## Boncompagni Manuscripts: Present Shelfmarks

Beta Version 2.2 (June 2026)<sup>1</sup>

This list has been posted in order to solicit additional information.

Please send additions, corrections, and comments to Ron B. Thomson at [ronb.thomson@utoronto.ca](mailto:ronb.thomson@utoronto.ca)

Note: Boncompagni manuscripts usually have the 1862 number on the spine in ink, and the 1892 number on a small pasted-on label on the spine, with the word “Boncompagni” across the top.

Note: To date we have located 332 of the original 614 manuscripts (a few are probable); we also cite sale and dealer information for another 13 (without knowing their present locations).

This list was first posted in September 2009.

Please cite this current list as:

Beta Version 2.2 (June 2026)

---

<sup>1</sup> An earlier version of this material was first published as: Menso Folkerts, “The Fate of the Manuscripts in the Boncompagni Collection,” in *Il Sogno di Galois. Scritti di storia della matematica dedicati a Laura Toti Rigatelli per il suo 60° compleanno*, ed. Raffaella Franci, Paolo Pagli, and Annalisa Simi (Siena: Università di Siena, Centro Studi della Matematica Medioevale, 2003), pp. 229-267. Folkerts included only the mathematical manuscripts. His introduction is reprinted below with certain corrections and updating.

## “The Fate of the Manuscripts in the Boncompagni Collection”

Introduction [2003] by  
Menso Folkerts

Prince Baldassarre Boncompagni (1821-1894) was one of the leading figures in the history of mathematics in the second half of the 19th century.<sup>1</sup> Beginning in the 1840s, he published more than 200 articles and books in the history of mathematics and physics, among them the voluminous edition of the works of Leonardo Fibonacci (published 1857-1862). Even more important was his liberal support of works on the history of science. Boncompagni spent a large amount of his money to enable historians of science to do research in libraries and to prepare editions of mathematical texts as well as source-based articles on the development of the mathematical disciplines. He paid much money to get copies of many important manuscripts in libraries all over the world; some of these copies were done by artists so that the copies looked like the originals. Perhaps the most important of Boncompagni's contributions to the history of science was his support of publications in this field. He established his own printing press, assumed full financial responsibility for the entire cost and freely granted to other scholars the privilege of using its facilities. From 1868 to 1887 he published his own scientific journal, *Bullettino di Bibliografia e di Storia delle Scienze Matematiche e Fisiche* (usually cited as *Bullettino Boncompagni*).<sup>2</sup> The 20 volumes which were published contain many articles on the history of mathematics and physics – several of them written or commented on by Boncompagni himself – which are still of use today, though Boncompagni's painstaking way of citing the originals increased the length of the articles and led to huge notes so that many articles are difficult to read.

Boncompagni was also well known for his library, which he enlarged throughout his life. When he died, it consisted of about 650 manuscripts and 20,000 printed volumes. The nucleus of his collection were works on mathematics and the mathematical sciences. The manuscripts in his library constituted the largest private collection of scientific codices in the 19th century, perhaps the biggest one of this kind which ever existed. In 1862 Enrico Narducci published a catalogue of Boncompagni's manuscripts, which then consisted of 368 items.<sup>3</sup> This catalogue, which represented the state of the art at that time, was established in the same way as all publications which were done or stimulated by Boncompagni: giving painstaking information about all details of the relevant manuscript by citing sentences and texts of the manuscripts without resolving the abbreviations. Because of this, the descriptions of the codices are sometimes difficult to read; on the other hand, they enable us to identify any manuscript which belonged to Boncompagni. In 1892 Narducci published a second edition of the catalogue of Boncompagni's manuscript collection. It describes all of his 614 manuscripts in the same way as in the older catalogue and is still the best source of information about

---

<sup>3</sup> Enrico Narducci, *Catalogo di manoscritti ora posseduti da D. Baldassarre Boncompagni* (Rome, 1862).

