Old Way . . .

CURING RICKETS in the CLEFT of an ASH TREE

FOR many centuries,—and apparently down to the present time, even in this country—ricketic children have been passed through a cleft ash tree to cure them of their rickets, and thenceforth a sympathetic relationship was supposed to exist between them and the tree.

Frazer* states that the ordinary mode of effecting the cure is to split a young ash sapling longitudinally for a few feet and pass the child, naked, either three times or three times three through the fissure at sunrise. In the West of England, it is said the passage must be "against the sun." As soon as the ceremony is performed, the tree is bound tightly up and the fissure plastered over with mud or clay. The belief is that just as the cleft in the tree will be healed, so the child's body will be healed, but that if the rift in the tree remains open, the deformity in the child will remain, too, and if the tree were to die, the death of the child would surely follow.

*Frazer, J. G.: The Golden Bough, vol. 1, New York, Macmillan & Co., 1923

It is ironical that the practice of attempting to cure rickets by holding the child in the cleft of an ash tree was associated with the rising of the sun, the light of which we now know is in itself one of Nature's specifics.

New Way . . .

Preventing and Curing Rickets *with* OLEUM PERCOMORPHUM

NOWADAYS, the physician has at his command, Mead's Oleum Percomorphum, a natural vitamin D product which actually prevents and cures rickets, when given in proper dosage.

Like other specifics for other diseases, larger dosage may be required for extreme cases. It is safe to say that when used in the indicated dosage, Mead's Oleum Percomorphum is a specific in almost all cases of rickets, regardless of degree and duration.

Mead's Oleum Percomorphum because of its high vitamins A and D content is also useful in deficiency conditions such as tetany, osteomalacia and xerophthalmia.

Mead's Oleum Percomorphum is not advertised to the public and is obtainable at drug stores in boxes of 25 and 100 10-drop capsules and 10 and 50 cc. bottles. The large bottle is supplied, at no extra cost, with Mead's patented Vacap-Dropper. It keeps out dust and light, is spill-proof, unbreakable, and delivers a uniform drop.

MEAD JOHNSON & COMPANY, Evansville, Indiana, U. S. A.

Please enclose professional card when requesting samples of Mead Johnson products to cooperate in preventing their reaching unauthorized persons.

even after **40**, a woman's work is never done...

Dishes, dustpans, a thousand details...the three "d's" of household drudgery...are challenge enough at any age, but a stack of dinner dishes can look mountain high to the woman in the menopause. This is a disquieting aspect of the daily life of such patients that physicians can bring into proper perspective with "Premarin."

"Premarin" therapy, it has been found, has in it a certain "plus" that produces a sense of well-being in most women. "Premarin" quickly relieves the symptoms of the menopause. It is orally active, and is rapidly absorbed from the intestine.

While sodium estrone sulfate is the principal estrogen in "Premarin," other equine estrogens...estradiol, equilin, equilenin, hippulin...are probably also present in varying amounts as water soluble conjugates.

"PREMARIN" 

ESTROGENIC SUBSTANCES (WATER SOLUBLE)
also known as CONJUGATED ESTROGENS (equine)

Happy New Year!

Each one of us wish for each one of you a NEW YEAR filled with good health, happiness, and the things you most desire.

And we pledge anew to serve you the very best we know how — the very best we can!

Thank you for your wonderful support in 1948.

High blood levels . . . prolonged therapeutic effect . . . characterize 'Duracillin, In Oil' (Crystalline Procaine Penicillin—G in Oil, Lilly). To overwhelm invading bacteria, effective penicillin blood levels must be maintained around the clock. 'Duracillin, In Oil,' is more than adequate to do the job. An injection of 1 cc. (300,000 units) of 'Duracillin, In Oil,' assures, for at least twenty-four hours, blood concentrations of penicillin that are sufficient to subdue most of the virulent penicillin-susceptible organisms. Repeating the 1-cc. dose at twenty-four-hour intervals is all that is required to keep most invading pathogens "on the run." Specify 'Duracillin, In Oil,' in 1-cc. or 10-cc. rubber-stoppered ampoules.
No refrigeration is necessary.*

TULSA, OKLAHOMA, JANUARY, 1949

No. 1

1948 COMMITTEE ACTIVITY HIGH

Retiring President Recommends Tulsa County Medical Society Members Take Greater Interest In National Political Scene. Poor Attendance Record Scored.

