THE WICKED—GOOGLY WEAVE AND ITS APPLICATION
TO HIGH-PRESSURE SPEED-WEAVING

A DISSERTATION APPROVED FOR THE
DEPARTMENT OF UNDERWATER BASKET-WEAVING

BY

Dr. Haywood Djabuzzov, Chair

Mrs. Eleanor Roosevelt

Mr. Junior Senior, Jr.

Dr. Dre

To my loving cats, oh, how I do love you so.

Acknowledgements

I would like to acknowledge the National Basketweaving Foundation and the University of Oklahoma for funding this work. Also, my friend Doug.

2.2	This basket was woven woefully in under 26.2 seconds.	4

Abstract

A new, Earth-shattering weave design is presented. Called the “Wicked-Googly Weave,” this novel weave is weaverific and will revolutionize baskets and their construction while immersed in water.

Chapter 1

Introduction

1.1 Implications

Basket-weaving is a fine art begun over five million years ago by the eskimos. For many decades, they toiled to perfect their magical baskets. It is said that they could weave a basket around a killer whale and not get wet. The Great Flood almost wiped all record of their activities if not for Squanto [1]. Recently, more esoteric weaves have elucidated the matter-antimatter asymmetry in the universe [2].

1.2 Compatibility

You have to fight to get to the top of the basket-weaving world (See Figure 1.1.) The formed basket must be compatible with its place of placement. Refer to Table 1.1 for a brief compatibility list.

Figure 1.1: An extreme training session.

Table 1.1: Tables and their basket holding capability.

Table shape	BHC [†]
Rect-angular	YES
Square	YES
Round	YES [‡]
Water	NO

[†] BHC – Basket Holding Capability

[‡] Tables with knights should be avoided.

Chapter 2

The wicked–googly weave

2.1 Introduction

The wicked–googly weave (WiGoo) is technologically superior to all previous weaves [3].

Although the WiGoo provides +4 shield bonus and protects against incorporeal touch attacks, it is not very effective against ninturpoos (See Figure 2.1.)

2.2 This stuff is for real

The WiGoo method can seriously whip out some serious basket. A quite serious basket is shown in Figure 2.2.

Figure 2.1: Though rare, ninja turtle poodles, or ninturpoos, are particularly devastating to baskets.

Figure 2.2: This basket was woven woefully in under 26.2 seconds.