the manuscripts which Boncompagni possessed.<sup>4</sup>

Boncompagni's heirs sold his library in Rome in 1898.<sup>5</sup> The auction started (from 27 January to 12 February) with his manuscripts, facsimiles and editions of the 15th century; the catalogue of this part of the auction is *Biblioteca Boncompagni. I. Manoscritti. Fac-simili e copie di manoscritti. Edizioni del secolo XV.* ....<sup>6</sup> The books from his library were sold later in the same year. Since that time, Boncompagni's manuscripts have been scattered throughout the world. But several libraries now possess large parts of the manuscript collection: the Universitetsbibliotek (Stockholm), Trinity College Library (Dublin), and the Cornell University Library (Ithaca, N.Y.), as well as the Vatican library, Columbia University Library (New York City), and the Biblioteca Comunale in Treviso. It is also possible that some of the manuscripts found their way to the Biblioteca Reale (now the Biblioteca Nazionale Universitaria) in Turin.<sup>7</sup>

Boncompagni commissioned scholars to prepare facsimiles of mediaeval mathematical and scientific manuscripts kept in libraries all over the world. Most of them were word-for-word copies, but many were also almost exact reproductions of the originals. After Boncompagni's death, G. Mittag-Leffler bought the entire collection of facsimiles.<sup>8</sup> In 1964 they were moved to the Archives of the Royal Swedish Academy of Sciences in Stockholm. Now they are to be found in the stacks of the Stockholms Universitetsbibliothek (University Library, Stockholm). The collection numbers about 3000 items, equivalent to at least 30 meters of shelf space. Up to now, there is no adequate catalogue of this facsimile collection. Many items are sufficiently described in the auction catalogue,<sup>9</sup> though the last entry in the catalogue (nos. 1214-1223) – “Lotti di 50 Facsimili” – refers to lots containing about 500 facsimiles of manuscripts and books. The facsimile collection contains not only copies of manuscripts, but also of incunabula and 16th-century prints. Included are many algorism and abacus treatises, other works on arithmetic and on algebra, geometry, astronomy, physics, geodesy etc. The main part concerns mediaeval and early modern science, but there are also copies of letters of famous scientists. A catalogue of this facsimile collection is a desideratum.

In 1962 H.P. Kraus of New York donated a part of the Boncompagni Archive to Cornell University.<sup>10</sup> This part comprises – besides about 1300 printed items – some manuscripts from the Boncompagni collection. In contrast to the printed books and articles which came from Boncompagni's library, there is no special information about the manuscript material. According to the note in *Historia Mathematica*,<sup>11</sup> there are about 2000 unbound manuscripts in sixteen groups; they relate “primarily to textual and bibliographical research

---

<sup>4</sup> Enrico Narducci, *Catalogo di manoscritti ora posseduti da D. Baldassarre Boncompagni*, 2nd ed. (Rome, 1892). There is a concordance between the shelf-marks of the first and second edition on pp. VI-VIII. This concordance is reprinted below (with minor corrections).

Narducci's 1892 catalogue is available online: [www.archive.org/details/catalogodimanos00nardgoog](http://www.archive.org/details/catalogodimanos00nardgoog).

<sup>5</sup> See Picutti, “Don Baldassarre Boncompagni,” pp. 333-334.

<sup>6</sup> *Catalogo della Biblioteca Boncompagni. I. Manoscritti. Fac simili, Edizioni del Secolo XV. Abbachi Riviste* (Roma, 1898).

<sup>7</sup> This was suggested by Warren Van Egmond, though he says that a day's search in the library did not reveal any Boncompagni manuscripts.

<sup>8</sup> See Ivor Grattan-Guinness, “Materials for the History of Mathematics in the Institut Mittag-Leffler,” *Isis* 62 (1971), 372.

<sup>9</sup> *Biblioteca Boncompagni*, vol. I, nos. 502-1213.

<sup>10</sup> For this part of Boncompagni's collection see “Boncompagni Archive at Cornell University” *Historia Mathematica* 5 (1978), 470-472..

<sup>11</sup> “Boncompagni Archive,” p. 471.

by Boncompagni and include letters from correspondents and assistants to him regarding this. There are also many transcriptions and tracings from books and manuscripts with the correspondence. The correspondence dates from 1859 to 1894.” Besides these loose manuscripts, there are eleven bound manuscripts at Cornell University. From a short list of these bound manuscript volumes which was available to me I was able to identify four manuscript without doubt<sup>12</sup> and three manuscripts with good evidence;<sup>13</sup> the remaining four manuscripts are not listed in the 1892 catalogue<sup>14</sup> although they might have been added to the collection between 1892 and 1894.