Annual committee reports filed in the Executive Offices last month reveal a high degree of activity for Dr. Victor K. Allen's administration of the Tulsa County Medical Society in 1948. Foremost among the accomplishments for the year were:

1. The co-sponsorship with the Tulsa County Red Cross and development of the Red Cross Blood Center, which opens January 11, 1949, after more than a year of planning and effort.

2. A completely new Constitution & By-Laws, needed for several years, approved by the Society last November 22, 1948.

3. Progress in a Society-approved plan to eventually house the Executive Offices and Library in its own building.

4. Near completion of a permanent endowment fund for the Library of the Tulsa County Medical Society.

5. A hard-hitting attack on fraudulent medical practitioners in Tulsa County.

6. Seventeen top quality programs, of which fifteen were scientific in character with speakers divided between Tulsa doctors and out-of-town medical leaders. These programs cost an average of 22 cents per member per program.

7. A strengthening of the Tulsa County Medical Clinic.

8. A course of post-graduate medical study in the basic sciences, sponsored by the Society with speakers drawn principally from the University of Oklahoma School of Medicine.

9. An improved public relations program with more effective use of news-

papers and radio, as well as increased participation by the Society and the Tulsa profession in civic and community affairs.

10. The Society entertained the American Medical Association Conference on Medical Service last November 13-14 with physicians from six south central states in attendance. Earlier, the American College of Physicians met in Tulsa on September 25 for a one-day discussion of scientific medical problems with doctors from Oklahoma, Arkansas, and Kansas present.

The annual reports of the Society's twenty-two committees also reflect continued attention to many routine services, such as the publication of *The Bulletin*, operation of the Medical Credit Bureau, the expanding official insurance program, the personal services of the Executive Offices, the Scientific Speakers Bureau, etc.

In a short address delivered at the annual meeting, Dr. Victor K. Allen, retiring President, also praised the work of many members of the profession in valuable civic and medical projects not directly sponsored by the Society. These include the formation of the St. John's Tumor Clinic, reorganization of the Tulsa City Health Department, organization of the Tulsa Chapter of the American Heart Association, and the expansion drive of Hillcrest Memorial Hospital—all projects in which doctors took the leadership.

Dr. Allen expressed thanks for the cooperation of the membership and other officers in his program of activity during the year, noting a huge expenditure

of time and effort by the various committees. Dr. Allen estimated that over 150 individual meetings of committees, Board of Trustees, etc., had been held during the year, with each meeting requiring one to four hours of time. This is exclusive of other public meetings in which the profession activity participated.

In his remarks Dr. Allen struck hard at the apathy of the Society in attending the scientific meetings. Expressing his belief that the programs were of high quality, he pointed out that attendance ranged from a low of 40 members to a high of 115, with an average of 70, or with only 30 per cent of the membership present. Dr. Allen noted the same situation had prevailed here for more than twenty years. "This seems to me to be a sad situation and shows a marked apathy of organized medicine in this respect. When we have programs with such fine speakers as Holinger, Senear, and De-Bakey, there can be no justification for the situation which prevails and has prevailed for twenty years."

In addition to his plea for greater attendance at the Society meetings, the retiring President recommended:

1. Greater attention by the individual physician to the national medical scene as a necessary step to avert state medicine.
2. Continued interest in public health matters of Tulsa.
3. Increased support of the Medical Credit Bureau.
4. Continued cooperation in the programs of the Blue Cross-Blue Shield plans of prepaid medical and surgical care.
5. A policy designed to keep all indigent clinics under the Tulsa County Medical Clinic, with Society endorsement withheld for all specialty clinics not participating or functioning as a part of the Clinic.

By resolution, the Board of Trustees commended Dr. Allen for his work as President in 1948 and gave approval to his suggestions for the future.

The various Committee reports for 1948 are on file in the Executive Offices and may be examined upon request by any member. A few of the highlights of the reports may be summarized as follows:

The Bulletin Committee reported advertising revenues for the year almost

\$500.00 above the previous year and well over budget estimates made last January. News and medical features continued to be used exclusively in *The Bulletin* with many editorials being widely reprinted in other county medical society bulletins over the nation.

