively scheduled for Tulsa on October 6, 1947. Sponsored by the Oklahoma Division of the American Cancer Society, it will feature lectures and symposiums on all phases of cancer with a minimum of eight guest speakers from over the nation.

A five-day postgraduate course in Pediatrics, opening September 22 at the University of Oklahoma School of Medicine in Oklahoma City. Attending physicians may receive \$50.00 for the entire five days towards payment of expenses, such funds being provided by the Children's Bureau, federal agency of health education.

The course of postgraduate study in Gynecology is the annual program of the Committee on Postgraduate Medical Teaching of the Oklahoma State Medical Association. The selection of this field of medicine was made as the result of a survey among Oklahoma physicians as to their preferences, with Gynecology first and Psychiatry second. An advance enrollment has been heavy and a minimum of 100 are expected to attend in the Tulsa area.

Dr. J. R. Bromwell Branch, instructor in the course, is a graduate of the Class of 1908 at Johns Hopkins Medical School. Subsequently, he served as a resident in Gynecology at Johns Hopkins Hospital, later at the Macon Hospital of Macon, Georgia. From 1910 to 1915, he was in private practice at Macon, Georgia. For a twelve-year period beginning in 1915, Dr. Branch was Professor of Surgery and

Gynecology at the Hunan-Yale Medical School of Changsha, China. This was interrupted in 1923-1924 by a year's furlough spent in the gynecological clinics of the Mayo Foundation at Rochester, Minnesota, and other clinics in Chicago and Buffalo, N.Y. Later in 1924, he visited gynecology clinics in Edinburgh, Belfast, Dublin, London and Paris as a beneficiary of a Rockefeller Foundation Fellowship. Beginning in 1928, Dr. Branch taught in the Department of Surgery in the National College of Medicine at Peking, China. In 1941, he returned to this country as attending gynecologist to the Macon Hospital of Macon, Georgia. Beginning in 1943, Dr. Branch began teaching postgraduate courses in Surgical Diagnosis and Gynecology in Tennessee, and has most recently concluded a series of courses in gynecology in other parts of Oklahoma.

Classes will be held for ten successive weeks on each Friday night beginning September 26. The first five meetings will be in the staff room of Hillcrest Memorial Hospital, and the concluding five classes in the staff room of St. John's Hospital. Meetings will begin promptly at 8:00 p.m. A fee of \$15.00 is charged, payable with the application form. The latter may be obtained from the offices of the Tulsa County Medical Society. Enrollments will be accepted any time up to the opening of the first lecture. Dr. E. O. Johnson, President of the Tulsa County Medical Society, has appointed a local committee of arrangements comprising Dr. Benjamin W. Ward, chairman, Dr. E. Malcolm Stokes, and Dr. W. A. Dean.

A brochure, outlining the various lectures and other details of this course, has been mailed to each Tulsa doctor and additional copies are available at the offices of the Tulsa County Medical Society.

The titles of the ten lectures are as follows:

(1) The Importance of a Complete History, and Study of the Patient as a Whole.

(2) Pediatric Gynecology.

- (3) Menstrual Abnormalities.
- (4) Gynecological Endocrinology.
- (5) Congenital Deformities or Anomalies.
- (6) Infections.
- (7) Leukorrhea; Pelvic Inflammatory Disease.
- (8) Tumors.
- (9) Disturbances in Sexual Life, Fertility, etc.
- (10) Roentgenography.

The one-day course in Cancer will feature two separate sessions, one beginning at 1:30 p.m., and the second at 7:00 p.m., with an intermission for dinner from 5:00 p.m. to 7:00 p.m. The date of Monday, October 6, has been tentatively announced for this course of study for the Tulsa area. The meeting place will be the Mayo Hotel. There will be no admission charge, and all medical doctors are urged to attend.

An incomplete list of speakers who may appear on the program includes:

William S. MacComb, M.D., Memorial Hospital, New York, N.Y. Subject: "Malignancies of Head and Neck."

Thomas H. Burford, M.D., Associate Professor of Surgery, Washington University School of Medicine, St. Louis, Mo. Subject: "Malignancies of the Chest."

Thomas G. Orr, M.D., Professor of Surgery, University of Kansas School of Medicine, Kansas City, Kansas. Subject: "Malignancies of the Breast."

Fred J. Hodges, M.D., Professor of Roentgenology, University of Michigan School of Medicine, Ann Arbor, Mich. Subject: "Radiology in Relation in Cancer."

A. H. Dowdy, M.D., Chairman of Radiology Department, Atomic Energy Project, University of Rochester School of Medicine, Rochester, Minnesota. Subject to be announced.