Another part of the Boncompagni collection is now in the library of Trinity College, Dublin.<sup>15</sup> They were presented in 1909 by J. H. Reddan, a diplomat who had worked on the Venezuela-British Guiana boundary arbitration. This part fills 129 boxes. The manuscripts “consists of the prince’s notes, correspondence and other materials connected with the history of mathematics and science, together with specimen facsimile pages specially executed for him from manuscripts all over Europe and also from title pages of printed books.” It should be checked whether the manuscripts in Dublin come from the volumes of correspondence which formed the items 596-613 in the 1892 catalogue.<sup>16</sup>

When preparing in the last decades a database of the Western mediaeval manuscripts containing mathematical texts, I tried to find the present locations of the mathematical manuscripts which formerly belonged to Boncompagni. I present here a concordance between Narducci’s 1892 catalogue and the present shelf-marks. The list contains all manuscripts with mathematical texts; if the present location is unknown, a question-mark is given. [This list has been expanded to include all manuscripts (RBT).] Locations in brackets refer to manuscripts in private collections which have been sold but whose present location I do not know. I have not tried to search systematically for those Boncompagni manuscripts which do not contain mathematical texts, but if I know the present place of such manuscripts, I have mentioned it. The information in the column “Main contents” comes from Narducci’s 1892 catalogue. I have not tried to check and (if necessary) correct his notes, which are in general so detailed that they make it possible to find out whether a manuscript was originally in Boncompagni’s collection. For those manuscripts which W. Van Egmond

---

<sup>12</sup> Nos. 33, 85, 108, 315 in the 1892 catalogue.

<sup>13</sup> Nos. 148, 187, 188 in the 1892 catalogue. The main arguments were – besides the short title of contents – the number of leaves and the height of the manuscripts.

<sup>14</sup> The last four manuscripts are:

#4707 Bd. Ms. 4: *L’Aritmetica Pratica ; Trattato di Geometrica Pratica* (Italian, 18<sup>th</sup> century?). On front free endpaper: “Questo libri è di proprietà di me Giuseppe Panari ...”. 445, [20] p., [1] folded leaf of plates; ill.; 22 cm.

#4707 Bd. Ms. 11: *Canonie quaest[ionem] de hospitaliis*, by Camillo Cappucci (Latin, 17<sup>th</sup> century). 1 v.; unpagged, 100 leaves, interleaved; 33 cm

#4707 Bd. Ms. 8: Euclid, *Elementi di Aritmetica* (Italian, 1 August 1809). 297 [= 307], [17] p.; 29 cm.

#4707 Bd. Ms. 3: Giovanni Battista Lanfranchi Lanfreducci, *Geometria ad uso dell’ ill[ustriss]mo sig[no]re conte cav[alie]re Gio[vanni] Batt[ist]a Lanfranchi Lanfreducci* (Italian, 1800s). 1 v.; unpagged, 112 leaves; ill.; 22 cm.

<sup>15</sup> The following is based upon the note “Boncompagni Papers in the Library of Trinity College, Dublin.” *Historia Mathematica* 6 (1979), 207-208 and additional information by I. Grattan-Guinness. [See also below, p. 60: “Boncompagni Papers in the Library of Trinity College Dublin”. RBT]

<sup>16</sup> [There are also two boxes of various Boncompagni papers and correspondence in the Huntington Library in San Marino, California; formerly part of the Dibner Institute papers. See below, p. 59: “Boncompagni Papers in the Huntington Library, San Marino, California”. RBT]

described in his catalogue of Italian *abbacus* manuscripts<sup>17</sup> I used his notes instead of Narducci's.

My main source for finding the present location of Boncompagni's manuscripts were the many printed and unprinted manuscript catalogues which I have looked through during the last decades. I obtained additional information from P. O. Kristeller's *Iter Italicum* (Leiden 1963-1997). I am much indebted to Warren Van Egmond (Tempe, Arizona), who informed me about many Boncompagni manuscripts, mostly in the Vatican, and to Quirino Bortolato (Treviso, Italy), who is very interested in Boncompagni's life and works and who was of great help in identifying the Boncompagni manuscripts which now are in the Biblioteca Comunale, Treviso. Of course, the following list is incomplete and defective. But I hope it will stimulate historians of science and bibliographers to increase and correct it.