The Red Cross Blood Center Committee reported that recommendations for the Center were completed in the Spring and formally approved by the Tulsa County Medical Society on May 10, 1948, after an extensive survey by the Committee as to the desirability of the Center. Development of the Center has continued since that time with the actual opening now set for January 11, 1949. (See separate story in this issue of *The Bulletin*.)

The Cancer Committee reported continued Society cooperation in the Mobile Cancer Clinic program and the educational programs of the Oklahoma Division of the American Cancer Society. The St. John's Tumor Clinic, a project of a group of Tulsa doctors, was also commended.

The Clinic Committee reported harmonious operation of the Tulsa County Medical Clinic during the year, repainting and refinishing of the Clinic premises and equipment, and pleasant relationships with the Board of County Commissioners. The average patient load has doubled since the end of the war and appears to be headed for further increases. Dr. J. D. Shipp, Committee Chairman, expressed dissatisfaction with the present set-up of the Roentgenology Department of the Clinic and called for volunteer radiologists, internists, and cardiologists to join the Clinic staff.

The Constitution & By-Laws Committee reported completion of a new governing document for the Society with approval by the membership in November.

The Golf Committee recalled a most enjoyable Doctors & Dentists Golf Tournament held last May at Indian Hills Country Club with twenty two Tulsa firms contributing valuable tournament prizes.

The Ethics Committee reported satisfactory settlement of a number of questions involving ethics.

The Finance Committee reported the

(Continued on Page 20)

DR. McDONALD ASSUMES PRESIDENCY

Dr. Fred E. Woodson Named President-Elect Of The Tulsa County Medical Society. Annual Combined Membership Dues Again Fixed At \$100.00. Committees To Be Announced.

Dr. Fred E. Woodson, prominent Tulsa anesthesiologist, was named President-Elect of the Tulsa County Medical Society at the organization's annual business meeting last December 13. He will serve in 1950, succeeding Dr. John E. McDonald, who assumed office on January 1, 1949.

Other officers named by the Society were Dr. W. A. Showman, Vice-President; Dr. John G. Matt, re-elected Secretary-Treasurer; Dr. Robert E. Funk, member of the Board of Trustees; and Dr. Thomas H. Davis, member of the Board of Censors. Named as delegates to the Oklahoma State Medical Association were Dr. Victor K. Allen, retiring President, and Dr. Walter S. Larrabee, re-elected.

Ten alternate delegates selected were Dr. Logan A. Spann, Dr. A. Ray Wiley, Dr. I. H. Nelson, Dr. R. Q. Atchley, Dr. Herbert S. Orr, Dr. J. D. Shipp, Dr. Donald V. Crane, Dr. Fred E. Woodson, Dr. Robert E. Funk, and Dr. H. B. Stewart.

The election of Dr. Woodson culminates a very active career in hospital and medical circles for the popular Tulsa anesthesiologist. A very young officer in World War I, Dr. Woodson was for many years a professional secretary for the YMCA of Tulsa and other Oklahoma cities. He left a promising career in this field to study medicine and in 1931 was graduated from the University of Oklahoma School of Medicine. Dr. Woodson

returned to Tulsa and became widely known for his leadership in youth activities and other civic affairs. For many years he has been an active leader in the professional affairs of Hillcrest Memorial Hospital and directed a recent drive to secure funds for the construction of a new nurses home for the institution. During the past two years he has assisted in the formation of Oklahoma Medical Research Foundation, a project of the Alumni Association of the University of Oklahoma School of Medicine. For many years Chairman of the Section on Anesthesiology of the Southern Medical Association, he was named to the Board of that organization last year.

Of the other officers, Dr. Showman has just completed a term of five years

as a member of the Board of Trustees and has long been active in the House of Delegates and the Society's Medical Library Committee. Dr. Matt, a medical officer of World War II, was re-elected in recognition of his splendid work as Secretary-Treasurer last year. Dr. Funk has attracted attention for his work as a Chairman and member of the Medical Library Committee and in the general committee for the 1947 and 1949 annual meetings of the Oklahoma State Medical Association.

The Tulsa County Medical Society at the annual business meeting last month

DR. JOHN E. McDONALD

also approved an operating budget suggested by the Board of Trustees and fixed annual membership dues at \$58.00. This sum, with the dues of the Oklahoma State Medical Association of \$42.00, comprise a total of \$100.00. This sum is now due and payable although members may pay in two equal installments of \$50.00 if desired. The first installment is now due and the second on July 1, 1949.