James B. Smith, D.D.S., Oral Surgeon, George F. Geisinger Memorial Hospital, Danville, Pennsylvania. Subject: "Malignancies of the Mouth."

Fred A. Henny, D.D.S., Oral Surgeon, Henry Ford Hospital, Detroit, Michigan. Subject to be announced.

Local arrangements for the Cancer course of study are in charge of the Cancer Committee of the Tulsa County Medical Society. Dr. Emil E. Palik is chairman,

with Dr. Ralph A. McGill, Dr. Leon H. Stuart, and Dr. Frank J. Nelson as members.

The course of study is under the sponsorship of the Oklahoma Division of the American Cancer Society in cooperation with the Oklahoma State Medical Association, the Oklahoma State Dental Association, and the Oklahoma State Health Department.

The University of Oklahoma's five-day course of study in Pediatrics, beginning September 22, 1947, at Oklahoma City, is under the joint auspices of the Children's Bureau and the Oklahoma State Health Department. Enrollment will be limited to 25 medical doctors, each of whom will receive \$50.00 for attending the full five-day session. These fees are paid by the Children's Bureau as an aid to attending physicians in defraying their expenses at Oklahoma City. Applications have been mailed to all Tulsa doctors.

A copy of the final program will be available to those doctors indicating their desire to attend. A number of nationally known guest speakers will participate, including Dr. Joseph A. Johnston, Pediatrician-in-Chief of the Henry Ford Hospital, Detroit, Michigan.

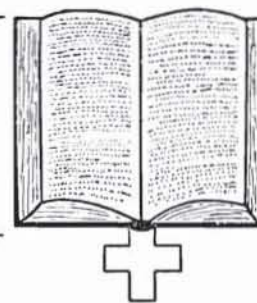

ALL DOCTORS MUST COMPLY WITH NEW STATE LAW

The Oklahoma State Board of Medical Examiners last month reminded Oklahoma doctors of their obligation to comply with House Bill 159, passed by the last session of the Oklahoma State Legislature. The measure requires all persons practicing a branch of the healing arts to place after his name in the *same size letters* the school of practice to which he belongs. All medical doctors must therefore place their name and the initials "M. D." after their name on their doors, windows, entrance signs, stationery, prescription pads, or other public use of the name and title. The term "Dr." alone, preceding the name, cannot be used. Any of the following forms are acceptable: John Doe, M.D.; John Doe, Doctor of Medicine; Dr. John Doe, M.D.; or Dr. John Doe, Doctor of Medicine. The terms of this act apply also to chiropractors, optometrists, osteopaths, etc.

SUMMER RECREATIONAL READING

The Medical Library's large collection of volumes on medical history and personalities offers many hours of enjoyable recreational reading for the physician wishing a diversion from scientific material. Many of the books in this section are general in character, while others refer to specific fields of medicine. The doctor wanting an all-around picture of the development of medical science will be entertained by Douglas Guthrie's "A History of Medicine" (Lippincott, 1946) which condenses a wealth of medical information to a single volume. In greater detail, Packard's two-volume work, "History of Medicine in the United States," has much to offer although limited to medical history in this country. (Hoerber, 1932).

The romance of the surgeon appears to have attracted much public and professional interest as most biographies and autobiographies of medical leaders are confined to leading world surgeons, living and dead. For a general study of surgery itself, the doctor will enjoy "The Story of Surgery" (Halycon House, 1943) by Harvey Graham, an outstanding authority. Much more compact is the picture record, "Surgery Through The Ages," by Lejaren A. Hillier. Published three years ago by Hastings House, Hillier's remarkable posed photographs made the book a wide-seller. The accompanying text by Paul Benton is concise and effective. "The Doctors Mayo" (University of Minnesota Press, 1942) is a lengthy but compelling biography of the Rochester surgeons, William and Charles Mayo, and will be of special interest to all Mayo-trained physicians. "Harvey Cushing—A Biography" (Thomas, 1946) is a detailed and vivid picture of the late, great medical leader. Dr. Max Thorek, founder of the International College of Surgeons, tells his own story in "A Surgeon's World," a commendable effort published in 1943 by Lippincott. Of similar interest is "Hugh Young—An Autobiography" (Harcourt Brace, 1940) and "Fifty Years of Medicine and Surgery" (Surgical Publishing Company, 1930), a reminiscence of Chicago's famed Dr. Franklyn H. Martin. For the experiences of the country doctor, several volumes by Dr. Arthur E. Hertzler of Halstead, Kansas, provide delightful readings. Of these, "The Horse and Buggy Doctor" is probably the best known and most enjoyable. Numerous other volumes complete the collection, which must be seen to be appreciated.