## **“Revisions and Development of the Original List”**

by Ron B. Thomson

I began searching for Boncompagni manuscripts in the course of my own research on medieval mathematical astronomy. Narducci listed several manuscripts of interest to my work, but I was unable to locate any of them, realizing explicitly what I knew implicitly, that the Boncompagni collection had been widely dispersed.

Knowing that an up-to-date finding-aid for these manuscripts would be useful – similar to the ones produced formally or informally for the Philipps collection – I started to collect references. Part of my systematic research led me to Menso Folkerts (whom I had long known) and I was surprised, but delighted, to find that he had embarked on the same project, concentrating on the mathematical manuscripts.

Our lists greatly overlapped, but I had a number of items of which he had not known. So I have produced below an extended version of his list, and added all the other items in Boncompagni's (1892) collection so that others can pencil in their own findings. (As well I added in parentheses the manuscript numbers from the first edition of 1862, and the lot numbers from the 1898 sale.) I also append a number of concordances, relating the first edition numbers to the second edition numbers, the sale catalogue numbers to the second edition numbers, and the numbers of the manuscripts when they appeared in three other collections (the Albani manuscripts, Pietro Girometti's collection, and J. O. Halliwell's collection), as an aid to identification for the user.

We are expecting to continue this work on-line, so that as items are identified they can be added for the benefit of future scholars. Please send us any corrections or new information. (A list of those who have already helped us in preparing this list is appended.)

Fellow Emeritus

## **The Table of Shelfmarks**

The table is, for the most part, self-explanatory.

- The first column gives the 1892 catalogue number, with the 1862 catalogue number in parentheses (if it had an earlier number).
- The second column is the number assigned in the 1898 sale catalogue. When several manuscripts were sold as a set, they are numbered as, e.g., 7/1, 7/2, 7/3 and 7/4. Numbers are from vol. 1 of the catalogue (generally up to ms. 550); letters and autographs listed in vol. 6 (*Autografi*) are indicated by a preceding “v.6”.
- Date is given as either the century with the prefix “s.” (e.g., “s.18”; “in.” indicates the beginning, “ex.” the end of the century); or as a firm date with the prefix “a.” (e.g., “a.1424”); or as an approximate date with the prefix “c.” (e.g., “c.1480”).
- Present location by city, institution/library, sub-library/special collection (if any), shelfmark.

#### **COLLECTIONS OF LETTERS / AUTOGRAPHS:**

Many of these “manuscripts” are bound collections of letters, receipts, notes, etc. which have since been broken up – some when auctioned off in 1898 and some by later owners either for the creation of new collections or for sale as separate items. This makes these manuscripts or their parts difficult to locate today.

Of the 3500 or so items in these later volumes, the whereabouts of approximately 3200 of them is currently unknown.

| 581                                          | — Various autograph letters (mainly French political, 1772-1832)                                                                               | s.18/19                | [?]                                                                                             |         |
| 582                                          | [Collection broken up when auctioned in 1898]                                                                                                  |                        |                                                                                                 |         |

<sup>24</sup> Ms. 577 has "S. Dumouch" on the cover, and "Stefano Dumouchel" on an added label, but the director of the Observatory of the College of Rome at this time was named Dominique Dumouchel. He was the first astronomer to detect the return of Halley's Comet in 1835. There is no explanation of why the name is different on the collection of letters.

<sup>25</sup> The only "Francisco Doni" that I can find is "Anton Francisco Doni" (1513-1574). But this Francisco Doni lived too early to have letters in this collection. However the Narducci catalogue does not specifically mention letters to Francisco, other than on the cover.

<sup>27</sup> See below, p. 00, “Letters between Boncompagni and Angelo Genocchi”.

<sup>28</sup> There was some doubt in the twentieth century about 5 of the letters being from Mérimée. In 2026 the Foudazione was uncertain of where these 5 letters were.

**Concordance: Narducci 1862 and Narducci 1892 Numbers**

In this list the first number is the number of the manuscript in the 1862 catalogue; the second is the manuscript's number in the 1892 catalogue. In the main list above the 1862 number is set in parentheses and follows the 1892 number.

### Concordance: Albani Manuscripts and Narducci 1892 Numbers

In this list the first number is the manuscript's number in the former Albani collection (parts of which were sold at various times between 1864 and 1928) and the second is the manuscript's number in the 1892 catalogue.