Annual reports of standing committees were presented by Committee chairmen and a summary of such reports for 1948 will be found elsewhere in this issue of *The Bulletin*.

Upon assuming office, Dr. McDonald announced he would shortly complete the personnel of standing and special committees. These appointments will be made by letter and published in the February issue of *The Bulletin*. Under the terms of the new Constitution & By-Laws recently approved by the Society, Dr. McDonald will appoint only one member of each standing committee with two senior members retaining office. This staggering

of committees will give greater permanence to Society activities. All members appointed to committees designated as "special" committees by the By-Laws will serve only the single year. The President is empowered to appoint the Chairman of both special and standing committees.

The Society honored Dr. Thomas J. Lynch, veteran Tulsa surgeon now retired due to ill health, by election to Honorary Membership. Dr. Lynch was also recommended for similar privileges in the Oklahoma State Medical Association and the American Medical Association.

By a one-vote majority, the Society approved a motion which would place full authority for the 1949 scientific programs with the Program Committee. This, in effect, rescinds an action taken in November, 1948, limiting the number of programs with out-of-town speakers to three. The motion, approved after some considerable discussion, leaves the selection of speakers entirely to the discretion of the Program Committee. The President voted for the motion to break a tie vote.

Newly-elected officers of the Tulsa County Medical Society meet in the Medical Library to consider organizational plans for 1949. Left to right, seated, are Dr. Fred E. Woodson, President-Elect, and Dr. John E. McDonald, President. Standing, left to right, are Dr. John G. Matt, Secretary-Treasurer; Dr. Robert E. Funk, new member of the Board of Trustees; and Dr. W. A. Showman, Vice-President. (Photo by Howard Hopkins).

ANNUAL REPORT FOR 1948

The Library Committee of the Tulsa County Medical Society can report a year of activity and growth of the Library. It has had 1,157 personal visits by doctors, 2,427 books and journals borrowed, 940 reference questions answered, and 73 loans made from other libraries.

It receives 90 journals either by direct subscription or by gifts of doctors and friends. It is our wish that subscriptions to these same journals may continue so that no breaks will occur in the continuity of our files.

A big step ahead has been made in binding 264 volumes of back issues of various journals.

Twenty new textbooks have been purchased, the titles of which have been listed in the monthly publication of the Society, *The Bulletin*, as they have been received. The same holds true for many gifts of books and journals from various doctors and friends.

All books have been catalogued, cards made and put on file, so that any text or desired information can be readily found by any one.

An unexpected replacement of a desk, two chairs, and a desk lamp had to be made. This problem was solved by having refinished an old desk from the business office and purchasing two chairs all in light oak to match the other Library furniture. An additional set of stacks has been purchased, and additional shelves have been built in the Library pantry.

The Library is happy to report that the expense of operating the Library for 1948 is well within the amount allocated by the general budget.

GIFTS OF THE MONTH

Dr. Walter S. Larrabee. Thirteen textbooks, principally in Roentgenology.

Dr. Philip M. Schreck. Archives Of Internal Medicine. Renewal for 1949.

Dr. Victor K. Allen. A cash gift to apply on the purchase of new books.

Dr. H. D. Murdock. Collected Papers of the Mayo Clinic. 1942.

From the Library of the late **Dr. H. P. Price.** Nineteen textbooks.

The Library hours are now 9:00 A.M. to 5:00 P.M. daily, closed during the lunch hour from 1:00 P.M. to 2:00 P.M. Saturday hours are 9:00 A.M. to 1:00 P.M. only.

USE YOUR LIBRARY

PRESIDENT'S PAGE

One of the objectives of my administration as President of your Tulsa County Medical Society is to make the 1949 Annual Meeting of the Oklahoma State Medical Association, to be held in Tulsa next May 15-18, the best convention in the history of the organization. The Tulsa County Medical Society has been entrusted with the arrangements for this event and for several months the officers and convention committees have been quietly making plans. In deference to your wishes, a number of changes have been made in the usual format of the convention. For instance, the annual dinner dance will be held on the second night of the meeting instead of the last, which means that attendance may be as much as doubled. We believe you will be pleased with these departures from the usual program arrangement. Dr. W. A. Showman is again at the helm of the meeting as General Chairman, and he assures me that hotel and catering arrangements are of pre-war quality. Dr. H. A. Ruprecht and his advisors have a splendid scientific program nearly completed. The usual social functions and the program of the Ladies Auxiliary will complete the schedule. I believe we have a reputation for hospitality to maintain, and at the same time to demonstrate the leadership of our profession here in Tulsa. I am hopeful that each of you will encourage your fellow physicians over the State to attend, and I know I can rely upon each of you to assist in making the 1949 Annual Meeting a memorable event.