AN EDITORIAL SUGGESTION

In a letter to the Editor of the Journal of the American Medical Association, the Tulsa County Medical Society last month suggested that the A.M.A. sponsor an annual contest to determine the best publication of a county medical society in this country. This suggestion stems from a general disgust with the average low quality of the journals, bulletins, and other magazines being published by more than 100 local medical organizations throughout the United States. In no way are we thereby advocating our own superiority, and neither do we venture to suggest The Bulletin as a model for such publications. With the natural pride of a mother for its offspring, we do believe The Bulletin to have some merit and we would welcome the opportunity of entering it in competition with similar publications.

The general mediocrity of the local publications stems in large measure from a failure to utilize it for a primary purpose of disseminating local news from the medical profession's viewpoints on pertinent matters. Too many are composed of material which is bodily clipped or lifted from other sources and reprinted. Little original matter is used. Features are a rarity. Typographic make-up and format is generally unimaginative. Many use no headlines, conduct no departments, and are merely dull-looking blobs of type and composi-

tion. Editing is too often a function of the printer.

We are aware that most county medical societies do not support a professional secretary and we understand also that in such cases practicing physicians must take time from busy practices to tend to editorial duties. Yet, there is a definite responsibility to be met by such publications, and if time is a requirement some method must be found to provide it. The work can well be divided, definite assignments made, and certain responsibilities fixed. Conferences with printers and advertising representatives will lead to many valuable suggestions as to format and typographic appearance. Once the organization has been accomplished, the editing of a successful publication should be more enjoyable and less time-consuming. The immediate return will be greater readability, wider dissemination of information, and eventually, an improvement in advertising revenues. County medical society publications attract less than a half-dozen national advertisers. A contributing factor is their present low-quality of content and appearance.

A number of county medical society publications are well-edited and of unusual value, but they are the exception rather than the rule. The encouragement of increased standards through an annual competition, conducted under A.M.A. auspices, would be a definite step in the remedy of this present situation. We would appreciate the reaction of other editors to this idea. Again, let us reiterate that we are not serving as models, and are indeed anxious to correct the shortcomings which such competition might reveal.

DR. A. W. PIGFORD

The death of Dr. Albert W. Pigford at his Tulsa home last month deprives the medical profession of a valuable leader who made numerous contributions to the progress of medicine during his lifetime. Over a period of 25 years he served in many capacities with the Tulsa County Medical Society, exhibiting a foresight and soundness of judgment that assisted the Society in attaining its present high

(Continued on Page 16)

NEW GLASS-NELSON CLINIC COMPLETED

A Medical Feature

The Glass-Nelson Clinic, newest of Tulsa's institutions of group practice, was formally completed last month with the installation of modern air-conditioning and circulating units. The attractive one-story structure at 2020 South Xanthus houses seven Tulsa medical doctors headed by Dr. Fred A. Glass, surgeon, and Dr. Frank J. Nelson, internist.

The new clinic, which first opened its doors late in June, includes complete and modern x-ray and pathological laboratories, physio-therapy units, pharmacy, latest optical and refracting equipment, comfortable waiting rooms, recreational and parking facilities, physicians' offices, examination and diagnostic rooms, business office, and spacious record room. A telephone switchboard and intercommunication system permits contact with all parts of the building.

The structure has been attractively decorated in a uniform color scheme and effective use of paneled woods. The arrangement of the rooms and various units are designed to make maximum use of

available space with an eye towards compact grouping of related units. Many of the facilities are specially constructed from plans based on previous experience of the tenants. Malcolm McCune of Tulsa was the architect.

The Glass-Nelson Clinic is adjacent to St. John's Hospital of Tulsa, where members of the Clinic personnel have staff privileges. In addition to Dr. Glass and Dr. Nelson, the Clinic houses the offices of Dr. Hays R. Yandell, surgeon; Dr. D. L. Edwards, ophthalmologist-otolaryngologist; Dr. Thomas H. Davis, surgeon; Dr. Paul T. Strong, internist; and Dr. Royston Miller, orthopedic surgeon.

The building is constructed in such a manner that it can be expanded on the ground floor and a second story added if necessary. The basement is partially completed and includes private offices, business and record rooms, and air-conditioning and heating facilities.

Members of the Tulsa County Medical Society have been invited to inspect the new Clinic at their convenience.

Check these 7 advantages

TRI-CALSATE

THE BUFFERED GASTRIC ANTACID

1. TRI-CALSATE neutralizes the HCl of the gastric contents and desensitizes the pain producing mechanism.
2. There is no evolution of carbon dioxide during the reaction in the stomach, hence the distress from gastric distention and belching is eliminated.
3. It does not make the gastric contents alkaline.
4. The possibility of the development of alkalosis is minimized.
5. The probability of gastro-intestinal irritation is remote.
6. It does not injure the kidneys.
7. It is palatable and convenient to take.