Note: The numbering of the Albani manuscripts seems to have changed over time. Many of the Boncompagni volumes from that collection seem to have had a different Albani number than the one recorded by Narducci. It is always necessary to check the contents and not depend on the Albani number alone.

|               |                |           |              |                |

| 86 = 13       | 219 = 334      | 348 = 361 | 619 = 64-66  |                |
| 93 = 40       | 244 = 144      | 353 = 44  | 620 = 339    | 917 = 308      |
|               | 255 = 241      | 368 = 53  | 631 = 68     | 918 = 271      |
| 106 = 146     | 256 = 236      |           | 638 = 275    | 933 = 238, 239 |
| 116 = 125     | 264 = 259      | 414 = 34  | 670 = 59     | 959 = 240      |
| 118 = 341     | 265 = 228, 229 | 430 = 527 | 693 = 49     | 986 = 580      |
| 119 = 180     | 267 = 237      | 436 = 74  | 694 = 153    |                |
| 130 = 263     | 268 = 235      |           |              | (olim)         |
| 134 = 58      | 273 = 83       | 511 = 31  | 706 = 81     | 930 = 527      |
| 142 = 223     | 274 = 11, 12   | 528 = 220 | 720 = 245    |                |
| 143 = 210     | 275 = 218      | 535 = 279 | 735 = 370    | ? = 231        |
| 145 = 272     |                | 536 = 212 |              |                |

### Concordance: Pietro Girometti Manuscripts and Narducci 1892 Numbers

In 1856 Boncompagni purchased 34 items from the collection of Pietro Girometti, the Italian artist (1811-1859).

In this list the first number is the manuscript's number in the Girometti collection and the second is the manuscript's number in the 1892 catalogue.

|         |          |          |          |                |
|---------|----------|----------|----------|----------------|
| 1 = 221 | 8 = 101  | 16 = 356 | 22 = 332 | 32 = 217       |
| 2 = 319 | 9 = 80   | 16 = 155 | 23 = 313 | 33 = 310       |
| 3 = 243 | 10 = 2   | 18 = 254 | 24 = 248 | 34 = 216       |
| 4 = 317 | 11 = 274 | 18 = 349 | 25 = 122 | 35 = 169       |
| 5 = 266 | 12 = 231 | 19 = 329 | 26 = 288 | 36 = 321       |
| 6 = 347 | 13 = 82  | 20 = 273 | 28 = 189 |                |
| 7 = 330 | 14 = 344 | 21 = 307 | 31 = 52  | catalogue = 22 |

“34” (= 216) is given as “134”.

NOTE: One of the items cited as “16” is probably number “15”, and one of the items cited as “18” is probably number “17”. (In the 1862 catalogue, mss 356 (306) and 155 (49) are both identified as Girometti 16; ms 349 (357) is identified as Girometti 18; but ms 254 (277) is not identified as a Girometti ms.)

**Concordance: Halliwell Manuscripts and Narducci 1892 Numbers**

In this list the first number is the manuscript's number in the former James Orchard Halliwell (1820-1889) collection and the second is the manuscript's number in the 1892 catalogue.

|          |           |           |            |
|----------|-----------|-----------|------------|
| 11 = 47  | 98 = 200  | 104 = 292 | s.n. = 111 |
| 20 = 171 | 101 = 351 | 145 = 185 | s.n. = 149 |
| 38 = 286 | 102 = 352 | 165 = 353 |            |
| 52 = 157 | 103 = 207 | 192 = 120 |            |

### **Boncompagni Papers in the Huntington Library, San Marino, California**

As part of the papers from the Dibner Institute now in the Huntington Library in San Marino, California, there exist two boxes of material from the Boncompagni estate. These papers consist of 38 folders (or cahiers) containing various notes, telegrams, letters, etc., sometimes sewn into "pamphlets." These items have numbers on them, but as yet it is not clear what these numbers refer to.

The notes themselves seem to describe manuscripts not in his collection but which Boncompagni was interested in. One folder, for instance, contains notes about a manuscript in the Ambrosiana Library in Milan. These may simply be research notes, or they may represent information about manuscripts of which Boncompagni had copies made for his own use, that is, one of the manuscripts numbered 502-1223 in the 1898 sale catalogue and which are now housed in Stockholm in the Universiteitsbibliothek.