May I at this time thank each of you for the honor which you have bestowed upon me in selecting me as your President. I will, with your cooperation and advice, endeavor to justify the confidence which you have placed in me.

Sincerely,

President

CHICAGO PHYSIOLOGIST TO LECTURE

Dr. A. J. Carlson, Eminent American Scientist, Is Speaker For Tulsa County Medical Society On January 10, 1949. Second January Program Announced.

Dr. Anton J. Carlson, Professor Emeritus of the University of Chicago, whom the Saturday Evening Post calls "the most remarkable physiologist of our times," will be guest speaker for the Tulsa County Medical Society on Monday, January 10, 1949, at 8:00 P.M. at The Mayo. His subject will be "Diet And The Life Span."

The second monthly meeting of the Society will be on Monday, January 24, 1949, when Dr. James B. Thompson, Springer Clinic surgeon, will present a paper entitled "The Role of the Transverse Abdominal Incision in the Reduction of Post-operative Complications." The result of a review of 1,500 consecutive cases made by Dr. Thompson during resident training at the University of Michigan in recent years, the paper will be discussed by Dr. A. B. Carney and Dr. Edward L. Moore.

"We are very fortunate in securing Dr. Carlson to inaugurate our 1949 series of scientific medical programs," Dr. John E. McDonald, President of Tulsa County Medical Society, said last month. "He is among the foremost leaders in American Medicine and his research discoveries have revolutionized medical diagnosis and therapy in many fields."

A colorful personality, Dr. Anton Julius Carlson—"Ajax"—to hundreds of former students—is credited with refuting the famous Pavlov's theory of the ebb and

flow of gastric juices. His principles provide the basis for the modern diets for feeding infants and peptic ulcer victims. He is a hard-hitting foe of food faddists, the major enemy of the anti-vivisectionists, a debunker of the "monkey-gland" theories of rejuvenation, and a

scientist with his famous "evidence" on a hundred subjects from sleep to falling bodies.

His former pupils at the University of Chicago, where he has been a member of the faculty of the Department of Physiology for nearly half a century, remember him for his spectacular but effective teaching methods, for a personality that plunges his class into unrestrained laughter with his pungent humor, the next moment bitterly blasting those with whose principles he cannot

DR. A. J. CARLSON

agree. In spite of a truculent spirit, he is remembered as a kindly gentleman interested in the welfare of the individual student. It is said that none of his students are ever "former" students, all continuing to follow his medical teachings throughout their professional life. In his office he receives Nobel Prize winners and jittery freshmen with equal concern for their problems.

At 73, Dr. Carlson is an amazing phenomena of energy, vitality, and radiant personality. He can match a professional woodsman in activity, and has been

ETICYLOL

most potent oral estrogen therapy

A single 0.02 mg. tablet of Eticylol* (ethinyl estradiol) costs only a few cents. This small dose, administered daily, is sufficient to maintain the average menopausal patient.

Eticylol is not only convenient but is pleasant to take — with no disagreeable odor or after-taste. The "sense of well-being," associated with the use of naturally occurring estrogens, is usually experienced. Daily administration of this steroid sex hormone maintains a relatively stable level of estrogen in the body. When therapeutic doses are used, side effects rarely occur.

ETICYLOL: Tablets of 0.02 mg. (white), and 0.05 mg. (yellow) — bottles of 100 and 250.

RED CROSS BLOOD CENTER SETS JANUARY 11 OPENING

All members of the Tulsa County Medical Society are invited to attend the formal opening of the Red Cross Blood Center on Tuesday, January 11, 1949, at 7:30 P.M. Physicians and other prominent guests will be conducted through the facilities of the project on the fourth floor of the Community Welfare Building, 6th and Cheyenne streets, Tulsa.