The nucleus of the peptic ulcer problem lies in the neutralization of excess HCl in the stomach contents by an antacid that will meet the requirements of real physiologic and therapeutic economy.

Approx. percentage composition when in aqueous suspension:

Tri-calcium phosphate U.S.P.	35.5
Tri-sodium phosphate crystals (arsenic free)	12.5
Sodium citrate crystals	52.0
	100.0

Available on Rx in 4 1/2 oz. and 18 oz. bottles
Write for trial package and literature.

NEW APPLICANTS

The following physicians are applicants for membership in the Tulsa County Medical Society:

Manuel Brown, M.D., 1619 East 15th Street, Tulsa, Graduate, University of Maryland School of Medicine, 1938. Practice: United States Army Medical Corps, Captain. Specialty: Allergy. Recommended by Dr. H. J. Rubin and Dr. Samuel E. Franklin. To be voted upon at meeting of September 22, 1947.

Edward L. Moore, M.D. 215 Braniff Building, Tulsa. Graduate, St. Louis University School of Medicine, 1939. Practice: Surgical resident, St. Francis Hospital, Pittsburgh, Pa., three years; United States Army Medical Corps, Major, three years. Specialty: Surgery. Recommended by Dr. Fred A. Glass and Dr. D. L. Garrett. To be voted upon at meeting of October 27, 1947.

William J. Campbell, M.D. 1442 East 34th Street, Tulsa. Graduate, University of Oklahoma School of Medicine, 1939. Practice: United States Army Medical Corps, Lieutenant-Colonel. Specialty: Ophthalmology. Recommended by Dr. C. G. Stuard and Dr. H. H. Porter. To be voted upon at meeting of October 27, 1947.

PIGFORD EDITORIAL

(Continued from Page 14)

position in state medical circles. He is due particular credit for his activity in organizing the Tulsa County Medical Clinic, a project which has increased the quality of medical care available to indigent patients at an estimated annual savings to the taxpayer of \$50,000. In civic and church affairs, activities of Hillcrest Memorial Hospital, and professional circles, Dr. Pigford's enthusiasm and interest were responsible for much of value to the community and the medical profession. His guidance will be sorely missed, but the memory of his kind friendship and his accomplishments will remain as a monument to his spirit.

the Tulsa Fairgrounds, which is exempt from local and state regulations, and subject to federal laws only.

(g) Members are eligible for benefits of ships' stores, including the purchase of merchandise and clothing at sharply reduced prices exempt from local and state taxation.

(6) Officers interested in fishing and hunting may participate in this sport at the federal game preserves of the Navy Ammunition Depot at McAlester, Oklahoma. Ammunition and supplies are furnished.

Doctors interested in obtaining commissions in the regular reserve must first apply to the Officer of Naval Officer Procurement, New Orleans, Louisiana. Reserve officers wishing to apply for the available medical officer billet in the Organized Naval Reserve of Tulsa should contact the Navy Recruiting Office in the Federal Building, Tulsa, telephone 3-9282.

PERSONALS

DR. WILLIAM F. THOMAS, JR. has been named to the editorial staff of the Bulletin.

DR. W. A. SHOWMAN has returned from a vacation of fishing and hunting in Wyoming and Colorado.

Speakers for the "How's Your Health?" series of radio broadcasts last month were DR. H. LEE FARRIS, DR. MARVIN D. HENLEY and DR. WALTER E. BROWN.

Frequent visitors to Grand Lake are cabin- and cruiser-owners DR. JOHN E. McDONALD, DR. FRANK J. NELSON, DR. HUGH PERRY, DR. H. D. MURDOCK, DR. HOMER A. RUPRECHT, and DR. MARCELLA R. STEEL.

DR. H. D. MURDOCK is vacationing in Alaska and Northwestern areas of the United States.

DR. JAMES STEVENSON has been named a member of the Tulsa Council of Social Agencies' committee to investigate Tulsa public welfare agencies.

The Emblem Of Approval

Confidence and trust are underlying assets of any business or profession. They constitute the basic foundation for the successful practice of medicine. They are equally important in successful medical administration. Several years ago, the Tulsa County Medical Society recognized the need of a medical collection agency designed by and for the doctors exclusively. The result was The Medical Credit Bureau. The confidence and trust placed in this organization is attested by the emblem of the Tulsa County Medical Society, which appears on all stationery and printed matter. Collection methods are prescribed by doctors. The results obtained through this method make The Medical Credit Bureau the outstanding medical collection agency in Tulsa. That fact is illustrated by its list of clients, which constitute 80 per cent of the Tulsa medical profession.