There is a hand-written detailed inventory, by no means complete, of all the cahiers.

The boxes at the Huntington library should be considered as similar to the Boncompagni material in Trinity College, Dublin, and at Cornell University, described above by Menso Folkerts and in *Historia Mathematica*. The library currently has no information on how these papers became part of the Burndy collection.

Reference:

San Marino, CA, Huntington Library, Burndy Collection, Boncompagni Papers

Box 1: folders 152-165

Box 2: folders 172-176, 179, 182-184, 186-190, 192-195, 213

### **Boncompagni Papers in the Library of Trinity College, Dublin**

During the summer of 2018, an intern at Trinity College Library in Dublin made a start at analyzing the material presented to the library in 1909 by J. H. Reddan. This material is housed under the shelf-mark MS 2943 and consists of 129 boxes:

Boxes 1-115: materials classified by Boncompagni

Boxes 116-121: materials classified by year

Boxes 122-128: miscellaneous materials

The contents generally include specimen facsimiles made for Boncompagni of mathematical manuscripts and of title pages of printed books kept in international libraries; correspondence with librarians; extracts, notes etc. The cahiers have been arranged in order according to Boncompagni's own numbering and, from where that stops, in order of date. Gaps in the numbering, which runs to MXII, indicate that this is only part of the collection. (Reddan estimated that there were between 60,000 and 80,000 cahiers on auction in 1898, of which he purchased and donated only a portion.)

The intern was able to catalogue in detail only the first 10 boxes; this catalogue is available on-line at the Library's web-site. There is a list of Boncompagni's numbers and a more detailed rough-list of the contents of the unnumbered cahiers.

“Presented by J.H. Reddan who bought the collection in Rome; the papers arrived in summer 1909 (see TCD Misc Autograph 92: letter from J.H. Reddan to Dr T.K. Abbot, librarian, TCD, offering ‘some 60,000 to 80,000 Cahiers’ from the Boncompagni sale to TCD Library, although it turns out that Reddan bought and donated only a portion of this total).

“Boncompagni's collection was sold in Rome in 1898 in 14,944 lots, described in 6 printed catalogues. The collection is now widely dispersed: Trinity College Dublin; Vatican Library, Rome; Olin Library at Cornell University, New York; University Library, Stockholm; Huntington Library, San Marino, California (part of the Dibner Institute papers).”

### Letters between Boncompagni and Angelo Genocchi

Giorgio Isreal has discussed, in a 1990 article<sup>29</sup> a collection of letters from Baldassarre Boncompagni to the Italian mathematician, Angelo Genocchi (1817-1889), and vice versa, from April 1855 to November 1861. The letters are bound in a file (“very inconvenient and irrational,” according to Isreal) entitled “B. Boncompagni e A. Genocchi – Corrispondenza scientifica – 1855-61” in the library of the Dipartimento di Matematica, Università degli Studi “La Sapienza,” in Rome. The collection consists of 105 letters from Boncompagni to Genocchi and 123 from Genocchi to Boncompagni. They are not in chronological order, but the pages are numbered from 1 to 1192.

The 105 letters from Boncompagni to Genocchi are a match to the entry in Narducci’s 1892 catalogue, no. 604 (item 1) – 101 letters from 7 April 1855 to 11 November 1861, which are the first and last of the Genocchi to Boncompagni letters listed by Isreal. The difference of 4 letters may have been a mis-counting by Narducci.

The 123 Genocchi to Boncompagni letters match the entry in the 1892 catalogue, no. 604 (item 2) – 123 letters from 2 April 1855 to 20 November 1861, also the first and last of the Genocchi to Boncompagni letters listed by Isreal.

In Isreal’s article he lists, in chronological order, the sender/receiver and place of writing of each letter, as well as its date and its page numbers in the collection.

This folder also contains two texts, comments by Genocchi on one of Boncompagni’s 1854 publications – “Tri scritti inediti di Leonardo Pisano ... secondo la lezione di un codice della Biblioteca Ambrosiana di Milano”. The first of these (pages 1129-1132) is Narducci 604 (item 3), and the second (pages 1145-1192) is Narducci 604 (item 4).

---