Jointly sponsored by the Tulsa County Chapter of the American Red Cross and the Tulsa County Medical Society, the Blood Center represents more than a year's planning and development by a joint committee from the two groups. Contracts have signed with all Tulsa hospitals providing for utilization of the blood by patients beginning about January 14. The new Center is expected to draw 25 to 40 pints of blood daily from volunteer donors. The blood will be given free to patients, except for a standard charge of \$10.00 for laboratory and administration costs. This figure reduces the present cost by about 75 per cent.

NEW MEMBERS

Elected to membership in the Tulsa County Medical Society at the regular meeting of Monday, December 13, 1948, was the following:

Milton L. Berg, M. D. 3505 South Peoria, Tulsa. Medical Degree, Harvard Medical School, 1941. In United States Army Air Forces, 1941-1946. In private practice, Everett, Massachusetts, 1946-48. General Practice. Recommended by Dr. Carl F. Simpson and Dr. Harold J. Black. By transfer from the Massachusetts State Medical Association.

FOR RENT: Space for Doctors office available at Medical and Surgical Clinic, 1307 South Main, Tulsa, Oklahoma.

DR. WILLIAM J. CAMPBELL has removed his practice to Amarillo, Texas.

DR. W. J. BRYAN is ill at Hillcrest Hospital.

20 Years Clinical Experience behind TRI-CALSATE IN ULCER THERAPY

For twenty years, careful clinicians have prescribed TRI-CALSATE in the treatment of peptic ulcer, hyperchlorhydria, etc. They have found it effective and safe. TRI-CALSATE is a scientific formula based on the molecular weights of the salts as shown in the following equations

REACTION WITH HCl OF GASTRIC CONTENT

BUFFER EFFECT

Acid Salts
 CaCl_2 (calcium chloride)
 NaH_2PO_4 (sodium acid phosphate)

Alkaline Salt
 $\text{Na}_3\text{C}_6\text{H}_5\text{O}_7$ (sodium citrate)
 Possibility of alkalosis minimized. No local alkalinity.

When in aqueous suspension the approximate percentage composition is as follows

Tri-calcium phosphate	35.5
Tri-sodium phosphate crystals (arsenic free)..	12.5
Sodium citrate crystals	52.0
	100.0

If you are not using this "years tested" scientific formula, try it on your most persistent cases. Find out for yourself how remarkably efficient TRI-CALSATE is. Exceedingly effective in neutralizing gastric HCl, non-constipating, (tri-sodium phosphate counteracts any constipating effects of prolonged use of tri-calcium phosphate) non-irritating and free from all substances alien to the body composition.

Available on Rx in 4½ oz. & 18 oz. bottles. Write on your letterhead for samples and literature.

DR. CARLSON*(Continued from Page 13)*

known to saw a hole in the winter ice in order to take a swim. Some say his nickname of "Ajax" stems from this physical vitality, others that it is a student's contraction of his initials of "A.J.C."

Born in Sweden on a small farm on the coast of the North Sea, Dr. Carlson followed an older brother to America in 1891, arriving with but a few dollars in his pockets. For many years he worked as a farmer and a carpenter, saving money for a college education which he obtained at Augusta College of Rock Island, Illinois. Later, he was to study at Leland Stanford University and secure his Ph. D. degree in Physiology as recipient of a Carnegie Institute fellowship. At the University of Chicago he rose rapidly to become Professor and Head of the Department of Physiology as his fame grew.

When he was only 29, Dr. Carlson proved the pulse begins in a nerve. In 1916, he published his famous "Control of Hunger in Health and Disease" and paved the way for entirely new concepts of stomach disorders, their diagnosis and treatment. Later he disproved Pavlov's theory that gastric juices are secreted only when food is in the stomach. Carlson's studies asserted the juice flow periodically regardless of the fact that the stomach may be empty for long periods of time.

Dr. Carlson lambasts the academicians, both medical and otherwise, and long feuded with Dr. Robert Maynard Hutchins, President of the University of Chicago, over concepts of education. His differences with others have made newspaper headlines, although he does not

always have such attractive opponents as Mrs. Irene Castle McLaughlin, his adversary in the anti-vivisectionist arguments. "If a man isn't worth more than a dog," Dr. Carlson comments, "then our effort to improve man is an error. We should, rather, devote our attention to improving the dogs."

The veteran physiologist thinks sex hormones have no relation to longevity of life and the aging processes, dismissing them as "twaddle." Food fadists get the same treatment, although Dr. Carlson insists the number of vegetarians should be limited by law. "Otherwise," he says, "we would have an inadequate supply of vegetables to feed us all, and some of us would have to eat grass."

An honorary M.D.—one of the few in the nation—Dr. Carlson's presentations are of wide interest, sparkling with the wit and humor which marks his teaching. Not one to present unproven theories, Dr. Carlson has long followed his advice to those physicians who would write a paper: "Keep your mouth shut and your pen dry until you learn the facts."

Dr. McDonald, in announcing the appearance of Dr. Carlson, noted that all medical doctors in Eastern Oklahoma are urged to attend this and other scientific meetings.

DR. ROBERT L. ANDERSON has taken professional quarters at 807 Medical Arts Building, Tulsa, for the practice of Chest Surgery. DR. S. C. SHEPARD who formerly occupied the space, is now at 406 Medical Arts Building.

DR. R. C. PIGFORD has been elected President of the Tulsa County Public Health Association.

drops

PRIVINE

A DISTINGUISHED NASAL VASOCONSTRICTOR

high potency Only two or three drops of the 0.05 per cent solution of Privine hydrochloride usually give prompt and complete relief of nasal congestion and hypersecretion.

prolonged action The effect of each application of Privine provides two to six hours of nasal comfort, thus avoiding the inconvenience of frequent re-application.

bland and non-irritating Privine is prepared in an isotonic aqueous solution buffered to a pH of 6.2 to 6.3. Artificial differences in osmotic pressure between solution and epithelium are avoided; stinging and burning are usually absent.

relatively free from systemic effects Although a sedative effect is occasionally noted in infants and young children — usually after gross overdosage — Privine is generally free of systemic effect. The absence of central nervous stimulation permits the use of Privine before retiring without interfering with restful sleep.

• CIBA PHARMACEUTICAL PRODUCTS, INC., SUMMIT, NEW JERSEY

Privine 0.05 per cent for all prescription purposes; 0.1 per cent strength reserved for office procedures.

ANNUAL REPORTS*(Continued from Page 8)*

Society had not exceeded its 1948 budget and would end the year in a sound financial condition with a small surplus on hand. The 1949 budget was prepared and introduced at the annual meeting for approval.

The Fraudulent Practices Committee, under the energetic leadership of Dr. M. O. Hart, has been actively campaigning against medical quackery in Tulsa. Several offenders have been arrested and fined for violations of medical law. Still hampered by lack of effective legislative controls, the Committee is in need of an adequate investigative service.

The Housing Committee reported the results of a survey into the desirability of the Society purchasing or building its own home for the Library and Executive Offices. Members favor construction when building costs decline.

The Legislative Committee reported that the Oklahoma State Medical Association had failed to support recommendations of the Tulsa County Medical Society for legislation to curb advertising physicians. The Committee also reported

the views of Congressional and Legislature candidates for office, and in early December arranged for successful candidates to meet with the Society membership in a discussion of mutual problems.

The complete report of the Library Committee is to be found on the Medical Library page in this issue of *The Bulletin*.

The Medical Credit Bureau reported a successful year but called on members of the Society for increased support. Collections continue good despite a tightening of family pocketbooks as the cost of living rises.

The Postgraduate Medical Study Committee reported an excellent response to the current series of lectures in the basic sciences. This group is expected to run through next May or longer with an average of two lectures monthly.

The Program Committee report has been summarized above.

The Public Health Committee reported excellent progress in the field of public health in Tulsa County, primarily through the efforts of the Public Health Committee of the Tulsa Chamber of Commerce and the reorganized City Health Department.

The Publicity & Public Relations Committee reported 33 members of the Society had participated in the "How's Your Health?" series of medical broadcasts sponsored by the Society over Radio Station KOME each Tuesday at 4:45 P.M. Reports on two other transcribed series were uniformly good. A newspaper series of public relations stories have been well received by the public. Press and radio cooperation has been splendid.

The Welfare Committee reported floral offerings had been sent to sick members and at the funerals of deceased members.

DR. C. H. BENNING has resigned as City Superintendent of Health to accept a position in Berlin, Germany.

DR. JAMES J. RIODAN has joined the Radiology Department at St. John's Hospital.

DR. D. B. JONES is now associated with Dr. Walter S. Larrabee in the practice of Radiology.

DR. ROBERT H. JOHNSON has joined the staff of Glass-Nelson Clinic, Tulsa.
